

ORION 20 LED

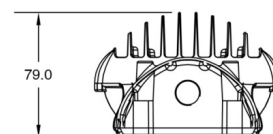

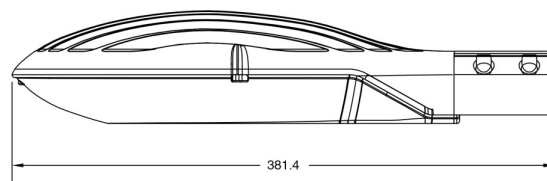

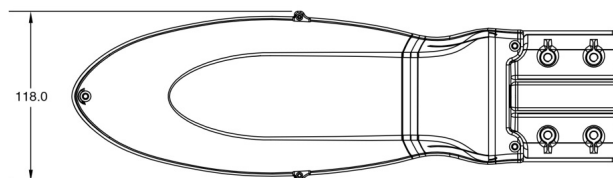

APPLICATION

A versatile LED fixture suited to many outdoor applications where energy and maintenance costs need to be controlled. The contemporary form and compact design of the ORION 20 sets a new benchmark in LED lighting. Integrating an energy efficient LED module and driver with an optical system; the ORION 20 from Sylvania provides uniform illumination from low to medium height poles or wall mounted positions. Featuring a functional aluminium housing and moulded polycarbonate lens, sealed to IP65 and designed to operate in above average temperatures and exposed environments.

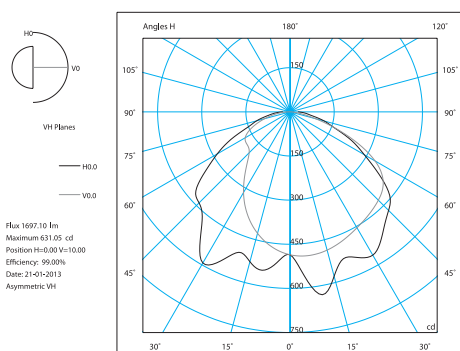

LUMINAIRE CONSTRUCTION

- Pressure die-cast aluminium body with contoured design to shed dirt
- Epoxy powdercoated paint finish over a phosphochromate treatment for corrosion resistance
- Precision moulded clear polycarbonate lens with prismatic control optics
- Stainless steel exposed fasteners with lock nuts for extra security
- One piece moulded silicone seal provides IP65 weather protection
- Secure light weight driver and LED module resists vibration

FEATURES

- Sylvania quality LED system rated to 50,000 hours life at L70
- Designed to operate in ambient temperatures up to +50°C
- White light LEDs at 6000K and CRI 80 provide higher visual performance over traditional sodium lamps
- Total system power of only 20W provides an energy efficient 1700 luminaire lumens
- Integral mounting socket accepts diameter 34 to 45mm standard spigots or poles
- Can be surface mounted using the optional wall bracket
- Includes a 3000 mm heavy duty supply cable attached for quick and easy installation
