

Living Space[®]

Intelligent home control for individual living spaces
with **Busch-priOn** and **Busch-ComfortTouch**.

Security meets

Inspiration

Inspiration

Security is a basic requirement for every living space and a natural prerequisite for developing quality of life. The intelligent home control offered by Busch-Jaeger greatly exceeds the personal basic need for security and is inspiring with its innovative solutions. There are, for instance, completely new ways of expression in staging and controlling individual living spaces. Residents become designers, thus realising their own claim for security, comfort and energy efficiency.

Living Space®

Intelligence creates free space and revives your home anew every day. The new generation of Busch-Jaeger home control anticipates and flexibly responds to various requirements. No matter whether it is about improving energy efficiency or individual comfort or sense of well-being. The innovative operating concepts make it possible to intuitively create a completely new culture of experience and the house is presented in a very personal light.

Intelligence meets

Comfort

Comfort

A modern kitchen interior featuring a dark countertop, wooden cabinets, and a large window. The scene is brightly lit, with sunlight streaming in from the window. A bar stool is visible near the window. The text "Function meets Emotion." is overlaid on the image.

Function meets

Emotion.

Emotion

When everything works exactly as planned, room for emotions is created. The intelligent Busch-Jaeger home control reduces complexity, thus creating something completely new: the experience of highest level privacy. Exclusive design is one thing – inner values are another. They provide a high degree of flexibility and

automatically create a suitable atmosphere: a composition of lighting, warmth and sound that always matches the respective mood or individual requirements of the respective rooms or the entire home.

Living Space®

Living spaces change and rooms redefine themselves. Bathrooms become wellness oases, kitchens turn into communication isles and living rooms are furnished to suit your personal experience culture. The new generation of Busch-Jaeger home control systems adjusts to changing habits and combines comprehensive home control with useful information and entertainment functions. In the process, Busch-Jaeger sets new category standards in terms of functionality and ease of operation. For, with the intelligent central control unit, one can intuitively control one's personal living space. Thus, everyday life becomes a personal experience. Central, networked and intriguingly simple.

A modern, minimalist bathroom with large windows in the background. The room features a dark floor, a white bathtub, and a vanity with two sinks. A dark wooden cabinet is in the foreground on the left, and a dark wooden bench is in the background. The text "Benefit meets" is overlaid in blue, and "Impression." is overlaid in a large, light gray, italicized font.

Benefit meets

Impression.

Discover the freedom of intelligent
home control for your individual living comfort.

Busch-*priOn*

As diverse as life itself.

Busch-*priOn* fills the house with life every day.

The variety of its functions opens individual scope for design. Lighting, climate and sound can be individually switched or designed to become living scenes from a central point of control.

It is good that the home control flexibly adjusts to varying requirements in terms of functionality and design. It is even better, when this leads to the creation of individual living spaces.

BUSCH-JAEGER

Busch-*priOn*

The colours of intuition.

Simplicity and ease of use always have top priority in operation. For the user interface of its intelligent home control, Busch-Jaeger has developed a completely new and unique colour concept. Every comfort area has been assigned a special colour following a simple logic:

- Light control is yellow, like the sun
- Functions of the blinds are blue, like the sky
- Climate functions are orange, representing warmth
- Living scenes are magenta, representing an awareness of life

Defined living scenes are magenta, and are additionally differentiated by short descriptions, e.g., wellness, dining room table, TV evening and the like.

Busch-*priOn*

Central control.

Habits often make everyday life easier. By a synthesis of traditional switching and intuitive menu control, Busch-*priOn* creates new freedom of design. All functions can be accessed by simple turns, each room can be rapidly and efficiently controlled and monitored. At the same time, the 3.5" TFT display shows all information clearly arranged and in colour. Busch-*priOn* is available in four design variants, thus matching individual lifestyles. Individual functions like lighting scenes, blinds or lamps are directly controlled via three freely programmable compensators. In combination with the unique colour system, the definition of private living spaces is effected in an innovative way.

Intuitive operation

Timeless design for every room

Focus on what is essential

Variety that satisfies every style

Modularity for all applications

Everything under control with a single turn.

Scene

Individual lamps can be controlled and dimmed directly via menu prompting.

Blinds can also be set to respond to the time control or individual requirements.

A comfortable climate can be created using temperature control for individual rooms.

And – in line with your personal habits – complete environments can be staged to form your individual ambience.

Busch-*ComfortTouch* **Every day an individual experience.**

Infotainment | Entertainment | Home control

Individuality needs freedom to stage preferences, habits, moods and feelings of well-being. For exacting residents, Busch-*ComfortTouch* opens not only functional, but also particularly experience-oriented, opportunities of organising and designing their environment. As a central control unit, the Busch-*ComfortTouch* complements the use and free-moving space of multimedia-based communication, and consistently broadens the horizon in the areas of entertainment, infotainment and intelligent home control with new functions.

Busch-*ComfortTouch*

The new form of individuality.

Busch-*ComfortTouch* manages to offer a comprehensive entertainment programme taking up only little space. In addition, the central switching device is a very personal communication centre that can read and write e-mails and memos and that is savvy in the area of infotainment – from stock prices to weather forecasts. In parallel, the current energy consumption is visualised via monitoring, and even the missed concert can be directly viewed and enjoyed as a recording. And this is only the beginning.

Orientation in colour.

Busch-*ComfortTouch* also integrates the unique colour system, assigning each comfort zone its own colour.

Pure design for highest requirements

Comfort in a new dimension

Efficient home control down to the smallest detail

Free spaces for individual requirements

Everything directly under control

Efficiency meets

Energy.

Energy

Programmed to efficiency by nature.

Energy is a precious commodity, and handling it economically lies in the responsibility of our society. The new generation of home control by Busch-Jaeger is consequently designed to be efficient. On the one hand, the environment is spared and relieved, on the other hand, money

can be saved along the way. Lowering the room temperature by 1°C can achieve energy savings of up to 6%. Nobody, however, has to do without the pleasant and familiar feeling of comfort, because all rooms can be regulated via individual room control.

If desired, everything can also be done automatically. The decision in favour of a modern home control made by Busch-Jaeger increases the energy efficiency of a house, while at the same time meeting the individual warmth requirements of its residents.

Advantages of single-room control

Additional power savings

Increasing personal comfort

Individualised climate of well-being

Optimised energy efficiency

Busch-priOn

Personality needs individuality – in colour, material and design.
