

A choice of excellence for leading hotels.

Hotel bell from 1913

It all began with the need to make hotels more comfortable. The first hotel bell opened completely new horizons for the hotel business in terms of service and the definition of luxury.

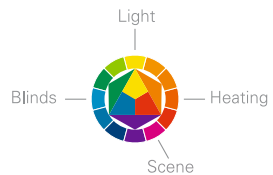

The ABB Group, a truly international manufacturer, has united its expertise in all things relating to electrical installation under the Busch-Jaeger brand. For more than 125 years now, Busch-Jaeger has been developing and manufacturing products that have become market leaders in Germany, both in terms of technology and visual appearance.

We supply and support our customers in more than 60 countries around the world.

Busch-priOn® for hotel rooms

The successful combination of design, innovation and technology blends perfectly into contemporary interior design. Lighting scenarios can be called up easily and conveniently. Whether in the morning or the evening: new worlds open up at the touch of a button. In addition, the patented colour wire system distinguishes itself thanks to its intuitive operation.

The future of history.

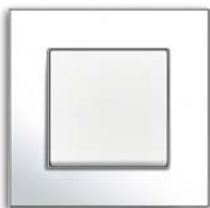

Busch-ComfortTouch®

Today's customer is more demanding than ever: this is particularly true of guests in serviced flats and representative hotel suites. Safety, comfort and entertainment are the top priorities here. At the same time, the technology used should guarantee easy and safe handling. The new ComfortTech offers an optimal solution with an outstanding combination of infotainment and safety devices. Be it lighting, air conditioning, room functions, music or security cameras: ComfortTouch takes care of all these areas. And with its award-winning design in glass black or white, it ensures harmonious integration into any high-quality surroundings.

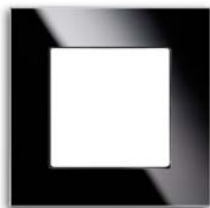

Tomorrow's aspirations. Delivered today.

carat® stainless steel

Each Busch-Jaeger product series is as individual as each individual hotel. Materials, shapes and colours can be combined in a variety of ways in all series. Genuine materials such as glass, gold, stainless steel and bronze reveal an understatement that your guests will not fail to appreciate.

Individual personality for buildings.

KNX sensor ECO Mode

Hotel-specific function can be realised in many different ways thanks to Busch-Jaeger products. The KNX building system technology makes the advantages of a "green" hotel palpable for guests: energy savings at the touch of a button. In combination with the Busch-Jaeger switch selection, the latest safety devices from our cooperation partner Miditec such as the online locking system ensure increased safety and contribute to energy savings.

Unique perfection.

Hotel Adlon Kempinski, Berlin

The high-tech steel surface doesn't just make guests feel good. It has been refined so that no lasting fingerprints can spoil the appearance of the switch and thus upset the housekeeper's sense of order.

Many demands. Exclusive perfection.

In the business arena, the Busch-Jaeger control panel provides access to all critical building functions quickly and easily. The internationally-recognised KNX communication standard makes this possible. With this technology, light and blind control, control of the screen for presentations, the sound system, service functions such as service call, and even your air conditioning control can be combined, thus ensuring a professional environment for important business meetings.

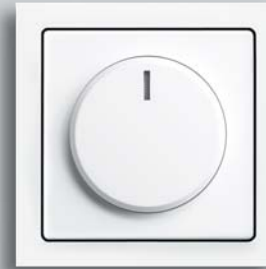

Ideal environment for meetings.

The **future**[®] concept

Qasr Al Sharq, Jeddah, Saudi Arabia

The Hilton Palace Hotel Qasr Al Sharq ("oriental palace"), which opened in May 2006 in Jeddah, is a luxury palace hotel with 46 suites. This facility, managed by Hilton, is located in the Northern Corniche of Jeddah, close to an existing Hilton Hotel which has 414 rooms. Designed according to oriental architectural models, the nine-story triangular granite building of the Qasr Al Sharq faces directly towards the Red Sea.

Grand Hotel Kempinski Geneva

Thanks to its location directly on the banks of Lake Geneva, this hotel offers a unique view of the scenery between Lake Geneva, Jet d'Eau and the Alps, including Montblanc. The colours of the lake are also reflected in the hotel's 423 rooms and suites, which offer the greatest possible comfort. This comfort is also expressed through the Busch-Jaeger technology with which the entire hotel was equipped.
