

The fascination of contrasts.
Light switch.

Light switches by ABB / Busch-Jaeger.

Living space needs light. Light needs light switches. A simple and thoroughly enlightening idea during designing. Because the light switch is quite often the only element on the wall. It is an element that constantly catches the eye. That is why, aside from its function, it should also meet aesthetic requirements. And here ABB / Busch-Jaeger light switches set the standard, because they place each one's personal style into the right light.

Wherever atmosphere is to be created,
it is the detail that counts.

carat®/carat® flat. The clear commitment to high-quality design. It combines straight lines and authentic material to make it a unique object. And the switch takes on an equivalent position within representative architecture.

Pure and sensual.
Extravagant and noble.

Trend with tradition.
Porcelain switch.

Decento®. Authentic aesthetics for classical architecture. The light switches and socket outlets made of porcelain captivate with their round shape. Together nostalgic charm and modern technology have found their place. The retro-look accentuates the small rockers on the light switches as well as the permanently visible screws. All components in this range are available in studio white.

Yesterday vanguard.
Today classics.

pure stainless steel. Beautiful. When the unusual attains its objective with such style. And no wonder. Stainless steel stands for one hundred percent. For absolute quality. Because design and material of this switch series possess the same characteristics. Durability. Consistency. Conciseness. In this way aesthetics, function and durability are fused into one perfect unit.

Outstanding and noble.

impuls. In the contrast between light and dark, colours and forms become particularly prominent. impulse unites these impressions into extraordinary design and innovative technology with harmonious light aura. What is particularly fascinating here is the the contrast between clear lines and the elegance of the circle. Even in the dark this switch convinces - discreet continuous light provides orientation. The additional Softtouch colours of studio white matt and black matt set impulses.

Well-balanced forms with accentuated aura of light.

solo®. Distinctive character is often seen in subtleties. In details. In uniqueness. That is also the case with design. This shade of difference connoisseurs find in the solo® switch series. It is just that touch different. Its essence is totally straightforward. An inherent ideal of beauty - rich in contrast of form and colour. Something exceptional.

Design above the norm.

Germany

Busch-axcent®/Busch-axcent® flat. Consistent straight-lined design meets harmony of colours. Living, contrast-rich colours unite with puristic optics. The new quality of creative interior design is characterized by the modern language of colour from leading architects and interior designers. Two exciting possibilities to implement individual style also in the selection of light switches.

Modern accents. In color and design.

Reflex SI / Reflex SI Linear. This is a phenomenon known from landscapes. Light talks to them. And the environment responds with reflections. Fascinating. And in similar fashion do the colours and forms of the switch series Reflex SI / Reflex SI Linear communicate with homely living environment. And here the two design lines - gently rounded and functionally square - impress with their perennially modern reserve.

Classic beautiful forms.

It's easy!
- switching.

Switches can be much more than merely an On-Off button. They can be used to regulate the feeling of well-being in almost all areas. Whether light or blinds, digital radio or room temperature. ABB / Busch-Jaeger offers all options. And in a large variety of versions. Manually or via sensor. With switchable stages or with dimmers. Solo or automatic. No matter where or how – this kind of switching cares for effortlessness in the living environment.

A different kind of switching.
Ideas to make life safer
and more pleasant.

Busch-Comfort switch¹

2gang combination switch/socket outlet
with shutter. Switch series Busch-axcent.
Colour: studio white.

Busch-Comfort switch¹

The switch with four comfort levels

Basic comfort: Switch in the normal way.
Medium comfort: automatic on-, but manual switch-off - sometimes less is more.

Timing comfort: Switch on manually, but automatic switch-off - you determine the timing.

Maximum comfort: Never switch by hand again.

Busch-Memory 2gang Dimmer¹

Two dimmers in one

Dims two lights independently at the press of a button. The orientation light on the dimmer makes it easy to find in the dark.

Busch-Watchdog 180 FM comfort sensor II¹

Automatically in the right light

Responds to motion and automatically switches on the light. When leaving the detection range the light switches off automatically.

KNX Control element 2fold²

Centralised, convenient operation and display

Supplies a multitude of information around the house and includes the control option, which otherwise would only be available with a second switch.

¹ Available for all switch programs (except impuls).

² For ABB i-bus® KNX
