1 to 3 module cover frames for 3 module or 4"×2" box vertical installation habits (American)
09 Frame blank for 3 modules box
10 Frame 1 module vertical for 3 modules box
11 Frame 1 module for 3 modules box
12 Frame 1 + 1 modules for 3 modules box
13 Frame 2 modules for 3 modules box
14 Frame 3 modules in 3 modules box

1 to 7 module cover frames for 3, 4 and 7 module box horizontal installation habit (Italian)
15 Frame 1 module for 3 modules box
16 Frame 1 + 1 modules for 3 modules box
17 Frame 2 modules for 3 modules box
18 Frame 3 modules in 3 modules box
19 Frame 4 modules for 4 modules box
20 Frame 7 modules in 7 modules box

3+3 module cover frames for 4"×4" box installation habit (American and Eastern Asia)
21 Frame blank for 4"×4" box
22 Frame 1 + 1 modules for 4"×4" box
23 Frame 2 + 2 modules for 4"×4" box
24 Frame 1 + 1 + 1 + 1 modules for 4"×4" box
25 Frame 3 + 3 modules for 4"×4" box

Frames for 3 modules in BS 3"×3" square box
26 Frame 1-gang / 3 modules for square box

Notes

Mylos®

The system
in harmony
with the world

END OF LIFE

Mylos®

The system in harmony with the world

Italian design with high quality materials. Even in the smallest of details, functionality marries appearance. Ultra-thin square frames. Three different finishes of Mylos to choose from: Velvet, Lucent and Etik, granted with the Silver A' Design Award and the Good Design Award for Product Design because of its simplicity and elegance. The use of biopolymer gives it a unique design aesthetic with no compromises on the sustainability of the whole lifecycle. Your house is your world. And your world reflects you. Express yourself with Mylos.

Velvet finishes
1 white
2 black
3 cold grey
4 graphite
5 anthracite

Lucent finishes
6 white alabaster
7 brilliant black
8 ice

Etik finishes
9 matt black
10 matt white

END OF LIFE

Mylos®
Selected functions

Control devices
Maximum flexibility in the selection of switches, push switches, two-way switches, intermediate switches, relays and change-over switches. The most common control devices are available in screwless versions, reducing installation times even further. All the conventional control devices, except for relays and change-over switches, can be lit. Switches are available with an incorporated LED to enable all types of functional indication.

Socket outlets
The versions with 2P+E 10-16A socket outlets for 250V lines are available in the Italian and German standards, with safety shutters and side/central earth. For telephone and data transmission applications various types of connectors compatible with the most widespread international wiring standards are available.

Key covers
The key covers in 1 module or 1/2 module versions allow conventional switches to be customised as desired.

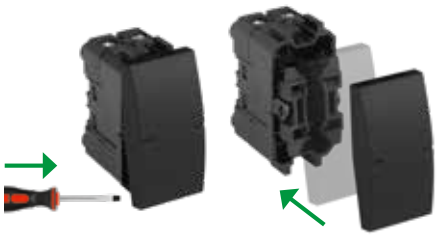
Protection devices
These devices intervene in the event of overloads, short circuits and other phenomena that involve a risk for the safety of persons and which compromise proper operation of connected appliances, performing their protection function directly downstream without impacting the power supply to other points in the electrical installation.

END OF LIFE

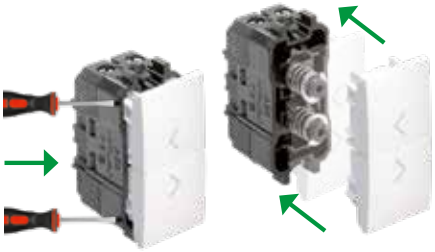
Mylos®
Selected functions

Signalling devices
Warning lights to display the operating status of connected appliances, as well as bells and buzzers. The warning lights are supplied with an incorporated 230V LED, which can be replaced for use under different voltages, if necessary.

Comfort devices
To optimize the operation of electrical appliances and increase the liveability of environments, the range includes devices for programming, adjustment and timing such as time-programmed thermostats, electronic thermostats and dimmers. IR presence detectors and receivers for remote controls complete the product range to guarantee the maximum level of comfort. Removable anti-blackout lights and emergency lights are available with ample operating autonomy.



Home and building automation
Mylos represents also a simple and immediate solution to best meet the needs of both residential and building applications. Mylos free@home® and Mylos KNX are, respectively, the home and building automation systems which are perfectly integrated into Mylos aesthetic and functionalities. Both the ranges includes thermostats, rocker switches, actuators, blind actuators and dimmers.



Access Control for hospitality
Based on transponder technology, and exploiting their flexibility and security, ABB's solution for access control is fully compatible with the KNX-standard Home & Building Automation System. The access control system, perfectly integrated into Mylos conventional wiring accessories range, is particularly suitable for hotel applications and allows construction of flexible systems with advanced functions to optimize the services provided to hotel guests.

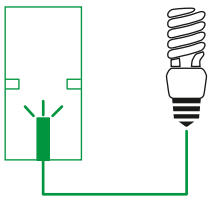
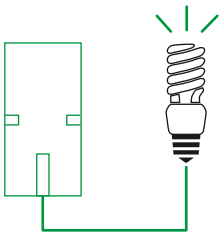
Key cover composition on 2CSY1027MY

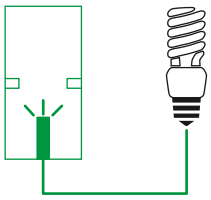
LED illumination.



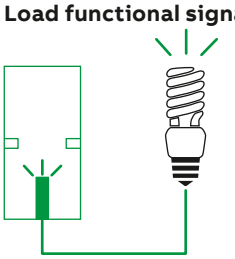


Plug-in LED illumination.
Conventional switches are lit by plug-in LEDs. There is no need for additional wiring because once the device is fixed in place, it is already ready to light up. In this way it is possible to implement night-time location signalling in a very easy manner.

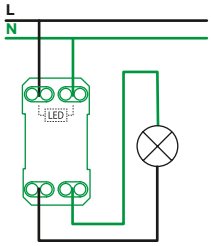
Incorporated LED illumination.
Switches with incorporated LEDs provide maximum freedom for wiring the signalling LED through the presence of dedicated terminals.



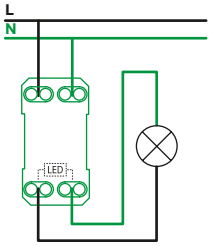
Night-time location signalling



The 2CSY1632MY and 2CSY1633MY LEDs can be added to conventional switches (see page 45) for night-time location. The LED electrically connected in parallel with the ON operating mechanism: it is lit when the load is off (OFF command), and it turns off when the load is powered (ON command).

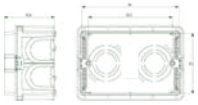


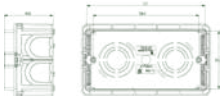
Location signalling (Always ON)

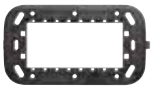


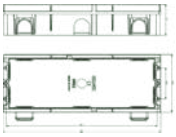
Load functional signalling

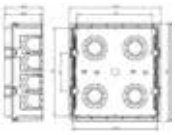
Switches with incorporated LED (see page 50) have preinstalled 250V~ LEDs and dedicated terminals for wiring. It is possible to implement any type of functional indication, also with LEDs at different voltages.











Wiring of double-pole switches 2CSY1006MC/S for Always ON signalling. The LED is built in.

Wiring of double-pole switches 2CSY1006FC/S for load functional indication. The LED is built in.

Chiara
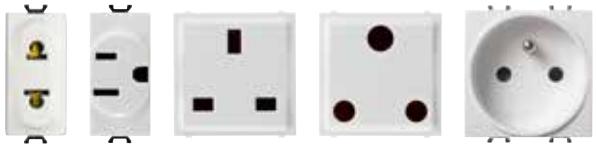
Selected functions



Command devices.
Circuit-breakers, push-buttons, switches, inverters, relays and commutator devices in different versions for configuring functions and control points in the most flexible and suitable manner for any home or office environment. All command devices, except for relays and switches, can be illuminated.

Protection devices.
These devices trigger in case of overloads, short-circuits and other phenomena that pose a risk to the safety of people and which impair the proper functioning of connected loads; their role is a direct downstream protection without interfering with the power supply of other points of the electrical installation.

Socket outlets.
10-16A 2P+T socket outlets for 250V lines compliant with Italian and German standards, with safety shutters and side/central ground. P17/11, P30 and P30/17 socket outlets are available also in coloured version for privileged circuits. The Side innovative socket outlet is also available, combining a German standard-based and two Italian bivalent socket outlets.

The range also includes the main socket outlets based on other different standards: EUR-American and American with grounding, for 127V lines; 13A e 16A English and 2P+T French for 250V lines.

Special socket outlets
Shaver socket outlet, 2.1A USB charger and connectors for telephony applications and data transmission, available in different versions that meet the most used and advanced wiring international standards.

Signalling devices.
Warning lights to indicate the operating status of the connected devices, bells and buzzers.

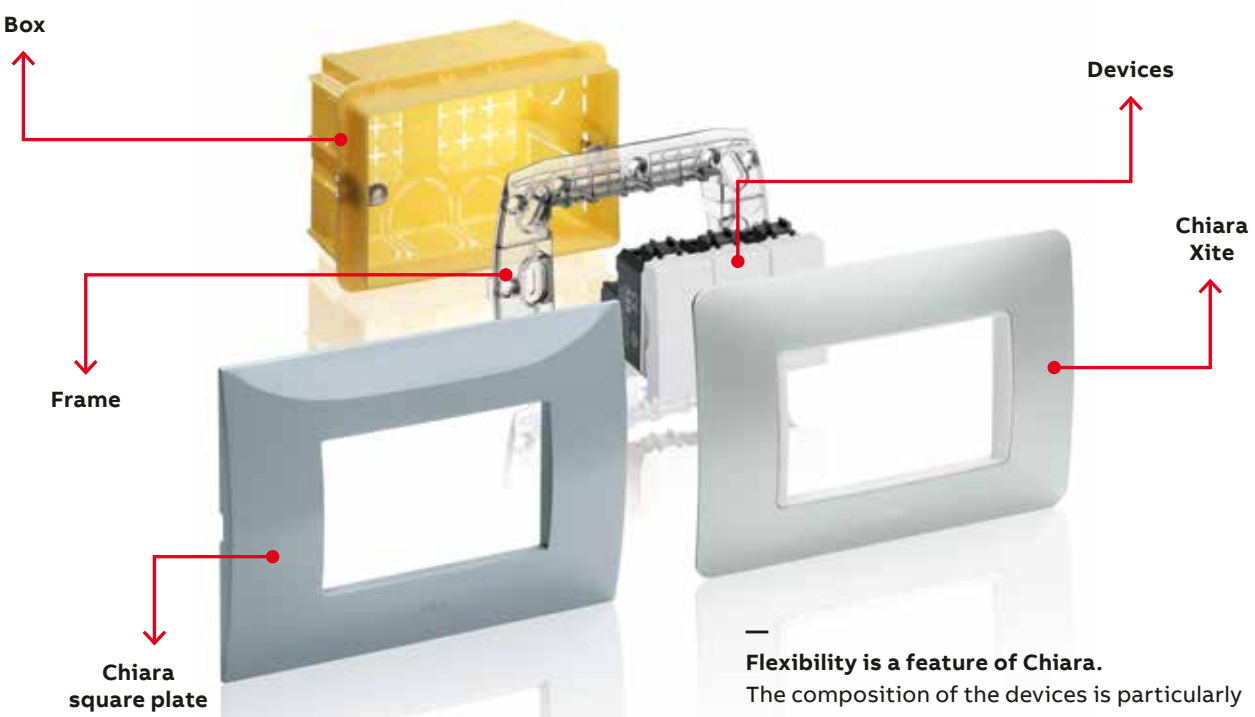
Chiara
Selected functions

—

Safety and comfort equipment.
To optimize the operation of the electrical devices and make the rooms more liveable, the range includes devices for programming, adjustment and timing, such as Chrono thermostats, electronic thermostats, dimmers and IR presence detectors with twilight threshold. Extractable anti-blackout lamps and emergency lamps are available with wide operating autonomy.

—

Components for installation.
Blank cover for unused modules and 2, 3, 4, 7 and 7+7 module mounting grids for the installation of Equipment and components inside flush-mounting round and rectangular boxes.



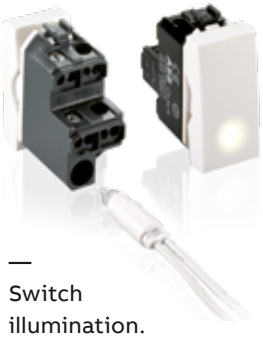
—

Other installation solutions.
Products and solutions for secure installation (IP55 covers and IP40/IP55 boxes) are available, as well as adapters for installation on DIN rail or Undernet retractable turret. The self-supporting frames are convenient and flexible solutions for any specific installation solution.

Chiara

Installation overview.

Flexibility is a feature of Chiara.
The composition of the devices is particularly simple: the mounting greed is made of semi-transparent plastic material for easy mounting in the flush-mounted boxes.
On the same mounting greed you can choose either to mount Chiara or Chiara Xite plates.



Quick installation of devices.

Specifications of screws and terminals. The composition of the devices is particularly simple: the frame is made from semi-transparent plastic material for easy mounting in the flush-mounted boxes.

- Frontal installation of the switches on the frame
- Modularity of the switches: 22 mm

Switch illumination.

Chiara

3	83.5 mm	ABB 1SL006A00
4	108 mm	ABB 00 053
7	100 mm	ABB 1SL0064A00

Note: For further information on ABB boxes for concrete walls please refer to the catalog 1SLC001001D0905 - Insulating Enclosures and Installation Materials.

Protected installation with IP55 wall-mounted enclosures.

IP40 wall-mounted enclosure

IP55 wall-mounted enclosure

No. Modules	IP40 enclosure	IP55 enclosure
1 (on 2-module enclosure)	2CSK2140CH	2CSK2155CH
2	2CSK2240CH	2CSK2255CH
3	2CSK2340CH	2CSK2355CH
4	2CSK2440CH	2CSK2455CH

The IP55 cover enclosures allow the direct assembly of devices without the aid of mounting grids.
The devices are inserted from the rear. See technical details on page 5/57. For further information on IP40/IP55 wall-mounted enclosures, please refer to the catalog 1SLC001001D0905 - Insulating Enclosures and Installation Materials.

Protected installation with IP55 cover.

IP55 wall-mounted cover

No. Modules	IP55 cover
2 (on a square or round box with screws, center distance 60mm)	2CSK3255CH
3	2CSK3355CH

Note: The IP55 covers provide a self-supporting solution that allows direct assembly of devices without the aid of mounting grids.
The devices are inserted from the rear.

Switches

Product	Article-No.	Order-No.	Pack/Qty
	**Single-pole switch** 16A - 250V~		
	2CSK1001CH	2CSK200005R1001	
	**Double-pole switch** 16A - 250V~		
	2CSK1002CH	2CSK200015R1002	
	**Single-pole switch** 16A - 250V~, 2 modules		
	2CSK1004CH	2CSK200025R1004	
	**Double-pole switch** 16A - 250V~, with key control		
	2CSK1006CH	2CSK215740R1006	
	**Double-pole switch** 16A - 250V~, with universal key control		
	2CSK1006CHU	2CSK221395R1006	

Note: The lightable control devices are supplied without lamp

Two-way switches

Product	Article-No.	Order-No.	Pack/Qty
	**Single-pole two-way switch** 16A - 250V~		
	2CSK1003CH	2CSK200035R1003	
	**Single-pole two-way switch** 16A - 250V~, 2 modules		
	2CSK1007CH	2CSK200045R1007	

Intermediate switches

	**Intermediate switch** 16A - 250V~		
	2CSK1010CH	2CSK200055R1010	
	**Intermediate switch** 16A - 250V~, 2 modules		
	2CSK1008CH	2CSK200065R1008	

Change-over switch

	**Change-over switch** 10A - 250V~, 3 positions, with central OFF		
	2CSK1011CH	2CSK200075R1011	

Relays

	**Single-pole relay with 230V~ coil** 10A output contact		
	2CSK1012CH	2CSK200255R1012	
	**4 sequence change-over switch relay** with 230V~ coil, 2 10A output contacts		
	2CSK1014CH	2CSK200265R1014

Time-programmed thermostats and thermostats

Product	Article-No.	Order-No.	Pack/Qty
	**Summer/winter electronic time-programmed thermostat with 4 temperature levels** relay output, 1 NO/NC change-over contact 8A (AC1)/2A (AC15) - Power supply 230V~ 50/60Hz		
	2CSK2201CH	2CSK200765R2201	
	**Summer/winter electronic thermostat** relay output, 1 NO contact 8A (AC1)/2A (AC15) - Power supply 230V~ 50/60Hz		
	2CSK1202CH	2CSK200755R1202	

Dimmer

	**Electronic dimmer** with rotary control for resistive loads 100-500W, 230V~ 50/60Hz		
	2CSK1205CH	2CSK200715R1205	
	**Electronic dimmer** with rotary control and with two-way switch for resistive loads 100-500W, 230V~ - 50/60Hz		
	2CSK1204CH	2CSK200735R1204	
	**Electronic dimmer** with pushbutton control for resistive and inductive loads 60-500W, (60-500VA) 230V~ - 50/60Hz		
	2CSK1207CH	2CSK200725R1207	

Chiara – Safety and comfort devices

Gas detectors

Product	Article-No.	Order-No.	Pack/Qty
	**Electronic natural gas detector** with acoustic and light signal, relay output, 1 NO/NC change-over contact 6A (AC1)/2A (AC15) - 250V~. Power supply 230V~ - 50Hz. Equipped with dedicated frame for installation on type 503 box		
	2CSK1210CH	2CSK225295R1210	
	**Electronic LPG gas detector** with acoustic and light signal, relay output, 1 NO/NC change-over contact 6A (AC1)/2A (AC15) - 250V~. Power supply 230V~ - 50Hz. Equipped with dedicated frame for installation on type 503 box		
	2CSK1211CH	2CSK225305R1211	

Emergency lighting

	**Removable anti-blackout light, 230V~** Charge reserve 4.5 h and recharge time 10-20h. To be combined with 230V~ socket outlets; particularly recommended for codes 2CSK1108CH and 2CSK1109CH		
	2CSK1214CH	2CSK203205R1214	
	**LED light for emergency lighting or steplight** Charge reserve up to 2h and recharge time 48h. Power supply 230V~ - 50/60Hz.		
	2CSK1235CH	2CSk218932R1235	
	**2-module pluggable blackout lamp** Charge reserve up to 2h and recharge time 48h. Power supply 230V~ - 50/60Hz. It turns on to enlightening areas where it is installed if a blackout occurs. The lamp can be unplugged and used as a portable torch.		
	2CSK1236CH	2CSK218782R1236	
	**Universal badge switch with location light** Relay output with NO contact 10A (AC1). Power supply 230V~ 50/60Hz		
	2CSK1426CH	2CSK223155R1426	
	**IR motion detector** with twilight sensor for control and adjustment of the operation time of lighting devices. Relay output NO 5A (AC1)/2A (AC15) - 250V~. Power supply 230V~ - 50/60Hz		
	2CSK1226CH	2CSK235321R1226

Chiara Antibacterial

The new solution for healthcare environments

Hospitals, clinics, laboratories and healthcare environments must guarantee maximum hygiene with a high level of safety and protection against bacterial growth for patients, visitors and medical staff. To enhance cleaner healthcare environments, ABB introduces Chiara Antibacterial, a sub-range of conventional wiring accessories of the Chiara switch assortment with antibacterial additive and technopolymer material (ABS/PC)

Quality within everyone’s reach

The Unno range with its colours, straight lines and its simple design brings personality to your home, while offering a unique and contemporary look.

We offer an elegant range, incorporating high technology while respecting the environment. We now know it is possible to align beauty, functionality, quality and sustainability, while placing great design within reach of all.

Unno is design

Its straight lines and simplicity provide an elegant and contemporary look; added to the colours that adapt to all the latest trends. With different side finishes, Unno is the perfect combination, bringing life to covers and switches, and ultimately, to your home.

Unno is technology

ABB's experience over the years can now be seen in the new mechanisms: manufactured using raw materials within the guidelines proposed by international environmental protection organisations such as (RoHS, IEC, INMETRO), the Unno switches are the most ideal for new energy saving light bulbs, incorporating childproofing in the 2P + T connections in all their products.

Unno is versatile

Only ABB has been able to create a range that comes with all the benefits of the highest quality, adapted to market needs in relation to both design as well as ease of installation and safety. Unno is versatility that matches your style.

Unno is versatility that matches your style.

All its uses
Maximum quality and guarantee

New mechanism design

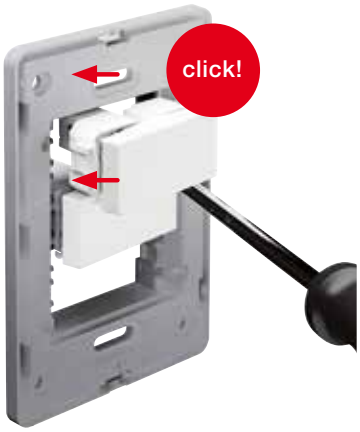
More functional and simple, allowing safer operation and preventing direct and indirect contact. 46 mm x 22 mm cover with 27 mm mechanism height.

Robust mechanism design

Contact function via indirect swaying and forced shut-off. This system offers robustness and durability, increasing its useful life.

Advanced connection

The direct contact connection system prevents the cable from moving, keeping it in place despite the temperature, movement or passing of time affecting the connection.



Safety

All the products in the Unno range come with childproofing measures ensuring everybody's safety, including children under the most adverse conditions, complying with ABNT NBR 60884-1:2004 + decree 085 regulations: 03-04-2006 and NBR 14136:2002.

Reinforced mounting

With exclusive mounting system that prevents it from becoming displaced or sunken. Manufactured from polycarbonate, a hard wearing and rigid material.

Rapid connection

Extraction and front setting mechanism. Two installation options that ensure mechanisms are perfectly aligned:
1. Mounting assembly and subsequent connection
2. Connection and subsequent mounting assembly

Visibility

White LED lighting offer higher luminosity. Energy savings.
Up to 80% longer lasting.

Large cover sizes

Allows the correction of possible imperfections when installing wall switches.

IVIE
Switch to the future.

Stylish design in three delightful colours which perfectly matches any interior. A comprehensive offer of premium modular wiring accessories provides advanced functions like dimming, USB charging, automatic switching based on movement, home automation. A clever combination of style, quality, safety and energy savings.

Different finishes and combinations:
01 Anthracite grey mechanisms in Silver plate
02 Silver mechanisms in Anthracite Grey plate
03 Anthracite grey mechanisms in White plate

Materials
Cover: thermoplastic cover (PC), impact-proof and fracture-resistant, UV-resistant, free of PVC and halogen.

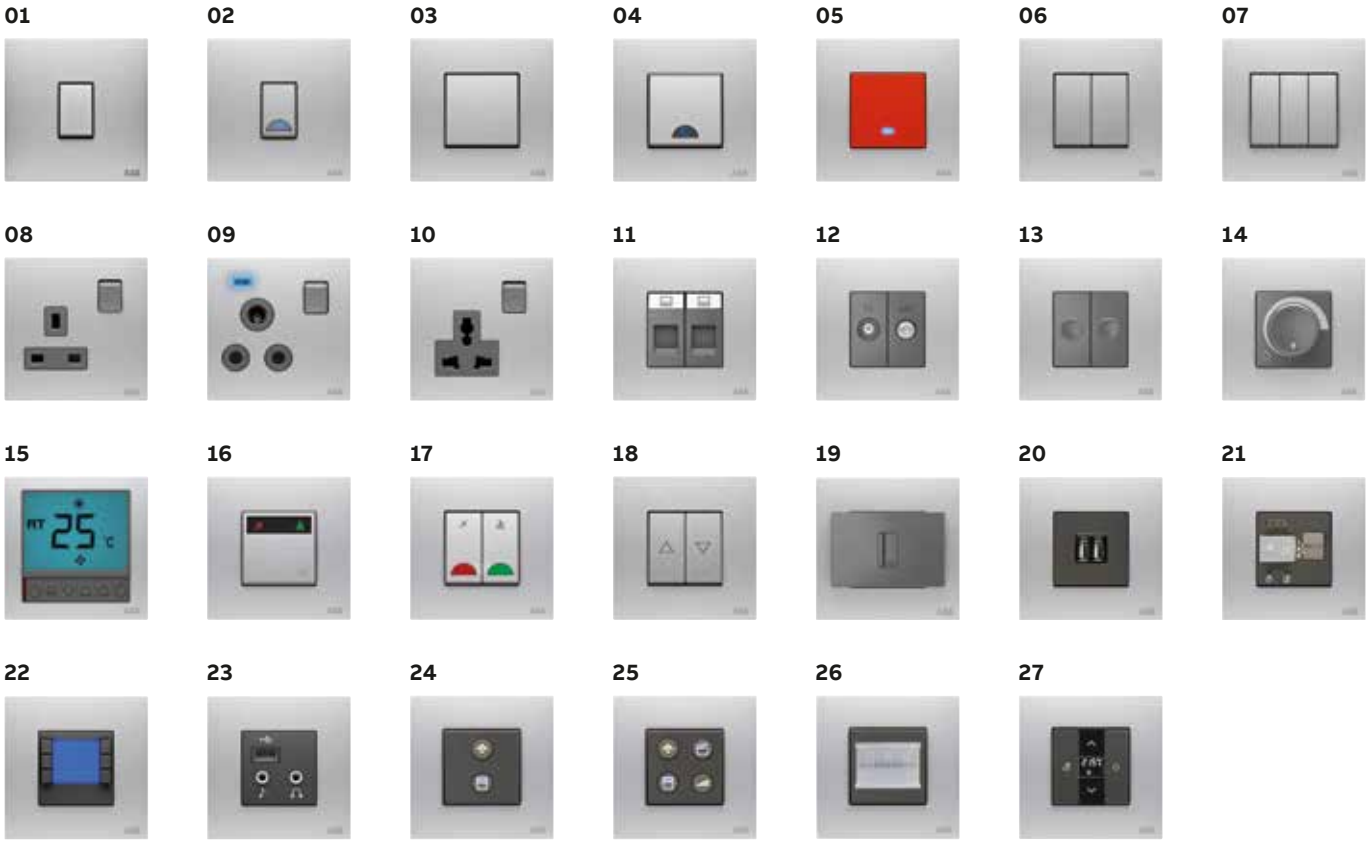
Millenium

Distinct sophistication.



Cool. Conspicuous. Clever. Striking metal light switches in square and ultra slim designs. Millenium surprises with its complexity and functional solutions designed for any interior, any building. A wide range of KNX sensors meet the highest of customer demands. Engineered to offer maximum comfort and happiness.

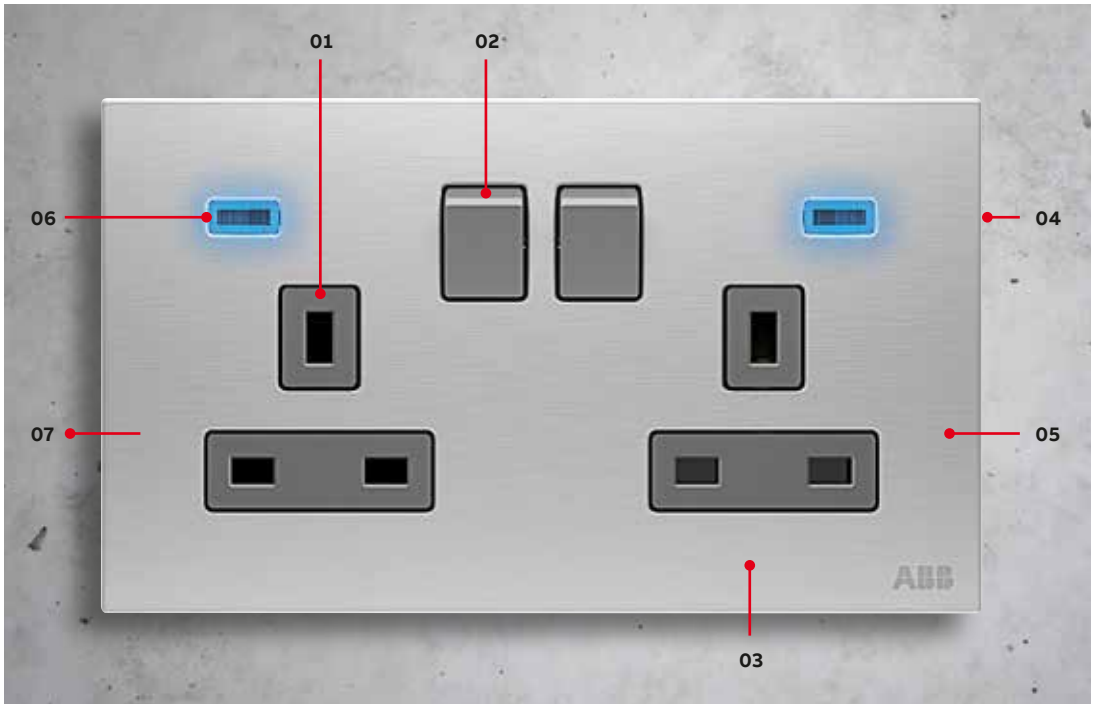
Features and benefits

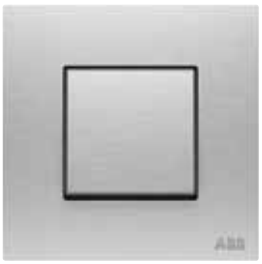
Full range of ABB i-bus® KNX, ABB-free@home® sensors, innovative, intuitive and visually elegant. Millenium gives answer to the future by providing comfort, safety, and energy saving.

Millenium collection is a grid type system enabling combination of colours and products of different dimension and functionality. The three type of switch dimensions together with the ABB i-bus® KNX, ABB-free@home® sensors and other functions, have to be composed with the required frame in order to have the right assortment of functionality and design. In ABB i-bus® KNX sensors we have the possibility to adjoin to the frame the special metal mounting plate that allows to reduce the height so as to maintain the ultra slim line for KNX functionalities.

—
Mounting Plate



—
Premium rocker switch



—
Frame

—
01 Earth Pin Child safety shutter system. Designed to inhibit access to electricity supply
—
02 Double pole switching
—
03 Four high quality finishes combinable to reach sixteen combinations in Stainless Steel material AISI 304
—
04 Styling slim-line design frontplate profile only 4 mm
—
05 Adaptable to the market wallboxes
—
06 Load indicator in blue LED. Less energy consumption, more durability and stylish signaling
—
07 Pure Stainless Steel AISI 304 with highest corrosion protection

Millenium – Complete sets (AM)

ST

ST

Millenium offers high quality complete sets. Each unique reference contains mechanism, frame and mounting plate; making easier the ordering, handling and installation. A reliable and complete collection with all functionality at first sight.
Millenium offers a wide and elegant choice of finishes in stainless steel AISI 304 material: from the Brush Stainless Steel, to the soft new touch given by the Silk Black, and the luxury of the sophisticated gold finishes, Matt Gold and Antique Gold.

ST	Stainless Steel
SB	Silk Black *
MG	Matt Gold
AG	Antique Gold
WG	White Glass
BG	Black Glass

* Silk Black not suitable to installation outdoors

Millenium - Grid system for combination (AMD)

Millenium collection is a grid type system enabling combination of colours and products of different dimension and functionality. The three type of switch dimensions together with the ABB i-bus® KNX and ABB-free@home® sensors and other functions, have to be composed with the required frame in order to have the right assortment of functionality and design. In ABB i-bus® KNX sensors we have the possibility to adjoin to the frame the special metal mounting plate that allows to reduce the height so as to maintain the ultra slim line for KNX functionalities.

Mounting Plate

Premium rocker switch

Frame

Standard rocker switch

Millenium - Grid system for combination (AMD)

Voice data & information connectors

Product	Article-No.	Order-No.	Pack/Qty
	**RJ45 Keystone, 3M & AMP system adaptor** Combined with cover plates: AMD33144-XX, AMD33244-XX, AMD33544-XX & AMD33644-XX Combination with frames: AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444		
	AMD6016	2CLA601600A1001	10
	**RJ45 Systimax system adaptor** Combined with cover plates: AMD33144-XX, AMD33244-XX, AMD33544-XX & AMD33644-XX Combination with frames: AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444		
	AMD6016.1	2CLA601610A1001	10
	**RJ45 Panduit system adaptor** Combined with cover plates: AMD33144-XX, AMD33244-XX, AMD33544-XX & AMD33644-XX Combination with frames: AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444		
	AMD6016.2	2CLA601620A1001	10
	**RJ45 R&M system adaptor** Combined with cover plates: AMD33144-XX, AMD33244-XX, AMD33544-XX & AMD33644-XX Combination with frames: AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444		
	AMD6016.3	2CLA601630A1001	10
	**Flat cover plate with shutter for RJ45 connector 1-gang** Cover plate for one data connector housing (refs.: AMD6016, AMD6016.1, AMD6016.2 and AMD6016.3) With labeling area for stickers With shutter Combination with frames: AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444		
Anthracite	**AMD33144-AN**	2CLA621630N1801	10
White	**AMD33144-WP**	2CLA621630N2001	10
	**Flat cover plate with shutter for RJ45 connector 2-gang** Cover plate for two data connector housing (refs.: AMD6016, AMD6016.1, AMD6016.2 and AMD6016.3) With labeling area for stickers With shutter Combination with frames: AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444		
Anthracite	**AMD33244-AN**	2CLA621640N1801	10
White	**AMD33244-WP**	2CLA621640N2001	10

Product	Article-No.	Order-No.	Pack/Qty
	**Inclined cover plate with shutter for RJ45 connector 1-gang** Cover plate for one data connector housing (refs.: AMD6016, AMD6016.1, AMD6016.2 and AMD6016.3) With labeling area for stickers With shutter Combination with frames: AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444		
Anthracite	**AMD33544-AN**	2CLA621670N1801	5

Millenium - Grid system for combination (AMD)

Dimmers

Product	Article-No.	Order-No.	Pack/Qty
	**LED rotatory/push dimmer - 2M** Rated voltage: 230 Vac ± 10%. Frequency: 50 Hz (Nominal power: 250 W/VA) / 60 Hz (Nominal power: 200 W/VA). Power (min./max load): - LEDi: 2 / 100 W/VA (max. 10 lamps). - Dimmable energy saving lamps: 2 / 100 W/VA (max. 10 lamps). - LV LEDi with transformer (only type L or LC): 4 / 100 W/VA (max. 10 lamps). - Incandescent lamps: 10 / 250 W/VA. - Halogen lamps: 10 / 250 W/VA. - LV halogen with transformer (only type L or LC): 10 / 250 W/VA (max. 10 lamps). 2 wire connection. Optional: auxiliary on/off with 2-way switch. Indicator LED lamp included. Back-up fuse: Electronic. Overload protection: Electronic. Ambient temperature: 0° C to +35° C. Combination with frames AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444-XX.		
Anthracite	**AMD60344-AN**	2CLA626030N1801	1
White	**AMD60344-WP**	2CLA626030N2001	1
	**Universal rotatory/push dimmer - 2M** Rated voltage: 230 Vac ; 50 Hz. Min. power: 60 W / VA. Max. power: - Incandescent: 500 W. - Halogen lamp with electronic transformer: 500 VA. - Halogen lamp with ferromagnetic transformer: 400 VA. 2 wire connection. Optional: auxiliary control with push-buttons. Indicator LED lamp included. Operating temperature: 0° C to +30° C. Combination with frames AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444-XX.		
Anthracite	**AMD60244-AN**	2CLA626020N1801	1
White	**AMD60244-WP**	2CLA626020N2001	1
	**1-10V rotary dimmer - 2M** Rated voltage: 127 - 230 Vac ; 50-60 Hz Dimmable electronic ballast/driver with 1-10V control input. Max. power: - 230 Vac: 700 VA. - 127 Vac: 350 VA. Max. 6 ballasts per device. Indicator LED lamp included. Combination with frames AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444-XX.		
Anthracite	**AMD60944-AN**	2CLA626090N1801	1

Motion sensor

Product	Article-No.	Order-No.	Pack/Qty
	**LED/Universal Rotary dimmer** Rated voltage: 250Vac / 50-60 Hz Power (min./max load): - LEDi (trailing-edge lamps): 4 / 125 W/VA. - LEDi (leading-edge lamps): 4 / 30 W/VA.* - LV LEDi with transformer type C: 4 / 125 W/VA. - LV LEDi with transformer type LC: 4 / 30 W/VA.* - LV halogen with transformer type C: 4 / 125 W/VA. - LV halogen with transformer type LC: 4 / 125 W/VA. - Incandescent lamps: 4 / 125 W/VA. - Halogen lamps: 4 / 125 W/VA. *Max. 10 lamps.		
Anthracite	**AMD60322-AN**	2CLA616030N1801	1
White Plastic	**AMD60322-WP**	2CLA616030N2001	1
	**110° motion sensor - 2M** Rated voltage: 127 - 230 Vac ± 10% ; 50 - 60 Hz Outputs: 1 Normally Open (NO). Potential free Max. power: - Incandescent: 1.800W @230Vac / 1.000W @127Vac - Halogen with electronic o ferromagnetic transformer: 750VA @230Vac / 400VA @127Vac - Fluorescent lamps or motors: 400VA @230Vac / 200VA @127Vac For automatic switching of devices dependent on motion and brightness. With integrated selector switch for ON-AUTOMATIC-OFF in the front side. Switch-off delay: 10 sec to 10 min or short-time pulse 1 sec adjustable (from the front side). Detection range: 5 m radious. Adjustable light set point level for activation (from the front side). Detection angle: 110 ° Mounting height: 1,2 m Auxiliary control with push-buttons Temperature range (Device): -10 °C to 40 °C Combination with frames AMD5144-XX, AMD5244-XX, AMD5344-XX & AMD5444-XX.

Millenium - Grid system for combination (AMD)

ABB-free@home®

Product	Article-No.	Order-No.	Pack/Qty
	**For switching 230 V~ consumers. With integrated switch actuator. Switching function is available also without prior programming (pre-configured). Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. ×45 mm. Outputs: 1× normally open contact, potential free. Suitable for: ohmic. Rated current: 10 A. Rated power: 2300 W. Suitable for: capacitive. Rated current: 10 AX. Protection class of device: IP 20. Mounting depth: 32 mm.		
	SSA-F-1.1.PB.1	2CKA006220A0232	1
Wireless	**SSA-F-1.1.PB.1-WL**	2CKA006200A0108	1
	**For dimming 230 V~ loads. With integrated universal dimming actuator for controlling different lamps. The dimming function is available also without prior programming (pre-configured). Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. × 45 mm. Outputs: 1× dimming channel. Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformers. Rated power: 10 – 180 W / VA. Suitable for: LEDi and energy-saving bulbs; typical. Rated power: 2 – 80 W / VA. Protection class of device: IP 20. Mounting depth: 32 mm.		
	SDA-F-1.1.PB.1	2CKA006220A0235	1
Wireless	**SDA-F-1.1.PB.1-WL**	2CKA006200A0111	1
	**For controlling blind and awning motors. With integrated blind actuator. Blind function is available also without prior programming (pre-configured). Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. × 45 mm. Outputs: 1× Change-over contacts/ normally open contact, potential bound. Rated power: 920 VA. Rated current: 4 A. Suitable for: Operating mode blind. Protection class of device: IP 20. Mounting depth: 32 mm.		
	SBA-F-1.1.PB.1	2CKA006220A0237	1
Wireless	**SBA-F-1.1.PB.1-WL**	2CKA006200A0113	1
	**For sending switching, dimming and blind commands to an ABB-free@home® actuator. Only to be used in combination with ABB-free@home® 1/2-Fold sensor cover plate.** 44 mm. × 44 mm. × 45 mm. Control: Push buttons up/down. LEDS: Used as orientation light or as switching status. Protection class of device: IP 20. Mounting depth: 9 mm.

Concept bs
Naturally aestetics.

Nature rarely presents us with straight lines and the Concept bs range of switches reflects this. Rather than rigidly sticking to squares, it steps outside the box to add some subtle curves to your interior design.

01 white
02 silver
03 elegant grey
04 silver champagne
05 pearl gold

Materials
High quality polycarbonate with improved flame-retardant characteristics and colour stability.

- High quality polycarbonate material with improved flame-retardant characteristics,
- practical light switch range includes electronics,
- hospitality solutions,
- compatible with KNX and ABB wiring accessories.

LED indicator light makes switches even more attractive.

For more information about light switch ranges visit ABB global web sites.

ocean®

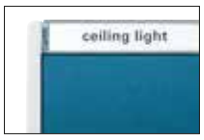
Water protected ranges IP 44.

Combination possibility
Using the cable entry, various inserts are freely combinable. In addition to data communication products, other special inserts like key switches, rocker switches, or twilight switches can be fully integrated.



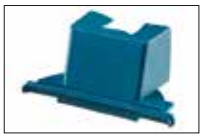
The combination that acts like a single component.
Article-No. 2601/6/20 EW-54
Article-No. 2138 W-54
Article-No. 2661 W-54 with 2863-13-53

Double cable entry from the top

Due to the large connecting space the power cord for the socket outlet, which is connected to a different electric circuit, can be fed through the shielding up to the socket outlet.

Clear assignment of the consumers
Uniform labelling field for switches and socket outlets (optional).

Visible in the dark
Large-area lighting of the labelling field by LED for all switches and push-switches (optional).



Fast mounting using the PoziDriv screw (+/–), PZ 1 (with triple-pitch fast release stainless steel thread). Same mounting dimensions as the WS range.

Easy connection
Large connection area even for 5 x 2.5 mm² conductors. Easy through--connections underneath the base.

Safe feed-through
Feed-through of earth wire via terminal block.

Colour-matching duct entry
Available in both colours for use in cable ducts.

Notes

Movement detector

For the pleasant feeling of safety.

These innovative and high-quality optical detection systems by Busch-Jaeger simply make life more comfortable. They are alert, helpful, efficient. And they automatically manage many tasks in every sector of the building. Inside and outdoors. When it comes to safety, they know precisely when the light is needed. And other functions such as heating, blinds and air-conditioning are precisely, intelligently and reliably controlled.

System according to plan
Perfect detection for different applications

The new Busch-Watchdog 180 flex movement detectors combine design, detection quality and flexibility in use.

Setting the switch-off delay pulse operation

Setting the brightness-value threshold/test mode

180-degree lenses
The 180-degree lenses provide perfect detection for different applications. The new Busch-Watchdog sensors are compact and flat. As a result, the movement detectors blend in with the general appearance more discreetly.

Comfort and multi-sensors
The comfort and multi-sensors can also be operated manually above and below the detection lens to switch the light on and off manually if required or to change the intensity of the light in conjunction with a dimmer insert. The operation is familiar and intuitive as with a switch/button operation.

Greater comfort
In addition to an increased selection, the combinable inserts have been technically further developed and offer many new features for reliable and installation-friendly use.

Extension unit insert flex

Flat construction type
25.5 mm

Claw protection
for greater safety

Open clamps also for flexible busbars
for quick mounting

Measuring points accessible from the front
Quick inspection in case of service

Features at a glance

- Fine wire protection: Safe and fast connection of flexible and rigid wires
- Wallpaper compensation: Evens out small unevenness during mounting
- Uniform interface: Many flexible combinations are possible between sensor and actuator
- Extension unit: For operation via conventional push-buttons or connection of the extension unit insert flex

Movement detector

Perfect detection for different applications

Bathroom
Friendly and light in the morning, the atmosphere subdued in the evening and during the night - the demands on the light conditions could barely be more versatile. The Busch-Watchdog 180 flex comfort sensor with the select lense creates an individual light atmosphere with the combination of movement detector and dimmer, and so supports the natural biorhythm.

Stairway
It is the connecting link to our apartments. Although one only spends a brief period of time here, uncomplicated lighting is especially important in the stairway.The hands are full of shopping, in your mind you are aleady on the next floor - but thanks to the Busch-Watchdog 180 flex multi-sensor, there is no irritating switching of the light.

—
02

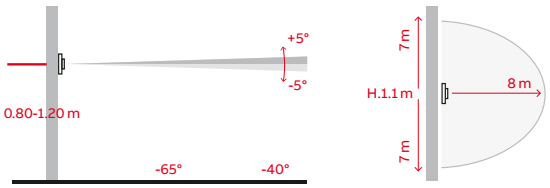
- Personalised light settings, adjusted to the time of day and the situation
- Dimming function supports the natural biorhythm and cares for sustainable power consumption
- Two detection lenses respond exclusively to movements that are created by people and not by inquisitive pets.

Detection range of multi-lense

- Individual light settings including dimming function
- Four detection levels cover the entire stairway
- Energy-saving effect due to automatic switch-on and switch-off.

Movement detector

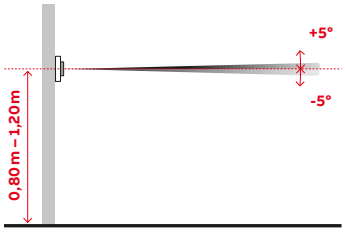
Perfect detection for different applications



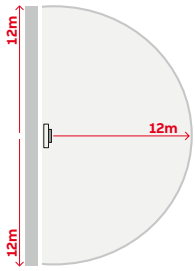
Corridor

The first impression counts! That is why it is especially difficult to create a welcoming light atmosphere in a rather small corridor. In addition, the switched-on light can be quickly forgotten and turn into a power guzzler. The Busch-Watchdog 180 flex standard with select lense detects the entire corridor area and reacts with a combination of movement detector and lighting.

—
03

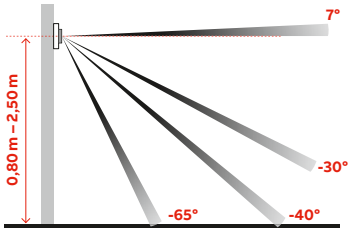


Detection range of select lense

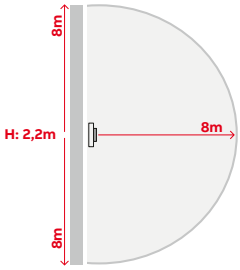


- The horizontal detection level reacts exclusively to persons and not four-footed family members
- Inviting and individual light conditions that can be personalized in the corridor area with dimming function
- Reduction of energy consuption due to automatic switch-on and switch-off

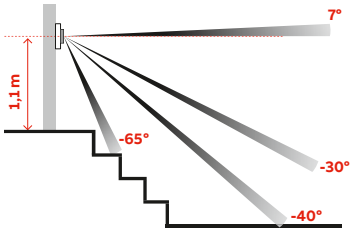
Movement detector

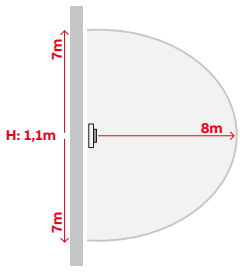


What kinds of detection are available?



The Busch-Watchdog 180 flex is available with two detection lenses. The **select lens** is suitable for corridors or rooms such as tea kitchens where horizontal detection is sufficient or desired, for example, because of pets. It is usually mounted at switch height.





The **multi-lens** offers further areas of application thanks to its four detection levels. For example, this lens can also be used in stairwells. Mounted in the hallway area at 2.2 m, this lens is even better protected from damage and vandalism.

Versatile combination possibilities!

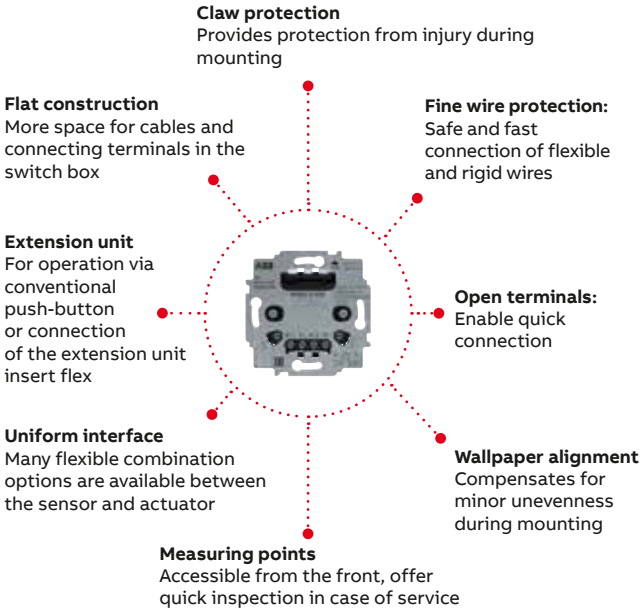
Movement detector

Reliable and uninterrupted surveillance.

Simple and uniform setting of the desired parameters on all Busch-Watchdog lenses on the rear side using two setting potentiometers.



Switching threshold or test mode

Switch-off delay or pulse operation

In addition to the increased selection of combinable inserts, these inserts have been technically further developed and offer many new features for reliable and installation-friendly use.

How flexible should YOUR home be?

The new Busch-Watchdog 180 flex movement detectors combine design, detection quality and flexibility in use. The 180-degree lenses provide perfect detection for different applications. The construction size of the new Busch-Watchdog is compact and flat. As a result, the movement detectors blend in with the general appearance more discreetly.

Busch-Watchdog 180 flex, basic sensor

Busch-Watchdog 180 flex, comfort sensor

Busch-Watchdog 180 flex, multi sensor

The **comfort and multi sensors** can also be operated manually above and below the detection lens to switch the light on and off manually if required or to dim it in conjunction with a dimmer. The operation is familiar and intuitive as with a switch/button operation.

Movement detector

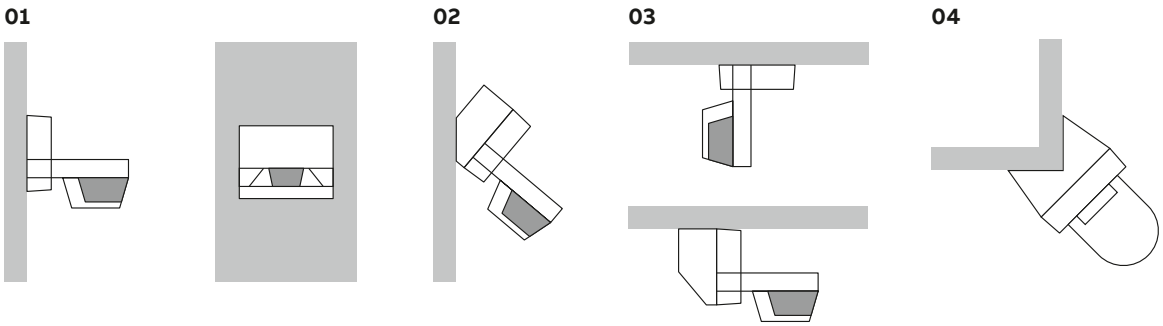
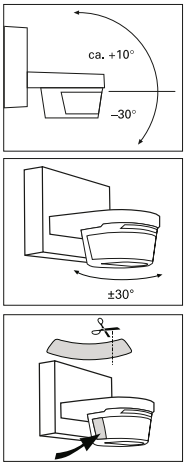
The angle is what matters. Mounting and detection ranges.

Busch-Watchdog 220 MasterLINE select

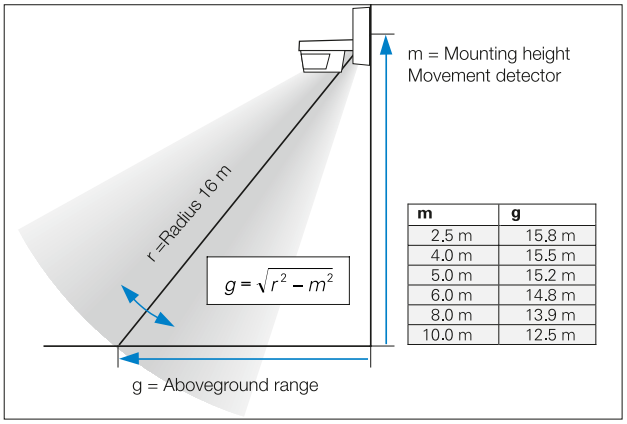


Precise surveillance.
Aside from horizontal mounting, which is ideally suited for the surveillance of houses, properties and parking areas, also vertical mounting is possible. This also allows warehouse thoroughfares on large industrial sites to be monitored so precisely that areas are illuminated only when being approached.

Sees everything. Except small animals.
Practical for the surveillance of outdoor areas: At a mounting height of 1.10 m with a horizontal alignment small animals are not detected by the Busch-Watchdog 220 MasterLINE select.



Mounting possibilities



01 Wall mounting
02 Wall mounting with gradient
03 Ceiling mounting with and without corner adapter
04 Corner mounting (using the corner adapter) Busch-Watchdog 280 MasterLINE

Setting the transmission range

- Regulation of the range due to turning, switching, or partially covering
- The optimum mounting height is 2.50 m.
- Automatic range stabilisation for the Busch-Watchdog 70/110 MasterLINE

With ground and rear-field detection. With high-quality lens for optimum detection. Detection sensitivity adjustable via IR service remote control. Surveillance density: 91 sectors with 364 switching segments. With integrated dismantling protection. All functions controlled by microprocessor. Continuous light (4 hours), light deactivation (4 hours) and presence simulation can be activated via IR remote control. Reading in the current brightness value as switching threshold via remote control. With automatic range stabilization. With automatic interference suppression. With automatic dazzle-proofing. With brightness-independent test mode for evaluating the detection zone. Individual adjustment of detection range via enclosed protective foil which can be cut to size. Additional possibility for switch-on via normally open push-button switch. Switch-off delay: 10 sec to 30 min or short-time pulse 1 sec adjustable. Rated voltage: 230 V~, +10 % / -10 % Rated frequency: 50 Hz - 60 Hz Outputs: 1x Normally open contact, potential-bound Suitable for: ohmic, capacitive and inductive loads Rated current: 10 AX, cos ϕ 0.6 Rated power: 2300 W/VA Control/Signal outputs: 1, Normally open contact, potential free Rated power: 0.12 - 2300 W/VA Detection range: frontal: 16 m, lateral: 16 m Detection range 2: frontal: 1 m, lateral: 1 m Detection angle: 220 ° Brightness limit value: 0.5 Lux - 300 Lux , Daytime operation Mounting height: 2.5 m Protection class (Device): IP 55 Temperature range (Device): -25 °C to 55 °C Dimensions: (L x W x D): 115 mm x 125 mm x 141 mm

Product	Article-No.	Order-No.	Pack/Qty
	**WaveLINE switch actuator, 1gang, with extension unit [1]** For wireless switching of electrical loads. Functions via radio control: ON/OFF, timer and light scene control. Functions via the extension unit: ON/OFF, timer and sending a radio control telegram. Operation also possible via conventional push-buttons (2020 US, 2012/6 UK). Actuation of the extension unit (via conventional push-button) causes the output to switch and a radio control telegram to be sent. Actuation of extension unit in ON/OFF function: Alternate sending of an ON/OFF telegram. Actuation of extension unit in timer function: Sending of an ON telegram. For Busch-Watchdog WaveLINE. For wall mounted transmitter Waveline 6731-xxx, 6732-xxx und 6733-xxx. For remote control WaveLINE 6780. Switch-off delay: Adjustable to 5 seconds, 1-5-15 minutes. Repeater function can be activated for extended range. For universal attachment or installation. 3 wire connection (neutral conductor required). For installation in (deep) flush-mounted boxes to German Standard DIN 49073. Controllable up to 32 transmission addresses. Send/receive frequency: 868 MHz. Free-field range: approx. 100 m. Control element: Adjustable potentiometer Display elements: Status indication of output via LED. Rated voltage: 230 V~, +10 % / -10 % Rated frequency: 50 Hz Inputs: 1 Polling voltage: 230 V~, Sensing pulse, L-wire Outputs: 1x Normally open contact, potential-bound Suitable for: Resistive load Rated current: 10 A Output voltage: 230 V~ Rated power: 2300 W Suitable for: capacitive Rated current: 10 AX Output voltage: 230 V~ Rated power: 2300 VA Suitable for: inductive Rated current: 10 A, cos ϕ 0.6 Output voltage: 230 V~ Rated power: 2300 VA Protection class (Device): IP 20 Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 47 mm x 48 mm x 22 mm Mounting depth: 25 mm

[1] The detection range with a central approach is reduced.
[2] Recommendation: HaloX-O flush-mounted box from Kaiser (article no. 1290-40) with corresponding cover (1290-47 or 1290-85 for exposed concrete) or IBTronic H120-68 from Spelsberg

Product	Article-No.	Order-No.	Pack/Qty
	**Busch-Presence detector Universal, e-contact [1] [2]** **12 meters** Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. With electronic switch contact for LED operation. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Extension of the detection range by means of master/ slave combination. Visible height 23 mm. For semiautomatic and fully automatic operation. Additional activation/deactivation possibility through pushbutton input. With continuous light/continuous off function (8 hours), activation via intelligent extension unit input possible. With brightness-independent test mode for evaluating the detection zone. With teach-in function of the brightness switching threshold, IR service remote control required. With detection display in test mode. Ceiling installation using integrated spring bracket. Twist protection via additional quick tensioning. Adjustment elements accessible on the front side. Surveillance density: 72 sectors with 640 switching segments. Switch-off delay: approx. 1 min. - 30 min. or short-time pulse adjustable. Remote control possible via IR service remote control 6843. Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm. Control element: 2 controllers for setting the brightness switching threshold and switch-off delay. Display elements: LED detection and status indication. Rated voltage: 110 - 230 V~, +10 % / -10 % Rated frequency: 50 Hz - 60 Hz Outputs: 1x Normally open contact, potential-bound Suitable for: 230 V incandescent lamps Rated power: 3 - 200 W Suitable for: 230 V~ LEDi Rated power: 3 - 200 W/VA Detection angle: 360 ° Brightness limit value: 5 Lux - 2000 Lux Mounting height: 2 m - 4 m Protection class (Device): IP 40 Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 94 mm x 94 mm x 59 mm Mounting depth: 36 mm60669-2-1

Product	Article-No.	Order-No.	Pack/Qty
	**Busch-Presence detector Universal BT, DALI [1] [2] [3] [4] 12 meters** Master presence detector with mixed light measurement. For regulating and switching of DALI operating devices that depend on brightness and movement. For DALI broadcast operation (central telegram). Supplies the required voltage for additional DALI operating units and controllers. Suitable for up to 45 DALI operating devices. For changing the colour temperature of "tunable white" lamps, which meet DALI Standard IEC 62386-209 (Device Type 8). Colour temperature can then be set between 2,700 K - 6,500 K. With additional switching output for the activation of heating, air conditioning and ventilation or for switching additional loads (e.g. panel light). Configuration possible up to the complete deactivation of the DALI operating devices. With Bluetooth interface for parameterization and operation. Adjustment of all setting options via smartphone or tablet. Light control via smartphone or tablet app. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Extension of the detection range by means of master/slave combination. Visible height 23 mm. For semi-automatic, comfort and fully automatic operation. Additional activation/deactivation possibility through pushbutton input. With continuous light/continuous off function (8 hours), activation via intelligent extension unit input possible. With time-controlled basic illumination function. With selectable warm-up function for fluorescent lamps. With 2-step automatic switch-off (according to EnEV / EN 15232). With time-controlled night anti-glare function. With selectable presence simulation in case of non-presence. With integrated storage of ON period (energy monitor). With brightness-independent test mode for evaluating the detection zone. With teach-in function of the brightness switching threshold, IR service remote control required. With detection display in test mode. Ceiling installation using integrated spring bracket. Twist protection via additional quick tensioning. Adjustment elements accessible on the front side. Surveillance density: 72 sectors with 640 switching segments. Individual deactivation and adjustment of sensitivity of individual sensors possible. aluminium silver	**6819/58-183-500**	2CKA006800A2789	1

[1]) Recommendation: HaloX-O flush-mounted box from Kaiser (article no. 1290-40) with corresponding cover (1290-47 or 1290-85 for exposed concrete) or IBTronic H120-68 from Spelsberg

Product	Article-No.	Order-No.	Pack/Qty
	**Busch-Presence detector Universal, slave, DALI [1]) [2]) 12 meters** DALI slave presence detector for extension of the detection range of DALI master presence detectors. For the supply of operating voltage via the DALI master. Power consumption on the DALI bus: max. 10 mA, corresponds to approx. 5 DALI operating devices. The communication with the DALI master is carried out via the DALI interface. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Visible height 23 mm. Ceiling installation using integrated spring bracket. Twist protection via additional quick tensioning. Surveillance density: 72 sectors with 640 switching segments. Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm. Rated voltage: 95 - 22.5 V- Detection angle: 360 ° Mounting height: 2 m - 4 m Protection class (Device): IP 40 Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 94 mm x 94 mm x 72 mm Mounting depth: 49 mm **DALI**		
studio white matt	**6819/39-24-500**	2CKA006800A2759	1
aluminium silver	**6819/39-183-500**	2CKA006800A2793	1

[1]) The detection range with a central approach is reduced.
[2]) Recommendation: HaloX-O flush-mounted box from Kaiser (article no. 1290-40) with corresponding cover (1290-47 or 1290-85 for exposed concrete) or IBTronic H120-68 from Spelsberg

Product	Article-No.	Order-No.	Pack/Qty
	**Busch-Presence detector Corridor, slave, DALI [1]) 30 metres** DALI slave presence detector for extension of the detection range of DALI master presence detectors. For the supply of operating voltage via the DALI master. Power consumption on the DALI bus: max. 10 mA, corresponds to approx. 5 DALI operating devices. The communication with the DALI master is carried out via the DALI interface. Detection range (for installation height of 3 m): rectangular Walking persons: crosswise to the detector 24 m x 3 m, frontal/lengthways to the detector 14 m x 3 m. Mounting height 27 mm. Ceiling installation using integrated spring bracket. Twist protection via additional quick tensioning. Surveillance density: 92 sectors with 368 switching segments. Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm. Rated voltage: 95 - 22.5 V- Detection angle: 360 ° Mounting height: 2 m - 4 m Protection class (Device): IP 40 Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 94 mm x 94 mm x 76 mm Mounting depth: 49 mm **DALI**		
studio white matt	**6819/59-24-500**	2CKA006800A2761	1
aluminium silver	**6819/59-183-500**	2CKA006800A2795	1

[1]) Recommendation: HaloX-O flush-mounted box from Kaiser (article no. 1290-40) with corresponding cover (1290-47 or 1290-85 for exposed concrete) or IBTronic H120-68 from Spelsberg

Product	Article-No.	Order-No.	Pack/Qty
	**Busch extension unit coupling [1])** For transmitting different control commands via a single conductor wire. For devices with intelligent extension input. For operation via conventional push-buttons 2020 US and 2021/6 U. For operation via conventional 2gang push-buttons 2020 US-205 and 2021/6/6 U. For universal attachment or installation. For installation in (deep) flush-mounted boxes to German Standard DIN 49073. Including compact connecting terminal for cable connection. Cable length: approx. 80 mm. Rated voltage: 110 - 230 V~, +10 % / -10 % Rated frequency: 50 Hz - 60 Hz Inputs: 2 Protection class (Device): IP 20 Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 33 mm x 45 mm x 8.5 mm		
	6494-500	2CKA006499A0002	1

[1]) To be mounted only in connection with commercially available flush-mounted installation boxes according to DIN 49073 > 40 mm depth gauge or Busch-Jaeger art. no. 3040, 3050 or 3060.

Movement detector

Presence detector

Product	Article-No.	Order-No.	Pack/Qty
	**ABB flexTronic presence detector, universal Sensor [1] [2] [3] 12 meters** Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. Detection range (for installation height of 3 m): circular Seated persons: up to Ø 10 m, walking persons: up to Ø 12 m. Extension of the detection range by means of master/slave combination. Mounting height: 35 mm For semiautomatic and fully automatic operation. Additional activation/deactivation possibility through pushbutton input. With continuous light/duration-off function (8 hrs), IR service remote control necessary. With teach-in function of the brightness switching threshold, IR service remote control required. With brightness-independent test mode for evaluating the detection zone. With detection display in test mode. Remote control possible via IR service remote control 6843. Adjustment elements accessible on the front side. Surveillance density: 72 sectors with 640 switching segments. Switch-off delay: approx. 1 min. - 30 min. or short-time pulse adjustable. For Universal relay insert 6440/01 U. For Universal e-contact insert 6440/04 U. For Universal slave insert 6440/05 U.		
studio white matt	**64753-24-500**	2CKA006800A3027	1
aluminium silver	**64753-183-500**	2CKA006800A3029	1

[1] The detection range with a central approach is reduced.
[2] The range specifications refer only to an ambient temperature of 21°C.
[3] Please order the respective flush-mounted insert separately.

Product	Article-No.	Order-No.	Pack/Qty
	**ABB flexTronic presence detector, sky sensor** Master presence detector with mixed light measurement. For switching lighting systems that depend on brightness and movement. Detection range (for mounting height 6 m and 12 m): circular. Walking persons Ø: max. 18 m and 24 m. Extension of the detection range by means of master/slave combination. Mounting height: 35 mm For semiautomatic and fully automatic operation. Additional activation/deactivation possibility through pushbutton input. With brightness-independent test mode for evaluating the detection zone. With detection display in test mode. Adjustment elements accessible on the front side. Surveillance density: 72 sectors with 640 switching segments. Switch-off delay: approx. 1 min. - 30 min. or short-time pulse adjustable. Compatible with all free@home flex inserts. For relay insert flex, 1gang, 64811 U. For series relay insert flex, 2gang, 64821 U. For e-contact insert flex, 1gang, 64814 U. For LED touch dimmer insert flex, 1gang, 64851 U. For extension insert flex, 64891 U.

Movement detector

ABB flexTronics inserts

Product	Article-No.	Order-No.	Pack/Qty
	**64811 U-500**	2CKA006800A3042	1/10

Relay insert flex, 1gang [1])
3 wire connection (neutral conductor required).
For switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-... .
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 1
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 300 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps
Rated power: 2300 W
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 2300 VA
Temperature range (Device): -25 °C to 55 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

[1]) Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Product	Article-No.	Order-No.	Pack/Qty
	**64821 U-500**	2CKA006800A3045	1

Relay insert flex, 2gang [1])
3 wire connection (neutral conductor required).
For switching lighting systems.
For switching two independent load circuits.
For controlling light and ventilation systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-... .
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 2
Outputs: 2x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 300 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps
Rated power: 1840 W
Suitable for: Low voltage halogen lamps that are operated via transformers.
Rated power: 1150 VA
Temperature range (Device): -25 °C to 55 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm
Mounting depth: 25 mm

[1]) Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Rated power: 3 - 240 VA Suitable for: 230 V incandescent lamps/230 V halogen lamps Rated power: 10 - 240 W Suitable for: Low voltage halogen lamps that are operated via transformers. Rated power: 3 - 240 VA Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm Mounting depth: 25 mm 		
	64814 U-500	2CKA006800A3048	1

[1] Use only dimmable high-voltage LEDs.
[2] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)

Product	Article-No.	Order-No.	Pack/Qty
	**LED dimmer insert flex, 1gang [1] [2] [3] [4] [5] [6]** **FM, LED, 3-240 VA** 2-wire connection (neutral conductor not required) Neutral conductor optionally connectable (recommended for the connection of low loads < 10 W/VA). Touch dimmer for switching lighting systems. Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units. Operation also possible via conventional push buttons (2020 US, 2021/6 UK). Optimised for dimming of retrofit LED lamps (LEDi). For dimmable Retrofit-LEDs (LEDi). For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers. For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps. Mix operaton of LEDi with conventional loads possible. With manually adjustable operating mode: trailing / leading edge control. With adjustable minimum brightness. With light-level memory and minimum brightness memory. Low-noise level by MOSFET transistors. With electronic short-circuit protection. With electronic overload protection. Without control cover. For control element flex, 1gang, 64711. For control element flex, 2gang, 64721. For control element flex, 1gang, wireless, 62711-WL. For control element flex, 2gang, wireless, 62721-WL. For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL. Rated power: 3-240 VA (LEDi) Rated voltage: 230 V~, +10 % / -10 % Rated frequency: 50 Hz Inputs: 1 Outputs: 1x dimming channel Suitable for: 230 V LEDi, typical (leading edge control) Rated power: 3 - 100 VA Suitable for: 230 V LEDi, typical (trailing edge control) Rated power: 3 - 240 W Suitable for: 230 V incandescent lamps, 230 V halogen lamps and low-voltage halogen lamps with conventional transformers or Busch Electronic Transformer. Rated power: 10 - 240 VA Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm Mounting depth: 25 mmIEC 60669-2-1, British Standard EN 60669-2-1 		
	64851 U-500	2CKA006500A0013	1

[1] In the case of conventional transformers, take ~20% transformer loss into account.
[2] In case of electronic transformers, 5 % transformer losses.
[3] Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)
[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Movement detector

ABB flexTronics inserts and sensors

Product	Article-No.	Order-No.	Pack/Qty
	**Extension insert flex [1])** 3 wire connection (neutral conductor required). For the extension of the Busch-Comfort switch or presence detector installations. For group control of flex inserts via extension unit communication. Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units. Without control cover. For control element flex, 1gang, wireless, 62711-WL. For control element flex, 2gang, wireless, 62721-WL. For Busch-Watchdog 180 flex sensors 6476x-... . 	**Busch-Presence detector mini KNX [1])** **8 meters** Detection range (for mounting height 2.5 m, 3 m and 4 m): circular. Seated persons Ø: max. 5 m, max. 6.5 m and max. 9 m. Walking persons Ø: max. 6.5 m, max. 8 m and max. 10.5 m. Visible height 16 mm. With 2 channels. Targeted for connection and disconnection of lights bands depending on the room brightness. Regulation in response to the movement possible. Using the device as presence and/or movement detectors. Detectors application with 2 power off stages. Detectors application with integrated monitoring function. Constant light switch with up to two independent channels. Constant light switch with max. 2 outputs for brightness-dependent switching of two light bands in the area. With integrated KNX bus coupler. Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm. Suitable for surface mounting installation. Cannot be installed in British Standard or VDE flushmounted box. Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg. Connections: KNX-line: Bus connection terminal Brightness limit value: 1 Lux - 1000 Lux Mounting height: 2 m - 4 m Protection class (Device): IP 20 Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 80 mm x 80 mm x 45 mm Mounting depth: 29 mm

	**Busch-Presence detector mini premium KNX [1]) [2])** **8 meters** Detection range (for mounting height 2.5 m, 3 m and 4 m): circular. Seated persons Ø: max. 5 m, max. 6.5 m and max. 9 m. Walking persons Ø: max. 6.5 m, max. 8 m and max. 10.5 m. Visible height 16 mm. With 4 channels. For dimming/brightness of the rules to a defined value in a designated collection area. HVAC function for controlling heating and/or cooling systems and ventilation systems in the designated collection area. Detectors application with 2 power off stages. Detectors application with integrated monitoring function. Constant light controller with up to two independent channels. Constant light controller with max. 2 outputs for dimming daylight control/rules of two rooflights in the room. Integrated object room temperature controller. 10 freely programmable IR channels (blue and/or white) Incl. 5 logic channels (logic gates, gates, delay and staircase lighting) Evaluation via internal brightness sensor. Weighting of up to 2 external brightness values and the internal brightness sensor possible. The programming button can be activated with the IR transmitter 6010-25 (-500). With integrated KNX bus coupler. Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm. Suitable for surface mounting installation. Cannot be installed in British Standard or VDE flushmounted box. Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg. 	**Busch-Presence detector premium KNX [1]) [2]) 12 meters** Detection range (for mounting height 2.5 m, 3 m and 4 m): circular. Seated persons Ø: max. 8 m, max. 10 m and max. 14 m. Walking persons Ø: max. 10 m, max. 12 m and max. 16 m. Visible height 23 mm. With 4 channels. For dimming/brightness of the rules to a defined value in a designated collection area. HVAC function for controlling heating and/or cooling systems and ventilation systems in the designated collection area. Detectors application with 2 power off stages. Detectors application with integrated monitoring function. Constant light controller with up to two independent channels. Constant light controller with max. 2 outputs for dimming daylight control/rules of two rooflights in the room. Integrated object room temperature controller. 10 freely programmable IR channels (blue and/or white) Incl. 5 logic channels (logic gates, gates, delay and staircase lighting) Evaluation via internal brightness sensor. Weighting of up to 2 external brightness values and the internal brightness sensor possible. The programming button can be activated with the IR transmitter 6010-25 (-500). With integrated KNX bus coupler. Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm. Suitable for surface mounting installation. Cannot be installed in British Standard or VDE flushmounted box. Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg. Connections: KNX-line: Bus connection terminal Brightness limit value: 1 Lux - 1000 Lux Mounting height: 2 m - 4 m Protection class (Device): IP 20 Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 91 mm x 91 mm x 45 mm Mounting depth: 22 mm

Movement detector

Presence detector

Product	Article-No.	Order-No.	Pack/Qty
	**Busch-Presence detector Corridor KNX [1]** **30 meters** Detection range: rectangular. For mounting height of 3 m: frontal toward the detector at a max. of 20 m x 3 m (at a max. of 10 m x 3 m per side). Crosswise toward the detector at a max. of 30 m x 3 m (max. of 15 m x 3m per side). With integrated KNX bus coupler. Mounting height 27 mm. With 2 channels. Targeted for connection and disconnection of lights bands depending on the room brightness. Regulation in response to the movement possible. Using the device as presence and/or movement detectors. Detectors application with 2 power off stages. Detectors application with integrated monitoring function. Constant light switch with up to two independent channels. Constant light switch with max. 2 outputs for brightness-dependent switching of two light bands in the area. Ceiling mounting on suspended ceilings with spring clamps, on solid ceilings in surface-mounting boxes 6131/39-xxx(-500) or on VDE flush-mounted boxes with intermediate ring for VDE flush-mounted boxes 6131/38-xxx(-500). Suitable for false ceilings with a board thickness from 9 to 25 mm. Hole size: Ø 68 mm. Cannot be installed in British Standard or VDE flushmounted box. Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg. Movement detector

Busch-Watchdog presence inserts

Product	Article-No.	Order-No.	Pack/Qty
	Comfort switch flex sensor Movement detector push-button switch combination. For switching lighting systems that depend on brightness and movement. Push switch function possible at all times. Extension of the detection range by means of master/slave combination. Additional activation/deactivation option via push-button input on the flush-mounted insert. Adjustable operating mode: automatic mode, automatic (motion-controlled) switch-on and switch-off. Adjustable operating mode: semiautomatic, manual switch-on, automatic (timer and movement-controlled) switch-off. Adjustable operating mode: automatic mode, automatic switch-on, manual switch-off. With continuous light/continuous Off function. Adjusting elements on rear side. Surveillance density: 9 sectors with 28 switching segments. Switch-off delay: 1 to 10 min., adjustable. Compatible with all free@home flexTronics inserts. For relay insert flex, 1gang, 64811 U. For series relay insert flex, 2gang, 64821 U. For e-contact insert flex, 1gang, 64814 U. For LED touch dimmer insert flex, 1gang, 64851 U. For extension insert flex, 64891 U. Please order the respective flush-mounted insert separately. The range specifications refer only to an ambient temperature of 21°C.

Movement detector

Busch-Watchdog presence inserts

Busch-Watchdog 180 flex, comfort sensor [1] [2]
with select-lens
Movement detector sensor with with measurement of ambient light.
For automatic switching of devices dependent on motion and brightness.
Push switch function possible at all times.
In combination with dimmer insert flex: dimming function of lighting and selectable light value storage.
With enabling of pre-warning of switch-off for stairwell operation.
Compatible with all free@home flex inserts.
Adjusting elements on rear side.
Extension of the detection range by means of master/slave combination.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
With continuous light/continuous Off function.
With detection display in test mode.
Surveillance density: 14 sectors with 56 switching segments.
Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable.
For relay insert flex, 1gang, 64811 U.
For e-contact insert flex, 1gang, 64814 U.
For series relay insert flex, 2gang, 64821 U.
For LED touch dimmer insert flex, 1gang, 64851 U.
For extension insert flex, 64891 U.
Mounting height: 22 mm.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Detection range: frontal: 12 m, lateral: 12 m, Mounting height: 1.1 m
Detection angle: 180 °
Brightness limit value: 5 Lux - 500 Lux Up to daytime operation
Mounting height: 0.8 m - 1.2 m
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 63 mm x 35 mm

Movement detector

Busch-Watchdog presence inserts

Product	Article-No.	Order-No.	Pack/Qty
	**Busch-Watchdog 180 flex, comfort sensor [1] [2] with multi-lens** Movement detector sensor with with measurement of ambient light. For automatic switching of devices dependent on motion and brightness. Push switch function possible at all times. For detection down to the floor. For detection in stairwells. With 4 detection levels. In combination with dimmer insert flex: dimming function of lighting and selectable light value storage. With enabling of pre-warning of switch-off for stairwell operation. Compatible with all free@home flex inserts. Adjusting elements on rear side. Multi-lens: suitable also for mounting heights of 2.20 m. Extension of the detection range by means of master/slave combination. Additional activation/deactivation option via push-button input on the flush-mounted insert. With continuous light/continuous Off function. With detection display in test mode. Surveillance density: 54 sectors with 224 switching segments. Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable. For relay insert flex, 1gang, 64811 U. For e-contact insert flex, 1gang, 64814 U. For series relay insert flex, 2gang, 64821 U. For LED touch dimmer insert flex, 1gang, 64851 U. For extension insert flex, 64891 U. Mounting height: 31 mm. Control element: 2 controllers for setting the brightness switching threshold and switch-off delay. Detection range: frontal: 8 m, lateral: 7 m, Mounting height: 1.1 m Detection range 2: frontal: 8 m, lateral: 8 m, Mounting height: 2.2 m Detection angle: 180 ° Brightness limit value: 5 Lux - 500 Lux Up to daytime operation Mounting height: 0.8 m - 1.2 m alternative: 2.2 m Temperature range (Device): -5 °C to 45 °C Dimensions: (L x W x D): 63 mm x 63 mm x 45 mm

Installation materials

ABB installation materials are continuously developed in cooperation with installers, paying close attention to easy and quick installation, high quality and reliability. They are designed to be compatible with each other and suitable for different installation situations and building methods.

ABB installation materials are:

- **Future oriented.**
  Offering customized solutions, following trends and future requirements for building constructions like prefabrication and modularity, supported by BIM models.

- **Environmentally friendly.**
  Choosing the materials with minimal environmental impact, minimizing waste and managing product environmental data in a transparent way.

- **Well documented.**
  The right information always easily available for each customer. Products are fully documented including ETIM data supporting digital sales.

Advantages of ABB installation materials:

- **Wide choice** of installation materials, meeting different worldwide requirements and installation habits.
- **Efficient, easy and fast installation.** Products are easy and fast to install and they enable efficient installation of wiring accessories and KNX products. Effective project execution brings overall cost-efficiency.
- **Reliable connections** in hollow, concrete and stone structures. Faulty installations are expensive and difficult to fix. Therefore we put effort in ensuring that the connections are reliable.
- **Quality material with specific properties used.** Material properties are selected to withstand demanding environments like fire, high temperature variations, frost, rain, etc.
- **Environmentally friendly.** Products are halogen free.
- **Safety.** Installation materials are designed to meet the highest requirements in regard to health and safe operation.
- **Special applications available.** Special applications to fire retardant walls and exterior walls (airtight solutions) are available.
- **Innovation based on cooperation with a customers and their needs**

Installation materials
A comprehensive offering

Conduits and accessories

Piping materials and accessories are developed to work as a system with ABB installation boxes and are easy to adapt to different installations. The piping materials ensure a safe and cost-efficient installation. Product range offers great variety of products as conduit extensions and adaptors, conduit bends, conduit end pieces and sleeves and accessories for concrete casting applications. Product colour coding helps customers to choose easier the right accessory size.

Flush mounted boxes

A wide variety of flush mounted junction and installation boxes, accompanied with accessories, helps installers work in an efficient and flexible way. The customer will find a suitable solution for any type of building or wall: brick or solid walls, various hollow or dry walls. Special solutions like for fire retardant walls or air tight and sound proof walls are also available (complying with relevant standards). The products are made of high quality halogen free plastic materials.

ABB Plug & Play

ABB Plug & Play is a concept that conveys convenience, efficiency, speed and time savings. Standard ABB products are re-configured to a customer's specification, ready for installation; Plug & Play.

A smart combination of boxes, wiring accessories and covers with plug & play connectors guarantees efficient, quick and highly reliable installation.

Through all the preparations in the design phase and the assembly of parts by ABB, the installation will be effortless and at lightning speed.

Digital Services

Powerful digital solutions in a single portfolio

Shaping the future of the digital world today requires fully automated solutions that can be networked with all other intelligent devices.

MyBuildings portal powered by ABB Ability™

Controlling and planning smart buildings is now easier than ever: ABB bundles its digital services for Smarter Home and Building in the MyBuildings portal (formerly my.abb-livingspace.com) under the ABB Ability™ umbrella. The online portal gives you access to many of ABB's tools and services that you can use for your individual needs. You have the option to configure KNX systems, fire alarm technology, door entry system or ABB-tacteo KNX as well as to extend system functionality with remote access or Amazon Alexa voice control. You can also connect your smart system to a mobile device.

Digital Services

Remote Access, Home Appliances Integration and Cloud-backup

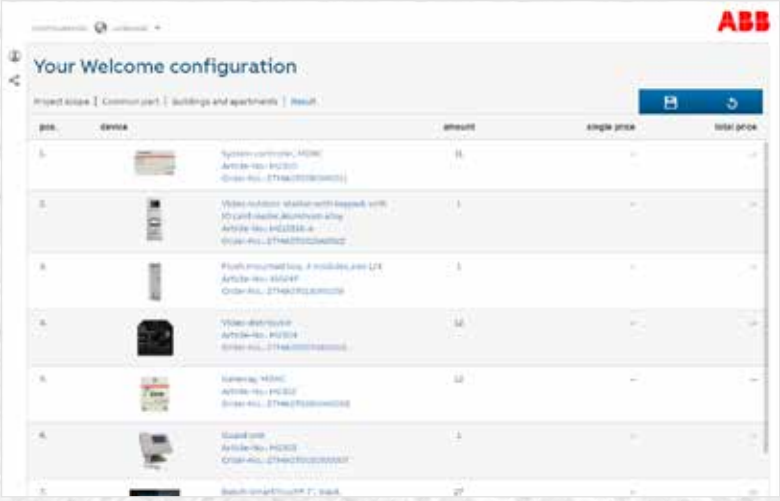
ABB-free@home
MyBuildings enables you to check on your ABB-free@home system from anywhere in the world. You can check the status, control functions, and you get notifications in case of events that you can define. All you need is a MyBuildings portal Account and a remote access subscription.

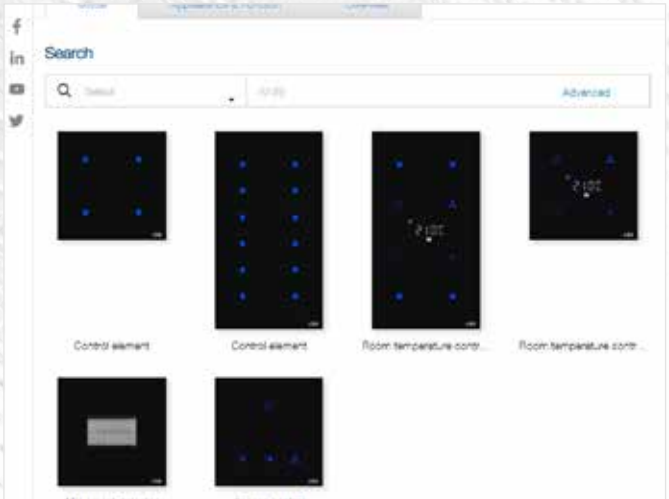
ABB-Welcome
You can also open the door from anywhere in the world to let in the maid or the post delivery man. This way you wont miss a package one more time. All you need is the IP Gateway and a MyBuildings portal Account.

Integration of Home Appliances
The MyBuildings portal allows the easy integration of Smart-Home-capable devices from Miele and Home Connect in ABB-free@home easily. All supported devices appear in the free@home app and the ABB-free@home panel and the main functions can be directly controlled via the wall-mounted pushbuttons.

Digital Services

Configuration and Commissioning





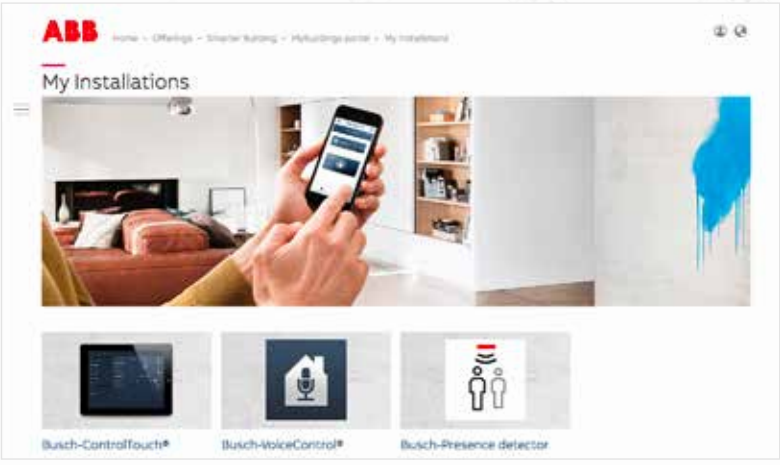


ABB-Welcome Configurator
Planning a door entry system for a residential compound with hundreds of apartments does not have to be difficult. The ABB-Welcome Configurator applies all the planning rules for you. You just need to tell him what you want and need.

ABB-tacteo Configurator
You can configure your individual ABB-tacteo KNX Sensor with the ABB-tacteo configurator. The freedom of planning with KNX is now also reflected on your glass touch sensors on your wall – because every function and scene is unique.

Commissioning through the MyBuildings portal
Via MyBuildings portal you can easily and securely set up remote access for instance to your ABB Smart Home System, set up ABB-free@home Alexa voice control or start the Busch-ControlTouch commissioning.

Digital Services
Services

Remote Access and Notification
Sign up to the MyBuildings Portal to get secure Remote Access to your ABB smart home and smart building system. Check the status, control functions and receive notifications in case of events, which you can define. With a connected ABB-Welcome system see live streams from outdoor stations and open the door from anywhere in the world.

Digital Services
Smarter Home Developer Program

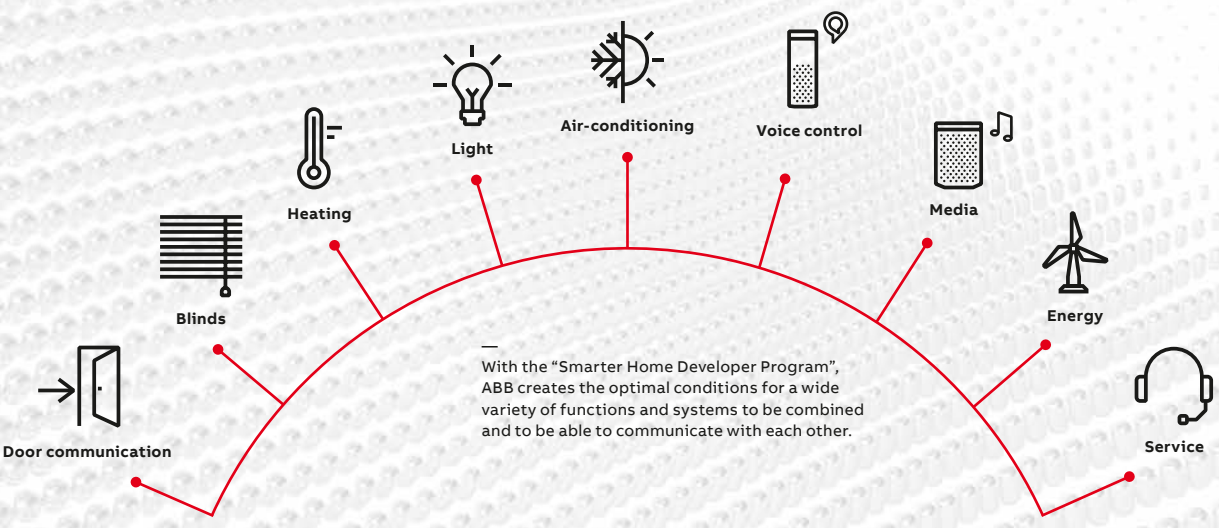
Living is becoming even smarter

ABB's cooperation with renowned partners offers extensive solutions and great added value.

Smarter Home Developer Program

To enable customers to choose from an even greater variety of products in the future, ABB has created the "Smarter Home Developer Program" for developers. The program combines ABB's core offering with solutions from external partners. This enables planners and electricians to equip smart residential buildings with a diverse range of components from different manufacturers and to operate them centrally using ABB products. As an interface for networking, ABB offers application programming interfaces (API).

- Easy and quick integration of your products and services with the ABB product and service portfolio
- Marketing visibility
- Access to households with integrated smart home solutions
- Opportunities to discuss joint offerings with ABB
- Global reach using the smart home portfolio of the two brands Busch-Jaeger and ABB



—
https://developer.eu.mybuildings.abb.com/

Digital Services

Smarter Home Developer Program

ABB-free@home® API
The API for ABB-free@home® allows manufacturers and service providers to integrate data from ABB's Smart Home system into their own program and vice versa.

With the "Smarter Home Developer Program", ABB creates the optimal conditions for a wide variety of functions and systems to be combined and to be able to communicate with each other.

ABB Update Copy Convert

The ETS app Update Copy Convert provides a series of useful functions for ETS applications and device configuration (parameters and group addresses) in an ETS project.

The functions are:

- Update: Changes the application program to a later or earlier version while retaining current configurations.
- Convert: Transfers/adopts a configuration from an identical or compatible source device.
- Channel Copy: Copies a channel configuration to other channels on a multichannel device.
- Channel Exchange: Exchanges configurations between two channels on a multichannel device.
- Import/Export: Saves and reads device configurations as external files.

Download the app

Firmware Update 2.0

With this ETS app you are able to updating the firmware of your device directly via the KNX bus. The app can be used with the ETS5 or higher.

Download the app

ABB i-bus® KNX

Overview

Energy consumption measurement	- Energy Analyzer - Energy Meter with Meter Interface Module - Energy Module
Switch energy with and without current detection	- Switch Actuator
Switch energy with energy measurement	- Energy Actuator - Switch Actuator with Energy Function
Switch, dim and control light	- Universal Dim Actuator - Switch/Dim Actuator 1–10 V - Light Controller
Digital lighting control using DALI	- DALI Gateway - DALI Light Controller
Control of shutters, blinds and ventilation flaps with and without automatic travel time detection	- Blind/Roller Shutter Actuator - SMI Blind/Roller Shutter Actuator
Heating/cooling via valve control	- Holistic HVAC solution ClimaECO - Valve Drive Actuator - Electromotor Valve Drive - FAN Coil Controller - Central HVAC Controller
Ventilation/climatization	- Blower Actuator - Fan Coil Controller
Room solutions with integrated sensor and actuator functions	Room Master devices with different combinations of inputs and outputs and internal logical connections Room Controller with functional modules

KNX-Main Line/TP

- 64 devices/line
- 15 lines/area with superordinated main line
- max. 15 areas with superordinated area line

Line 1 2 3 4 ... ... 13 14 15

Power Supply

Line Coupler

- Binary Input

Detect and evaluate switching commands

- Analogue Input

Capture, evaluate and monitor physical values

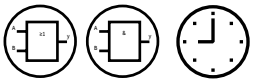
- Weather Station and Weather Sensor

Evaluate and monitor meteorological data (wind, temperature, rain, etc.)

Remote control via internet

Display operating conditions and control functions

- Presence Detector
- Movement Sensor
- Light Sensor

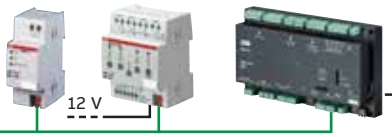


Lighting Control

Detect presence and movement

Measure brightness levels

- Logic Module
- Application Unit Logic
- Application Unit Time
- Time Switch



Perform logical operations and trigger timer-controlled functions

- Room Thermostat
- Air Quality Sensor

Capture, evaluate, monitor and control room conditions, temperature, air quality, etc.

- Security Terminal
- Security Module
- KNX Security Panel
- Fault Monitoring Unit
- Monitoring Unit
- Data Logging Unit

12 V

Security System

Monitor operating conditions, signal technical faults, recognize hazards and trigger alarms

- Room outside sensor with card reader
- Transponder Card
- Configuration Software

Access Control system for hotel rooms

SV/S 30.160.1.1

Power Supply, 160 mA, MDRC

KNX power supplies generate and monitor the KNX system voltage (SELV). The bus line is decoupled from the power supply by an integrated choke.
The voltage output is short-circuit and overload protected.
The two-color LED indicates device output status. With two-coloured status indicator and wide range input from 85…265 V AC, 50/60 Hz.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.160.1.1	2CDG110144R0011		0.30	1

SV/S 30.320.1.1

Power Supply, 320 mA, MDRC

KNX power supplies generate and monitor the KNX system voltage (SELV). The bus line is decoupled from the power supply by an integrated choke.
The voltage output is short-circuit and overload protected.
The two-color LED indicates device output status.
With two-coloured status indicator and wide range input from 85…265 V AC, 50/60 Hz.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.320.1.1	2CDG110166R0011		0.30	1

SV/S 30.640.3.1

Power Supply, 640 mA, MDRC

KNX power supplies generate and monitor the KNX system voltage (SELV). The bus line is decoupled from the power supply by an integrated choke. The voltage output is short-circuit and overload protected.
The two-color LED indicates device output status.
Device type SV/S 30.640.3.1 has an additional 30 V DC short-circuit and overload protected voltage output that can be used to power an additional bus line (in combination with a separate choke).
With two-coloured status indicator and wide range input from 85…265 V AC, 50/60 Hz.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX
Power Supply

SV/S 30.320.2.1

Power Supply with Diagnostics, 320 mA, MDRC
Compact Power Supply with integrated choke. Quick diagnostics by LED display and ETS communication objects. Analysis of the operating state and the bus line possible by means of ABB i-bus® Tool.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.320.2.1	2CDG110145R0011		0.26	1

SV/S 30.640.5.1

Power Supply with Diagnostics, 640 mA, MDRC
Compact Power Supply with integrated choke. Quick diagnostics by LED display and ETS communication objects. Analysis of the operating state and the bus line possible by means of ABB i-bus® Tool. Additional voltage output to supply an additional line in conjunction with an additional choke.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	SV/S 30.640.5.1	2CDG110146R0011		0.26	1

SU/S 30.640.1

Uninterruptible Power Supply, 640 mA, MDRC **to be discontinued**
Power supply with integrated choke for supplying a bus line from an uninterrupted supply. Quick diagnostics via LED display for operational readiness, fault and battery level as well as a floating contact for a fault signal indication. The accumulator module or up to 2 rechargeable batteries can be charged in normal operation by the voltage supply. The bus voltage is provided by the batteries in the event of a mains failure.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	8	SU/S 30.640.1	GHQ6310049R0111		0.55	1

SU/S 30.640.2

Uninterruptible KNX Power Supply, 640 mA, MDRC **NEW**
Uninterruptible power supply 640 mA with integrated choke for supplying an ABB i-bus® KNX bus line, short-circuit- and overload-proof. LEDs to indicate the status of the bus current, mains voltage, and battery voltage. Wide range input from 85…265 V AC, 50/60 Hz. The accumulator module AM/S 12.1 or up to 2 rechargeable batteries can be charged in normal operation by the voltage supply. The bus voltage is provided utilising the batteries in the event of a mains failure.
Available July 2022

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	8	SU/S 30.640.2	2CDG110275R0011		0.40	1

AM/S 12.1

Battery Module, 12 V DC, MDRC

With lead-gel battery for use in uninterruptible power supply SU/S 30.640.2 and for maintaining the bus voltage during a mains failure for 10 minutes (at full load). Connection is made via 4-core standard cable.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	8	AM/S 12.1	GHQ6310062R0111		0.81	1

KS/K 4.1

KS/K 2.1

Cable Sets

For connection of sealed lead gel batteries SAK7, SAK12 and SAK17 to the uninterruptible KNX power supply SU/S 30.640.2 or the uninterruptible power supply NTU/S 12.2000.1.
If only one battery is connected, the basic cable set KS/K 4.1 with integrated temperature sensor is to be used. In case two batteries are connected in parallel, the basic cable set KS/K 4.1 is to be used for the first battery and the extension cable set KS/K 2.1 is to used for the second battery. It is not permitted to connect more than two batteries in parallel.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
Basic	–	KS/K 4.1	GHQ6301910R0001		0.18	1
Extension	–	KS/K 2.1	GHQ6301910R0011		0.12	1

SAK17, SAK12, SAK7

Sealed Lead Acid Batteries, 12 V DC

For maintaining the bus voltage during a mains failure. For connection to the uninterruptible power supply SU/S 30.640.2 or the uninterruptible power supply NTU/S 12.2000.1.
A maximum of two batteries of the same type can be connected in parallel.
For connection, the cable sets KS/K 4.1 and KS/K 2.1 are to be used.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

18 Ah	–	SAK17	GHV9240001V0013		7.15	1

DR/S 4.1

Choke, MDRC

The device can be used together with a SV/S 30.640.5.1 or SV/S 30.640.3.1 to supply a second line. The device has a reset switch for isolating the bus voltage and resetting the bus devices connected to this line. Connection to ABB i-bus® via Bus Connection Terminal.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	DR/S 4.1	2CDG110029R0011		0.16	1

ABB i-bus® KNX
Power Supply

NTI/Z 28.30.1

Commissioning Power Supply, 28 V DC, 30 mA

For temporary power supply of KNX devices during commissioning. The Euroconnector and plug-in terminal provide faster connection and supply of devices with manual operation (e.g. FCC/S or SA/S).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	NTI/Z 28.30.1	2CDG110096R0011		0.14	1

CP-D 24/2.5

Power Supply Units, MDRC

The supply units that can be used universally as auxiliary power supply in KNX installations or other SELV applications. The devices supply a regulated output voltage of 12 V DC or 24 V DC with a maximum output current of 0.42 A up to 4.2 A. The units are protected against overload, the output being able to sustain a continuous short circuit. LED indication of the status of the supply and output voltage. With a width between one to five modules only, the CP-D range power supplies are ideally suited for the installation in distribution panels. Optimized for world-wide applications: The CP-D power supplies can be supplied with a rated voltage of 100 – 240 V AC.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
12 V DC, 0.83 A	1	CP-D 12/0.83	1SVR427041R1000		0.07	1

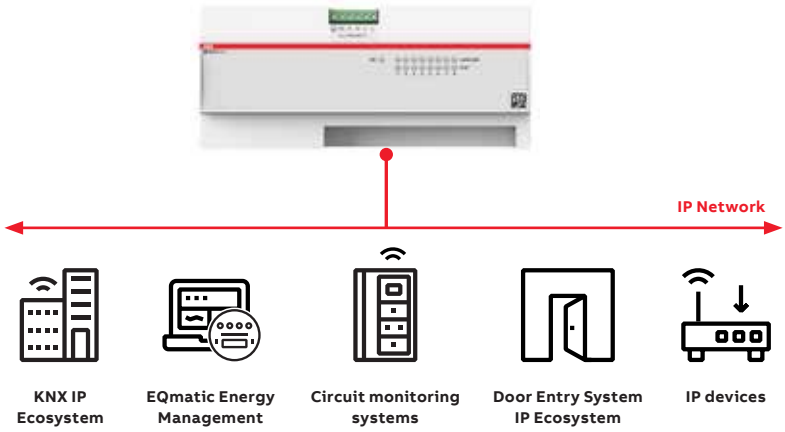
Redundancy Unit for decoupling of two CP-D power supply units	2	CP-D RU	1SVR427049R0000		0.08	1

NTU/S 12.2000.1

Uninterruptible Power Supply, 12 V DC, 2 A, MDRC

Delivers sufficient power for all types of demanding applications with a buffered output voltage of 12 V DC (SELV) and a maximum output current of 2 A. Operating malfunctions of the power supply are signalled via a changeover contact and can be sent for evaluation purposes. Up to two 12 V DC sealed lead-acid batteries (gel cell) can be connected in parallel with the power supply, in conjunction with the KS/K 4.1 and KS/K 2.1 cable sets, or the AM/S 12.1 battery module.



Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB IP switches for DIN-Rail installation

Simplifying IP connectivity inside your cabinet

The IP infrastructure plays an important role for the reliability and availability of all building functions.

The ABB IP switches are two industrial-grade, 8 Ports, Fast Ethernet, unmanaged switches (with and without PoE) designed for installation in electrical distribution boards and easy mounting on DIN-Rails.

The new ABB IP switches are suitable for all applications, segments and markets in which distribution boards with DIN-Rail devices requiring IP connectivity are used.

LK/S 4.2

Line Coupler, MDRC

The line coupler is used in larger installations to connect KNX lines or areas. The lines or areas are galvanically isolated from one another. Telegrams can be filtered to simultaneously reduce the telegram traffic between lines or areas. With ETS 4 (V4.1.2 and higher) the complete group address range of the main groups 0...31 can be filtered. Within a line, the LK/S 4.2 can also be used as a line amplifier (repeater). The device supports long frames (from > ETS5) and KNX Data Secure communication. KNX Data Secure telegrams are processed, filtered, forwarded, or blocked depending on settings.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	LK/S 4.2	2CDG110171R0011		0.1	1

IPR/S 3.5.1

IP Router Secure, MDRC

Connects the KNX bus with the Ethernet network and encrypts communication on the IP backbone. The device uses the KNXnet/IP Secure protocol for communication (Routing and Tunneling). It can be used as a fast line and area coupler. The full filter table for main groups 0-31 is supported. KNX devices can be programmed via the LAN using ETS. For this and further clients 5 Secure Tunneling Servers are available. The IP address can be fixed or can be received from a DHCP server. Power supply via 12…30 V DC or PoE (IEEE 802.3af class 1). The KNX Standard Communication (Multicast) can be switched off. In this case, up to 10 IPR/S 3.5.1 can communicate using unicast communication.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	IPR/S 3.5.1	2CDG110176R0011		0.11	1

IPR/S 3.1.1

IP Router, MDRC

Connects the KNX bus with the Ethernet network. The device uses the KNXnet/IP protocol for communication (Routing and Tunneling). It can be used as a fast line and area coupler. The full filter table for main groups 0-31 is supported. KNX devices can be programmed via the LAN using ETS. For this and further clients 5 Tunneling Servers are available. The IP address can be fixed or can be received from a DHCP server. Power supply via 12…30 V DC or PoE (IEEE 802.3af class 1). The KNX Standard Communication (Multicast) can be switched off. In this case, up to 10 IPR/S 3.1.1 can communicate using unicast communication.

	2	IPS/S 3.1.1	2CDG110177R0011		0.11	1

IS/S 8.1.1

IP Switch, 8 Ports, Fast Ethernet, MDRC

The IP Switch is an industrial-grade, 8 Ports, Fast Ethernet (100 Mbit/s), unmanaged switch with plug-and-play capabilities, designed for installation in electrical distribution boards and small housings for rapid mounting on 35 mm DIN rails (to EN 60715).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	8	IS/S 8.1.1	2CDG120082R0011		0.25	1

ISP/S 8.1.1.1

IP Switch PoE, 8 Ports, Fast Ethernet, 55W, MDRC

The IP Switch PoE is an industrial-grade, 8 Ports, Fast Ethernet (100 Mbit/s), PoE (55 W), unmanaged switch with plug-and-play capabilities, designed for installation in electrical distribution boards and small housings for rapid mounting on 35 mm DIN rails (to EN 60715).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	12	ISP/S 8.1.1.1	2CDG120083R0011		0.41	1

IPM/S 1.1

IP Patch Module, MDRC

The IP Patch Module consists of an RJ-45 module and a mounting adapter for rail mounting.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	1	IPM/S 1.1	2CDG120036R0011		0.1	1

USB/S 1.2

USB Interface, MDRC

Connects the KNX installation with PC software clients such as ETS or visualisations (programming, bus monitor, group monitor). The device supports Long Frames which allows faster download and download of KNX Secure devices.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	USB/S 1.2	2CDG110243R0011		0.08	1

LL/S 1.1

Optical Fibre Interface, MDRC

The device is used to couple two sections of an bus line using an optical fibre link. Ideal for bridging longer distances or to avoid having to implement lightning and overvoltage protection when laying cables between buildings. Two devices are needed to complete a transmission link.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	4	LL/S 1.1	GHQ6050053R0001		0.28	1

ABB i-bus® KNX
Connection and Wiring

DSM/S 1.1

Diagnosis and Protection Module, MDRC

Enables quick diagnosis of the bus state and indicates telegram traffic via an LED. A bus fault is indicated by contacts. The DSM also suppresses transient overvoltages and interference voltage spikes on the bus and thus protects the connected devices.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	DSM/S 1.1	2CDG110060R0011		0.11	1

SPD/S 1.1

Surge Protective Device

KNX surge protective devices are capable of discharging direct & indirect lightning strikes causing induced or conducted overvoltages between lines (differential) and lines to ground (common mode) and are safely kept well below the withstand voltages of the KNX system. They are installed between buildings or KNX zones to provide safe isolation from surges. End of life protection indication is provided from the pushbutton, simply depress the pushbutton and make sure green indicator illuminates. If no indication then replacement is required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

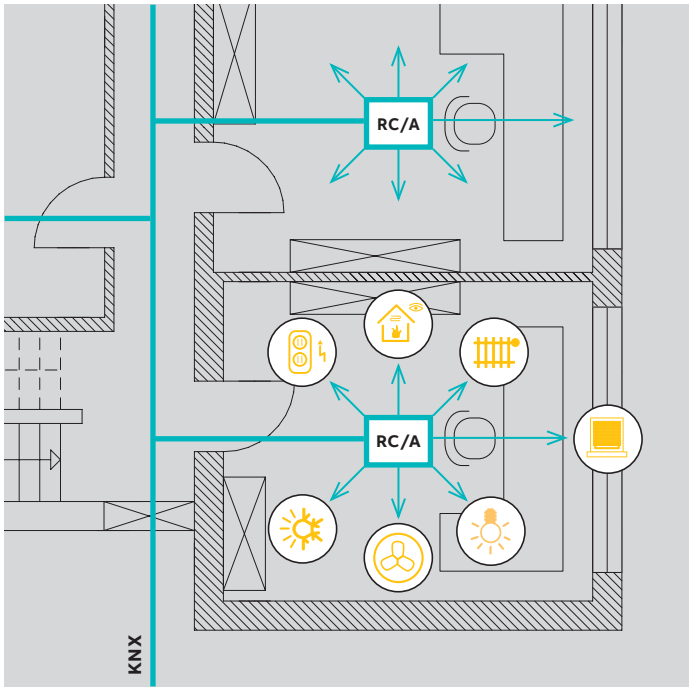
ABB i-bus® KNX

Multifunction Room Automation –
Room Controller



The fundamental principle:
One device per room
A single Room Controller controls all the room functions.
This “one device per room” principle economically and flexibly provides KNX functionality: With 4 or 8 modules, which are simply inserted into the basis device, all loads in this room (lights, blinds, heating, etc.) can be controlled.

Economic security from the outset
The installation concept of the Room Controller, particularly the simple plug-in module concept, provides security and reliability.

- **When planning the infrastructure of a building:**
  - It can be undertaken without exact knowledge of the subsequent user demands.
- **During commissioning:**
  - When user demands have been determined, they are implemented by simple insertion of modules.
- **In operation in a building:**
  - Modifications to the room utilisation are easy to implement.
  - The changes to the cable routing are limited to the room concerned.

Improved fire protection included
The significant reduction in the wiring also considerably reduces the fire load and thus improves safety for persons and assets.

Save on energy and not on comfort
Each room is used differently. The different module assignments of the Room Controller can be configured accordingly.
Just three examples of special building functions that can be implemented with the device.

In the lighting sector
Constant lighting control is not the only conceivable solution.
A high level of comfort can be assured by the control of different light scenes.

Blinds and roller shutters
Not only do they provide pleasant shading, they also assist in responsible use of energy. Intelligent facade controls move the blinds to suit the position of the sun.

Heating/Ventilation/Air conditioning
The control of electrothermal valves on radiators is no problem for the “electronic switch actuator” module of the Room Controller. The ventilation can also be integrated into this automatic control.

ABB i-bus® KNX

Multifunction Room Automation – Room Controller Basis Devices

Configuration example

Room Controller

The Room Controller controls all the functions in the room as a central device. Due to its modular design, it can be adapted flexibly to the required functionality.
On-site installation enables short assembly and commissioning times. A structured cable entry creates clarity and flexibility for changes in function – both during planning and operation.

Special features

- Height 50 mm: optimised for underfloor installation or suspended ceilings
- Room Controller counts as just one bus device
- Robust housing, IP 54 degree of protection
- Manual operation for immediate testing – even without bus voltage
- Comprehensive software functionality

RC/A 4.2

Room Controller, Basis Device for 4 Modules, SM

It accommodates up to 4 plug-in modules and controls their functions. The RC/A 4.2 communicates as a bus device. Any module type can be plugged into each module slot. A manual control for module function test is integrated. Dimensions: (H x W x D) 200 x 275 x 50.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	RC/A 4.2	2CDG110104R0011		0.98	1

RC/A 8.2

Room Controller, Basis Device for 8 Modules, SM

It accommodates up to 8 plug-in modules and controls their functions. Any module type can be plugged into each module slot. The inserted module is automatically detected. The manual operation facility enables an immediate function test even when bus voltage is not applied. Dimensions: (H x W x D) 270 x 316 x 50.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX

Multifunction Room Automation – Room Controller Function Modules

BE/M 4.230.1

Binary Input Modules, 4-fold

Each of the modules provides 4 inputs. There are 3 module types available for the connection of 115/230 V, 12/24 V (AC or DC) or floating contacts to cover all demands.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
230 V	–	BE/M 4.230.1	2CDG110005R0011		0.13	1
12/24 V	–	BE/M 4.24.1	2CDG110006R0011		0.13	1
Contact Scanning	–	BE/M 4.12.1	2CDG110007R0011		0.13	1

SA/M 2.6.1

Switch Actuator Module, 2-fold, 6 A

For switching loads up to 16 A at a maximum continuous current of 6 A.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SA/M 2.6.1	2CDG110002R0011		0.17	1

SA/M 2.16.1

Switch Actuator Module, 2-fold, 16 A

Switches up to 16 A with two floating relay contacts. The feeding voltage is independent from the Room Controller Basis Device. It must thus be applied directly to the module.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SA/M 2.16.1	2CDG110100R0011		0.16	1

JA/M 2.230.1

Shutter Actuator Modules, 2-fold

For controlling two independent blind or shutter drives. There are two module types available for 115/230 V AC or 24 V DC drives.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
230 V AC	–	JA/M 2.230.1	2CDG110003R0011		0.17	1
24 V DC	–	JA/M 2.24.1	2CDG110004R0011		0.17	1

SD/M 2.6.2

Switch/Dim Actuator Module, 2-fold, 6 AX

It enables the switching and dimming of two groups of luminaries in conjunction with electronic ballasts via a 1…10 V control voltage.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SD/M 2.6.2	2CDG110107R0011		0.17	1

ABB i-bus® KNX

Multifunction Room Automation – Room Controller Function Modules

LR/M 1.6.2

Light Controller Module, 1-fold, 6 AX

Enables the switching and dimming of one group of luminaires via a 1...10 V control voltage. The device can be used for constant lighting control in connection with a Light Sensor LF/U 2.1.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	LR/M 1.6.2	2CDG110108R0011		0.13	1

UD/M 1.300.1

Universal Dim Actuator Module, 1-fold, 300 VA

For dimming incandescent lamps, 230 V or low-voltage halogen lamps up to 300 W/VA. The automatic load detection detects the connected load and optimises the control. The minimum load is just 2 W.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	UD/M 1.300.1	2CDG110012R0011		0.18	1

ES/M 2.230.1

Electronic Switch Actuator Module, 2-fold

With 2 overload-proof outputs for noiseless control of heating systems and chilled ceilings via thermoelectric valve drives. Two module types for voltages from 115/230 V or 24 V (AC or DC) are available.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
115/230 V	–	ES/M 2.230.1	2CDG110013R0011		0.15	1
24 V	–	ES/M 2.24.1	2CDG110014R0011		0.15	1

Multifunction Room Automation – Room Master

RM/S 1.1

RM/S 2.1

RM/S 3.1

RM/S 4.1

Room Master

The Room Master is a KNX device with a combination of inputs and outputs. The quantities, technical data and the functions of these inputs and outputs are compiled, so that overall control of all the functions in rooms of a live-in character or apartments, are implemented via a device. Typical areas of application of the Room Master are hotel rooms, hospital rooms as well as apartments in institutions for residential care or in student residential homes. The Room Master with its compact design covers all the basic requirements for Lighting control, Heating/Air conditioning, Shading control (shutters, blinds or curtains - with the RM/S 2.1) and Control of further loads via switched electrical sockets. Function extensions are possible at any time, e.g. devices for dimming via ABB i-bus® KNX.

Overview of the inputs and outputs

	RM/S 1.1	RM/S 2.1	RM/S 3.1	RM/S 4.1	Application possibilities
Binary inputs via contact scanning	8	18	12	8	For connection of switches or push-buttons (light on/off, shutter up/down,etc.) or sensors (window contacts, door contacts, water sensors, condensation water sensors, hotel card readers, etc.)
Outputs 20 A (16 AX)	1	3	4	–	Bathroom fan, switching of electrical sockets
Outputs 16 A (10 AX)	2	1	–	–	Auxiliary electrical heating of fan-coil units (at RM/S 1.1 and 2.1), lighting
Outputs 6 A	3	12	–	8	3-speed fan control (at RM/S 1.1 and 2.1), lighting
Outputs 0.5 A electronic	2	2	–	–	Valve control (heating, cooling) for max. 2 seperate valves
Outputs 6 A changeover contact	–	1	4 (configurable as switch outputs too)	–	Blind or roller blind control

- RM/S 1.1 and RM/S 2.1 are preprogrammed ex factory
- RM/S 3.1 and RM/S 4.1 are programmable with predefined and tested example projects (ETS 4) for different fields of application (office, schools, hotel rooms, ...)
- Commissioning of the preprogrammed devices on the construction site without notebook and ETS programming. With the electrical connection all room functions are available.
- Optional functional extensions via integration into KNX networks with ETS software.

ABB i-bus® KNX

Inputs

ABB i-bus® KNX
Inputs

Wide-range inputs and a streamlined range – The ABB i-bus® KNX Binary Inputs.

ABB i-bus® KNX Binary Inputs serve as an interface for operation of KNX systems via conventional push buttons and switches as well as for processing binary signals (signalling contacts).

In contrast to the existing solutions, where the input voltages of 24 V and 230 V required separate devices, the Binary Inputs now feature **wide-range inputs**, which can process voltage signals ranging from 10 to 230 V AC/DC. This offers the **installer significantly greater flexibility.**

In addition to two devices with 4 and 8 wide-range inputs, the ABB i-bus® KNX Binary Input product range is rounded off by two devices with 4 and 8 inputs with scanning voltage. On these types, a pulsed scanning voltage is provided for connection of floating contacts from the device.

With an identical range of applications, the number of ABB i-bus® KNX Binary Inputs is now reduced from 6 types to 4.

All Binary Inputs feature **a high-quality membrane keypad for comfortable manual operation and display of the device functions.** Input states can be simulated at the device, so that the conventional push buttons, switches or floating contacts do not need to be connected for commissioning purposes. The device functions can be easily tested during commissioning in this way.

The Binary Inputs are powered via the KNX and do not require an additional power supply.

The software functionality of the Binary Inputs has also been extended. It is now possible to send **several switching telegrams with just a single push of a button.**
Especially useful, just as in the case of the Switch Actuators, it is also possible **to copy the channels of the device in the ETS.** The parameters and group addresses of a channel can be simply transferred to other channels in this way. This simplifies project engineering and helps reduce sources of error.

Application
- Operation of KNX systems via conventional push buttons and switches
- Processing of binary signals (signalling contacts)

Benefits
- Flexible application due to wide-range inputs
- Reduced stock requirement due to streamlined product range
- Simplified commissioning using the copy function

Product
- BE/S 4.20.2.1 with 4 inputs for contact scanning and manual operation
- BE/S 4.230.2.1 with 4 wide-range inputs and manual operation
- BE/S 8.20.2.1 with 8 inputs for contact scanning and manual operation

BE/S 8.230.2.1

Binary Inputs, 10 – 230 V, MDRC

Detects AC/DC signals in the voltage range from 12...230 V. The state of the input is displayed via yellow LEDs. The binary inputs enable detection of independent input signals. The devices feature a manual operation pushbutton for each channel. The devices are powered via the ABB i-bus® and do not require an additional power supply.

US/U 4.2

Universal Interface, FM

The universal interface has 2, 4 or 12 channels which can be parametrised as inputs or outputs with the ETS software. Conventional push-buttons, auxiliary contacts, LEDs and the electronic relay ER/U can be connected. The connecting cables can be extended up to 10 m. The contact scanning voltage and the supply voltage for the LEDs are made available by the device, the series resistors for the LEDs are integrated.

WES/A 3.1

WS/S 4.1.1.2

Analogue Input
Used wherever analogue variables should be detected. The sophisticated housing concept of the surface mounted device and the screw terminals of the DIN-Rail device enable quick and clear wiring and improve the speed of connection of the sensors.
Comprehensive range of adjustment for many typical sensors (1 – 10 V, 0(4) – 20 mA, 0 – 1 V, PT 100, PT 1000,...) for detection of temperature, brightness, fill levels, etc.
For active sensors the auxiliary voltage is supplied by AE/S 4.1.1.3; in case of AE/A 2.1 a separate auxiliary voltage supply is required.

Weather Unit, MDRC and Weather Sensor, SM
It is used to detect and process weather data from weather sensor. It supplies data for twilight and brightness levels in 3 directions, rain, temperature, information on day/night, wind speed, date and time. An additional input for the connection of a PT - 1000 sensor is provided. Four value memories which can store up to 24 values each are available. The Weather Unit WZ/S 1.3.1.2 can be operated either with the new Weather Sensor WES/A 3.1 or with the former sensor WES/A 2.1. The Weather Unit also provides the supply voltage for the connected sensor. The Weather Unit has to be supplied with a operating voltage of 85 to 265 V AC. The Weather Unit supports the ABB i-bus® Tool for advanced diagnosis and improved commissioning.
The Weather Sensor WES/A 3.1 detects twilight, brightness in three directions, rain, temperature, day/night, wind speed and the date and time using a GPS module. An additional heating transformer is not required. The new Weather Sensor WES/A 3.1 can be connected to the new Weather Unit WZ/S 1.3.1.2 or to the former Weather Unit WZ/S 1.1.

Weather Station, 4-fold, MDRC
All common weather sensors for wind speed, wind direction, rain, amount of rain, brightness, light intensity, pyranometers, twilight, air pressure, humidity or temperature can be connected to the device. The power supply generates the 24 V DC voltage for external sensors (max. 300 mA). The device can be operated with 85 to 265 V AC, 50/60 Hz. The application software is configured for the detection of weather based data and enables quick sensor programming. The Weather Station supports the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

Outputs
Switch to a smarter tomorrow

Combi Switch Actuators
The 9 Combi devices are combining two applications: switching and shading. The products are ideally made for residential usage to offer greatest flexibility.

Standard Switch Actuators
These 12 devices are building the Standard when it comes to switching applications for commercial buildings. During the development we focused on providing a cost optimized selection of products, that matches the needs of commercial projects.

Professional Switch Actuators
The professional series includes 8 switch actuators made for high switching capacity. This portfolio has been developed to suit the high requirements of industry standards.

ABB i-bus® KNX

Outputs – Combi Switch Actuators

SAH/S 8.6.7.1

Switch/Shutter Actuator, 6 A, MDRC

The compact 6 A combi switch actuator has 8, 16 or 24 independent switching relays. The outputs can be used individually via ABB i-bus® KNX for switching electrical loads or in pairs for controlling 230 V AC roller shutter or blind drives (no electromechanically interlocking). The device features a manual operation, which can also be disabled. Via the manual operation the outputs can be operated manually and the switching or driving status is displayed. The device is powered by KNX and requires no additional power supply.

Switch/Shutter Actuator, 16 A, MDRC

The compact 16 A combi switch actuator has 8, 16 or 24 independent switching relays. The outputs can be used individually via ABB i-bus® KNX for switching electrical loads or in pairs for controlling 230 V AC roller shutter or blind drives (no electromechanically interlocking). The device features a manual operation, which can also be disabled. Via the manual operation the outputs can be operated manually and the switching or driving status is displayed. The device is powered by KNX and requires no additional power supply.

SA/S 2.6.2.2

Switch Actuator, 6 A, MDRC

The switch actuator uses potential free contacts to switch 2, 4, 8 or 12 independent electrical loads via the ABB i-bus® KNX. The device features a manual operation and displaying of the switching state of the outputs. The 6 A device is especially suited to switch resistive, inductive or capacitive loads. The device is powered by KNX and requires no additional power supply.

SA/S 12.16.6.2

Switch Actuator, 16 A, C-Load with Energy Function, MDRC

The switch actuator uses potential free contacts to switch 2, 4, 8 or 12 independent electrical loads via ABB i-bus® KNX. The device has integrated energy functions. This includes independent load current measurement in each output and easy to use calculation of power and energy consumption for each output or groups of outputs. Via an integrated load shedding object an integration in a load control system can be easily realized. The device features a manual operation and displaying of the switching state of the outputs. The 16/20 A, 16 A-AC3 (C-load) device is especially suited for loads with high surge currents e.g. LED or fluorescent lighting (AX) acc. EN60669.

IO/S 4.6.1.1

I/O Actuator, 6 A, MDRC

For the control of loads in residential areas, typically in hotel rooms and apartments.
The I/O Actuators provide binary inputs for the connection of conventional push-buttons and outputs for switching loads. Inputs and outputs can be internally connected by ETS.
By integrating the devices into KNX networks further functions can be realised: e.g. central control or room based emergency calls to a control centre.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX
Outputs

AA/S 4.1.2

AA/A 2.1.2

Analogue Actuator
The Analogue Actuator converts KNX telegrams in voltage (0...10 V) or current (0...24 mA) signals. These analogue output signals are used to influence regulatory processes. For example, devices for heating, air conditioning or ventilation applications can be adjusted in their operation depending on the information, which are transmitted via the bus system. This Analogue Actuator is available in a 4-fold DIN rail version and a 2-fold device with surface mounting housing. The ABB i-bus® Tool is supported for advanced diagnosis and improved commissioning.

ABB i-bus® KNX
Shading Control

Modern building installation enables a high degree of functionality and simultaneously complies with increased security requirements. Due to the structured installation of the electrical components, it is possible to carry out rapid planning, installation and setup as well as achieve cost benefits during operation.

Modern sun protection devices have a significant role, as they must fulfil many demands:
- Anti-glare protection (e.g. PC workstations)
- Utilization of daylight by tracking the sun's position and directing available daylight
- Protecting furniture and carpets from fading
- Regulating the room temperature (overheating protection in summer; harvesting the available energy on cold days)
- Providing protection from people looking in from the outside
- Protection against intruders.

With the Blind/Roller Shutter Actuators JRA/S, the complex requirements on a sustainable and energy efficient automatic sun protection control can be implemented in offices, residential and functional buildings via ABB i-bus® KNX.

The Blind/Roller Shutter Actuators are ideal for the control of drives in the area of sun protection:
- Blinds, exterior blinds, slat blinds and panel curtains
- Roller shutters, roller blinds, screens, vertical blinds
- Awnings, pleated blinds, pleated curtains, etc.

Optimum room air quality via automatic ventilation
The demands for the reduction of energy consumption often results in poor ventilation in today's heavily insulated buildings. The quality of the room air does not comply with the desired and required level.
Natural ventilation is often an effective and efficient method for exchanging the "used" room air and improving the air quality in the room. If the air quality in the room is monitored with sensors (temperature, humidity, CO_2 concentration), the ventilation flaps can be opened automatically and in good time ensuring that the air quality is kept in a comfortable range.

Blind/Roller Shutter Actuators are ideal for control of ventilation elements such as
- Ventilation flaps
- Roof hatches, skylights
- Windows, doors and gates

ABB i-bus® KNX
Shading Control

Automatic travel detection
Travel times for the connected drives can be easily determined during operation with the automatic travel detection feature. It saves time during setup. Furthermore, compensation of age and weather-related length changes to blinds or roller shutters is assured. It facilitates precise positioning of the blinds/shutter when using sun position-dependent control.

Diagnostics
Enhanced diagnostic messages can be issued with the Blind/Roller Shutter Actuators. They are particularly useful during setup or in the event of faults. It is possible, for example, to detect and signal if the power supply to a drive is interrupted.

Copy and exchange
This function allows parameter settings of an output to be copied or exchanged with other freely selectable outputs.
This is possible within a device or in conjunction with several devices. Copy and exchange is useful particularly on projects, where all drives of a facade are controlled identically.
It shortens the setup process and reduces the possible sources of error with parameterization.

Integration in the room temperature control
The intelligent and networked blind and roller shutter control plays an important role in the energy efficient usage of a building. The level of sunlight in the room and heating up due to the sun‘s energy can be controlled in conjunction with the room climate control. The software function “overheat control” prevents unintentional overheating of a room. The blinds are closed in good time. The shutter control can be actively involved in the room temperature control – a requirement for implementing high-efficient buildings compliant to EN 15232.

JRA/S 8.230.5.1

Blind/Roller Shutter Actuator with Travel Detection, 230 V AC, Manual Operation, MDRC

For the control of independent 230 V AC drives via ABB i-bus® KNX. The devices are designed for positioning blinds, roller shutters, awnings and other shading products as well as for controlling doors, windows and ventilation flaps. Additional auxiliary voltage is not needed. The travel times of the drive are detected automatically via current detection. To protect the drives, the output contacts are electromechanically locked against each other. Push buttons are located at the front of the device to control the outputs e.g. during commissioning. The current status of the output is displayed via LEDs.

JSB/S 1.1

Shutter Control Unit, MDRC

Controls shutter and blind actuators according to the position of the sun. The shutter control unit contains the functions of anti-glare protection and daylight redirection for up to 4 facades. Automatic shading can be implemented for every building and climatic control can be supported by the comprehensive range of parameter settings in the ETS.

Lighting Control
ABB i-bus® KNX DALI Gateways

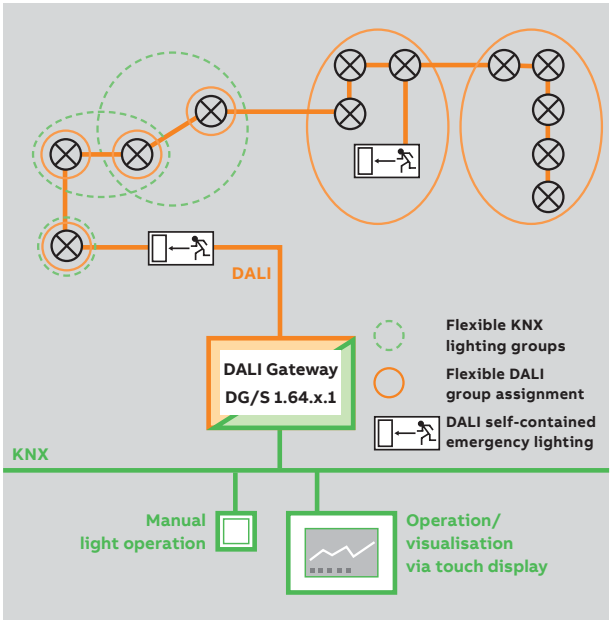
Impressive lighting atmosphere, thanks to the DALI Gateways DG/S 1.64.5.1 and DG/S 2.64.5.1

A DALI Gateway serves as the interface between the KNX installation in the building and the digital DALI lighting control system, and therefore unites the two most important building automation standards.

ABBs DALI Gateway Premium devices enable maximum functionality and flexibility in lighting design thanks to the tunable white and color control function.

ABB i-bus® KNX

Lighting Control – DALI



The ABB DALI Gateways are used to interface between DALI (Digital Addressable Lighting Interface) and KNX installations. Four Gateways are available:
The basic versions DG/S 1.64.1.1 DALI Gateway (1-fold) and DG/S 2.64.1.1 DALI Gateway (2-fold) and on the other hand the premium versions DG/S 1.64.5.1 DALI Gateway (1-fold) and DG/S 2.64.5.1 DALI Gateway (2-fold). All incorporate the DALI power supply.

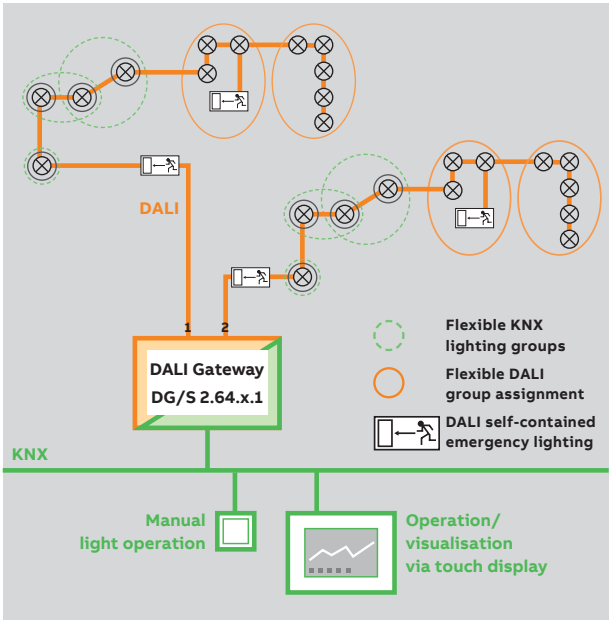
Both, basic and premium Gateways are equipped with emergency lighting function, support the DALI standard EN 62386-202 that specifies DALI emergency lighting (self-contained).
The two DALI Gateways Premium are additionally equipped with tunable white and color control function and supports the DALI standard EN 62386-209.

DALI Gateways DG/S 1.64.x.1
Flexibility by controlling light individually per device or in groups

The DG/S 1.64.1.1 DALI Gateway Basic (1-fold) or DG/S 1.64.5.1 DALI Gateway Premium (1-fold) can install up to 64 DALI devices both via 16 flexible DALI (orange lined group) and KNX lighting groups (green dotted lined group), each with one or more DALI participants. Control and Monitoring via KNX. Control and status feedback can also be carried out via Broadcast. 16 independent Lighting scenes are available.

DALI Gateways DG/S 2.64.x.1
Maximum flexibility combined with highest amount of DALI participants and groups, to meet all customer needs

The DG/S 2.64.1.1 DALI Gateway Basic (2-fold) or DG/S 2.64.5.1 DALI Gateway Premium (2-fold) can install up to 2 x 64 DALI devices both via 2 x 16 flexible DALI (orange lined group) and KNX lighting groups (green dotted lined group), each with one or more DALI participants. Control and status feedback can also be carried out via Broadcast. 2 x 16 independent Lighting scenes are available.



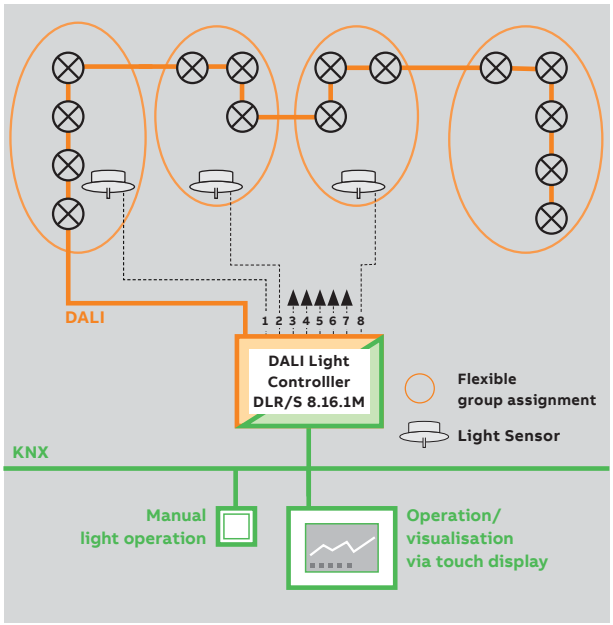


ABB i-bus® KNX

Lighting Control – DALI

DALI Light Controller DLR/S 8.16.1M
Energy through constant lighting control

Control via 16 lighting groups. Up to 8 lighting groups can be controlled with 8 light sensors. Master-slave, staircase light and Scene mode round off the functions.

DALI Light Controller DLR/A 4.8.1.1
Decentralized Constant Lighting Control

The new DALI Light Controller DLR/A 4.8.1.1 is a surface mounting device for switching and dimming of 8 independent lighting groups. A maximum of 64 DALI devices can be connected. The device can be used for 4-fold constant lighting control in connection with 4 Light Sensors LF/U 2.1. Furthermore staircase lighting and master / slave functions are provided. Fault feedback messages, e.g. concerning ballast or lamp failures, can be programmed and activated via KNX. The compact surface-mounted housing allows the decentralized installation in the underfloor or in false ceilings – optimal for the use with Room Controller RC/A.

DALI Gateway DG/S 8.1
The proven technology

Lighting groups are formed via “rigid” hardware wiring.
Fast commissioning as no addressing is necessary.
No readdressing when a ballast is exchanged. 8 x 16 DALI devices.

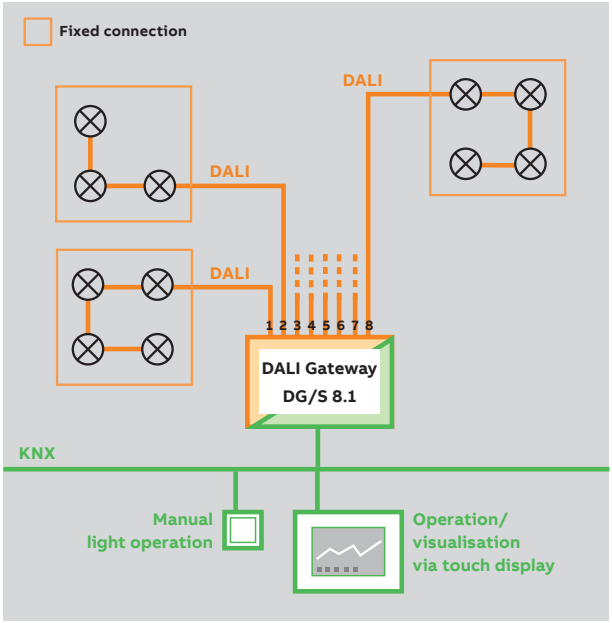

ABB i-bus® KNX

ABB i-bus® KNX

Lighting Control – DALI

DG/S 1.64.1.1

DALI Gateway, Basic, MDRC

The device is used to interface between DALI and KNX installations and incorporates the DALI power supply. One/Two DALI output(s) for up to 64/2x 64 DALI participants. Control and status feedback is carried out via KNX per DALI participants (64/2x 64), with lighting groups (16/2x 64), together in broadcast or per scenes (16/2x 16). Extensive fault and error messages are available. Self-contained emergency converter (64/2x 64) acc. EN 62386-202 will be supported. By means of KNX and emergency converter, different emergency tests (e.g. function and duration test) can be triggered.
Feedback is sent. Slave-, staircase-, force-, block- and scene- function are integrated.
DALI telegram rate can change. For diagnostic use and individual change of the DALI address or group assignment a separate software tool (ABB i-bus® Tool) is available.

2-fold	4	DG/S 2.64.1.1	2CDG110199R0011		0.19	1

DG/S 1.64.5.1

DALI Gateway, Premium, MDRC

For controlling DALI devices via the ABB i-bus® KNX. One/Two DALI output(s) for up to 64/2x 64 DALI participants. DALI power supply is integrated. Control and status feedback is carried out via KNX per DALI participants (64/2x 64), with lighting groups (16/2x 16), together in broadcast or per scenes (16/2x 16). DALI devices type DT1 (Self-contained emergency converter acc. EN 62386-202) and type DT8 (colour temperature Tc / tunable white, RGB(W) acc. EN 62386-209) will be supported. Extensive fault and error messages are available. By means of KNX and DT1 converter different emergency tests (e.g. function and duration test) can be triggered, test results are transferred back to KNX. With DT8 devices Dim2Warm, HCL, set and dim colour temperature are possible. Slave-, staircase-, force-, block- and scene-function are integrated. Feedback is sent. DALI telegram rate can change. Another function is the standby switch-off in combination with a KNX switch actuator (e.g. SA/S).
From the ETS application version 2.0 the color functions RGB(W) and HSV(W) can be used. This allows the color of a lamp to be controlled, dimmed and set. In addition to scenes, 4 sequences per DALI output can be parameterized. It is also possible to integrate the DALI Gateways into a load control system. The DALI Gateways determine the operating hours. All these features can be used for individual EVGs and DALI groups.
For diagnostic use and individual change of the DALI address or group assignment a separate software tool (ABB i-bus® Tool) is available.

DG/S 8.1

DALI Gateway, 8-fold, MDRC

For controlling up to 128 DALI devices. There are 8 separate, independent DALI outputs/ channels available. Up to 16 DALI devices can be connected per channel. The DALI power supply is integrated in the gateway. The functions of switching, dimming, set values and fault indication for lamps and electronic ballasts are available for each output. It is possible to set the lamp burn-in time and 16 light scenes. Commissioning is simplified as no addressing or commissioning of the DALI devices is necessary.

DLR/S 8.16.1M

DALI Light Controller, 8-fold, Manual Operation, MDRC

For switching and dimming of 16 independent lighting groups. A maximum of 64 DALI devices can be connected. The device can be used for 8-fold constant lighting control in connection with eight Light Sensors LF/U 2.1. Fault feedback messages can be programmed and activated via KNX. With comfortable manual operation and status display.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

	6	DLR/S 8.16.1M	2CDG110101R0011		0.26	1

DLR/A 4.8.1.1

DALI Light Controller, 4-fold, SM

Surface mounting device for switching and dimming of 8 independent groups of luminaries. Up to 64 DALI participants can be connected to one DALI control line. When combined with the light sensor LF/U 2.1 the device can be used as a 4-fold light controller for constant light control. Additionally a staircase and master/slave function is integrated.
A great number of status feedback e.g. lamp and ballast fault can be transferred from DALI to KNX. With this functions the DALI light controller is a key factor in every energy efficient building automation. With his surface mounting housing it is possible to insert the device central in false ceiling or underfloor installation.

ABB i-bus® KNX
Lighting Control

LR/S 4.16.1

Light Controller, 1-10 V, MDRC

The device enables the switching and dimming of 2 or 4 independent lighting circuits in conjunction with electronic ballasts. In combination with the Light Sensor LF/U 2.1, the device can be used for constant lighting control. 2 or 4 light sensors can be connected to the controller for precise detection of the lighting conditions.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

LF/U 2.1

Light Sensor, FM

Used for implementing constant lighting control applications in conjunction with light controllers LR/S, LR/M, DLR/S 8.16.1M or DLR/A 4.8.1.1. The scope of delivery includes different optical rods, the connection terminals and the cover for discrete fitting in a room.

	–	LF/U 2.1	2CDG110089R0011		0.07	1

SD/S 8.16.1

Switch/Dim Actuator, 16 A, MDRC

Used for switching and dimming of 2, 4 or 8 independent groups of luminaries with electronic ballasts with 1 – 10 V control interfaces. On each channel the power supply of the ballasts is switched by a floating load relay (16 A – AC1). Every output can be operated manually and features display of the switching state. The device can assume a range of applications thanks to the programming options.

UD/S 4.210.2.1

LED Dimmer, 4-fold, 210 W/VA, MDRC

Multichannel universal dimming actuator optimized for dimming of retrofit LED lamps (LEDi). Also suitable for dimming of incandescent lamps, low-voltage halogen lamps with conventional or electronic transformers, 230 V incandescent halogen lamps and dimmable halogen energy-saving lamps. Automatic load detection (deactivatable). One separate N-terminal per channel. Channel bridging possible in order to increase the maximum load. Outputs can be switched in parallel as required. Minimum load: 2 W. Manual operation on the device is possible also without bus voltage or in unprogrammed state. One LED control button per channel (including status indication) for ON and OFF switching as well as for up and down dimming. Programming of the device is possible without connecting 230 V supply voltage. Comprehensive test and diagnostic functions via the i-bus® Tool. Fast parameterization in the ETS by means of copyable channel templates. With integrated bus coupler.
Rated power at 230 V ~:

- 230 V ~ incandescent and halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
- Dimmable 230 V ~ LEDi: 4 x 210 W/VA to 1 x 600 W/VA in trailing edge mode, 4 x 80 W/VA to 1 x 200 W/VA in leading edge mode.
- Inductive L-transformers with LED/low-voltage halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
- Electronic C-transformers with LED/low voltage halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
- Electronic LC transformers with LED/low-voltage halogen lamps: 4 x 80 W/VA to 1 x 200 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

UD/S 6.210.2.1

LED Dimmer, 6-fold, 210 W/VA, MDRC

Multichannel universal dimming actuator optimized for dimming of retrofit LED lamps (LEDi). Also suitable for dimming of incandescent lamps, low-voltage halogen lamps with conventional or electronic transformers, 230 V incandescent halogen lamps and dimmable halogen energy-saving lamps. Automatic load detection (deactivatable). One separate N-terminal per channel. Channel bridging possible in order to increase the maximum load. Outputs can be switched in parallel as required. Minimum load: 2 W. Manual operation on the device is possible also without bus voltage or in unprogrammed state. One LED control button per channel (including status indication) for ON and OFF switching as well as for up and down dimming. Programming of the device is possible without connecting 230 V supply voltage. Comprehensive test and diagnostic functions via the i-bus® Tool. Fast parameterization in the ETS by means of copyable channel templates. With integrated bus coupler.
Rated power at 230 V ~:

- 230 V ~ incandescent and halogen lamps: 6 x 210 W/VA to 1 x 800 W/VA.
- Dimmable 230 V ~ LEDi: 6 x 210 W/VA to 1 x 800 W/VA in trailing edge mode, 6 x 80 W/VA to 1 x 240 W/VA in leading edge mode.
- Inductive L-transformers with LED/low-voltage halogen lamps: 6 x 210 W/VA to 1 x 800 W/VA.
- Electronic C-transformers with LED/low voltage halogen lamps: 6 x 210 W/VA to 1 x 800 W/VA.
- Electronic LC transformers with LED/low-voltage halogen lamps: 6 x 80 W/VA to 1 x 240 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

Lighting Control

UD/S 2.315.2.1

LED Dimmer, 2-fold, 315 W/VA, MDRC

Multichannel universal dimming actuator optimized for dimming of retrofit LED lamps (LEDi). Also suitable for dimming of incandescent lamps, low-voltage halogen lamps with conventional or electronic transformers, 230 V incandescent halogen lamps and dimmable halogen energy-saving lamps. Automatic load detection (deactivatable). One separate N-terminal per channel. Channel bridging possible in order to increase the maximum load. Outputs can be switched in parallel in groups as required. Minimum load: 2 W. Manual operation on the device is possible also without bus voltage or in unprogrammed state. One LED control button per channel (including status indication) for ON and OFF switching as well as for up and down dimming. Programming of the device is possible without connecting 230 V supply voltage. Comprehensive test and diagnostic functions via the i-bus® Tool. Fast parameterization in the ETS by means of copyable channel templates. With integrated bus coupler.

Rated power at 230 V ~:

- 230 V ~ incandescent and halogen lamps: 2 x 315 W/VA to 1 x 500 W/VA.
- Dimmable 230 V ~ LEDi: 2 x 315 W/VA to 1 x 500 W/VA.in trailing edge mode,
- 2 x 120 W/VA to 1 x 200 W/VA in leading edge mode.
- Inductive L-transformers with LED/low-voltage halogen lamps: 2 x 315 W/VA to 1 x 500 W/VA.
- Electronic C-transformers with LED/low voltage halogen lamps: 2 x 315 W/VA to 1 x 500 W/VA.
- Electronic LC transformers with LED/low-voltage halogen lamps: 2 x 120 W/VA to 1 x 200 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

UD/S 4.315.2.1

LED Dimmer, 4-fold, 315 W/VA, MDRC

Multichannel universal dimming actuator optimised for dimming retrofit LED lamps (LEDi). Also suitable for dimming incandescent lamps, low-voltage halogen lights with conventional or electronic transformers, 230 V halogen lamps and dimmable energy-saving halogen lamps. Automatic load detection (can be deactivated). Separate N-connection per channel. Parallel connection of the outputs possible to increase the output power. Outputs can be connected in parallel in groups. Minimum load: 2 W. Manual operation on device also possible without bus voltage or in an unprogrammed status. Programming of the device also possible without applied 230 V supply voltage. Extensive test and diagnosis functions for the i-bus® Tool. Fast parameter setting in ETS using copyable channel templates. With integrated bus coupler.

Nominal power at 230 V~ mains voltage:

- 230 V~ incandescent and halogen lamps: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control.
- Dimmable 230 V~ LEDi: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control.
- Inductive L-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA. Electronic C-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA.
- Electronic LC-transformers with LED/low-voltage halogen lamp: 4 x 120 W/VA to 2 x 200 W/VA.

Recommendation: Always use bulbs of one type and manufacturer.

HS/S 4.2.1

Outside Light Sensor Interface, MDRC

The device is used for the connection and evaluation of up to 3 Outside Light Sensors LFO/A 1.1. The Outside Light Sensors can be analysed individually or combined. Amongst others 10 logical switching channels for the evaluation of threshold values are provided. Threshold values can be adjusted directly on the device. The device can be used as a twilight switch (1 ... 100 lx) or as a light value switch (100 ... 100.000 lx). One Outside Light Sensor LFO/A 1.1 is supplied with the device.

ABB i-bus® KNX

Movement and Presence Detection

6131/20-24-500

Busch-Presence Detector, Mini, Basic, 8 Meter, SM
Presence detector with 4 individual PIR sensors (single switch-off) and 2 independent channels. Detection range (for mounting height 2.5 m, 3 m and 4 m): 360° (circular). Seated persons Ø: 5 m, 6,5 m and 9 m. Walking persons Ø: 6,5 m, 8 m and 10,5 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application). For switching on/off light bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detector.
2 channels for detector application with integrated monitoring function or up to 2 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area).
Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 - 1000 Lux.
Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
The KNX programming button is accessible without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Scene control via KNX.
Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/29-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.
Dimensions: (L x W x D): 80 mm x 80 mm x 45 mm.
Visible height: 16 mm.
Mounting depth: 29 mm.
Temperature range (device): –5 °C – 45 °C.
Storage temperature range: –25 °C – 55 °C.
Transport temperature range: –25 °C – 70 °C.
Protection class (device): IP 20.
For software and description please check the current Online-Catalogue.

6131/21-24-500

Busch-Presence Detector, Mini, Premium, 8 Meter, SM
Presence detector with 4 individual PIR sensors (single switch-off) and 4 independent channels. Detection range (for mounting height 2.5 m, 3 m and 4 m): 360° (circular).
Seated persons Ø: 5 m, 6,5 m and 9 m. Walking persons Ø: 6,5 m, 8 m and 10,5 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application). For dimming/control the brightness to a defined value in the detection area.
4 channels for detector application with integrated monitoring function
or up to 4 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area)
or up to 2 channels for constant light control (max. 2 outputs for dimming daylight control/ control of two rooflights in the room)
or up to 1 channel for HVAC functions for controlling heating and/or cooling systems and ventilation systems in the detection area. Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 - 1000 Lux. Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
Incl. 5 logic functions (logic gates, gates, delay and staircase lighting).
Integrated object room temperature controller with temperature sensor.
The KNX programming button is accessible without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus. Scene control via KNX.
Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Integrated IR receiver for activation of the KNX programming mode via the IR remote control 6010-25(-500) and 10 freely programmable IR channels (blue and/or white function buttons).
Alternatively via a teachable IR remote control with RC5 code.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/29-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.
Dimensions: (L x W x D): 80 mm x 80 mm x 45 mm.
Visible height: 16 mm.
Mounting depth: 29 mm.
Temperature range (device): –5 °C – 45 °C.
Storage temperature range: –25 °C – 55 °C.
Transport temperature range: –25 °C – 70 °C.
Protection class (device): IP 20.
For software and description please check the current Online-Catalogue.

ABB i-bus® KNX

Movement and Presence Detection

6131/30-24-500

Busch-Presence Detector, Basic, 12 Meter, SM
Presence detector with 4 individual PIR sensors (single switch-off) and 2 independent channels. Detection range (for mounting height 2.5 m, 3 m and 4 m): 360° (circular).
Seated persons Ø: 8 m, 10 m and 14 m. Walking persons Ø: 10 m, 12 m and 16 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application). For switching on/off light bands depending on the room brightness.
Regulation in response to the movement possible.
Using the device as presence and/or movement detector.
2 channels for detector application with integrated monitoring function
or up to 2 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area).
Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 - 1000 Lux.
Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
The KNX programming button is accessible without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Scene control via KNX.
Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/29-xxx(-500) or intermediate ring for VDE flush-mounted box 6131/38-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.
Dimensions: (L x W x D): 91 mm x 91 mm x 45 mm.
Visible height: 23 mm.
Mounting depth: 22 mm.
Temperature range (device): –5 °C – 45 °C.
Storage temperature range: –25 °C – 55 °C.
Transport temperature range: –25 °C – 70 °C.
Protection class (device): IP 20.
For software and description please check the current Online-Catalogue.

6131/31-24-500

Busch-Presence Detector, Premium, 12 Meter, SM
Presence detector with 4 individual PIR sensors (single switch-off) and 4 independent channels. Detection range (for mounting height 2.5 m, 3 m and 4 m): 360° (circular).
Seated persons Ø: 8 m, 10 m and 14 m. Walking persons Ø: 10 m, 12 m and 16 m.
Sensitivity of the watchdog adjustable via ETS-parameter.
Operating modes: Automatic, Automatic switch-off/switch-on (depending on detector application). For dimming/control the brightness to a defined value in the detection area.
4 channels for detector application with integrated monitoring function
or up to 4 channels for constant light switch application (max. 2 outputs for brightness dependent switching of two light bands in the area)
or up to 2 channels for constant light control (max. 2 outputs for dimming daylight control/ control of two rooflights in the room)
or up to 1 channel for HVAC functions for controlling heating and/or cooling systems and ventilation systems in the detection area.
Integrated brightness sensor.
Weighting of up to 2 external brightness values and the internal brightness sensor possible.
Brightness range: 1 - 1000 Lux.
Brightness adjustment via KNX communication objects.
Two-stage switch-off with delay time and reduced brightness.
Incl. 5 logic functions (logic gates, gates, delay and staircase lighting).
Integrated object room temperature controller with temperature sensor.
The KNX programming button is accessible without demounting the detector.
The KNX programming LED can be activated for the walk-test function via KNX.
With integrated KNX bus coupler and power supply via KNX bus.
Scene control via KNX.
Easy Master-Slave operation of several presence detectors possible.
Firmware update via ETS and KNX Firmware Update App.
Integrated IR receiver for activation of the KNX programming mode via the IR remote control 6010-25(-500) and 10 freely programmable IR channels (blue and/or white function buttons).
Alternatively via a teachable IR remote control with RC5 code.
Mounting height: 2 m - 4 m.
Suitable for false ceilings with a board thickness from 9 to 25 mm in combination with a spring clip.
Hole size: Ø 68 mm.
Suitable for surface mounting installations in combination with the surface-mounted box 6131/29-xxx(-500).
Cannot be installed in British Standard or VDE flush-mounted box.
Recommendation: Installation housing from Kaiser HaloX-O (Art.no. 1290-40) with corresponding cover plates (1290-47 or 1290-85 for fair faced concrete) or IBTronic H120-68 from Spelsberg.

ABB i-bus® KNX

Movement and Presence Detection

6179/01-204-500

Watchdog Sensor, Basic, SM

Sensor angle: 220° Range: approx. 16 m. With 2 movement channels. With 1 twilight channel with 3 switching thresholds. No remote control possible via IR remote control KNX. With integrated KNX bus coupler. No additional power supply necessary.
Surveillance density: 92 sectors with 368 switching segments.
Twilight sensor: approx. 1 – 1000 lux. Switch-off delay: approx. 10 sec to 1092 min.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Efficient climate control in one system

ClimaECO the new product range for HVAC automation

Heating, ventilation, and air-conditioning automation – ClimaECO brings HVAC applications together in one holistic solution portfolio based on the standardized KNX system.

HVAC control in one single system
ClimaECO is the holistic heating, ventilation, and air-conditioning (HVAC) automation solution for commercial buildings based on the proven ABB i-bus® KNX system. A solution that seamlessly integrates room automation, central HVAC functions, and management and automation into one system – a significant step towards increasing energy efficiency and reducing operational costs. ClimaECO – making your building more economical, sustainable, and comfortable.

—
When it comes to HVAC you often have to deal with several systems. ABB ClimaECO offers one solution for everything.

HVAC automation from the room level to the management level

HVAC –
multiple functions

Heating, ventilation, and air-conditioning technology is made up of various systems that are now integrated into one system.

KNX –
a standardized system

With the proven ABB i-bus® KNX system it is possible to automate all HVAC applications and combine them into a single solution.

HVAC –
levels

ClimaECO combines the three different levels of HVAC automation, ranging from management level to central HVAC systems (generation and distribution) to room automation (energy consumption).

ClimaECO –
a holistic solution

ClimaECO bundles all functions and solutions for HVAC automation into a single integrated system. This saves you time and effort with planning, integration, and maintenance, while significantly increasing energy efficiency in buildings.

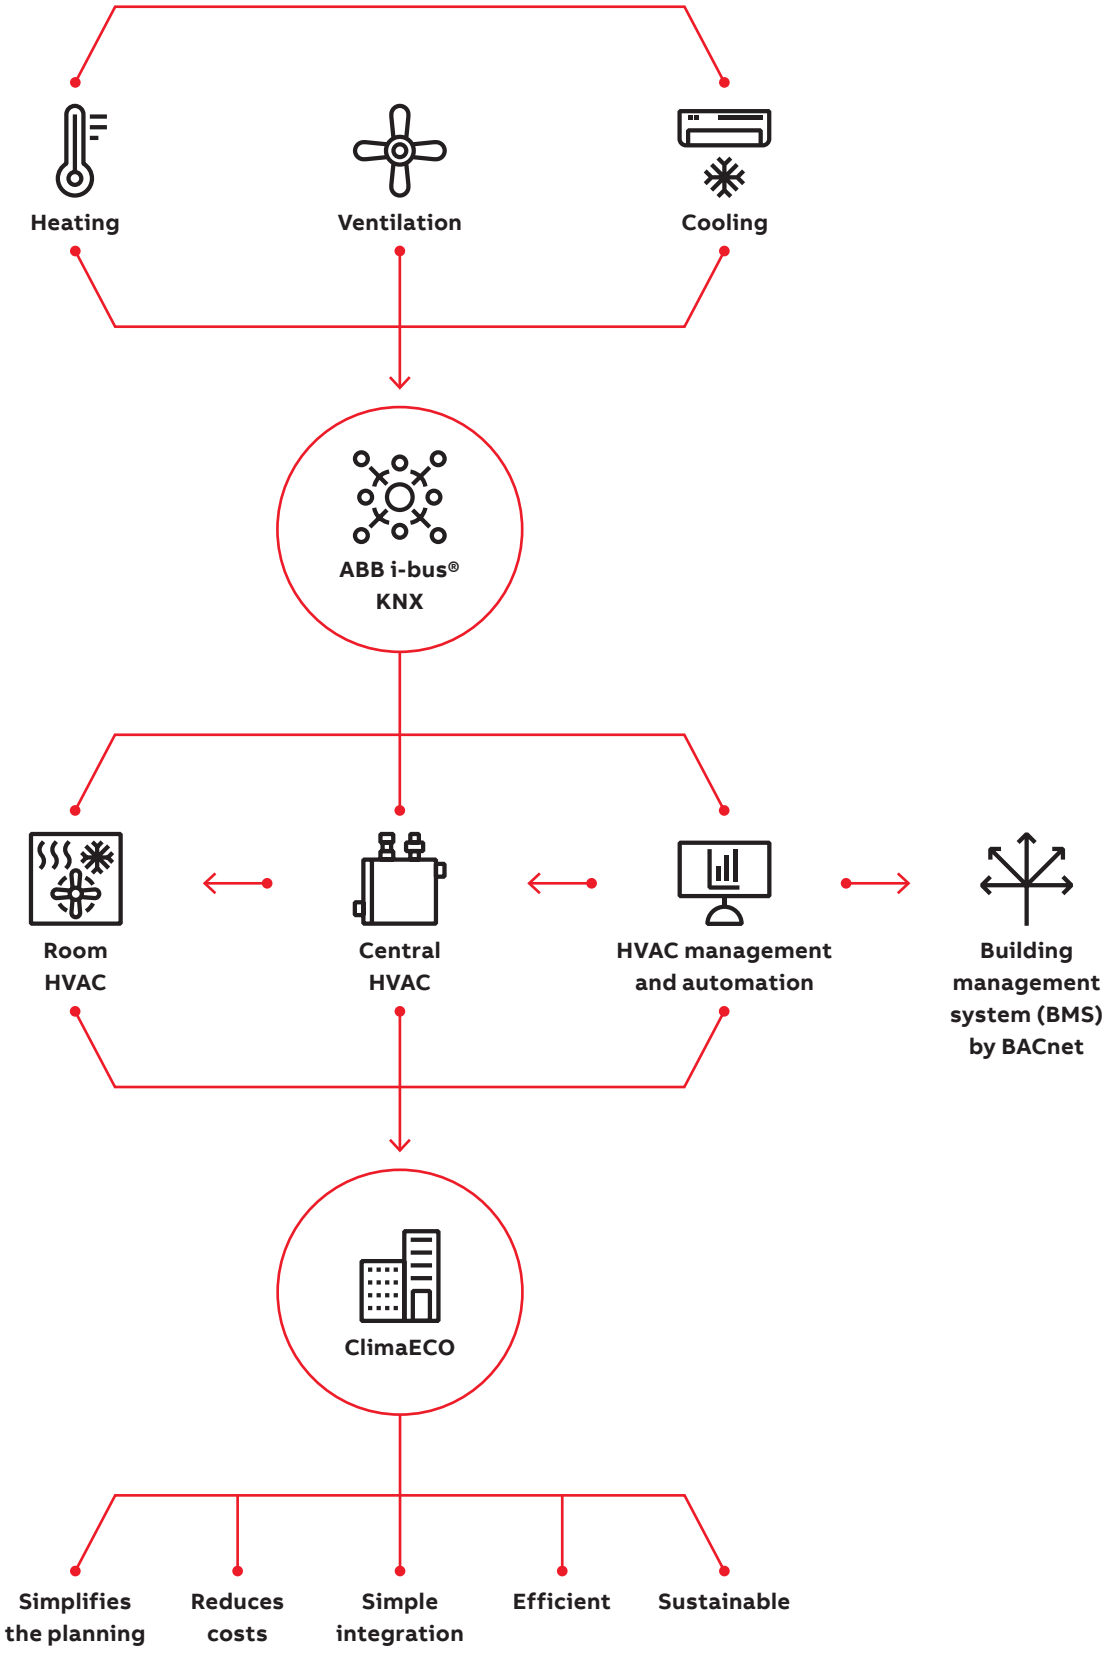

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning – Influencing Variables on Room Climate

Influencing Variables on Room Temperature

Internal and external factors have an effect on the thermal conditions in a room or a building. As an external factor the solar radiation is important for the indoor temperature – particularly with regard to modern architecture with glass fronts. Besides this, the room temperature is strongly affected by the exchange of thermal energy through windows and walls as well as the loss of thermal energy through open doors and windows.

Depending on the intensity, all this interactions influence also the energy efficiency of a building and have therefore to be optimised.
Internal thermal inputs from lighting, devices or persons have also an influence on the room climate. By planning a heating, ventilation or air conditioning system all this internal and external factors have to be considered.

Influencing Variables on Air Quality

The indoor climate in living and working areas has a scientifically proven impact on health, job performance and well-being of people. A suitable indicator for determination of the room air quality is the CO_2 concentration. In addition the values for room temperature and air humidity must be controlled to meet the requirements for a comfortable room climate.

Studies have shown, that high CO_2 concentration in the air influences the well-being as well as the performance and learning ability of people. Besides the normal CO_2 concentration in the air, human respiration is an important factor increasing the CO_2 concentration in a room. Therefore it is important to measure the CO_2 concentration in rooms where many persons are present (schools, conference rooms, open-plan offices). Monitoring of thresholds enables fans to be switched via ABB i-bus® KNX allowing automatic control of the CO_2 concentration and sufficient supply of fresh air.

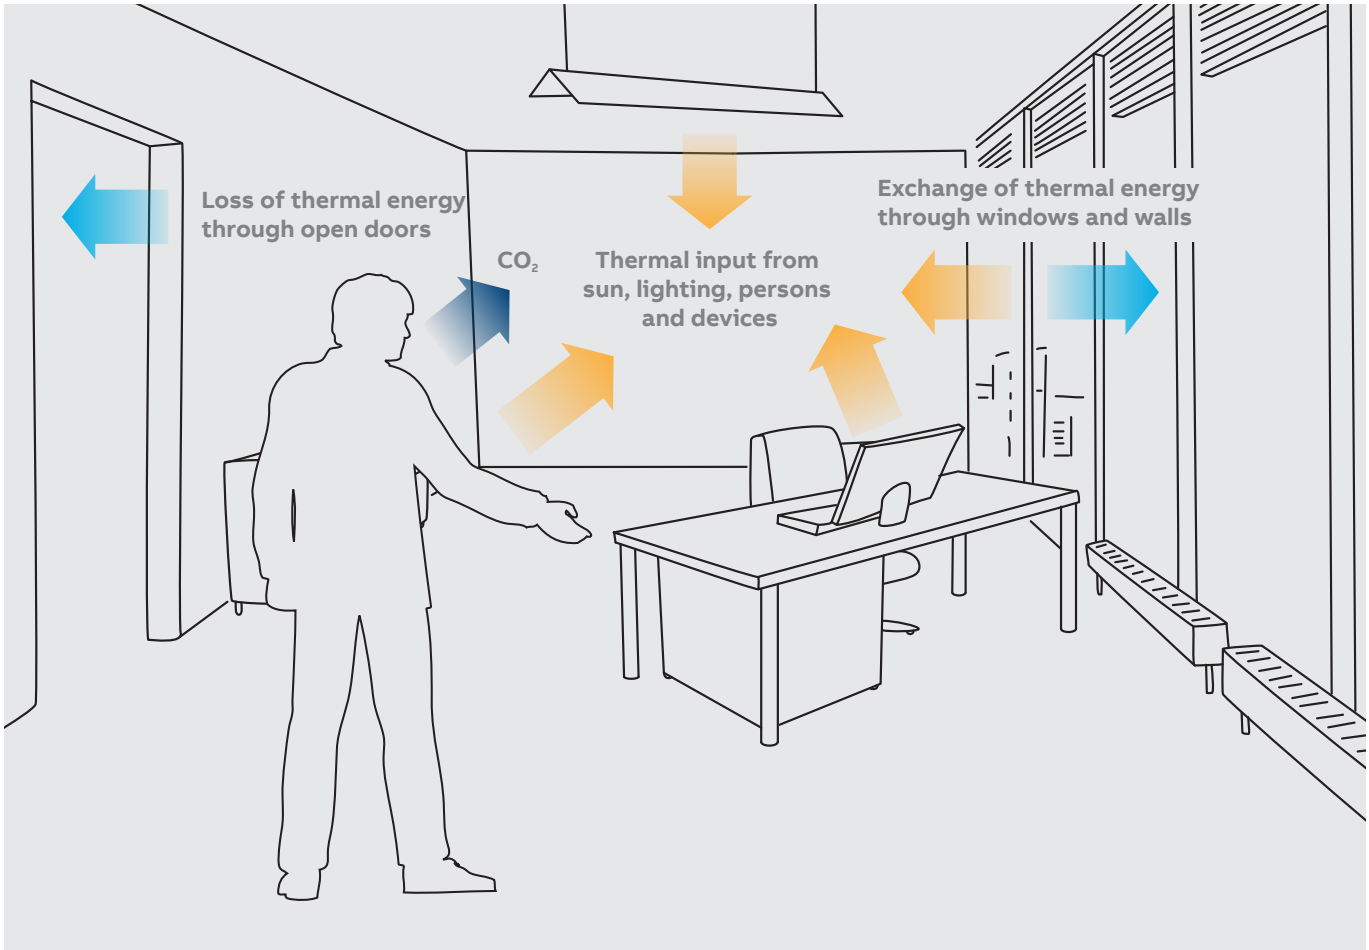

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning – ABB Tenton®

Living and working with a feeling of well-being.
And here the air in the room is one of the most important factors. Because the body takes an ideal temperature for granted and therefore easily reacts to changes. Heated or air-conditioned rooms can be optimally adjusted – to a consistently pleasant ambience.

The KNX ABB Tenton® for stand-alone applications.
The ABB Tenton® with display is a room temperature controller for ventilator convectors or conventional systems for heating and cooling. This option offers complete air-conditioning for rooms. The temperature can be adjusted precisely for personal comfort. The fan speeds can be selected by push buttons. Even very large rooms can be heated or cooled to a comfortable temperature quickly – with additional air-conditioning units. The KNX ABB Tenton® can be operated individually. The bus coupler is integrated into the control element.

Function
- Temperature sensor
- RTC setting
- Illuminated display
- Fan Coil operation for heating and cooling

Features
- Very easy to operate with large, clear display
- Complete air conditioning
- Fan speeds can be manually selected
- Integrated bus coupler
- Surface-mounted, independent switching program
- Available in four modern colours

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning

VC/S 4.1.1

Valve Drive Controller, 4-fold, MDRC

For the control of heating and cooling applications in the room, such as radiator, floor heating or cooling ceiling. The device has 4 channels each for the independent control of a heating or cooling application. Each channel has an electronic valve output for the control of a thermoelectric valve drive, as well as 3 inputs to detect and monitor the room status (use for window contact, dew point sensor, level sensor or temperature sensor). Also it is possible to connect one analog room control unit (SAR/A or SAF/A) to the inputs of each channel. Each channel has its own integrated room temperature controller for the control of the room temperature, which can be used directly to control the outputs of the device. The VC/S 4.2.1 features an easy to use manual operation.
Both devices support the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

VAA/S 6.230.2.1

Valve Drive Actuator, 230 V, MDRC

For controlling thermoelectric valve drives (e.g. TSA/K) in heating/cooling systems at 24...230 V AC. The outputs are protected against short circuits and overload and can be switched on or off via manual push buttons during commissioning.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
6-fold	4	VAA/S 6.230.2.1	2CDG110116R0011		0.17	1
12-fold	8	VAA/S 12.230.2.1	2CDG110117R0011		0.3	1

VAA/A 6.24.2

Floor heating Controller, 6-fold, SM

For the control of up to twelve thermoelectric 24 V DC or analog 0-10 V valve drives (two per channel). With integrated power supply for the valve drives. The device has an integrated relay output to switch the heating circuit pump in dependence of the control value of the valve outputs. The valve outputs can be controlled by the internal or an external room temperature controller. The device is suitable for the installation in the (floor) heating distribution system.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	VAA/A 6.24.2	2CDG120061R0011		0.5	1

ES/S 4.1.2.1

Electronic Switch Actuator, 4-fold, 1 A, MDRC

Controls thermoelectric valve drives (e.g. TSA/K) in heating and cooling systems. Each output (24...230 V AC/DC) is protected against short-circuit and overload. With manual operation and status display for each output.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ER/U 1.1

Electronic Relay, 1-fold, FM

The device is used in combination with the universal interface US/U x.2 and a room thermostat to control the temperature in individual rooms. The thermal valve drives of the radiator valves are operated both noisefree and with a low rate of wear.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

6164/11 U-500

Heating Actuator, 1-fold, 230 V, FM

1 electronic output (noiseless). For connecting thermoelectric actuating drives. The device possesses three additional input. Rated voltage: 230 V~, +10% /–10%, 50 Hz – 60 Hz. Input polling voltage 5 V. Output Rated current: 25 mA, cos φ 1. Output voltage: 250 V~. The bus can be connected via enclosed terminal block.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	6164/11 U-500	2CKA006151A0247		0.09	1

ST/K 1.1

Electromotor Valve Drive

The drive is a proportional valve drive for controlling heating valves and is mounted on thermostat valve bases. Valve Adapters VA10, VA78 for conventional valves are supplied.
The control is carried out via a continuous KNX room thermostat. The actual valve position is indicated by 5 LEDs. The valve drive has two binary inputs for a presence contact and/or window contact and for further signal indication. With integrated Bus Coupler.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning

TSA/K 230.2

Thermoelectric Valve Drives

For opening and closing valves in heating, ventilation and air-conditioning systems. Both variants (230 V and 24 V) feature a plug-in connection cable (1 m) and a splash-proof housing. The mounting on the valve is easily implemented using the Valve Adapter VA/Z xx.1.

SUG/U 1.1

Split Unit Gateway, FM

The Split Unit Gateway forms the interface between the KNX system and many manufacturers' air conditioners, so-called split units. The device converts the KNX telegrams into infrared commands and transmits them to the split unit. The transmitter of the supplied cable is bonded directly onto the split unit's receiver. The split unit then no longer receives the commands from a remote control. Instead, it can be operated via any KNX sensors or via a visual display system. The device is put into operation with the ETS, and a free ETS app is available to select the split unit model. Auxiliary voltage is not required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

Heating, Ventilation and Air Conditioning

FCC/S 1.1.1.1

Fan Coil Controller, 2 x PWM, 3-stage, MDRC

For the control of fan coil units. Via two electronic outputs, two thermoelectric or one motor-driven valve drive can be controlled for heating and cooling. For the fan control the devices features three relay outputs. A relay output switches an additional load of up to 16 A, such as auxiliary heating. Over 4 inputs the room status can be detected and monitored (Use for window contact, dew point sensor, level sensor or temperature sensor). Also it is possible to connect one analog room control unit (SAR/A or SAF/A) to the inputs of the device.
The device has an integrated room temperature controller for the control of the room temperature, which can be used directly to control the outputs of the device. The FCC/S 1.1.2.1 features an easy to use manual operation.
Both devices support the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning

LGS/A 1.2

Air Quality Sensor with Room Temperature Controller, SM

For the control and measuring of the room air quality and temperature. Accurately measures the $C0_2$ concentration (390…10.000 ppm), humidity (0...100 %) and temperature (0…50 °C) in a room and sends the values on the bus. By using the integrated thresholds the measured values can be monitored. With the integrated controller it is possible to control the room temperature and HVAC actuators. With integrated Bus Coupler.

	–	LGS/A 1.2	2CDG120059R0011		0.06	1

AC/S 1.1.1

Application Controller, MDRC

The AC/S Application Controller has predefined Automation Modules for a holistic HVAC Automation Solution from Central HVAC to Room Automation. For example Schedule, Set Point Calculation, Heat Curve Calculation, Data Logging and Device Monitoring. Furthermore own Automation Modules can be created by a graphical Logic Editor. By a web based User Interface the whole system can be monitored and managed.
The AC/S 1.2.1 has additional a built in bidirectional KNX-BACnet/IP Gateway (Server) for data exchange with superordinate Building Management Systems.
The Engineering is done completely by the ETS. An additional external Software is not required. The device has a KNX TP port.

ABB i-bus® KNX

Heating, Ventilation and Air Conditioning

HCC/S 2.1.2.1

Heating/Cooling Circuit Controller, 2-fold, 0-10 V, MDRC

For the control of heating or cooling circuits. The device has 2 channels, each with an analog output to control the mixing valve (0…10 V) of a heating or cooling circuit as well as a relay output (5 A) to switch the pump of the circuit. Via 3 binary inputs it is possible to monitor the status of the pump (via potential free contacts) and integrate these feedback into the control of the pump. The flow and return flow temperature are measured and used for the calculation of the control value for the valve output in the integrated controller. The set point temperature is received via the KNX bus. By bundling both channels of the device it is also possible to use it for double pump systems.

HCC/S 2.2.1.1

Heating/Cooling Circuit Controller, 2-fold, 3-point, MDRC

For the control of heating or cooling circuits. The device has 2 channels, each with two electronic outputs to control a motor-driven mixing valve (3-Point) of a heating or cooling circuit as well as a relay output (5 A) to switch the pump of the circuit. Via 3 binary inputs it is possible to monitor the status of the pump (via potential free contacts) and integrate these feedback into the control of the pump. The flow and return flow temperature are measured and used for the calculation of the control value for the valve output in the integrated controller. The set point temperature is received via the KNX bus. By bundling both channels of the device it is also possible to use it for double pump systems.

BCI/S 1.1.1

Boiler/Chiller Interface, 1-fold, MDRC

As interface between the KNX system and a heat generator or chiller. Via an analog output (0…10 V) the set point or set point adjustment temperature can be transmitted to the heat generator/chiller. The set point itself is received via KNX. Via two binary inputs the device can monitor the status of the heat generator/chiller (via potential free contacts) and send it on the KNX bus. A relay output (5 A) is included to switch or enable/disable the heat generator/chiller. With an additional relay output (5 A) the pump of the heat generator/chiller can be switched on and off. Via 3 binary inputs it is possible to monitor the status of the pump (via potential free contacts) and integrate these feedback into the control of the pump.
The device supports the ABB i-bus® Tool for advanced diagnosis and improved commissioning.

BAC/S 1.5.1

Building Automation Controller, KNX, MDRC **to be discontinued**

Powerful freely programmable KNX Building Automation Controller with flexible expandable In- and Output Modules.
Automation programs based on the globally standardized IEC 61131 programming languages can be executed. Both the graphical and textual programming languages are supported.
The programming software ABB Automation Builder based on the established Codesys software enables the easy creation and reuse of automation programs as well as the integration of software libraries. The ABB Automation Builder is integrated with the ETS through an ETS app.
Up to 1000 KNX group objects can be used in the automation program. The KNX relevant settings such as physical address, linking of the controller group objects with group addresses and the KNX sending conditions are set in the ETS and can also be changed at any time without ABB Automation Builder.
The building automation controller has two Ethernet network interfaces. The use is flexible adjustable. In addition to KNXnet/IP communication, these can also be used for other protocols and functions. Among other things, for Modbus TCP and a web server with a freely customizable web interface for display and operation of the system.
The controller has a built-in display, an RS-232/485 interface for i. a. Modbus. The internal clock and data variables can be buffered by a battery. The internal memory of 8 MB can be extended by the memory card slot.

ABB i-bus® KNX

Automation, Logic and Time Control

LM/S 1.1

Logic Module, MDRC

Used to solve a varied range of project-specific control tasks and can implement 3 functions simultaneously. The following functions are available for selection: logic gate, filter, time delay, multiplier, min/max value detector, temperature comparator, toggle values, threshold detection, format converter, scenes, increment/decrement values, staircase lighting.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	LM/S 1.1	GHQ6310080R0111		0.1	1

ABL/S 2.1

Application Unit Logic, MDRC

Allows the compilation of complex logical functions by simply combining different logic elements and gates using a graphical user interface as an ETS plug-in and does not require additional software. 50 logical elements, 50 gates, 30 timer modules and 10 comparators are available.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	ABL/S 2.1	2CDG110073R0011		0.12	1

ABZ/S 2.1

Application Unit Time, MDRC

It provides a yearly time clock program with 15 daily routines (800 switching events), a weekly schedule and allowance for 100 special days. Additionally, the unit can control up to 300 participants in 30 macro groups, that can be triggered using a single command. In this way, each time controlled switching event can cause a series of actions. The switching times can be modified with the free PZM software without using ETS. PZM Software and additional information on www.abb.com/knx.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	ABZ/S 2.1	2CDG110072R0011		0.12	1

ABA/S 1.2.1

Logic Controller, MDRC

The device provides extensive logic functions. The logic is defined via a graphic editor integrated in the ETS. Up to 3000 logic gates are possible.
The generated logic can be tested by a simulation function. User-defined function blocks can be created and saved for taking them over into other projects.
The device requires an auxiliary voltage, either 24 V DC or Power over Ethernet (PoE). If timer functions are used the date and time has to be provided via KNX/TP.

TR/A 1.1

Time Receiver GPS, SM

For the reception and processing of the GPS signal, as well as for brightness and temperature measurement. The sensor measures the brightness and outside temperature and sends them on the KNX bus. Likewise the time, date and geographical coordinates are send to the KNX bus. Additionally the sunrise and sunset times are also send to the bus. With integrated Bus Coupler.

ABB i-bus® KNX

Visualisation, Display and Signalling

UK/S 32.2

Universal I/O Concentrator, 32-fold, MDRC

Used to connect push buttons or signal lamps, e.g. to an operating/display tableau. It has 32 channels which can be freely parameterised as inputs/outputs using the ETS software. The device requires an external 12 or 24 V DC auxiliary power supply, (e. g. NT/S 24.800).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

MT 701.2, WS
with T-RAHM, WS

Display and Control Tableau, FM

For indication of switching status, fault reports and measurement values. Using the robust push buttons, electrical consumers can be manually switched, values can be set in addition to timer programs and light scenes. The alarms can also issue an acoustic warning. The FM wall box simplifies mounting.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Centralised and comfortable operation
The new freedom

Modern home automation has never been as comfortable. With intuitive gestures, the way you operate your smartphone or tablet. This is how you control light, blinds, heating, music and much more with the utmost in comfort. Individual or in single scenes. Just as you please via expressive touch panels or via app of mobile devices. Both at home and while travelling. Discover the possibilities of limitless freedom.

—
01

Device features worth mentioning:
- Capacitive touch with the support swiping gestures
- Up to 30 pages with a maximum of 480 control elements
- 30 logic functions
- 80 fault and alarm messages which can be stored in a list and exported
- Up to 30 weekday timers with astro function which can be set by the user
- A favourite page with a maximum of 16 favourite control elements
- Indoor video station for door communication
- Presence simulation

The colour display has a diagonal of 17.78 cm (7") in 16:9 format. The special feature of the Busch-SmartTouch®: It has a minimal mounting height only 13 mm. The panel is available in two colour versions – in genuine black or white glass. This allows it to be perfectly combined with the carat® and Busch-axcent® switch ranges. The bottom design bar made of brushed stainless steel lends the panel that visual refinement.

In combination with the mounting frame the Busch-SmartTouch® can be mounted on the old ABB control panel box, normal flush-mounted boxes or also on the new ABB-Welcome table stand.

—
01 Busch-SmartTouch®, black

Busch-ControlTouch®

Smartphones, tablets and smartwatches or PCs turn into a practical remote control, thanks to the Busch-ControlTouch®. It connects the KNX installation with the IP network and controls all KNX functions in the building.

Works with SONOS

New features:
- Works with Sonos
- RTC integration compatible with ClimaEco
- Background pictures with bubble controls

Device features worth mentioning:
- External access the the KNX system
- Easy creation of individual scenes
- Integrated weekly timer (with astro function)
- Integrated logic editor
- Recording and display of diagrams
- Sonos and Philips Hue connection
- Connection of IP cameras with MJPEG protocol possible
- Integrated rights and user management
- Alarm messages via e-mail and/or push notification
- iOS widget for fast access from the mobile terminal device

The applications for iOS and Android create intuitive operation the same as the PC application. The compact 4 MW DIN rail can be parameterized via the MyBuildings portal, thereby making it completely future-oriented for future system extensions and modifications. In addition: Many useful services (e.g. external access to the KNX system or a notification service) through connection to the MyBuildings portal Cloud are very easy to implement. Whether in a single residential unit, in a large apartment block or at the workplace – the Busch-SmartTouch® intelligently controls the home automation. Either locally or while travelling. With the Busch-SmartTouch® you have complete access at all times.

Busch-VoiceControl® KNX
Control completely by voice

The building of the future recognises the needs of its users. It reacts individually – automatically and without being asked to do so.

—
01 Busch-VoiceControl® KNX

—
01

- Approved solution for the systems Google Assistant, Amazone Alexa, Apple HomeKit and Alice Yandex
- Integration of lighting, heating and blind control systems
- All voice commands can be used simultaneously
- Control up to 150 functions
- HomeKit certification allows control of the KNX system from other Home-Kit devices, such as the iPad, iPhone and Apple TV

ABB i-bus® KNX

Visualisation, Display and Signalling

6136/07-811-500

Busch-SmartTouch® 7", SM

Free programmable KNX touch display as a control, notification and operation center for the entire house. Works as a video indoor station with the ABB-Welcome Door Entry System. During the conversation a picture of the visitor can be taken and stored in the picture memory. For the display and operation of the following KNX standard functions: switching, dimming, slider, blind, RGBW LED control, step switch, RTC, scene switch, display element, audio control. With scene and logic functions, presence simulation and time programs.
Displays alerts and malfunctions. Available with induction loop for connecting to hearing aid devices. Programmable with up to 16 functions per page.
External power supply: 20 – 32 V DC (SELV) or through the ABB-Welcome bus. The freely programmable touch display (7") comes with a resolution of 1024 x 600.

ABB RoomTouch®
As individual as your home

—
The HD IPS touch display can be mounted in landscape format or portrait format for intelligent building control (alignment can be decided on-site)

- Up to 30 control elements
- The full hand activates a pre-defined “coming in” scene or function
- Acoustic and haptic feedback
- Integrated proximity and brightness sensor
- Integrated room temperature controller
- Anti-glare mode for use in dark
- Integrated binary input
- Integrated external temperature sensor input
- Commissioning via ETS5 and DCA tool

ABB i-bus® KNX

Visualisation, Display and Signalling

6136/27-811-500

ABB RoomTouch® 5", FM

Freely programmable KNX touch display as a control, notification and operation center for e.g. your room. For the display and operation of the following KNX standard functions: switching, dimming, value slider, blind, RGBW LED control, step switch, RTC, scene switch, display element, audio control and Split Unit control. With scene and logic functions and time programs. Displays alerts and malfunctions. Programmable with up to max 30 functions. With a switch input and a temperature sensor input. With a proximity sensor and brightness sensor. It has haptic and acoustic feedback. There is a primary function for entering the room.

External power supply: 20 – 32 V DC (SELV). The freely programmable touch display (5") comes with a HD resolution of 720 x 1280 and a view angle of 160°.

CT/S 2.1

Busch-ControlTouch® 2, MDRC

Busch-ControlTouch® is a visualisation server for mobile end devices (iOS and Android) and Window computers. Not only for visualise and control your complete KNX installation but also:

- Sonos Bridge with a complete integration of the Sonos API (Works with Sonos) (NEW)
- Can be used as a Bridge between KNX and Philips Hue
- Visualisation of your IP camera's, with support of pan, till and zoom
- Unlimited time programs and scenes and they can be edited by the end user
- Integrate Webpages into your design for maybe weather information or traffic information
- Alarm messages can be sent as email or as a push notification (including a snapshot of an IP camera) but can also be heard on your Sonos System (NEW)
- Can be used as a UPnP bridge, so you can control e.g. your UPnP enabled Receiver via KNX
- Statistics and charts support with 5 period types (hour, day, week, month, year)
- Unrestricted personal profiles with an unlimited number of pages and controls
- Easy to use presence simulation, that can be edit by the end customer and with no limitation of participants
- Visualisation functions: dimmer, RGB(W) control, switch, blind and shutter, heating/cooling, air conditioning, scenes, button row (max. 6 buttons), IP camera, status display, value transmitter, Sonos control, and UPnP control
- Has a flexible and unrestricted Script Editor for more complex logical functions based on LUA (NEW)
- Automatic cloud backups including scenes, time programs and presence simulation data (NEW)
- Complete commissioning is online and live. You can do it from everywhere and you don't need to drive to the customer
- First commissioning with Wizard support (NEW)
- Loading the software into the device can be done without Internet
- Device has a direct KNX interface or can communicate via an IP Interface via the bus
- Visualisation as a list view and/or with background pictures with round, rectangle or transparent controls (NEW)
- Secured remote access via our Cloud solution (For this function, you pay a monthly fee)
- Functional extensions and updates via firmware and software updates.

Security:
This device supports extensive security options to protect your installation and privacy. All communication between the app your installation and our cloud is encrypted and always based on the highest possible standards. The communication between the different parts always requires a username and password. The end user can also protect pages with a pin code, Touch ID or Face ID. Additionally end users can set up local users with access rights to shield certain parts of the home installation or allow them access only to specific parts.
External power supply: 10-36 V DC (SELV)
Control element: freely programmable touch surfaces
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): 0 °C to 70 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 60 mm, Module width: 4 MW

VCO/S 150.2

Busch-VoiceControl® 2, MDRC

A certified voice control gateway for the combination of a KNX system with a voice control system. Acts as a gateway and guarantees that you can operate the KNX components in a house and query their status using Apple, Amazon, Google and Yandex devices. This component makes it possible to operate the lighting, blind or room temperature controller using simple voice control. Up to 150 functions can be used. Busch-VoiceControl® is an official certified HomeKit accessory. Complete web-based commissioning. Compatible with ABB i-bus® KNX. External power supply: 10-36 V DC (SELV).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

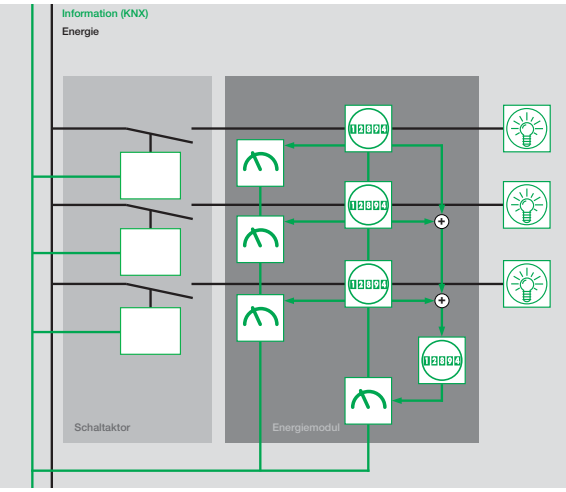
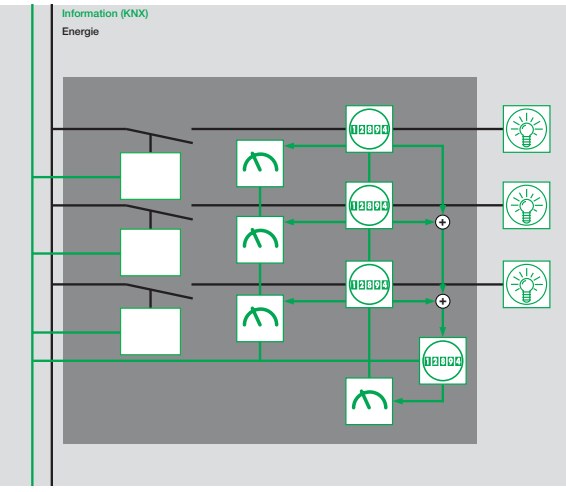
ABB i-bus® KNX
Energy Management

ABB offers various solutions for decentral energy measurement on the basis of the KNX standard.



Version 1

Electronic energy meters make the current energy values available on the KNX bus system in conjunction with a KNX interface. The measured data can be intermediately stored, evaluated and visualized from here.



Version 2

The Energy Module can record the energy consumption for the individual devices. It is used particularly when upgrading existing KNX systems and wherever energy measurement is required without switch functions. It facilitates a detailed and transparent insight into the energy consumption of a building. The current meter values can be sent and evaluated.

Version 3

The Energy Actuator facilitates control of the connected consumer loads via the ABB i-bus® KNX. For each of the three switch channels, the individual consumption can be measured in the same way as for the Energy Module. For every channel, the proven functionality of the ABB i-bus® KNX Switch Actuators are available.

SE/S 3.16.1

Energy Actuator, 3-fold, 16/20 AX, MDRC

Records the energy consumption of the connected electrical loads in the load circuit. Various electrical variables can be monitored and load peaks can be limited by simple load control. The 3 output channels can be manually operated and display the current switching state. The Energy Actuator can switch resistive, inductive and capacitive loads The switching capacity corresponds to the SA/S X.16.6.1.

ZS/S 1.1

Meter Interface Module, MDRC

It records consumption and measured values of the electrical energy consumption meters. Using an infra-red interface, the ABB energy meter types of the A- and B-series are incorporated. The information and data which is read can be used, for example, for cost centre accounting, energy optimisation, monitoring of installations and visualisation.

The following values are available (depending on the meter type):

Meter reading	
Active energy	Tariff 1-4, total
Reactive energy	Tariff 1-4, total
Power values	
Active power	L1, L2, L3, total

Energy Management
ABB EQmatic

With the new ABB EQmatic series, ABB offers a solution for storing, displaying and analyzing the consumption data of electricity, gas, water and heat meters. Thus, energy flows and costs in the building can be monitored and made transparent.

User interface offers helpful features
The commissioning, evaluation and analysis of the data are carried out via the web-based graphical user interface. For a detailed monitoring the devices offer several analysis functions such as historical data analysis, benchmark functions, cost analysis, instantaneous values etc.

Increased Energy efficiency
This serves to increase energy efficiency and as a basis for further operational optimizations, based on the energy management standard ISO 50001.

High flexibility
Various export functions such as scheduled reports via FTP or E-Mail are available for further data processing.
The data sharing options via Modbus TCP and API allow the integration into supervisory systems.

—
Intuitive web-based user-interface to access meters easily. It can be flexibly configured to meet specific demands. For a quick overview, metering data and analytic charts can be individually configured and arranged here.

ABB i-bus® KNX

Energy Management

QA/S 1.16.1

Energy Analyzer, KNX, 16 Devices, MDRC

Compact and web-based stand-alone device for energy management applications. For monitoring, logging, displaying and analyzing consumption data of up to 16 electricity, gas, water or heat meters via KNX TP. In addition measured values such as temperature, humidity, etc. can be processed and displayed. The alarm function allows early warning (e.g. via E-mail) if any value exceeds defined limits. The user interface provides graphical analysis functions, e.g. dashboard, historical data, instantaneous values, benchmark functions, cost allocation according to consumer groups and more. In order to increase energy efficiency, defined loads can be selectively switched off with the load control function if they exceed a configurable load limit. For further processing data can be exported cyclically (e.g. every month) via E-mail or upload to FTP server. Several data sharing options (e.g. Modbus TCP, Rest API) allow the communication with other systems.

ABB i-bus® KNX
Energy Management

QA/S 3.16.1

QA/S 3.64.1

Energy Analyzer, M-Bus, MDRC*

Compact and web-based stand-alone devices for energy management applications.
For monitoring, logging, displaying and analyzing consumption data of up to 16 or 64 electricity, gas, water or heat meters via M-Bus. Automatic detection for ABB EQ meters (A/B-Series). Access to the device via web browser. The user interface provides graphical analysis functions, e.g. dashboard, historical data, instantaneous values, benchmark functions, cost allocation according to consumer groups and more. For further processing data can be exported cyclically (e.g. every month) via E-mail or upload to FTP server.
Several data sharing options (e.g. Modbus TCP, Rest API) allow the communnication with other systems.
* Pure M-Bus Master, no data routing from M-Bus to KNX

ABB i-bus® KNX
Safety and Monitoring

SMB/S 1.1

Fault Monitoring Unit, MDRC

It is used to detect and manage up to 100 fault messages which are processed within the unit and can be forwarded to a display unit. Furthermore, an optical and an acoustic collective status signal is provided. Messages can be acknowledged and data losses can be reported.
The devices support message formats to DIN 19 235: messages with continuous lighting, new value messages with simple flashing light, initial value messages with simple acknowledgement, motor messages. Current values can be centrally scanned.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	SMB/S 1.1	GHQ6310085R0111		0.12	1

EUB/S 1.1

EIB Monitoring Unit, MDRC

Monitors up to 100 bus devices in KNX systems, which can be divided into 5 groups. The devices are monitored to ensure their presence and minimum functionality (send and receive). Monitoring can be undertaken based on the physical address or the group address. A total of four different monitoring modes are available. No additional power supply required, the device is powered from KNX bus.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	2	EUB/S 1.1	2CDG110066R0011		0.12	1

BDB/S 1.1

Data Logging Unit, MDRC

It detects local operation cycles and operating hours to plan the maintenance or durability evaluation of the devices. For each of the 35 channels to be monitored, limit values can be set and a message sent if this limit is exceeded. The logging of operating hours can be predetermined for the total or remaining time. These values can be modified via communication objects. No additional power supply required, the device is powered from KNX bus.

ABB i-bus® KNX

Security – Alarm System KNX

The compact solution for security applications – the Security Terminals
The Security Terminal provides a compact security solution for KNX applications for detection and signalling of intrusion, personal attack and technical hazards. They are used as the interface between the security technology sensors and KNX.

Depending on the configuration, the devices feature 2, 4 or 8 inputs – so-called detector circuits or zones. They are used for monitoring connected passive detectors (e.g. magnetic contacts, glass break sensors, etc.) to the ABB i-bus® KNX as well as for connection of floating contacts in applications with enhanced security requirements.

Through the connection of security technology and KNX, the detectors employed can, in addition to the security functions, also be used for heating control (e.g. window contact signal for control of the heating valve) or lighting control (e.g. central switch off of the lighting when the alarm logic is set).

The Security Terminals can be used as autonomous systems with the integrated alarm logic, in conjunction with the Security Module SCM/S or with an Intrusion Alarm Panel GM/A 8.1 or L240.

The application program offers several functions for security applications, such as

- Direct and delayed setting
- Internal setting with occupancy and external setting when absent
- Setting of the connected detector types
- Reset input and setting input
- Detector monitoring
- Zones (detector circuits) can be switched off
- Different types of alarms
- Setting for freely programmable relay outputs, e.g. for direct control of signalling devices.

ABB i-bus® KNX

Security – Alarm System KNX

SCM/S 1.1

Security Module, MDRC

The module provides the necessary logic functions to link the various KNX devices (e.g. zone terminals) to a security system. Up to 64 different zones can be evaluated via communication objects. Arming, operation and display are also implemented using communication objects. The device has a freely programmable relay output for connection of a signal encoder. An uninterruptable KNX power supply with battery back-up is recommended for security function buffering on mains failure.

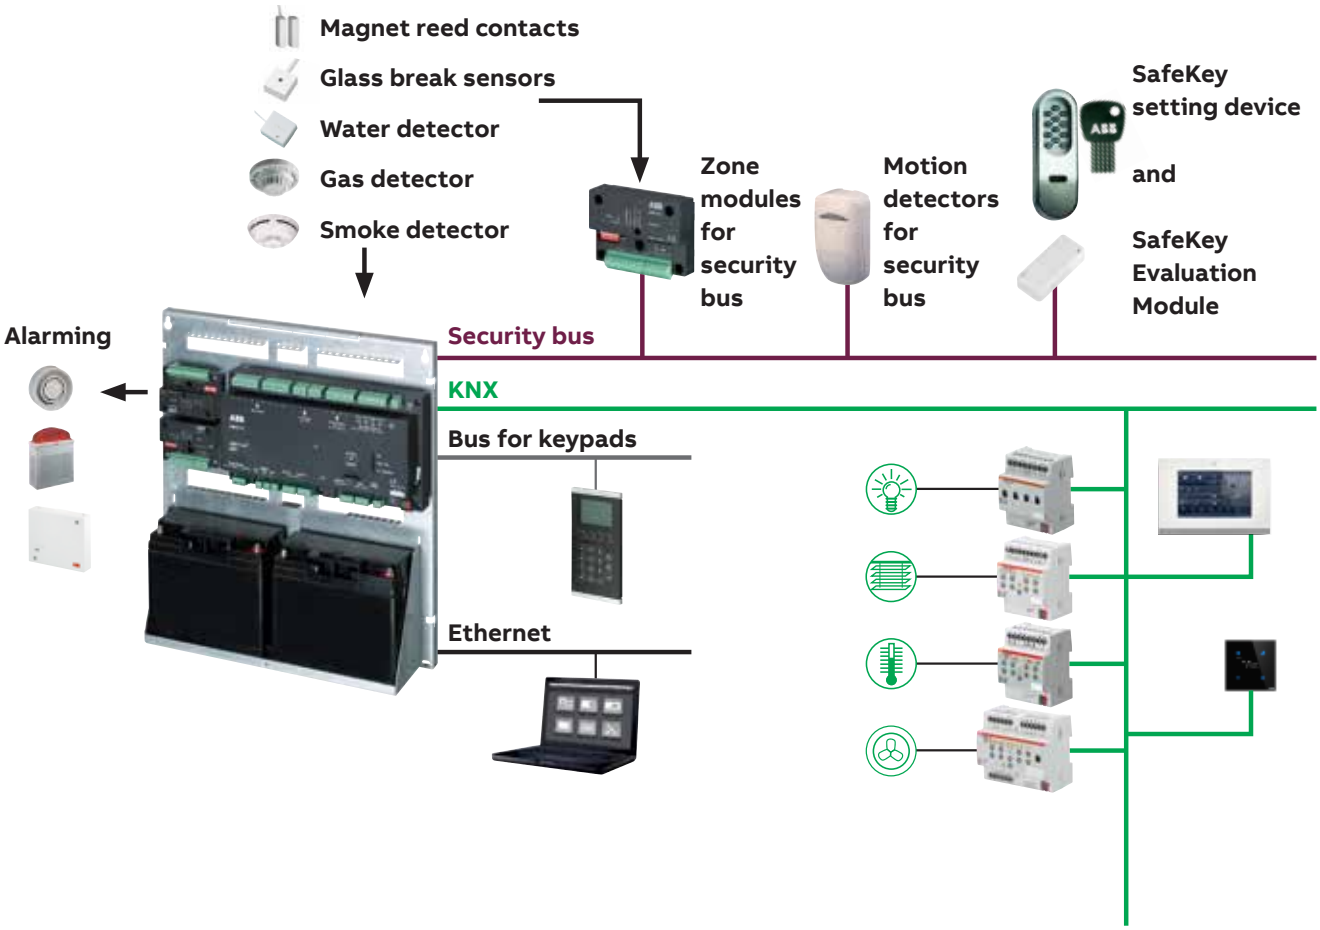
ABB i-bus® KNX

Security – Alarm System GMA



Professional alarm system for KNX experts

With the KNX Security Panel GM/A 8.1 ABB presents the first security system that is compatible with both, the international KNX standard (14543-3-x ISO / IEC) and the international standard for alarm systems (ISO / IEC 62642). Therefore the KNX Security Panel GM/A 8.1 is ready for a worldwide usage and expands business opportunities of nearly 40,000 KNX partners in 124 countries. The system is the perfect solution for projects ranging from simple to high security requirements.

ABB i-bus® KNX

Security – Alarm System GMA

A complete product product portfolio: One system – all interfaces

To fulfill the project requirements ABB provides the user besides the panel and keypad a complete product portfolio for professional alarm technology as well as known solutions for all trades of KNX building automation.

The KNX Security Panel is for universal usage for all kinds of hazardous situations in buildings like intrusion, personal attack, smoke, gas- and water leakage.

ABB i-bus® KNX

Security – Alarm System GMA

KNX Security Panel without cover, integrated zone modules and batteries

- Ethernet connection for programming, diagnostics and operation via a standard webbrowser
- Direct inputs for security sensors
- Keypads
- Internal, external or remote alarming
- Security bus for security sensors, zone modules and setting devices
- KNX interface to display alarm states via displays of building automation and to control automatic building functions with support of security sensors.

The KNX Security Panel provides all needed system interfaces: An ethernet connection is used for programming, diagnostics and operation via a standard webbrowser as well as integration into the building network. The security sensors will be connected directly to the panel inputs or via the security bus, where the setting device for the system is also connected. Furthermore the panel provides interfaces for the also newly developed keypads and for internal, external or remote alarming. Finally the integrated KNX interface allows on the one hand to display alarm states via displays of building automation and on the other to control automatic building functions with support of security sensors.

ABB i-bus® KNX

Security – Alarm System GMA

GM/A 8.1

KNX Security Panel, SM

For the protection of small to medium residential or commercial properties against intrusion and technical faults. The Security Panel is suitable for up to five logical areas. It has 8 integrated zones for detectors, a Security Bus for Bus-detectors, Bus-Zone Modules and Setting devices, Ethernet connection (RJ45) for programming, operating and displaying system status via Web-Browser and an integrated KNX interface. The Security Panel GM/A 8.1 complies with the requirements to VdS classes A, B and C, to the European Standard EN 50131, Grade 1 to 3 and to ISO/IEC 62642 Grade 1 to 3 as one-area system.

BT/A 1.1

BT/A 2.1

Keypad for GM/A 8.1

Used to operate and display the information of the system states of the GM/A 8.1 KNX Security Panel. System messages are displayed on a four-line LCD display. The multifunction and special keys mean that all the system functions can be operated easily. Safety-relevant functions are protected by a user PIN. Fife Keypads can be connected to each Security Panel. There is no need for an external voltage supply, the keypads are supplied via the Keypad-Bus. The device can be used in systems with increased system requirements according to VdS Class A, B and C, DIN VDE 0833 Level 1, 2 and 3 and EN 50131/IEC 62642 Level 1, 2 and 3.

ABB i-bus® KNX

Security – Components

MG/A 4.4.1

Zone Module, 4-fold

To connect to Security Panel GM/A 8.1 via the Security-Bus. For expansion of the Security-Panel by 4 detector zones. Used for connection to the exterior perimeter detectors such as magnetic reed contacts and passive glass break sensors. The module has 4 zones to which several detectors can be connected. The status of each zone is displayed with a status LED. The Zone Module delivers the control signals and the supply voltage for the external detectors. There is no need for an external voltage supply, the Zone Modules are supplied via the Security-Bus.

IR/XB

Passive IR Bus Motion Detector, 15m, VdS B

For direct connection to the security-bus of the Intrusion Alarm Panel GM/A 8.1. The motion detector with passive infrared technology is VdS class B / EN Grade 2 certified. It facilitates monitoring of an area with an infrared range of up to 15 m.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
VdS B/EN Grade 2	–	IR/XB	2CDG230023R0011		0.15	1

EIM/XB

Dualtech Bus Motion Detector, 15m, VdS B

For direct connection to the security-bus of the Intrusion Alarm Panel GM/A 8.1.
The Dual-Motion Detector combines proven passive infra-red technology with temperature-independent microwave technology. The combination of both functional principles results in a detector featuring high immunity to false alarms, even with unfavourable ambient conditions, and which still has high detection security. The detector is VdS class B / EN Grade 2 certified. It facilitates monitoring of an area with an infrared range of up to 15 m.
For use in EU countries only.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

MC-C 1.1

Rolling Door Reed Contact

The Rolling Door Reed Contact Set is mounted mainly on rolling, sliding, and tilting doors.
The contact housing is mounted on the ground (a flat support surface is required).
Only screws made of anti-magnetic material may be used for mounting.
Due to the weatherproof and mechanically stable design of the contact housing, the circuit is mostly protected against damage when rubber-tired vehicles drive over it.
The 4-wire cable is protected by a plastic-coated metal hose.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
VdS Class B, EN Grade 2	–	MC-C1.1	2CDG250006R0011		0.3	1

ABB i-bus® KNX

Security – Components

TD-C 1.1

Gas Detector with Relay Contact

The Gas Detector is used for monitoring gas leakage of domestic and commercial rooms. It detects gases like propane, methane and butane as well als acetylene, city gas and natural gas. The detector can be connected to ABB intrusion and fire alarm control panels, as well as ABB i-bus® binary inputs via a potential-free relay contact. Suitable as a stand-alone device. An external power supply with 12-24 V DC is required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	TD-C 1.1	2CDG220023R0011		0.167	1

SWM 4

Water Detector for Detector Groups

A resin-encapsulated water detector with gold-plated Termipoint pins, detects water ingress, e.g., pipe fractures, ingress of groundwater and sewage, water damage caused by washing machines and dishwashers etc. before the damage becomes too expensive.
For operation directly on detector circuits of intrusion alarm panels or security terminals.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SWM 4	GHQ4030001R0004		0.16	1

SWM 4/RN

Water Detector with Relay, 12 V

Features a potential free changeover contact output, an LED parallel output and a LED display. The detector resets itself automatically when the affected area dries out. The device draws its power from an external 10 ... 23 V DC voltage source.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SWM4/RN	GHQ4030001R0012		0.23	1

FC650/O

Optical Smoke Detector

Optical smoke detector in threshold alarm technology that detects smoke according to the scattered-light principle. The detectors feature an alarm indicator on the detector head that is visible from all angles, and which can be be triggered with a permanent magnet for test purposes. A detector base is provided for mounting and cable connection purposes into which the detector is simply screwed in via the bayonet connection. Each detector is equipped with an alarm LED, which displays the stored alarm in the event of an a alarm Detector/base diameter: 110 mm. VdS approved.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	FC650/O	2CDG430079R0011		0.09	1

FC650/TMAX

Thermal Maximum Detector

Static Heat Detector in threshold alarm technology, – trigger temperature 78 °C. The detectors feature an alarm indicator on the detector head that is visible from all angles, and which can be be triggered with a permanent magnet for test purposes. A detector base is provided for mounting and cable connection purposes into which the detector is simply screwed-in via the bayonet connection. Each detector is equipped with an alarm LED, which displays the stored alarm in the event of an a alarm. Detector/base diameter: 110 mm. VdS approved.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	FC650/TMAX	2CDG430081R0011		0.09	1

FC600/BREL

Relay Base, 12/24 V

Enables system-independent connection of the FC650 series fire detector to systems or devices that are not specifically designed for this detector technology. Examples include Intrusion Alarm Panels, KNX Security Terminals, elevator controls or other signal processing equipment. The detector base must be supplied by either a 12 V or a 24 V DC voltage supply. A floating 30 V DC/1 A changeover contacting is provided for transferring an alarm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	FC600/BREL	2CDG430051R0011		0.08	1

ABB i-bus® KNX

Security – Components

6833/01-84-500

Busch-Smoke Alarm® ProfessionalLine

For early detection of smouldering fires and open fires with smoke development indoors according to the photooptical measurement principle (Tyndall). With installed Lithium battery. Battery life min. 10 years. With test button and muting. Can be networked with up to 12 detectors using the radio module. Can be networked via 2-wire twisted pair cable with up to 12 detectors. Acoustic alarm: installed horn (85 dBA). Cyclic functional test. Including attachment material – VdS certified. Conform to EN 14604 studio white.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

studio white	–	6835/01-84-500	2CKA006800A2723		0.268	1

6827-84

Busch-Smoke Alarm® Radio Module

For wireless networking of multiple Busch smoke alarms® / heat alarms.
With installed Lithium battery. Battery life min. 10 years. Radio frequency: 868 MHz.
Range: max. 100 m outdoors, max. 30 m indoors.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	6828	2CKA006800A2514		0.268	1

6829-84

Busch-Smoke Alarm® Relay

For connecting external systems, e.g. KNX. Relay contact, floating changeover contact 230 V~ max. 5 A. Cable connection: up to 2 x 2 x 1.5 mm². With installed radio module. Rated voltage: 230 V~.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
studio white	–	6829-84	2CKA006800A2515		0.268	1

6824-84

Busch-Smoke Alarm® Remote Control

For service purposes. With muting, test and search function.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
studio white	–	6824-84	2CKA006800A2516		0.268	1

SSS

Indoor Siren, 12 V DC

Electronic solid-state siren with intermittent tone for alarm purposes in indoor installations. External dimensions: ø x H = 90 x 37 mm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SSS	GHV9270001V0001		0.17	1

SSF/G

Siren in Enclosure

An aluminium protective housing with additional protective enamel coating. Protected against sabotage by a case tamper contact. The alarm inputs are wired onto a terminal strip. With fixing screw (M4) for potential equalization on the base.
Dimensions: H x W x D = 200 x 205 x 88 mm; Color: RAL 9002 Environmental class III to VdS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	SSF/G	GHQ3050017R0001		1.64	1

SSF/GB

Siren with Strobe

An aluminium protective housing with additional protective enamel coating. Protected against sabotage by a case tamper contact. The alarm inputs are wired onto a terminal strip. With fixing screw (M4) for potential equalization on the base.
Dimensions: H x W x D = 258 x 205 x 88 mm; Color: RAL 9002 Environmental class III to VdS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

Bright prospects for all

We bring energy to buildings and the people within them – whether these are modern single residential units, all kinds of hotels or ground-breaking industrial buildings. For us, power is more than just what comes from the wire. Why? Because it forms the basis of a comfortable life. As a result, we are constantly improving every little detail, looking for the most userfriendly solution and bringing people and technology together. That's what our large company is all about – we do everything to give you the freedom of choice.

A vision for the perfect building
What's key is the synergy created in the building as a whole. It starts with the power that's created using renewable sources of energy, which then feeds into the things that this power can do for the people within – from the infrastructure in the buildings right through to the emotional experience of the occupants, from the lowest parking level right through to the most exquisite penthouse suite. Only when everything intertwines are values created, which you can experience with all your senses.

Building automation from ABB governed by our core values
All ABB solutions are checked against the six core values and constantly improved until they meet the very highest requirements in terms of technology, management and the guests.

Economic efficiency
A hotel building is for the people within. This is the only way to measure the value of what's inside. Every day, development gives rise to performance.

Safety
The building automation technology can't take a break. With a complete system, the management can count on it as a whole – and on the fact that everything is functioning safely.

Energy efficiency
You need energy for absolutely anything you wish to accomplish. That's why, for ABB, it is crucial to never waste energy and to make the most of it at the same time.

Durability
The future always comes quicker than you think. It must be easy to upgrade the technology. The new fits perfectly with what is already there.

Design
Hotels are more than just buildings. They shape the city and are sometimes a key part of the skyline. The aesthetics count – from the largest detail right down to the smallest.

Sustainability
A safe future starts today with technologies which combine all energy-saving capabilities with quality of life.

ABB i-bus® KNX
Guest Room Management

Room Outdoor Sensor with Bus Coupler, FM
Ordering possible only in connection with the design ID. The icons and/or texts are configured by means of a web configuration tool. Freely programmable function ”Do not disturb“, ”Bell“ and ”Make up room“. Push switch function: switching / dimming / blind / sending values / scenes etc. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. With integrated KNX bus coupler. With integrated temperature sensor and proximity function. The bus connection is provided via the enclosed bus terminal.

ABB i-bus® KNX

Guest Room Management

TR/U 1.1

Transponder Reader, MIFARE

The “transponder reader” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4A @24 V AC/DC) and one input to be used for connecting external conventional card-holder (e.g. Millenium wiring accessories card-holder). The output can be programmed in three different ways: “Linked to access control”, receiving in this case switching commands from the device itself (according to transponder card validation); being a standard KNX Switch actuator output, able to be controlled by every KNX standard devices; “linked to card-holder”, that means that the relay is switched according to closing/opening internal input contact available on transponder reader. The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX telegram (for example for DND/MUR purposes). The transponder reader can be configured with MiniMAC software (will be discontinued) or RoomGuard Software in order to behave as transponder programming device. The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
	–	TR/U 1.1	2CSY235683R2001		0.050	1

TH/U 1.1

Transponder Holder, MIFARE

The “transponder holder” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4 A @24 V AC/DC) and one binary input to be used for connecting external conventional push-button for switch, dimmer and shutter functionalities, or for example for connecting window contact or similar.
The output can be programmed as “Linked to access control”, receiving in this case switching commands from the device itself (according to card insertion/removal); or being a standard KNX Switch actuator output, able to be controlled by every KNX-standard devices. The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX.
The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
The transponder reader is available for ABB Millenium wiring accessories range.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

LT/U 1.1.MS

Transponder Reader, Mylos

The transponder reader is used for access control in the hotel, residential and commercial sectors (office buildings, business centers, laboratories, etc.). The device is equipped with two bistable relays (8 A, 250 V AC), one of which can be assigned to control electronic lock, and three voltage-free, non-optically insulated inputs; the 5-V DC scanning voltage is available on the COM terminal.
The transponder reader requires a 10...32 V DC/12...24 V AC external power supply to ensure its operation even with bus voltage failure.

RoomGuard software

RoomGuard software **NEW**

RoomGuard software for configuration and supervision of ABB Access Control range; Tacteo, Millenium, Zenit, Chiara, and Mylos.
RoomGuard is a web-based scalable solution (licensing model based on number of rooms) accessible by any browser providing greater accessibility for hotel and maintenance staff. Main features and functionality include: Access control (management of keys, groups, time bands and staff cards, definition of access to common areas, and more), room state monitoring, guest check in/check out, front desk room load monitoring, management of guest and employee databases, Occupancy and access records and statistics, front desk management of room climate, and maintenance and diagnostics. RoomGuard features an intuitive and easy to use interface, with straightforward installation and configuration, seamless integration with building automation and third-party software integration.
RoomGuard software replaces MiniMAC software.
Available December 2022

Notes

PEONIA®

All in one for smarter life

PEONIA® is a highly smart panel integrated with lighting, temperature, electric doors and windows, air conditioning, floor heating, scene and proximity sensors.
All these functions make your life smarter and easier than ever.

reddot award 2019
winner

A unique proximity sensor system that can automatically activate the background lights and scenario mode when you are close to the panel. In addition, the in-built sensor can monitor the temperature. Additional information like PM 2.5, VOC and humidity receive from the KNX bus can be displayed. This information can be displayed on the screen directly. When the air quality is bad, the sensor will open the window and air condition system automatically. This brings convenience and comfort to your daily life.

ABB i-bus® KNX

User Operation – Design Ranges – PEONIA®

PEBR/U2.0.1-201

PEONIA® control element 2/4-fold with Room Temperature Controller, FM
With integrated bus coupling unit and temperature sensor. Proximity sensor, device locking and energy saving function Switch contact left/right. Replaceable rocker without icon.
Push button function: switching/dimming/blind/value sending/step-type switch/ lightscene/ fan function.
With base-load operation.
The controller is a constant room temperature controller for ventilator convectors (fan-coil) in 2 and 4 pipe system and conventional heating and cooling systems.
The fan stage can be switched manually or automatic mode.
Delicated capactive touch RTC control button with vibration feedback, Single/Master/Slave configuration.
LCD display: Setpoint/actual temperature, Fan speed, Operating state, Operating mode.
Configurable: time, PM2.5, CO_2, Humidity, VOC, temperature, Dynamic animation for dimming, blind, scene.
Individual programmable LED per rocker. Top and bottom ambient LED strip.
LED colour: red/green/yellow/blue/red-orange/violet/white.
Temperature range (device): –5 °C to 45 °C. Dimensions (L x W): 86 mm x 86 mm.
For British standard installation only.

A smart sensor for everything
Advantages for you at a glance

—

The extra-flat KNX sensor fits into any environment

Flat and theft-proof
The frameless and extra-flat KNX sensor with a diameter of 9.5 mm sits almost flush with the wall and blends harmoniously into any wall design. Peace of mind is provided by the optional removal guard, which protects the KNX sensor from theft.

Secure access control for the hospitality industry

Hotel access control
The ABB tacteo® KNX range offers secure access control for the hospitality industry. It is particularly practical that the sensor performs all of a hotel's management tasks, which can be controlled from a central point such as the reception desk.

The capacitive glass sensors react without contact

Intuitive operation
The capacitive KNX glass sensors react without any touch or contact. When moving your hand towards the sensor, the status lighting switches on automatically. On the other hand, touching the sensor with the entire palm of your hand triggers a preprogrammed function – such as "switching on the light". With a tap of the finger the desired function can be activated. Easy operation is also ensured by the tried-and-tested colour control concept.

ABB tacteo® KNX

The individual touch

Unique in design and function, the intuitive and individually configurable ABB tacteo® KNX sensor is as extraordinary as you are. The impressive, high-quality black or white glass sensor with its capacitive user interface offers virtually unlimited possibilities for intelligent building networking. Heating, ventilation, blinds and lighting can all be controlled to create comfortable everyday situations and put intelligent building management firmly in your hands. Discover more details at **abb.com/tacteo**

ABB i-bus® KNX

User Operation – Design Ranges – ABB tacteo®

Touch Control Element with Bus Coupler, FM

Freely configurable multifunction control element. The icons and/or texts are configured by means of a web configuration tool. With integrated KNX bus coupler. With integrated temperature sensor and proximity function. Push switch function: switching / dimming / blind / sending values / scenes etc. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. The bus connection is provided via the enclosed bus terminal.

TBR/U4.7.1-CG

TBR/U4.8.1-CG

Touch Control Element with Room Temperature Controller and Bus Coupler, 4-fold, FM

Freely configurable multifunction control element. The icons and/or texts are configured by means of a web configuration tool. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. Rocker switch left/right (switching/dimming/blind/value sender/light scenes/fan function). The controller is a constant room temperature controller for ventilator convectors (fan coils) in 2-pipe and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode. Class of temperature controller 1. Contribution to space heating energy efficiency 1,0 %. With integrated KNX bus coupler.

ABB i-bus® KNX

User Operation – Design Ranges – ABB tacteo®

TR/U.3.1-CG

Touch Room Temperature Controller with Bus Coupler, FM

Ordering possible only in connection with the design ID. The icons and/or texts are configured by means of a web configuration tool. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. Control element with room thermostat function for controlling TSA/K 230.1, TSA/K 24.1 in connection with KNX-Heating actuator, commercially available valve drives or analogue valve drives (continuous controllers). The controller is a constant room temperature controller for ventilator convectors (fan coils) in 2-pipe and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode. Class of temperature controller 1. Contribution to space heating energy efficiency 1,0 %. With integrated KNX bus coupler.

Notes

ABB i-bus® KNX

User Operation – Design Ranges – Busch-priOn®

Busch-priOn® allows you to control and monitor functions for the entire room. Light, scenes, timer, blind control unit, heating control unit – all functions are controlled simply and intuitively via a rotary dial, and freely programmable functions can be called up via the rocker switches.
Busch-priOn® is a non-fixed, modular concept.

Colours that make life easier.
A consistent colour coding concept and durable LED technology make Busch-priOn® extremely easy to operate. The dial lights up in the colours of the coding system, thus providing feedback on the function currently selected. Yellow stands for lighting, blue for the blind control unit, magenta for light scenes and orange for the heating control unit. These colours are also found on the rocker switches of the control element panels.

01

The rotary control element is equipped with a freely programmable button which can be pressed and turned. It can be used to switch and dim individual lamps, but also to switch on whole groups of lamps with one press of a button and vary their brightness continuously via the dial.

Function
Dimming | Blinds | Value | Light scenes | Logic functions | Time functions

Features
Illuminated dial | Colour coding concept | Anti-theft protection | Day/night operation

02

The single control element is equipped with a freely programmable “large” operating button. It can be assigned to one topic and can carry out a maximum of two commands.

Function
Switching | Dimming | Blinds | Value | Buttons | Light scenes | Logic functions | Time functions

Features
Illuminated rocker switch | Colour coding concept | Freely programmable control button | Anti-theft protection | Replaceable labelling symbol (Fig. shows Lighting labelling symbol)

03

The triple control element is equipped with 3 freely programmable control buttons. Each can be assigned to one topic and can carry out a maximum of two commands.

Function
Switching | Dimming | Blinds | Value | Buttons | Light scenes | Logic functions | Time functions

Features
Illuminated rocker switches | Colour coding concept | Freely programmable control buttons | Anti-theft protection | Replaceable labelling symbol (Fig. shows labelling symbols Lighting, Blinds and Scene)

reddot design award
best of the best 2008

Busch-priOn® received special commendment in the category “best of the best,” winning the “red dot award: communication design 2008” for its interface design.

01 Rotary control element
02 1 gang control element
03 3 gang control element

01

A single-line display with integrated room temperature controller has been designed for the Busch-priOn® 3 gang control element, technically reduced to the basics and optically elegant. It is particularly easy to read due to the monochromatic design for white on black information. The room temperature controller, information function like time and date, up to 17 freely programmable text displays, IR sensor and proximity sensor have been integrated into the display. The design of the display is available in the colour and material “glass black” only.

02

Busch-priOn® is ideal in combination with the carat® switch series, which has surfaces in the same design.

03

The Busch-priOn® flush-mounted movement sensor can be used individually or with other Busch-priOn® modules. Practical because users thus do not have to look for the light switch and are greeted with light when first entering a dark room.

6352-825-101-500

Bottom End Strip with Temperature Sensor, Busch-priOn®
For mounting on Base Frame 1-fold to 3-fold. Provides the value measured by the temperature sensor to the 8.89 cm (3.5") TFT colour display or the room thermostat.

6351/08-825-500

Top End Strip with Display, Room Thermostat, IR Receiver and Proximity Sensor, Busch-priOn®
Top end strip for installation on 1 gang to 3 gang support frame (6346/10-101, 6346/11-101 and 6346/12-101). With integrated IR receiver for control using the Busch remote control 6010-25 or 6020-.../6121... and integrated proximity function. For heating and cooling (PI, PWM or 2-point). For control of up to 5-level ventilation actuators. With manual adjustment of fan levels. Master/slave configuration. With base-load operation. Display of up to 17 functions as text and/or icon. Only in connection with 1-gang rotary control element (6341-xxx-101) and 3-gang control element (6342-xxx-101) possible. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Detection range: frontal: 0.5 m, lateral: 0.5 m. Detection angle: 100 °. Mounting height: 1.1 m. Protection class (Device): IP 20. Temperature range (Device): –5 °C to 45 °C.
Dimensions: (L x W x D): 33.4 mm x 106.6 mm x 15.5 mm

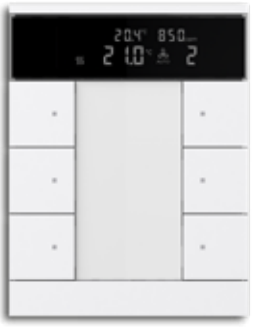
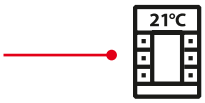
HVAC room automation
Solutions for HVAC room automation

ABB's room automation solutions ensure that all functions in a room are operated as efficiently as possible to save operational costs and improve the space environment.

For perfect climate conditions in a room
ABB's portfolio includes controllers for fan coils, radiators, floor heating and cooling ceiling applications, and devices for operating that can be easily installed on the wall or above the ceiling. Room control units are determined for small to medium commercial buildings. The whole ABB i-bus® KNX product portfolio is compatible with ClimaECO.





Easy installation and commissioning

Room Control Unit, SAR/A
The room temperature control unit allows every kind of room to be individually and conveniently heated or cooled as needed.

- Can be connected directly to FCC/S and VC/S
- Easy installation and commissioning
- Optimal price/peformance
- No power supply needed

User operation products

High degree of functionality

ClimaECO Room Controller
ABB has optimized its range of KNX room control units for commercial buildings. The result: easy-to-use room thermostats.

- Available with integrated room temperature controller and CO_2/humidity sensor
- Can be flush or surface-mounted
- Control of all room functions from HVAC to shading and lighting

ABB i-bus® KNX

User Operation – Design Ranges – ABB Tenton®

SBS/U6.0.1-84

Control Element with RTC Slave Unit, 6-fold

Freely configurable multifunction control element. Room Thermostat slave with max. 6 gang control. With labelling field. Transparent labelling sheet with standard symbols included in delivery. Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green. Rocker switch left/right (switching/dimming/blind/value sender/light scenes/fan function). With integrated temperature sensor. With actual value temperature display. With display of set-value temperature. The bus can be connected via enclosed terminal block.

Notes

ABB i-bus® KNX

User Operation – Design Ranges – Standard Control Elements

The standard control elements are available as 1/2 gang, 2/4 gang or 4/8 gang models. Every switch rocker has two LEDs, which display the status of the connected loads. The separate switch rockers are freely programmable and are suitable for switching and dimming, and also for operating blinds and as a light scene extension unit.

They can also be used in commercial applications. Anti-theft protection has also been integrated – an important factor for installations in public areas.

Customised text. Pictograms can be applied to push buttons for easier orientation. A clear text template with standard symbols is included for every sensor. The self-explanatory pictograms are available for the complete range of building control technology and if necessary can be easily replaced. If the appropriate symbol is not included, the push buttons can be labelled as desired. The related bus-coupler unit is included in delivery.

ABB i-bus® KNX

User Operation – Design Ranges – Multifunction Control Elements

The multifunction control elements with LED colour code concept meet the highest demands for comfort and technology. They each come with two RGB LEDs per rocker switch, which conform to a consistent colour concept. This makes the function obvious at a glance, and the surfaces can be additionally fitted with pictograms. Each side of a rocker switch can be occupied with its own function – each for calling up one light scene, for instance. This turns a 4 gang control element into an 8 gang control element.

01	Multifunction control element 1/2 gang
02	Multifunction control element 2/4 gang
03	Multifunction control element 4/8 gang
04	Multifunction control element 2/4 gang, integrated room thermostat
05	Multifunction control element 3/6 gang with IR reception
06	FM movement detector standard
07	FM movement detector comfort

01

Function
Switching | Dimming | Blinds | Push-button | Value transmitter | Light scene extension unit | Step-type | Multiple operation | Logic function (including light scenes)

Features
Labellable switch rockers | Anti-theft protection | Freely programmable switches | LED colour code concept

02

Function
Switching | Dimming | Blinds | Push-button | Value transmitter | Light scene extension unit | Step-type | Multiple operation | Logic function (including light scenes)

Features
Labellable switch rockers | Anti-theft protection | Freely programmable switches | LED colour code concept

03

Function
Switching | Dimming | Blinds | Push-button | Value transmitter | Light scene extension unit | Step-type | Multiple operation | Logic function (including light scenes)

Features
Labellable switch rockers | Anti-theft protection | Freely programmable switches | LED colour code concept

Wide range. Different shapes, colours and materials fulfil every requirement. KNX control elements are available in the carat®, pure stainless steel, solo®, Busch-axcent® and future® linear programmes. The complete range of conventional switches from these series is available, so there are no limits to the options for combining KNX components.

04

Function
Comfort | Stand-by | Night mode | Frost protection | Specified temperature | Time | Date | Heating | Cooling | Fan Coil operation for heating and cooling | Light scenes | Light scene extension unit | Value | Logic function (including light scenes)

Features
Labellable switch rockers | Anti-theft protection | Display illumination | Colour concept

05

Function
10 freely programmable IR channels | Switching | Dimming | Blinds | Button | Light scenes | Light scene extension unit | Value | Logic function (including light scenes)

Features
Labellable switch rockers | Anti-theft protection | Display illumination | Colour concept

06

Function
4 channels | Logic function (including light scenes)

ABB i-bus® KNX

User Operation – Design Ranges – Multifunction Control Elements

Control element, Multi-function/colour concept
For BCU 6120/12-101-500 or 6120/13-500. With labelling field. Support of KNX functions through innovative colour concept or standard illumination red/green. Push switch function: switching/dimming/blind/sending values/scenes etc. Transparent labelling sheet with standard symbols included in delivery. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Display elements: Two LED per rocker via separate communication object for status (Red/Green/OFF) or orientation light.

ABB i-bus® KNX

User Operation – Design Ranges – Room Thermostats

6128/28-884-500

Room Thermostat with Display and 2/4-fold Switch Sensor, FM
For ABB i-bus® KNX bus coupler 6120/12-101-500, 6120/13-500. Support of KNX functions through innovative colour concept (yellow = lighting, blue = blind, orange = RTC, magenta = scene and white = neutral/no function assigned) or standard illumination red/green. Rocker switch left/right (switching/dimming/blind/value sender/light scenes/fan function). Master/slave configuration. With base-load operation. The controller is a constant room temperature controller for ventilator convectors (fan coils) in 2-pipe and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode. Transparent labelling sheet with standard symbols included in delivery. Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.). Control element: Switch contacts left/right, also for selecting setpoint and mode of operation Display elements: LCD showing operation mode and temperature. Protection class (Device): IP 20. Temperature range (Device): –5 °C to 45 °C. Dimensions: (L x W x D): 63 mm x 63 mm.

ABB i-bus® KNX

User Operation – Design Ranges – Busch-triton®

With freely programmable switch rockers, backlit label fields and IR sensor Busch-triton® is ideal for any application and with its elegant design it is commonly installed in hotels and public areas. Busch-triton® is equipped with an integrated bus coupler and IR receiver. The unit composed of control element and integrated bus coupler now really has everything required to control building systems elegantly and comfortably.

01	1/2 gang control element with rear-illuminated labelling area and IR reception
02	3/6 gang control element with rear-illuminated labelling area and IR reception
03	5/10 gang control element with rear-illuminated labelling area and IR reception

01

Function
Switching | Dimming | Blinds | Value transmitter | Value dimming sensor | Light scene extension unit | Step-type switch | Short/long operation | 13 freely programmable IR channels | 8 light scenes

Features
Labellable switch rockers | Rear-illuminated labelling field | Anti-theft protection | Freely programmable switches | IR remote-controllable | Freely programmable additional key

02

Function
Switching | Dimming | Blinds | Value transmitter | Value dimming sensor | Light scene extension unit | Step-type switch | Short/long operation | 13 freely programmable IR channels | 8 light scenes

Features
Labellable switch rockers | Rear-illuminated labelling field | Anti-theft protection | Freely programmable switches | IR remote-controllable

03

Function
Switching | Dimming | Blinds | Value transmitter | Value dimming sensor | Light scene extension unit | Step-type switch | Short/long operation | 13 freely programmable IR channels | 8 light scenes

Features
Labellable switch rockers | Rear-illuminated labelling field | Anti-theft protection | Freely programmable switches | IR remote-controllable | Freely programmable additional key

Colour-coordinated.
The Busch-triton® is available in five stunning colours, offering exactly the right ambience for any environment. The colours offer exactly the right accent to the carat®, impuls, alpha and future® linear ranges – such as the use of the colour-coordinated socket outlets or motion detectors.

01

6321/38-24G-500

Busch-triton® Control Element with Room Thermostat and 3/6-fold Switch Sensor, FM

With integrated KNX bus coupler. With labelling field. Rocker switch left/right (switching/dimming/blind/value sender/light scenes/fan function). Master/slave configuration. With base-load operation. Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators. The controller is a constant room temperature controller for ventilator convectors (fan coils) in 2-pipe and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode. To control up to 13 IR channels (RC5) using Busch-Remote control. IR mobile remote control 6010-25 or 6020-.../6021... . Control element: rocker switch left/right. Display elements: One LED per rocker via separate communication object for status (Red/Green/OFF) or orientation light. Connections: KNX-line: Bus connection terminal. Protection class (Device): IP 20. Temperature range (Device): –5 °C to 45 °C.

ABB i-bus® KNX

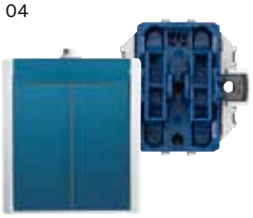
User Operation – Design Ranges – Push Button Coupling Unit

The push-button coupling unit with a centre position offers maximum flexibility. Installed in a flush-mounted wall box, it accepts switch rockers from conventional switch ranges* like a completely standard flush-mounted insert. Covers from all conventional ranges can now be used for KNX. This offers maximum freedom in the selection of the switch range and makes retrofitting easier.

01



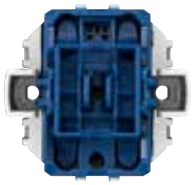
02

03

04

Features
Easy mounting and uncomplicated commissioning
All flush-mounted switch ranges* can be used for the ABB i-bus® KNX
Affordable solution for renovations
Status/orientation light (red/green/OFF)
(only with 1 gang push-button/switches)
Integration in surface-mounted water protected units

01	Push-button coupler 2 gang with integrated bus coupler
02	Push-button coupler 4 gang with integrated bus coupler
03	Push-button coupler 2 gang for ocean with integrated bus coupler
04	Push-button coupler 4 gang for ocean with integrated bus coupler



Design without limits. The push-button coupling unit includes the complete range* of switches for KNX. Switch rockers from all switch ranges can now be converted to KNX push buttons, which not only switch on and off but also dim or show the status with an LED (6108/01 and 6108/04 only). 1 gang and 2 gang models for single and 2 gang switch rockers are available.

KNX – water protected
The push-button coupling unit also allows special products to be used for KNX. Special models for water-protected installation allow covers from, for example, the ocean® surface-mounted range to be used. This means that KNX sensors can also be safely installed in a cellar, outside on a patio or in commercial applications.
Temperature range: –25 °C to 45 °C.

*except impuls, basic55® and All Weather 44 Busch-Jaeger switch ranges only available for selected markets. For further information please contact your local ABB office.

ABB i-bus® KNX

User Operation – Design Ranges – Push Button Coupling Unit

6108/06-AP-500

Push-button coupler 2 gang with integrated bus coupler

For contacting conventional 1 gang rocker switches. With middle position. For inserting in the ocean surface-mounted housing. Enclosed mounting plate for the following ranges: Busch-Duro 2000 SI/SI Linear, Reflex SI/SI Linear, future® linear, alpha, solo®, Busch-axcent®, carat® and pure stainless steel. The bus can be connected via enclosed terminal block.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.
1/2-fold	–	6108/06-AP-500	2CKA006133A0225		0.1	1

ABB i-bus® KNX

User Operation – Design Ranges

6108/60-500

Control Element, 6 gang with Universal Input, 5 gang

Control element with a maximum of 6 control functions and an RTC extension unit (slave). Primary function for calling up the main function. Status bar for indication/display of operating or RTC functions. Operation is carried out via cover plate 6108/61-xxx. With actual value temperature display. With display of set-value temperature. With universal input with: - max. of 5 binary inputs - 4 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V - 2 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V and an external temperature sensor PT1000 / T6226. The bus can be connected via enclosed terminal block.

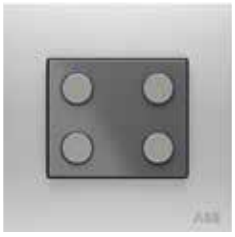
Notes

ABB i-bus® KNX

User Operation – Design Ranges – Millenium

The Millenium collection is the first metal range to incorage the KNX system, the most intelligent way of managing spaces and optimizing performance in terms of energy savings. Millenium is based on a combinable concept which creates a very comprehensive range, suitable for any types of needs. This makes it the ideal collection for all types of homes, hotels, offices and shops.

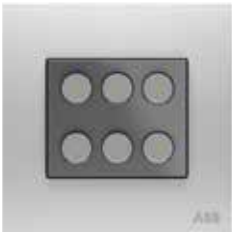
01	Switch Sensor 2 gang KNX
02	Switch Sensor 4 gang KNX
03	Switch Sensor 6 gang KNX
04	Switch Sensor 6 gang KNX with IR
05	Busch watchdog 180° KNX
06	Room Thermostat KNX



01

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

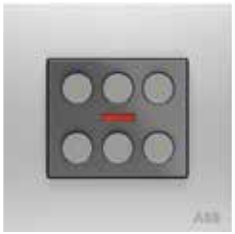


02

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

03



Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

Wide range. Millenium range offers special mounting plates for KNX sensors to reduce the height and improve the aesthetics for ultra slim design. The KNX sensors allow to replace the buttons with desired symbols in order to adjust the sensors to specific design and needs like light, blind, scene, RTC or fan coil. Millenium offers a wide and elegant choice of finishes in stainless steel material: from the Brush Stainless Steel, to the soft touch given by the Silk Black, and the luxury of the sophisticated gold finishes, Matt Gold and Antique Gold. Moreover, the range is now extended with two glass colors: White and Black glass to cater the luxury segment.

04

Function
Switching | Dimming | Blinds | Sending values | Scenes etc. | 6 gang sensor with IR.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

05

Function
Movement sensor with up to four channels.
Detection range: frontal: 6 m, lateral: 6 m
Detection angle: 180 °
Brightness limit value:
5 Lux - 150 Lux
Mounting height: 1.1 m

06

Function
Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators. The controller is a thermostat for Fan Coil units in 2- and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)

Switch contacts for operating mode selection and dial for setpoint or fan speed adjustment.
Display elements: LCD showing operation modes.
Protection class (Device): IP 20
Temperature range (Device): –5 °C to 45 °C

The Millenium range is only available in the following countries: China, Dubai, India, Kuweit, Oman, Qatar, Saudi Arabia, Singapore, UAE and UK.
Frames and special mounting plates for KNX sensores have to ordered by:
ABB, S.A.
Low Voltage Products-Niessen, Oiartzun / Spain
www.abb.es/niessen

TR/U 1.1

Transponder Reader, Millenium

The “transponder reader” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4A @24 V AC/DC) and one input to be used for connecting external conventional card-holder (e.g. Millenium wiring accessories card-holder). The output can be programmed in three different ways: “Linked to access control”, receiving in this case switching commands from the device itself (according to transponder card validation); being a standard KNX Switch actuator output, able to be controlled by every KNX-standard devices; “linked to card-holder”, that means that the relay is switched according to closing/opening internal input contact available on transponder reader. The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX telegram (for example for DND/MUR purposes).
The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
The transponder reader is available for ABB Millenium wiring accessories range.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code	€	kg	pc.

TH/U 1.1

Transponder Holder, Millenium

The “transponder holder” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4A @24V AC/DC) and one binary input to be used for connecting external conventional push-button for switch, dimmer and shutter functionalities, or for example for connecting window contact or similar. The output can be programmed as “Linked to access control”, receiving in this case switching commands from the device itself (according to card insertion/removal); or being a standard KNX Switch actuator output, able to be controlled by every KNX-standard devices. The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX.
The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
The transponder reader is available for ABB Millenium wiring accessories range.

Set of Transponder Cards for Millenium, Chiara 2 modules and tacteo design programs

The transponder card uses passive transponder technology operating in radio frequency (MIFARE technology), without the need for contact between the reader and the card itself. The transponder card is read by swiping it in front of the reader at a maximum distance of 20 mm (can be reduced according to installation environment).

RoomGuard software

RoomGuard software **NEW**

RoomGuard software for configuration and supervision of ABB Access Control range; Tacteo, Millenium, Zenit, Chiara, and Mylos.
RoomGuard is a web-based scalable solution (licensing model based on number of rooms) accessible by any browser providing greater accessibility for hotel and maintenance staff. Main features and functionality include: Access control (management of keys, groups, time bands and staff cards, definition of access to common areas, and more), room state monitoring, guest check in/check out, front desk room load monitoring, management of guest and employee databases, Occupancy and access records and statistics, front desk management of room climate, and maintenance and diagnostics. RoomGuard features an intuitive and easy to use interface, with straightforward installation and configuration, seamless integration with building automation and third-party software integration.
RoomGuard software replaces MiniMAC software.
Available December 2022

01	Switch Sensor 2 gang KNX
02	Switch Sensor 4 gang KNX
03	Switch Sensor 6 gang KNX
04	Switch Sensor 6 gang KNX with IR
05	Busch watchdog 180° KNX
06	Room Thermostat KNX

01

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

02

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

03

Function
Switching | Dimming | Blinds | Sending values | Scenes etc.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

Zenit is based on a combinable concept which creates a very comprehensive range, suitable for any type of needs. Optimizing comfort, safety and efficiency of homes and buildings: Providing with complete comfort solutions to satisfy all type of needs and projects. Ensuring safety and protection of persons and goods. Saving energy by using only the amount of energy required.

Zenit offers two different mounting plates for KNX sensors corresponding to different market standards: VDE and NEMA.

04

Function
Switching | Dimming | Blinds | Sending values | Scenes etc. | 6 gang sensor with IR.

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Control element: Switch contacts
Display elements: LED to indicate the function

05

Function
Movement sensor with up to four channels.
Detection range: frontal: 6 m, lateral: 6 m
Detection angle: 180 °
Brightness limit value: 5 Lux - 150 Lux
Mounting height: 1.1 m

06

Function
Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators. The controller is a thermostat for Fan Coil units in 2- and 4-pipe systems and conventional heating or cooling systems. The fan stage can be switched manually or in automatic mode.

The Zenit VDE range is only available in the following countries:
Spain, Portugal, Russia, France
The Zenit NEMA range is only available in the following countries:
Latin America, Australia, Thailand, Vietnam.
Sensors, frames and special mounting plates for KNX sensores have to ordered by:
ABB, S.A.
Low Voltage Products-Niessen, Oiartzun / Spain
www.abb.es/niessen

Features
Incl. 10 logic channels (light scene actuator | sequence actuator | logic gates, etc.)
Switch contacts for operating mode selection and dial for setpoint or fan speed adjustment.
Display elements: LCD showing operation modes.
Protection class (Device): IP 20
Temperature range (Device): –5 °C to +45 °C

RB/U 1.1

KNX sensor/blind actuator, 1/1-gang, 2M **NEW**

Push switch function: switching, dimming, blind or scene.
Display elements: LED to indicate the function.
Outputs: 1x change-over contacts/potential-bound
Rated current: 8 A.
To be installed with N2221, N2221.1, N2221.3, N2221.5, N2221.8, N2221.9 or N22 customized rockers.

TH/U 1.1.ZW

KNX transponder holder, 2M **NEW**

The “transponder holder” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. I is equipped with one relay (4A @24V AC/DC) and one binary input to be used for connecting external conventional push-button for switch, dimmer and shutter functionalities, or for example for connecting window contact or similar. The output can be programmed as “Linked to access control”, receiving in this case switching commands from the device itself (according to card insertion/removal); or being a standard KNX Switch actuator output, able to be controlled by every KNX-standard devices. The white blinking LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX. The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
Cover plate included.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

TR/U 1.1.ZW

KNX transponder reader, 2M **NEW**

The “transponder reader” is a flush-mounting device for British Standard wall boxes, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4A @24 V AC/DC) and one input to be used for connecting external conventional card-holder (e.g. Zenit wiring accessories card-holder). The output can be programmed in three different ways: “Linked to access control”, receiving in this case switching commands from the device itself (according to transponder card validation); being a standard KNX Switch actuator output, able to be controlled by every KNXstandard devices; “linked to cardholder”, that means that the relay is switched according to closing/opening internal input contact available on transponder reader. The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX telegram (for example for DND/MUR purposes). The transponder reader can be configured with ABB control software in order to behave as transponder programming device. The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.
Cover plate included.

Transponder Reader, Mylos

The transponder reader is used for access control in the hotel, residential and commercial sectors (office buildings, business centers, laboratories, etc.). The device is equipped with two bistable relays (8 A, 250 V AC), one of which can be assigned to control electronic lock, and three voltage-free, non-optically insulated inputs; the 5-V DC scanning voltage is available on the COM terminal.
The transponder reader requires a 10...32 V DC/12...24 V AC external power supply to ensure its operation even with bus voltage failure.

PTI/U 1.1.MC

Transponder Holder, Mylos

The transponder holder is equipped with a slot into which the transponder card is inserted. In a hotel application, this allows occupancy recognition and notification at the supervisory level (e.g. on the front desk computer). Moreover, room status information can be managed by using special cards (minibar status, maintenance status, usability).
The device is equipped with two bistable relays (8 A, 250 V AC), and three voltage-free, non-optically insulated inputs; the 5-V DC scanning voltage is generated by the device itself. The transponder holder has on the front four LEDs for signaling indications. It requires a 10...32 V DC/12...24 V AC auxiliary power supply to ensure its operation even in case of KNX voltage failure.

Square Cover Plate

Mylos Etik

The design in perfect harmony with sustainability. Today, the development of a new product cannot ignore the impact on the environment in which we live. Every effort must be made with a view to obtaining an original but mainly sustainable result. ABB strongly believes in this commitment. And confirms this with Mylos Etik, the new finish that is good for all, including the environment.

Mylos Lucent
A great adventure in luminosity.
If the need is to surround youself with sparkling elements, the Lucent series is the most appropriate choice.
Made of special resins, each plate enhances with its glossy shades in every setting, like spots of light on Caravaggio canvases.
Mylos Lucent evokes elements such as alabaster and ice, also makes black shine, giving a technological aspect and thereby completing particularly high-tech spaces.

User Operation – Design Ranges – Mylos

Mylos Metal

The prestige, the strength, the charm.

The skill in working metals is another typically Italian talent. The Mylos Metal civil series is the result of the process of die-casting of “zama”, a zinc alloy, finished with the shades of natural metals by means of precious painting and careful brushing for each and every piece. The finishes obtained range from silver to gold, through aluminium, steel and chromium, brushed and glossy, that evoke sensations of sophistication and preciousness.

Brushed steel

Metal, Scratchbrushed steel.

TR/U 1.1.CH

Transponder Reader, Chiara 2 modules

The “transponder reader” is a flush-mounting device, designed to realize access control systems with a communication support based on KNX bus. It is equipped with one relay (4 A @24 V AC/DC) and one input to be used for connecting external conventional card-holder (e.g. Chiara wiring accessories card-holder).

The output can be programmed in three different ways: “Linked to access control”, receiving in this case switching commands from the device itself (according to transponder card validation); being a standard KNX Switch actuator output, able to be controlled by every KNX-standard devices; “linked to card-holder”, that means that the relay is switched according to closing/opening internal input contact available on transponder reader.

The bicolor (red-green) LED placed on the front of the device allow you to monitor device operation and can be also switched ON/OFF in the proper color according to KNX telegram (for example for DND/MUR purposes).

The transponder reader requires a 12...24 V AC/DC external power supply to ensure its operation even with bus voltage failure.

The transponder reader is available for ABB Chiara wiring accessories range.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Matrix Series

MATRIX Series

The MATRIX is an IoT (Internet of Things) embedded ASPECT® Control Engine designed to provide flexible site control applications for medium to large scale building automation systems. It can be used to connect with Cylon CB Series and AAM NB Series of BACnet® MS/TP field level controllers. The MATRIX supports serial communications protocols such as BACnet®, AAM PUP, and Modbus®. Additionally, TCP/IP communications using FT/Net, BACnet®, Modbus® and Cylon's Unitron (when used with the UC32.netK) protocols are available when using the RJ-45 connection.

ASPECT®-Enterprise

ASPECT-Enterprise

ASPECT-Enterprise is a server-based variant that provides all of the powerful features of ASPECT, but is installed on specified server hardware. As this solution is hosted by the end-user, it requires no proprietary hardware, but requires the purchase of ASPECT®-Enterprise software. This allows the ease of on-site installations and fewer restrictions on requirements. In addition, it integrates with popular Internet programs to allow end- users more freedom. With ASPECT®, your PC, tablet, or smart device can integrate with your building easily and efficiently.

Whether the platform is a server running VMware®, a standard server box or complex rack-mountable network appliance, ASPECT®-Enterprise provides the capability, security, and the specification to meet the requirements of almost any project at an affordable price.

ABB Cylon®

ABB Cylon® ASPECT® Engineering

ASPECT®-Studio

ASPECT-Studio

ASPECT®-Studio provides a graphical programming tool experience like no other for configuring ASPECT® applications. Acting as an integrated development environment for ASPECT® products, ASPECT®-Studio contains a complete library of logical and graphical "widgets" representing the common tools that are used to engineer sophisticated control strategies for a complete control system and graphical user interface solution.

Using this highly intuitive software environment, users create and define all necessary elements for a project – including network device and point programming, global control sequencing, historical trending, alarming, scheduling, as well as rich graphical user interface pages. Rapid engineering capabilities can be leveraged to minimize labor intensive steps. This includes mass editing options, import and export of networked devices and points, and the ability to create custom Device and Point templates.

As a project is created, you have the ability to evaluate your work through each step of the engineering phase using simulated data, as well as the ability to communicate with defined networks, devices and their associated points. Complete testing prior to the deployment of a project can also be performed using a local simulation of the ASPECT® environment.

At commissioning time, ASPECT®-Studio reduces labor for technicians by automatically generating an HTML5 UI for all defined network devices, allowing smart phone and tablet users to gain access to the energy management system.

ABB Cylon®

BACnet®/IP Main Plant Controllers

FBXi Series

FBXi Series

The FBXi Series is a freely programmable range of BACnet® Controllers with native BACnet/IP communications support. The controllers are BTL listed BACnet Building Controller (B-BC) and are ideally suited for a wide range of applications for intelligent control of HVAC equipment, and electrical systems including lighting control and metering applications. The FBXi Series controllers support multi-protocol communications simultaneously including BACnet/IP, BACnet MS/TP, Modbus® TCP and Modbus RTU.
Part of the Cylon® FLXeon Line of BACnet field controllers, the FBXi Series controllers feature support for up to sixteen FLX (Field Level eXpansion) series extension modules providing up to 256 points of control, and a dedicated input for Cylon® room sensors. FLX I/O expansion modules are available in a variety of options to allow maximum flexibility in achieving the required point configuration.

CBXi Series

CBXi Series

The CBXi Series is a freely programmable range of BACnet® Controllers with native BACnet/IP communications support. The controllers are BTL listed BACnet Building Controller (B-BC) and are ideally suited for a wide range of applications for intelligent control of HVAC equipment, and electrical systems including lighting control and metering applications.
The CBXi-8R8 and CBXi-8R8-H controllers support multi-protocol communications simultaneously including BACnet/IP, BACnet MS/TP, Modbus® TCP and Modbus RTU.
Part of Cylon's CB Line of BACnet field controllers, the CBXi-8R8 controller features 8 UniPuts™ with Relay, 8 Universal Inputs, as well as support for up to five FLX (Field Level eXpansion) series extension modules providing up to 96 points of control, and a dedicated input for Cylon's CBT-STAT or UCU Room Display intelligent room sensors. The -H variant provides local override function through HOA switches. FLX I/O expansion modules are available in a variety of options to allow maximum flexibility in achieving the required point configuration.

INTEGRA™ IT-8000 (EMEA & FE)

Part of the INTEGRA™ family, the IT-8000 is an embedded Internet of Things (IoT), BTL-listed BACnet® Building Controller (B-BC) that connects to ABB's Cylon BACnet field controllers. The IT-8000 is also capable of connection to and network management of a variety of diverse devices and subsystems using various protocols including, but not limited to, Modbus™ and LonWorks™.
When connected to an Ethernet or wireless LAN, the IT-8000 uses Internet connectivity and web-serving capability to provide integrated control, supervision, network management, scheduling, data logging, alarming, and rich graphical displays through a standard Web browser.

INTEGRA™ IT-8000 (EMEA & FE)

Description	Order details	
	Type code	Order code
IT-8000 initial device capacity pack license. Purchased at time of initial order with core software. Adds support for an additional 500 points to the core (IT8-XXX-COR).	IT8-010-DCP-E	2CQG150123S4061
IT-8000 device capacity upgrade license. Purchased any time after initial core software purchase. Adds support for an additional 500 points to the core (IT8-XXX-COR-E).	IT8-010-DCU-E	2CQG150124S4061
Annual support fee and renewal of Demo equipment and Workbench licences. The fee for this part includes the annual fee for the Self-Licensing Extension Service and Marketplace Prime package. All rights to the Marketplace package are conditioned on agreement to the Niagara Marketplace Terms and Conditions of Use.	IT8-DEMO-SUP-R-E	2CQG150125R4011
Bundled IT-8000 with WiFi DISABLED. Includes core license for 250 points. Made up of IT-8000-NOWIFI + IT8-005-COR-E + IT8-005-SM0.	IT-8005-NOWIFI-E	2CQG150126R4011
IT-8000 initial device capacity pack license. Purchased at time of initial order with core software. Adds support for an additional 1,250 points to the core (IT8-XXX-COR-E).	IT8-025-DCP-E	2CQG150126S4061
Bundled IT-8000 with WiFi DISABLED. Includes core license for 500 points. Made up of IT-8000-NOWIFI + IT8-010-COR-E + IT8-010-SM0.	IT-8010-NOWIFI-E	2CQG150127R4011
IT-8000 field capacity upgrade license. Purchased any time after initial core software purchase. Adds support for an additional 1,250 points to the core (IT8-XXX-COR-E).	IT8-025-DCU-E	2CQG150127S4061
Bundled IT-8000 with WiFi DISABLED. Includes core license for 1250 points. Made up of IT-8000-NOWIFI + IT8-025-COR-E + IT8-025-SM0.	IT-8025-NOWIFI-E	2CQG150128R4011
IT-8000 initial device capacity pack license. Purchased at time of initial order with core software. Adds support for an additional 2,500 points to the core (IT8-XXX-COR).	IT8-050-DCP-E	2CQG150128S4061
Bundled IT-8000 with WiFi DISABLED. Includes core license for 5000 points. Made up of IT-8000-NOWIFI + IT8-100-COR-E + IT8-100-SM0.	IT-8100-NOWIFI-E	2CQG150129R4011
IT-8000 field capacity upgrade license. Purchased any time after initial core software purchase. Adds support for an additional 2,500 points to the core (IT8-XXX-COR-E).	IT8-050-DCU-E	2CQG150129S4061
Bundled IT-8000 with WiFi DISABLED. Includes core license for 10000 points. Made up of IT-8000-NOWIFI + IT8-200-COR-E + IT8-200-SM0.	IT-8200-NOWIFI-E	2CQG150130R4011
IT-8000 driver for Andover Controls AC256 over RS-232 or RS-485. (Beta version only)	IT8-DR-AC	2CQG150301S4061

INTEGRA™ IT-8000 (EMEA & FE)

Description	Order details	
	Type code	Order code
IT-8000 driver for American Auto-Matrix PHP over RS-232 or RS-485. Manufactured by 3rd party. Limited support.	IT8-DR-APHP	2CQG150303S4061
IT-8000 driver for American Auto-Matrix PUP over RS-232 or RS-485. Manufactured by 3rd party. Limited support.	IT8-DR-APUP	2CQG150304S4061
DEMO VERSION of INTEGRA IT-8000 controller includes 2 EIA-485 ports, configurable for 9.6 to 115.2 kbps. Support for 2 RS-485 protocols (BACnet MS/TP, LON, Modbus RTU, AAM PUP). Two RJ-45 10/100 MB Ethernet with TCP/IP support for FOX, BACnet/IP, and Modbus TCP. WiFi connectivity 802.11 a/b/g/n. Web Interface, embedded Workbench, integrated power supply and USB backup and restore. Includes core DEMO license file with support of up to 500 devices or 25,000 points and all standard drivers.	IT8-DEMO-E	2CQG150124R4011
IT-8000 driver for Flex over RS-232 or RS-485.	IT8-DR-FLEX	2CQG150306S4061
IT-8000 JSON Toolkit. Requires IT-8000 and valid Software Maintenance agreement.	IT8-DR-JSON	2CQG150311S4061
IT-8000 driver for McQuay to OPM driver.	IT8-DR-MCQUAY	2CQG150312S4061
IT-8000 driver for Micros Fidelio IP driver.	IT8-DR-MFID	2CQG150313S4061
Provides FIPS 140-2 Level 1 conformance using the integrated FIPS certified BouncyCastle module for IT-8000. Requires IT-8000 version 4.6 and later.	IT8-FIPS	2CQG150315S4061
IT-8000 SMS Alarm driver. Enables SMS alarms to be sent to any mobile phone via a GSM/GPRS modem connected to the RS-232 serial port driver. Supported in AX version 3.8U1 only. Not Available for N4.	IT8-DR-SMSALM	2CQG150317S4061
IT-8000 add-on single port LON FTT10A module	IT8-NPB-LON	2CQG155803P2061
IT-8000 add-on dual port RS-485 module	IT8-NPB-2X-485	2CQG155804P2061
IT-8000 add-on single port RS-232 module	IT8-NPB-232	2CQG155805P2061
IT-8000 wall plug module. 100-240 VAC, 50/60 Hz. Connect to the 2.5 mm barrel plug, 24 V input to the IT-8000 and includes, US, EU, UK and AU plugs	IT8-WPM	2CQG155806P2061
IT-8000 driver for Carrier Comfort Network	IT8-DR-CCN	2CQG150305S4061
IT-8000 driver for Flex over RS-232 or RS-485	IT8-DR-FLEX	2CQG150306S4061
IT-8000 driver for McQuay to OPM driver	IT8-DR-MCQUA	2CQG150312S4061
IT-8000 driver for Micros Fidelio IP driver.	IT8-DR-MFID	2CQG150313S4061

INTEGRA™ IT-8000 (NA)

Part of the INTEGRA™ family, the IT-8000 is an embedded Internet of Things (IoT), BTL-listed BACnet® Building Controller (B-BC) that connects to ABB's Cylon BACnet field controllers. The IT-8000 is also capable of connection to and network management of a variety of diverse devices and subsystems using various protocols including, but not limited to, Modbus™ and LonWorks™.
When connected to an Ethernet or wireless LAN, the IT-8000 uses Internet connectivity and web-serving capability to provide integrated control, supervision, network management, scheduling, data logging, alarming, and rich graphical displays through a standard Web browser.

INTEGRA-Supervisor (EMEA & FE)

BTL-listed as an BACnet® Advanced Operator Workstation (B-AWS) and BACnet Operator Workstation (B-OWS), the INTEGRA-Supervisor is an enterprise management server class software solution that connects multiple INTEGRA™-based IT-8000 controllers, along with other IP-based controllers and field devices, to be networked together. It serves real-time graphical information to standard web-browser clients and provides server-level functions. These functions include centralized data logging/trending, archiving to external databases, alarming, dashboarding, system navigation, master scheduling, database management and integration with other enterprise software applications through an XML interface (oBIX standard). Additionally, the INTEGRA-Supervisor includes a comprehensive graphical engineering toolset for application development.

INTEGRA-Supervisor upgrade from ITS-100-SUP to ITS-UNL-SUP	ITS-UNL-UPG	2CQG153222S4061
INTEGRA-Supervisor software core with support for unlimited Niagara network connections. Includes standard drivers. Requires ITS-UNL-SM0.	ITS-UNL-SUP	2CQG153221S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 500 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-010-DIP-E	2CQG153232S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 1,250 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-025-DIP-E	2CQG153233S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 2,500 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-050-DIP-E	2CQG153234S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 50,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-1000-DIP-E	2CQG153235S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 100 non-Niagara devices or 5,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-100-DIP-E	2CQG153236S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 10,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-200-DIP-E	2CQG153237S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 25,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-500-DIP-E	2CQG153238S4061
INTEGRA-ProPack License File. Supports up to 5 devices on non-Cylon IT-8000 or INTEGRA-Supervisor software. INTEGRA-ProPack is included at no cost on IT-8000 or INTEGRA-Supervisor software.	INT-PPACK-5	2CQG153401S4061
INTEGRA-ProPack License File. Supports up to 10 devices on non-Cylon IT-8000 or INTEGRA-Supervisor software. INTEGRA-ProPack is included at no cost on IT-8000 or INTEGRA-Supervisor software.	INT-PPACK-10	2CQG153402S4061
INTEGRA-ProPack License File. Supports up to 25 devices on non-Cylon IT-8000 or INTEGRA-Supervisor software. INTEGRA-ProPack is included at no cost on IT-8000 or INTEGRA-Supervisor software.	INT-PPACK-25	2CQG153403S4061

Monthly Support fee and renewal of Demo equipment and Workbench licenses for new SI partner. Per month in first year before renewal.	INTEGRA-RENEW-2	2CQG153902S4061

INTEGRA-Supervisor (NA)

BTL-listed as an BACnet® Advanced Operator Workstation (B-AWS) and BACnet Operator Workstation (B-OWS), the INTEGRA-Supervisor is an enterprise management server class software solution that connects multiple INTEGRA™-based IT-8000 controllers, along with other IP-based controllers and field devices, to be networked together. It serves real-time graphical information to standard web-browser clients and provides server-level functions. These functions include centralized data logging/trending, archiving to external databases, alarming, dashboarding, system navigation, master scheduling, database management and integration with other enterprise software applications through an XML interface (oBIX standard). Additionally, the INTEGRA-Supervisor includes a comprehensive graphical engineering toolset for application development.

	Order details	
Description	**Type code**	**Order code**
INTEGRA-Supervisor software core with support for 2 Niagara network connections. Includes standard drivers. Requires ITS-002-SM0.	ITS-002-SUP	2CQG153205S4061
INTEGRA-Supervisor software core with support for 3 Niagara network connections. Includes standard drivers. Requires ITS-003-SM0.	ITS-003-SUP	2CQG153206S4061
Adds the ability for a ITS-000-SUP, ITS-001-SUP, ITS-002-SUP or ITS-003-SUP to run 5 additional stations. Typically used for small site multi-tenant options.	ITS-005-STN	2CQG153207S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 10 non-Niagara devices or 500 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-010-DIP	2CQG153208S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 25 non-Niagara devices or 1,250 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-025-DIP	2CQG153210S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 50 non-Niagara devices or 2,500 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-050-DIP	2CQG153211S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 1,000 non-Niagara devices or 50,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-1000-DIP	2CQG153212S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 100 non-Niagara devices or 5,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-100-DIP	2CQG153213S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 200 non-Niagara devices or 10,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-200-DIP	2CQG153216S4061
INTEGRA-Supervisor Device Integration Pack license. Adds support for 500 non-Niagara devices or 25,000 points to INTEGRA-Supervisor core software (ITS-XXX-SUP). Standard drivers included. Requires ITS-XXX-SUP.	ITS-500-DIP	2CQG153217S4061

ABB FusionAir Smart Sensor*

The ABB FusionAir Smart Sensor series provides a slim, compact, and visually appealing room control display with a high definition capacitive touch backlit LCD display for use with ABB's Cylon® FLXeon and CB Line BACnet® field controllers. The intelligent temperature and humidity sensor allow users to view and adjust selected parameters within the field controller to which it is connected. Other sensing options available for integration with the CXproHD control strategy are CO_2 or Volatile Organic Compound (VOC) sensing, and contacts for the addition of Passive Infra-Red (PIR) occupancy detection.
The ABB FusionAir Smart Sensor display can be used to view control parameters and adjust HVAC, lighting and sunblind set points for the connected controller.
The ABB FusionAir Smart Sensor can be installed as part of a multi-sensor application for larger spaces or multiple room connection.
The system can also provide a Safe Indoor Environment against pandemic-causing viruses (such as Covid-19) through offering a patented* safe touch-free user interaction with the sensor which gives clear feedback of the safety status in a room.

ABB Cylon®

Displays & Smart Sensors

Cylon® CBT-STAT

The CBT-STAT and CBT-STAT-H provide visually appealing room control display for use with Cylon's CB Line BACnet® field controllers. The intelligent temperature sensor CBT-STAT and the CBT-STAT-H with integrated humidity sensor allow users to view and adjust selected parameters within the field controller to which it is connected. Use of the CBT-STAT(-H) avoids the need for any special tools of software to fully configure and commission a VAV controller. The configuration and commissioning is password-protected to prevent unauthorized changes. Each CB Line field controller automatically detects the presence of the CBT-STAT, and self-configures to utilize the CBT-STAT as the control interface. In Engineering Mode, the display can be used as the setup and commissioning tool. The CBT-STAT can be used to setup the communications parameters, all the default settings and do complete balancing of the VAV box.

Emergency lighting
A head of safety

By choosing ABB as your emergency lighting partner, you'll be placing your projects, your systems, and essentially your people, in safe hands.

—
01

—
01 We support emergency lighting projects on all scales

When choosing a partner for emergency lighting, you need a supplier capable of delivering a solution whenever the need arises, whether you're planning a new build project, overseeing an installation, or considering renewal of a long-standing system.

We are a leading life safety solutions provider, delivering state-of-the-art systems and products into the emergency lighting marketplace.

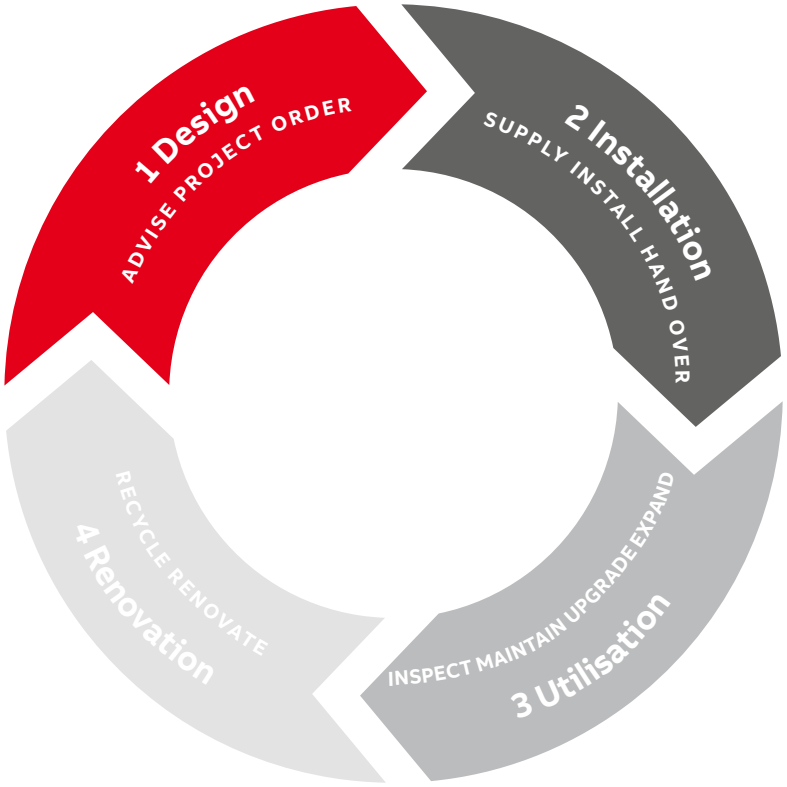
We focus on supporting our customers at all points of the emergency lighting life-cycle, whether planning, installing, managing or renewing.

Years of experience
Supporting emergency lighting projects on all scales, backed by friendly service, technical expertise and our continual drive towards new product innovation makes us the number one choice for emergency lighting.

Construction engineers and installers are assured that orders can be easily placed, deliveries arrive promptly, and that any issues are resolved quickly to a satisfactory outcome.

Our products and services are specifically designed to provide the most effective protection and safety, in line with customer needs, relevant standards and industry regulations. These solutions start at the planning stage for emergency lighting systems, with advice on product selection and system requirements, through to delivery of certified technical drawings.

With project time-lines tight and budgets constrained, choosing the right partner for emergency lighting system design is imperative. We would like to help you in making the right start.



We works at the heart of this complex process, assisting designers, specifiers, and final customers with all manner of emergency lighting needs.

Efficient emergency lighting solutions
Life-cycle

The concept is clear and simple. Providing you a reliable, total solution for safe evacuation. The way in which we do this is what makes the difference.
We offer advantages to everybody involved throughout the life-cycle process. That way, you know that ABB is always the right choice, for both you and your customers.

Advice and information during the design phase
In the design phase, it is important for you to have all the information. If desired, we can provide you with that in the form of specific project advice, based on the most recent regulations, standards and safety requirements. We always offers you the necessary information in the most compact form, so that you quickly have an overview of all the available information.

Speed and materials during the installation phase
Speed and timing are essential during the installation phase, because the easy-to-install materials must be at the construction site at the right time. That is why luminaires are always in stock, or short lead time from the manufacturing facility. If you perform the installation yourself, clear assembly instructions, packaging instructions and a modular system give you a head start.

Support during the utilisation phase
During the utilisation phase, we can advise on your emergency lighting installation and make sure it is aligned with the latest standards. That way, you guarantee optimal safety at minimum utilisation costs, thanks to low energy consumption and easy-to-replace parts and, if necessary, the people who are working, shopping, relaxing or sleeping in the building can quickly and safely find their way out.

Altering and separating during the renovation phase
The new generation of emergency lighting products is ready for the renovation phase. We go further than the normal use of durable, environmentally-friendly, recyclable materials. The products are easy to disassemble and easy to dispose of separately in the legally required return and recycling flows. It is also easy to alter the new generation of luminaires using the individual modules.

Emergency lighting process
With you every step

During building construction or refurbishment, the focus for emergency lighting shifts from planning and design, to delivery and installation.
We provide solutions that impact at all points of the emergency lighting life-cycle.

—
01 Easy-to-install product range

Easy-to-install product range
Many of our products are engineered to a modular design format, which promotes straightforward, cost-effective installation and maintenance.

Modular design enables First-Fix installation of the key wiring components with later connection of geartrays, diffusers and legends etc, for easy management and replacement of parts.

—
02 Certified technical design

Certified technical design
Central to emergency lighting is the technical design drawing. It defines luminaire positioning and spacing, drives the installation effort and provides the key control for commissioning and approval.

Our technical design team is on hand to advise and assist with design drawings for all types of emergency lighting system, to the latest relevant standards, with full certification for added confidence and peace of mind.

—
03 Project support

Project support
Our project engineers and internal sales support teams are available to provide guidance on products and project updates/delivery schedules etc. This catalogue makes for a great starting point when considering emergency lighting, but is only a small part of our service.

—
04 Project consultation

Project consultation
You can count on us to help with your emergency lighting planning. We offer expert assistance in emergency lighting scheme design, as well as clear, concise advice on product selection. Our dedicated team are able to assist you at your premises, and arrange for emergency lighting schemes to be prepared at our design office.

—
05

—
05 Easy-to-install product range

The purpose of an emergency lighting system is to protect and safeguard life. Once commissioned and in operation, the emergency lighting system must function correctly throughout its lifetime and therefore requires ongoing management, maintenance and testing.

Standards and legislation
The need for testing and servicing is enforced by legislation, with both The Regulatory Reform (Fire Safety) Order 2005/ Fire (Scotland) Act 2005 and The Work Place Directive 89/654 making reference to proper maintenance of emergency lighting systems.

Any faults found need to be rectified as quickly as possible. For many building owners/occupiers, who have legal responsibility for these systems, maintenance, testing and access to replacement parts are of paramount importance. With this in mind, it's clear to see that maintaining the partnership with your emergency lighting supplier, even after commissioning, is highly important.

Our fully certified engineering team can provide, support and advice on maintenance and servicing of emergency lighting.

Maintenance & servicing
Our team of qualified and experienced service engineers is available to service emergency lighting systems and to ensure full working order, in line with appropriate British Standards.

Term maintenance contracts are available. Contact our service team today to discuss your maintenance needs.

System testing & upgrades
Owner/occupiers are legally obliged to test and maintain emergency lighting to BS 5266-1 and -8 (Simplified Testing Regime EN 50172).

Emergi-Lite manufactures a range of testing solutions for self-contained emergency lighting - Self-test, IR2, Naveo®Pro and Emex test addressable testing - to accommodate all levels of testing requirement.

DALI emergency lighting
Why use DALI with emergency lighting?

Regular system checks must be carried out to guarantee that any emergency lighting system is fully operational. Emergency lighting with DALI constantly monitors the system, storing reports of any failures or issues and ensuring that the system is 100 percent healthy for the maximum time possible. The health of building occupants is assured, and automatic monitoring reduces maintenance costs.

DALI emergency system key features:
- Central monitoring from touch screen panel
- Report logging software
- Functional and full duration tests
- Faults reported to central computer, reducing maintenance time and costs
- Fully addressable emergency system with central test to BS-EN and IEC standards
- Switching of maintained luminaires, individually or per group
- Scheduled tests can be programmed via the touch screen panel and automatic tests can be staggered minimising disruption to building users and still protecting every area in case of a real emergency
- Based on the international industry standard DALI protocol
- Utilises standard DALI bus wiring

Advantages of using DALI with emergency lighting

1. Proven DALI technology specific for emergency lighting

2. Our DALI solution is based on non-proprietary systems. As long as all components of a system are DALI compliant, they will be able to communicate with each other

3. Cost-effective solution with reduced maintenance costs after commissioning

4. With the addition of the ABB DALI gateway, we can connect our DALI luminaires with KNX systems and BMS

5. DALI (DiiA) Certified

DALI emergency lighting
Safety of emergency lighting

It has never been more important to ensure the safety of a building, because ensuring safety requires full knowledge that the emergency lighting is fully operational and healthy.
DALI emergency is an extension of the DALI protocol, allowing for monitoring of the status of emergency fittings from a touch screen. Proven DALI technology is specific for emergency lighting.

About DALI emergency
DALI - Digital Addressable Lighting Interface - is an open standard defined under EN62386. This standard ensures that all DALI-compatible emergency control systems work in synchronization and that the technology is available to multiple device manufacturers.
DALI emergency lighting is a cost effective monitored emergency system that often betters the traditional systems
As a standalone monitored emergency system DALI emergency can monitor lamp and battery status and advise whether the luminaires are working, faulty, charge levels and hours of use in either normal or emergency operation.

As DALI is a two-way communication protocol, the central control can send commands to the luminaire and they will send back information to the control system.
Its a mandatory requirement that building owners are taking steps to ensure that their emergency lighting installations are routinely tested, with detailed records maintained. The associated labour costs have resulted in the owners of many larger buildings or building complexes investing in automated centralised test systems.
This type of system has also become increasingly popular since changes to the fire regulations now place the legal responsibility for recording these testing procedures solely with the building owners.
The benefits of using DALI central test systems for emergency lighting applications are wide-ranging:
• Increased safety
• Reduced maintenance labour time
• Ongoing monitoring savings

DALI
What is DALI?

DALI (Digital Addressable Lighting Interface) is a data protocol and transport mechanism that was jointly developed and specified by several manufacturers of lighting equipment.

It is essentially a network connected by a pair of cables and powered by a power supply.
The common platform of DALI enables equipment from different manufacturers to be connected together. ABB's DALI is designed to work with all DALI-compliant equipment displaying the DALI logo.
Put simply, DALI (digital addressable lighting interface) is a two-way communication system that brings digital technology to lighting.

An international standard for communication, DALI allows individual ballasts to "talk" to the user and allows the user to "talk" back via DALI controllers.

DALI is a testing and control system that offers both flexibility and reliability.

Bus wiring
In terms of wiring a DALI system also includes the bus wires that are used to connect together the DALI terminals of the various devices in the system.
- Standard 2-core cable (1.5mm2)
- 5-core cable possible to enable power and data
- Polarity free & free wiring topology
- maximum 64 devices per subnet (Hub/Routers)
- maximum 300m cabling
- maximum 250mA device consumption

Control devices
Control devices can provide information to other control devices and can send commands to control gear. Input devices are a type or a part of a control device that provides some information. Application controllers are also a type or a part of a control device and are the decision makers in a DALI system – for example, they can send commands to control gear to modify the lighting or test an emergency lighting system.

Bus power supplies
At least one bus power supply must be present in a DALI system. This is necessary to allow both communications on the bus, as well as to power any bus-powered devices. The bus power supply does not need to be a separate unit – it could be part of another device such as an DALI control unit or a KNX DALI gateway.
ABB has 3 different power supply options.
The central control DALI Touch screen panel or the KNX DALI gateway. Only one power supply is needed in each network.

Control gear
Control gear usually contains the power control circuit to drive lamps, or some other type of output such as on/off switching.

DALI emergency lighting
Testing & monitoring

ABB DALI emergency lighting offers automatic test functions from either a central controller or from the luminaire itself. This ensures you will always know the status of your emergency fitting. Effective monitoring helps to ensure the safety of building occupants and give building owners the peace of mind they require.

—
01 DALI emergency lighting and control system - Normal
—
02 DALI emergency lighting and control system - Error detected

Automatic testing & monitoring
Automatic monitoring includes the status of battery charging and the status of the main power supply. Central testing includes the current battery charge condition, functional tests and duration tests. Test frequencies can be adjusted to meet the requirements of the building or the local regulations. Testing periods can vary from weekly to monthly in the case of function tests, or annually for duration tests.

Function test
A function test that simulates a mains failure and checks the operation of the emergency light from the battery supply. If there is a failure during a function test, the local indicator LED changes its status on the luminaire.

Duration test
A duration test simulates a power failure and checks the operation of the emergency light from the battery supply for the rated duration of the product. Duration tests can be one, three hours or more depending on the local regulations. If there is a failure during a duration test, the local indicator LED alerts you to a problem or, in the case of a system monitored from a central location, the emergency lighting DALI control unit (DCU) will alert by showing an error message. As with all central test systems that require annual duration testing, this is only started after the battery has had an initial uninterrupted 24 hour+ charge period.

Local testing
Function and duration tests are initiated by the emergency light fitting. It performs automatic testing according to the locally stored settings.

Central testing
Function and duration tests are initiated by the DALI control unit and displays results on the screen.

Switching
Maintained luminaires can be switched and grouped.

Emergency lighting and control unit

KNX Integration

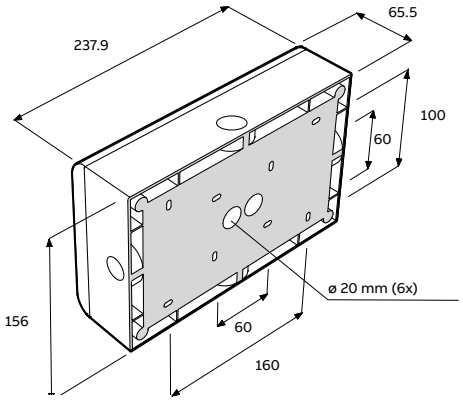
Connection via DALI-KNX Gateway to KNX systems

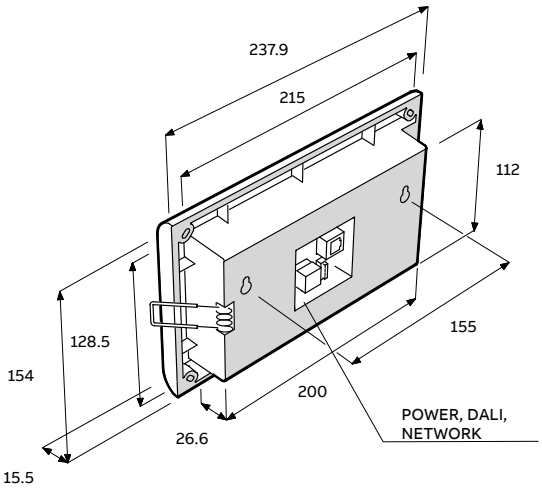
- Central monitoring, testing and control via the KNX building automation through integration of DALI self-contained emergency lighting via the DALI-KNX Gateway
- Alternative to the DALI emergency lighting control unit - ELDCS (both can't be used together)
- DALI-KNX Gateways for 64 and 2x64 luminaires
- Can be combined with DALI luminaires for general lighting
- Additional software required for use

DALI-KNX Gateway with integration in building automation

DALI control unit (DCU)

Productivity & reliability





DALI emergency lighting control panel

- Ensuring building occupant safety
- Touch screen to control, test and monitor emergency lighting
- Simple to group and easy to install

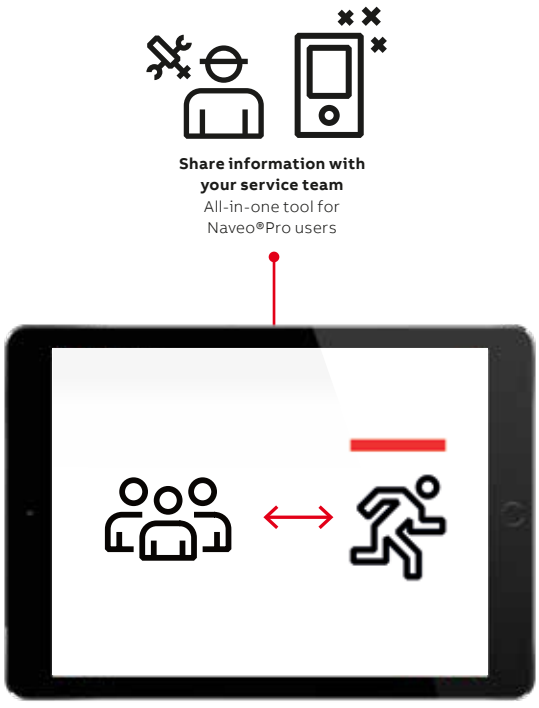
Naveo®Pro
The emergency lighting inspection and maintenance solution

The Naveo®Pro inspection and maintenance system provides a digital overview via the cloud – providing ready information to assist resource planning and enhance building safety. This information can be processed directly using a mobile device.

—
01 The ABB Ability™ platform is an integrated Internet platform and cloud infrastructure.



In practice, this will save you time on collecting and entering information. Naveo®Pro gives you integrated cyber security for safety and reliability, enables better maintenance planning, and reduces operating costs.

Overview in inspection and maintenance
In practice, ongoing inspection, maintenance and testing of emergency lighting is a time-consuming process with a great deal of work that has to be carried out regularly during every year that the installation is in place. These costs can be out weighed with a centralised automatic test system.

With Naveo®Pro you can concentrate on what matters: letting your emergency lighting luminaire system manage itself and reduce the amount of time monitoring it. This will quickly save you a considerable amount of money on maintenance time, allowing you to focus on problems quickly and as they happen. In figures, this could have potential savings of up to 30% on costs each and every year.

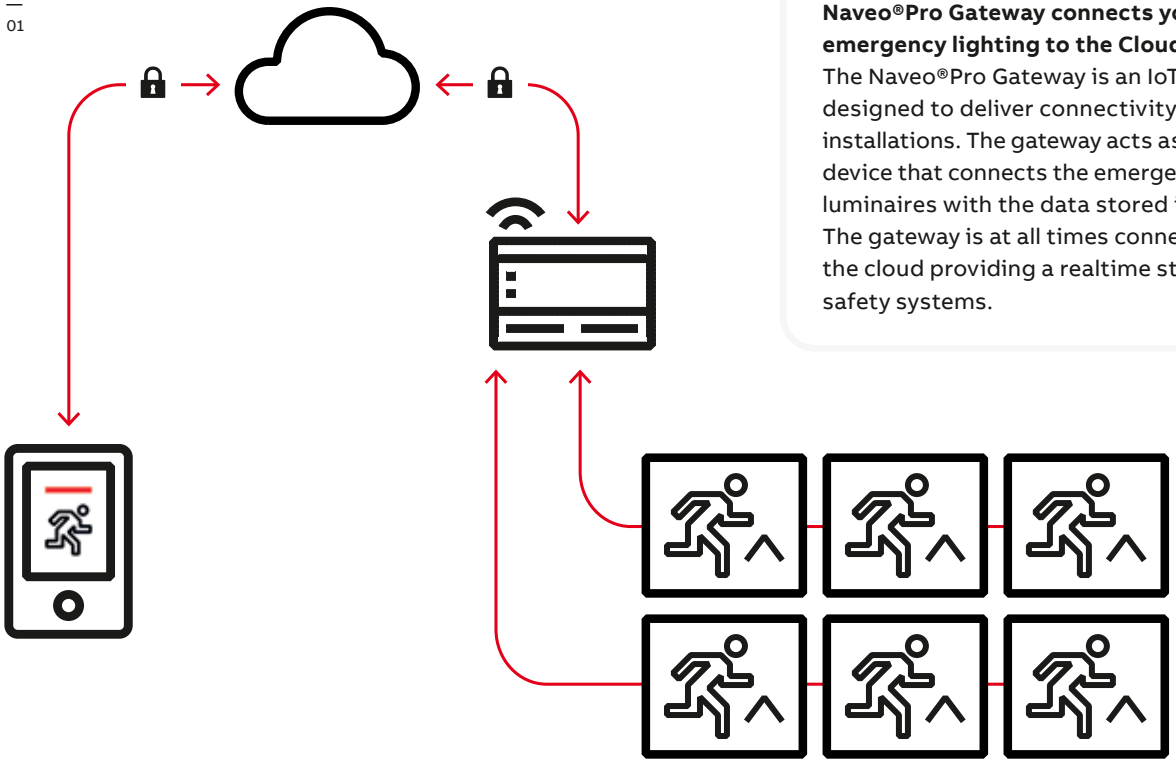
An overview of the advantages
- Inspection and maintenance software for mobile device
- Save time in planning maintenance ahead
- 24/7 overview of all monitored buildings via google maps
- Save administration time with on-site data entry using your mobile app
- Status alerts pushed to your mobile device
- Automatic list of (replacement) parts, including article numbers
- Ensuring that intended design of the emergency lighting installation is never compromised
- Documents can be used to prove safety of building to insurance companies, e.g. Liability and Buildings Insurance

ABB Ability™ enables Intelligent Buildings
ABB Ability™ connects our customers to the power of the Internet of Things and, through our services and expertise, goes further by turning data insights into the direct action that "closes the loop" and generates customer value in the physical world.

—
01

Naveo®Pro

The emergency lighting inspection and maintenance solution



01 The Naveo®Pro architecture for emergency lighting consists of three tiers; emergency lighting luminaires, the ABB gateway and the cloud.

Connecting your emergency lighting luminaires to the ABB gateway is simple and makes real time system status information readily available and easy to process via the cloud. Having this information enables you to get status directly to your mobile device. This method of accessing controlling, and monitoring the status of your installation, makes maintenance of your installation a great deal easier.

How does it work?
With Naveo®Pro being connected all the time, your emergency lighting system is always fully up to date. You can easily set up the connection:

- The Gateway continuously receives all luminaires data and pushes this information to the Naveo®Pro app.
- On continuous request from the cloud the Gateway automatically sends all (test) data to the Naveo®Pro app. With Naveo®Pro you are therefore constantly in touch with your system status anytime and anywhere.
- During a visual inspection of your building you can add notes directly into the app which means you can record your visual risk assessments in one place.

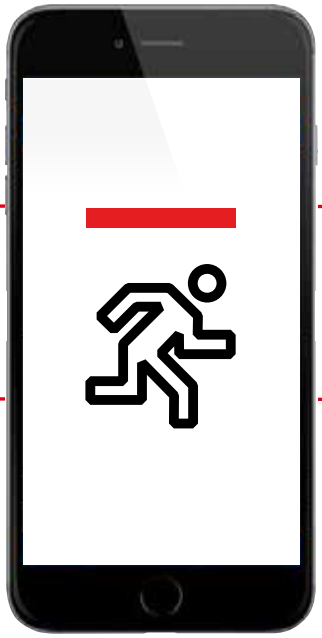
01

Naveo®Pro Gateway connects your emergency lighting to the Cloud
The Naveo®Pro Gateway is an IoT Gateway designed to deliver connectivity to all types of installations. The gateway acts as a networking device that connects the emergency lighting luminaires with the data stored in the cloud. The gateway is at all times connected to the cloud providing a realtime status of your safety systems.

* Up to 500 luminaires per gateway.

The Naveo®Pro app

Set up, maintain and fully control your entire emergency lighting installation with a new mobile app.



The Naveo®Pro App provides a real time overview of all systems, saving time, enabling better maintenance planning and enhancing building safety.
With the Naveo®Pro app, all types of emergency luminaires can be easily installed and programmed into a building in a fast and intuitive way using a QR code.

Through the ABB Ability™ platform, the system provides a digital overview via the cloud, giving instant information to assist resource planning and enhance building safety, which can be processed directly from a mobile device.

With emergency luminaire data stored in the cloud, the mobile app provides a 24/7 overview of all smart monitored buildings via Google maps. Building maps can be uploaded and overlaid onto Google maps, showing its current status and providing a clear and precise location of the emergency lighting luminaire.

Set-Up
Easily install and add new devices to your building through a list or map

Maintain
Defective devices are automatically detected and reported on your device in addition to push notifications

Test
Run test instantly or program them to ensure that all your devices are working properly

Share
Easily share the results of tests with other people on your team

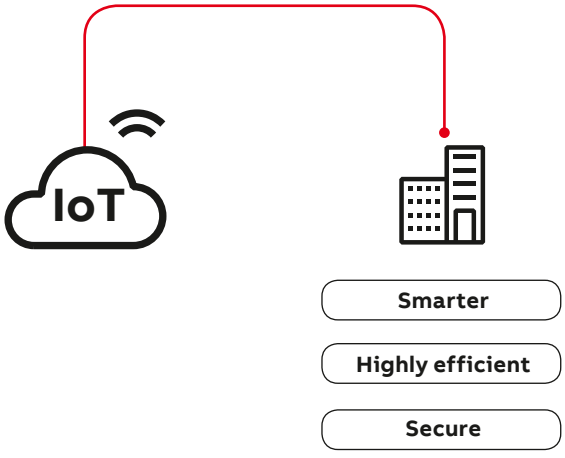
Nexus®Pro
A new age of intelligent solutions

Our lives are touched daily by the Internet. It widens our horizons and improves our capabilities by connecting us to a wider community and their collective knowledge.



For over a decade, ABB has been working to develop and enhance process control systems, communications solutions, sensors and software for the Internet of Things (IoT). These technologies enable all building owners in industries, utilities and infrastructure to analyze their data more intelligently, optimize their operations, boost their productivity, and their flexibility. ABB is advancing the IoT by helping customers enhance their existing technologies, while keeping sight of our enduring commitment to safety, reliability, cybersecurity and data privacy.

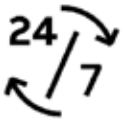
High level of cybersecurity
Cybersecurity can be a big concern in the world of IoT. Over the year, cybersecurity for automation and control systems has gained a lot of attention and is becoming increasingly important for all building managers or owners.

In the age of IoT, it's clear that "security" means much more than protection against cybercrime: certainly, connections need to be safe, but the value of that data should also be protected. Customers should not be required to forfeit safety, value, or control in order to realize the benefits of digitization.

By understanding market conditions, customer needs and the cyber environment, ABB strives to achieve and exceed the required levels of cybersecurity without compromising operational performance. Our solutions are aimed at reducing business risk, providing comfort and confidence, as well as enabling compliance with standards and legal requirements.

Digital connectivity
Driving change and innovation

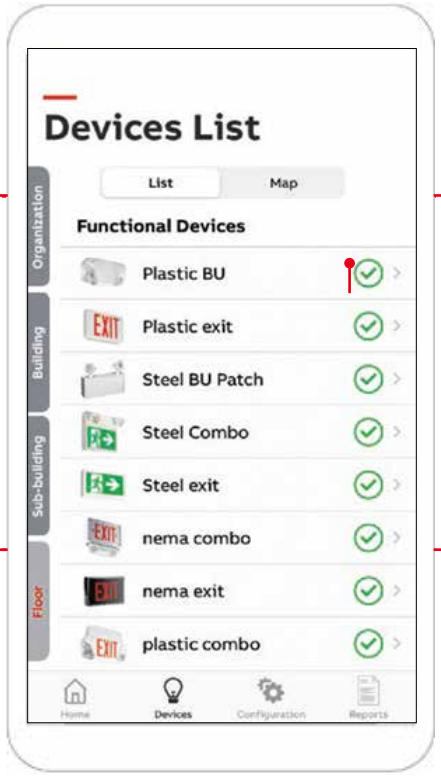
Nexus®Pro
Solution and benefits



Nexus Pro is designed to enable building owners and managers to easily maintain and test emergency lighting, without the need to visually verify performance or disrupt the power supply.
With digital solutions, building owners now can have peace of mind knowing their buildings are safer than ever. All operations can be managed remotely, giving building owners and managers complete control wherever they are, whenever they need it most while preventing any human error in the process.

Cost effective
- Reduce labor costs for maintaining emergency lighting
- Saving on cost and labour on manual collection and recording of emergency lighting data
- 200 emergency lighting units on one gateway • Reduce Monitoring costs by simply receiving notification once there is defective device

User friendly
- Monitor remotely anywhere at anytime
- Fast and easy testing with a smart device
- Interactive 2D floor plan layout showcasing emergency lighting positioning
- Software updates automatically applied
- Easily go from one building to many with our scalable system



Enhanced Safety and Protection
- Comply with Building and Life Safety Codes and other North American regulations
- Real-time self-monitoring and maintenance alerts if units stop functioning
- Holds all emergency lighting testing and maintenance data in a secure ABB cloud
- Ownership of maintenance data input, quick testing and device monthly and annual scheduling

Improve installation efficiency
- Quick and flexible commissioning
- Ease of use due to app configuration
- Get diagnostics and part number recommendations during failures

Set up
EEasily install and add new devices through your smart device

Maintain
Defective devices are automatically detected and reported on your interface in addition to push notifications

Test
Run test instantly or program them to ensure that all your devices are working properly

Share
Easily share the results of tests with team members, maintenance staff and technicians

Freedom
Home becomes smart

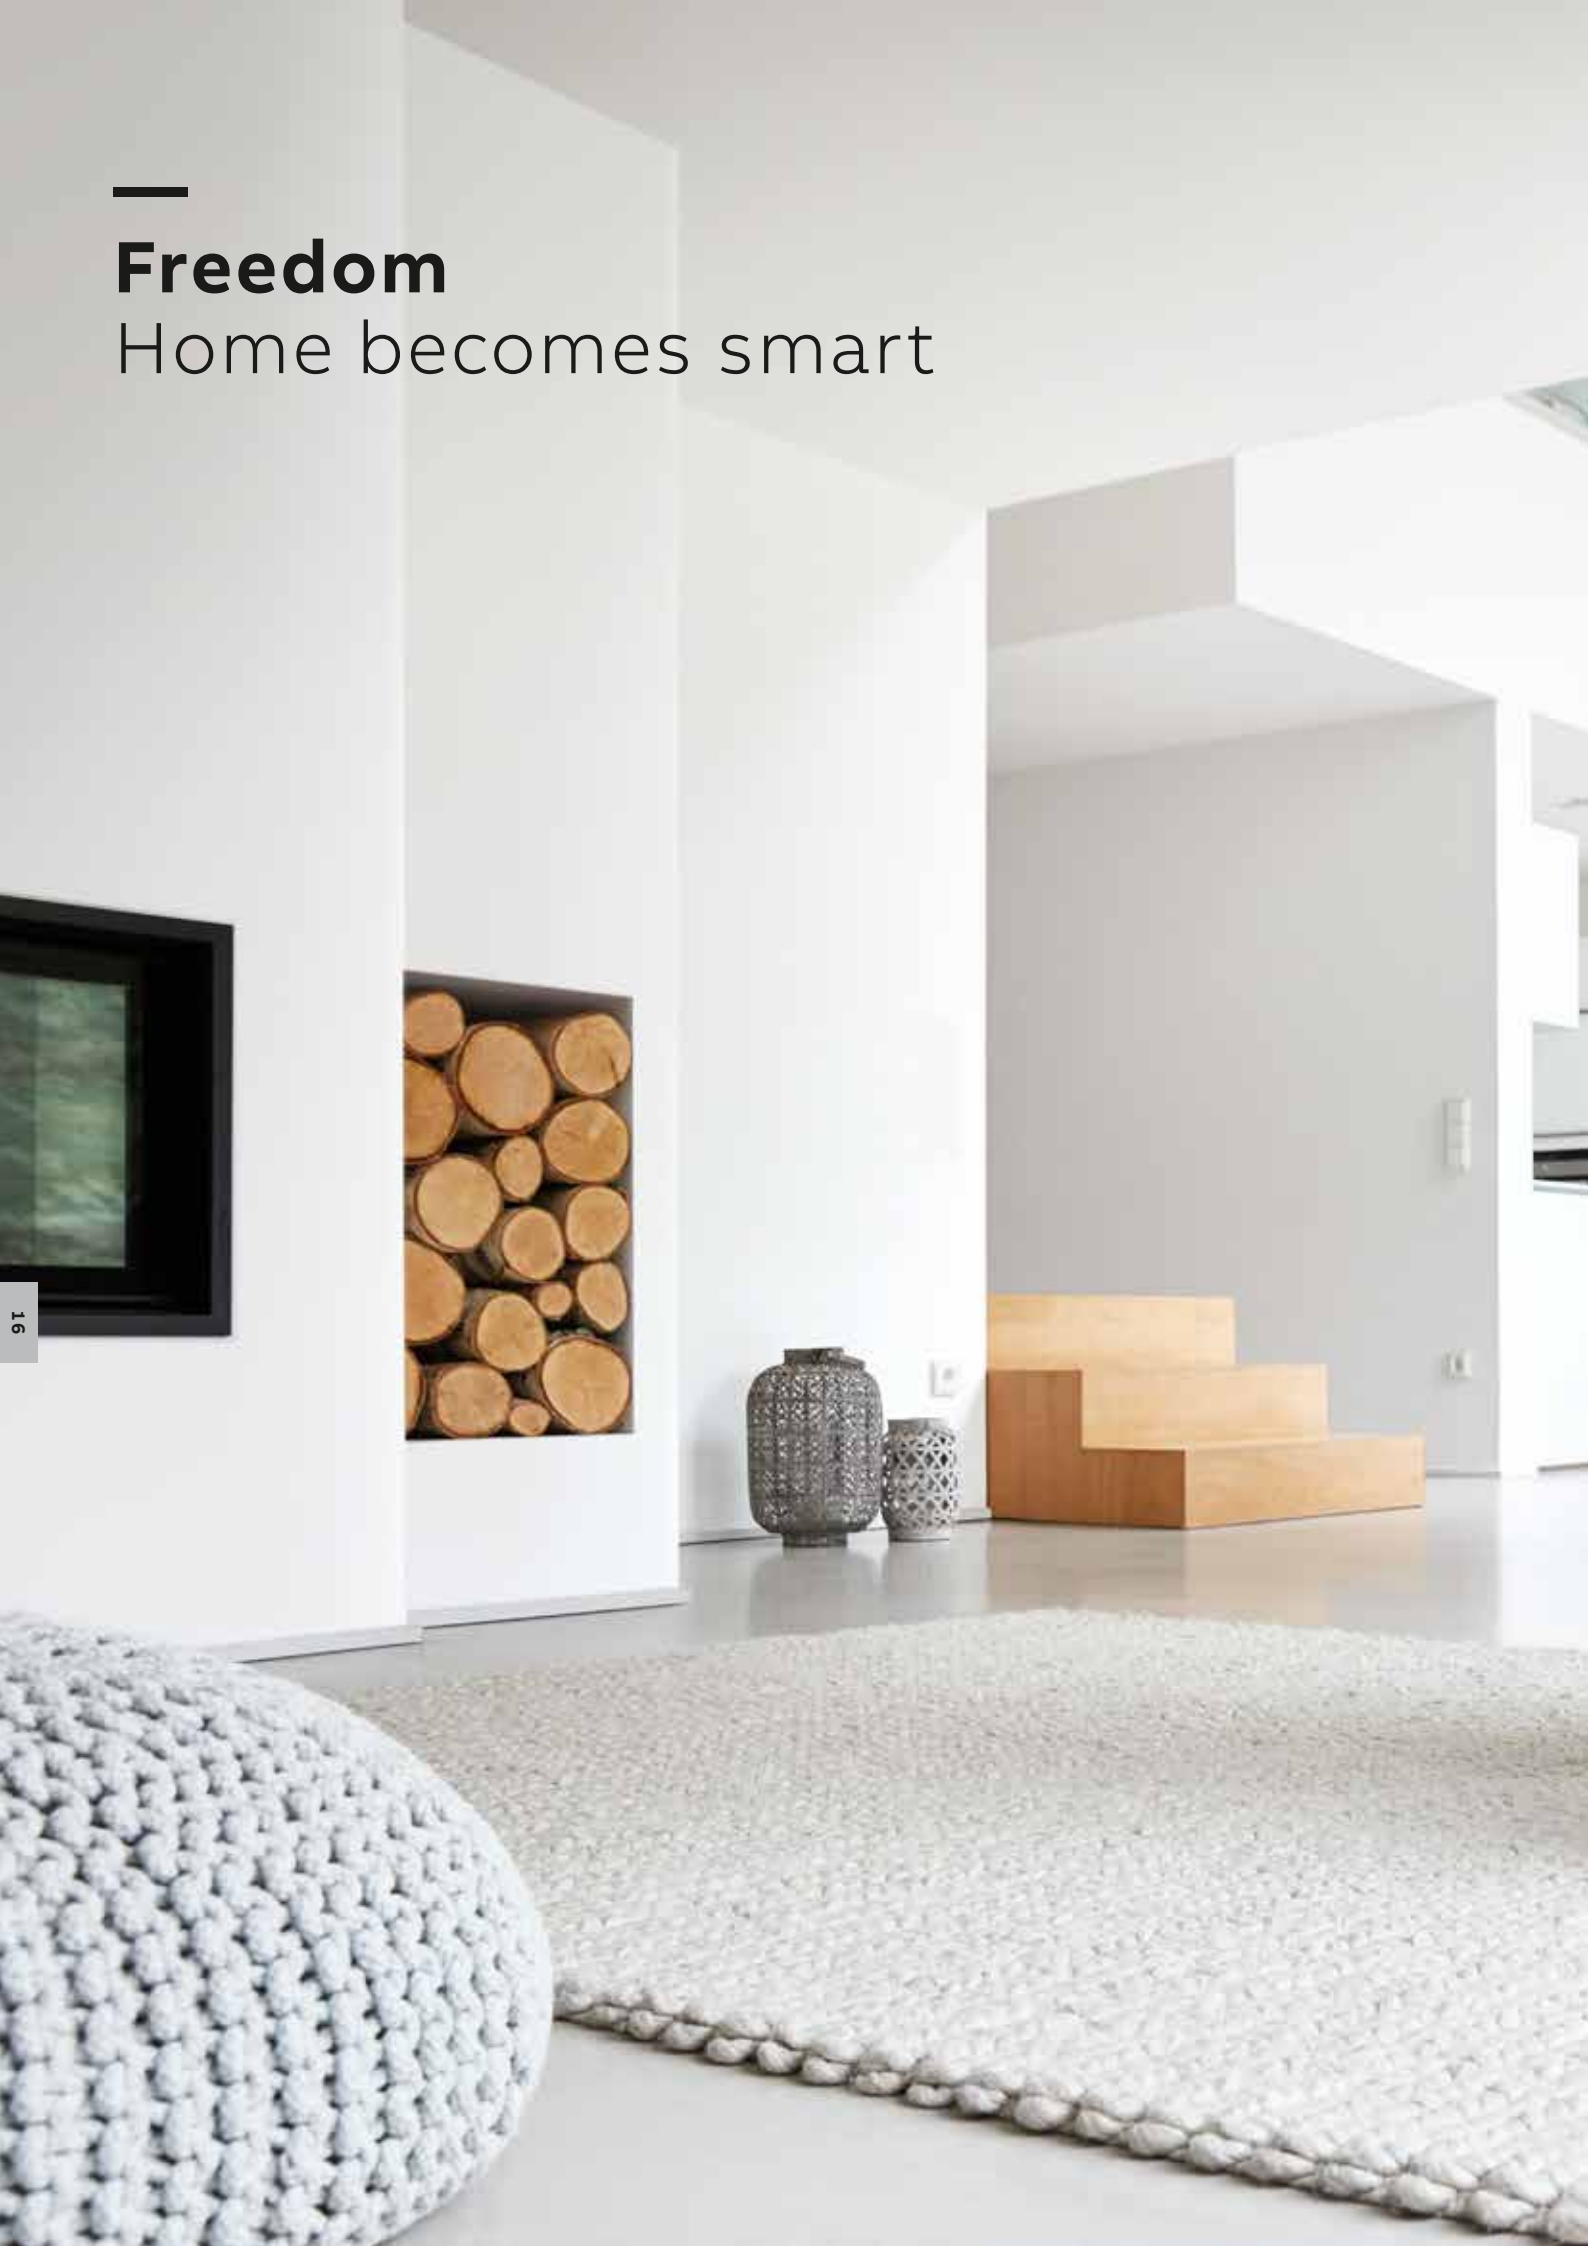

ABB-free@home®
Endless installation possibilities

Perfect daily routine. With ABB-free@home® the entire home can be controlled as usual with switches, and now even more practical: with the smartphone, tablet, or computer. Via touch or voice control.

Blind

Light

Heating

Air-conditioning

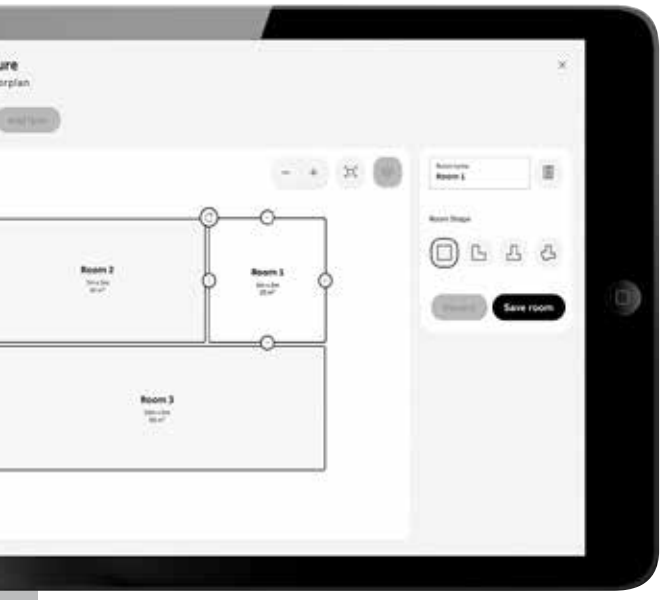
Door communication

Open for new ideas
With ABB-free@home® everyone can determine for themselves how they want to use the smart living technologies. Both individual functions, such as heating or control of blinds, or a combination of different functions can be implemented. Over the course of time the system can also be flexibly extended, if one so desires. Freedom of choice at all times.

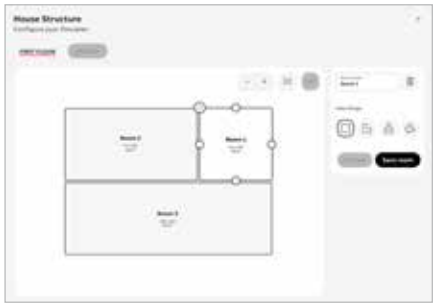
Blinds
Whether blind, roller blind, awning or roller door – with ABB-free@home®, sun protection and energy-saving could not be easier. Opening and closing, as well as adjustment of slats can be automated and controlled. In addition, a weather station for protection during a storm, a timer or astro function can be used. It automatically adjusts the blind according to sunrise and sunset. The relevant data are combined in the System Access Point and are precisely implemented.

Light control
Life begins with light.
With ABB-free@home® it can be optimally used, whether for illuminating individual rooms or the entire house. For example, with striking light scenes – for different moods and to suit the occasion. A pleasant side effect here is the cost-saving and environmentally friendly use of energy.

Heating and air-conditioning
Comfortable and energy-saving. The optimum room temperature can be adjusted according to the actual requirement. The heating can be automatically shut off when the windows are open. This reduces energy consumption. The ideal temperature is never the same. Depending on the time of the day, the room temperature controller provides your personal feelgood temperature. The heating valves are controlled wirelessly – with radio controlled thermal actuating drives. The room temperature controllers can be integrated into the switch combination. And the window contacts are networked wirelessly.



Door communication
The ABB-Welcome door communication system can be integrated into ABB-free@home®. The door communication and home automation can be used together with ABB-free@home-Touch 7". For example, the light switches on when the doorbell rings to see visitors more clearly. And for reasons of safety, the video camera records pictures of visitors at the door when no one is home.



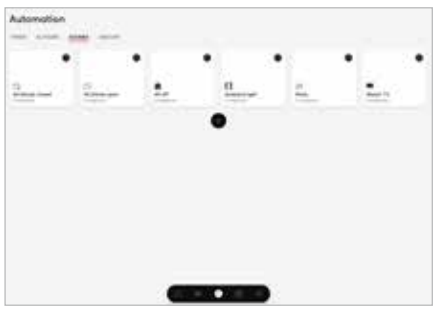
Integration of home appliances
The smooth integration of modern household appliances into ABB-free@home® offers a variety of options for convenient use. All networked devices with their icons are displayed in the free@home app and the ABB-free@home® panel and can be controlled from there. All functions can also be directly controlled via the wall-mounted pushbuttons, which is possible only with free@home.

So easy, anyone can do it
Creating scenes

Intuitive operation. The ABB-free@home® app is easy to understand.
To start with, all available devices in the rooms are activated in the display, allowing the favourite settings to be made immediately via drag-and-drop.

Easy to install – and even easier to operate
The ABB-free@home® app has been optimised for use in daily life. The wizard guides one through the system. The most important functions are clearly marked with self-explanatory icons. It makes no difference whether the components are connected in the two-wire bus or wirelessly. One has control over a uniform system. For maximum security, a personal password can be activated when logging in. This protects the home automation system against unauthorized access and tampering.

The house
First the electrician sets up the floor plan with its floors and rooms.



Assigning
Then the sensors in the app are integrated in the floor plan and assigned in the system.

Combining
And finally, the elements can be combined according to individual preferences and requirements.

Simple and time-saving
The electrician performs the initial configuration of the system via app. Operation is particularly fast and saves on costly billable hours.

Scene control
The user can easily combine the switches and devices available in each room to create personal scenes. The lighting scene for an evening on the sofa, for example.

Time control
Roller blinds can be automatically moved and lights can be switched at any time or dependent on sunrise or sundown.

Panel setting
The most important functions can be controlled from a central location in the house and easily changed later at any time.

Simply effortless
This saves valuable labour time

Now easier than ever. Only a few components are needed to install ABB-free@home®. For the direct activation of light, the entire system only requires a bus cable, the sensor/actuator unit, a power supply and a System Access Point for programming.

The System Access Point
The nerve centre of the ABB-free@home® system is the System Access Point. It provides access for computer, tablet or smartphone via WLAN. This allows the functions of the system to be defined and remotely controlled – even after installation. The System Access Point can also be combined with a network router – via LAN or WLAN. Just connect and you're done. For convenience, the System Access Point creates its own WLAN and the software necessary for project planning and commissioning is already on board. This makes you independent from the structural conditions and no additional software is required. As soon as you are finished with programming you can save the status and restore it again at any time.

The actuators and sensors
Actuators for switching, dimming and control are available for ABB-free@home®. The flush-mounted binary inputs also allow the integration of conventional switches and devices, such as window contacts, for example. Push-buttons, room temperature controllers and movement detectors are available as sensors.

Central distribution board with rail-mounting actuator
The installation of central rail-mounting actuators in the consumer unit makes the installation of the sensors even easier – as only the bus line is located in the flush-mounted box. With this method, the costs for each channel can be reduced.

Sensor/actuator unit for decentralised control
All in one. With the sensor/actuator unit, both the sensor and actuator are located in a single device to save space. The basic function of the unit is pre-configured, which makes programming the basic function unnecessary – but possible if required. The 230-volt line is wired as usual.

Sensor/actuator unit
The sensor/actuator unit combines a control element and, for example, a switch actuator in the single flush-mounted housing. It is installed in the same way as a flush-mounted switch. The device has already been pre-programmed: this means the light can be switched on directly after installation – without any programming. The sensor/actuator unit can, of course, be freely re-configured via the user interface, just like all other sensors and actuators.

ABB-free@home®

System devices

Basic free@home radiator thermostat, wireless [1) 2)]
For temperature control of hydronic heating radiators.
With integrated temperature sensor, controller and actuating drive.
Local operation for the switchover between comfort mode and Off.
No wire laying required.
Communication with the free@home system is carried out wireless.
Setpoint adjustement via the free@home app or a temperature controller extension (e.g. RTC-F-1).
“Window open” detection when combined with Window sensor Wireless (WBI-S-1-XX-WL).
With lime protection function.
With frost protection function.
Quiet operation.
Installation with sleeve nut M 30 x 1.5.
Fits many popular valve bases (e.g. Braukmann, Heimeier, Honeywell, Junkers, MNG).
The adapters for Danfoss RAV, Danfoss RA and Danfoss RAVL are included in the scope of supply.
Adapters for additional valves are available as accessories.
Battery included in scope supply.
Battery type: 2 x AA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 48 mm x 84 mm

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®
System devices

Comfort free@home radiator thermostat, wireless [1) 2)]
For temperature control of hydronic heating radiators.
With integrated temperature sensor, controller and actuating drive.
Local operation for the switchover between comfort mode, eco mode and Off.
No wire laying required.
With integrated Display and control knob for Setpoint temperature adjustment.
Setpoint adjustement locally, via the free@home app or a temperature controller extension (e.g. RTC-F-1).
Integrated “Window open” detection or can be linked with WBI-S-X-WL.
With lime protection function.
With frost protection function.
Quiet operation.
Installation with sleeve nut M 30 x 1.5.
Fits many popular valve bases (e.g. Braukmann, Heimeier, Honeywell, Junkers, MNG).
The adapters for Danfoss RAV, Danfoss RA and Danfoss RAVL are included in the scope of supply.
Adapters for additional valves are available as accessories.
Battery included in scope supply.
Battery type: 2 x AA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 48 mm x 84 mm

ABB-free@home®
System devices

free@home window sensor, wireless [1) 2)]
For monitoring of the current window handle position.
The status can be visualized on the free@home panel and in the free@home app.
The window sensor is installed between the existing window handle and the window frame.
Existing window handle is used.
Suitable for window handle: 7 mm square fastener, 43 mm
attachment screw separation, lifter dia. 10 and 12 mm, max.
mounting plate size 34 x 77 mm (WxH). No wire laying required.
Mounting accessories (square extension, screws, adapter for cams) are included.
Battery included.
Low Battery notification via the free@home app.
Protection class (Device): IP 43
Temperature range (Device): -5 °C to 50 °C
Dimensions: (L x W x D): 168 mm x 38 mm x 13 mm

free@home universal detector, wireless [1) 2)]
For monitoring of the state (open, closed) of windows, skylights, doors and gates with a magnetic contact.
Additional connection option for an external, potential-free sensor
(choice of normally closed or normally open contact).
The status can be visualized on the free@home panel and in the free@home app.
The magnetic contact and the potential-free input can be monitored separately.
The universal detector and the magnets are fixed with adhesive film or screws.
Accessories (adhesive foil, screws, magnet) included in delivery.
Battery type: CR2
Low Battery notification via the free@home app.
External sensor max. wire length: 5 m
External sensor terminal connection diameter : 0.14...0.5 mm² (single wire)
Protection class (Device): IP 43
Temperature range (Device): -5 °C to 50 °C
Dimensions: (L x W x D): 118 mm x 30 mm x 22 mm

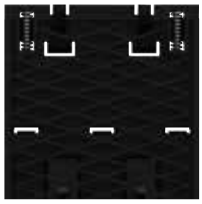
ABB-free@home®



System devices

System Access Point 2.0
For commissioning and remote control of the ABB-free@home® system.
Support for up to 150 free@home participants (independent of whether wireless or wired).
With integrated free@home wireless antenna.
With integrated free@home bus connection.
Easy to mount thanks to the external power adapter (included in the scope of delivery).
Optional supply via the yellow/white twisted pair of the bus line (24 V).
Allows the execution of astro and time programs.
Commissioning and remote control is executed via the web interface or app.
No additional commissioning software is required.
Easy commissioning with WLAN ad-hoc mode.
Connection to the home network via WLAN client mode or via CAT cable.
Suitable as table device.
Suitable for wall mounting.
2 x USB ports for future extension of functions.
2.4 GHz and 5 GHz WLAN
1 GHz dual core processor
512 MB working storage
Scope of delivery: Mounting plate, power adapter, screws and dowels
The bus connection is provided via the enclosed bus terminal.
Display elements: LED for status display.
Bus voltage: 24 V
Rated voltage: 230 V~
Rated frequency: 50 Hz / 60 Hz
Protection class (device): IP 20
Temperature range (device): -5 °C - 45 °C
Storage temperature range: -20 °C - 70 °C
Dimensions: (L x W x D): 107 mm x 109 mm x 30 mm
Programming via the web interface of the System Access Point.
Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current Online-Catalogue.
A bus power supply is required for the operation of free@home wired devices.
When operating with more than 64 participants, an additional bus power supply is required.

Rated voltage: 230 V~

ABB-free@home®
Displays

ABB-free@homeTouch 7" [1) 2)]
Indoor video station with 17.8 cm (7") touch display
For ABB-free@home® and ABB-Welcome®.
For the central control of up to 16 configurable ABB-free@home® functions and display of the video image of an outdoor door communication station. During the conversation a picture of the visitor can be taken and stored in the picture memory. For door calls during absence three pictures of the visitor are automatically stored in the picture memory. With hands-free function, volume is adjustable. Easy operation keys for door openers, mute function and light. Different bell sounds are adjustable for door and floor ringing; five polyphone bell sounds are available. Volume of bell sounds is adjustable. SD card slot for extension of the picture memory. Suitable as room temperature controller extension unit. For surface mounting. The bus can be connected via enclosed terminal block.
Display size: 17,8 cm (7")
Display resolution: 800 x 480
Display elements: TFT Touch Display
Protection class (Device): IP 30
Dimensions: (L x W x D): 155 mm x 218 mm x 29 mm

ABB-free@home®
Sensor unit

Sensor unit, 1gang [1) 2)]
For transmitting switching, push-button, dimming and blind commands to an ABB-free@home® actuator.
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 23 mm
Mounting depth: 9 mm

	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	180075	SU-F-1.0.1	2CKA006220A0117			1

Sensor unit, 1gang, wireless [1) 2)]
For transmitting switching, push-button, dimming and blind commands to an ABB-free@home® actuator.
Communication with the free@home system is carried out wireless.
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Rated voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

ABB-free@home®

Sensor unit

Room thermostat [1) 2)]

Heating/cooling operation.
Control element with room temperature controller function for controlling commercially available actuating drives in connection with HA-M-0.6.1, HA-M-0.12.1, FCA-M-2.3.1.
With display of set-value temperature.
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-xxx.
The bus can be connected via enclosed terminal block.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Bus voltage: 24 V
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 30 mm

ABB-free@home®
Sensor unit

Room temperature controller/heating actuator, wireless [1) 2)]
Heating/cooling operation. Communication with the free@home system is carried out wireless.
Control element with room temperature controller function.
With display of set-value temperature.
With integrated switch actuator, e.g. for controlling thermoelectric actuating drives in heating/cooling systems or electric floor heating systems. RTC function is available also without prior programming (preconfigured).
In connection with temperature sensor DP4-T-1 the integrated room temperature controller can be fitted with a remote sensor.
3 wire connection (neutral conductor required).
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-XXX.
With fixing claws.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Rated voltage: 230 V~
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Supply voltage: 230 V~
Suitable for: ohmic
Rated current: 16 A
Output voltage: 230 V~
Rated power: 3 680 W
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 48 mm
Mounting depth: 32 mm

ABB-free@home®

Sensor unit

Switch actuator sensor, 1/1gang [1) 2)]
For switching 127 V~/230 V~ consumers.
With integrated switch actuator.
Switching function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 1x Normally open contact, potential free
Suitable for: ohmic
Rated current: 10 A
Output voltage: 230 V~
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Rated power: 2300 VA
Suitable for: inductive
Rated current: 10 AX

1) Programming only with bus voltage applied via the web interface of the System Access Point.
2) Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current e-catalogue.

ABB-free@home®

Sensor unit

Switch actuator sensor, 2/2gang, wireless [1) 2)]
For switching 127 V~/230 V~ consumers.
Communication with the free@home system is carried out wireless.
With integrated 2gang switch actuator.
Switching function is available also without prior programming (both sensor channels are pre-configured). Configuration can be changed later via the web interface (groups, scenes, etc.). Only to be used in combination with ABB-free@home® 2gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 127 V/230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 2x Normally open contact, potential free
Suitable for: ohmic
Rated current: 5 A
Output voltage: 230 V~
Rated power: 1380 W
Suitable for: capacitive
Rated current: 4 AX
Rated power: 920 VA
Suitable for: inductive
Rated current: 4 AX
Rated power: 920 VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

ABB-free@home®

Sensor unit

Dimming actuator sensor, 1/1gang [1) 2) 3)]
For dimming 230 V~ loads.
With integrated universal dimming actuator for controlling LEDs, incandescent lamps, 230 V halogen lamps, low-voltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lamps.
For dimmable Retrofit-LEDs (LEDi).
Dimming function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
Only to be used in combination with ABB-free@home® 1gang rockers.
The bus can be connected via enclosed terminal block.
When installing in the flush-mounted box, a spatial division between the bus cable and 230 V installation cable is to be adhered to! If this minimum distance is not possible, use electronic boxes or insulating tubes.
Control element: Switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state
Bus voltage: 24 V
Outputs: 1x dimming channel
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformer.
Rated power: 10 - 180 W/VA
Suitable for: LEDi and energy-saving bulbs; typical
Rated power: 2 - 80 W/VA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 45 mm
Mounting depth: 32 mm

ABB-free@home®
Zenit/Millenium

Room temperature controller/heating actuator, wireless [1) 2)]
For ABB-free@home®
Heating/cooling operation.
Control element with room temperature controller function.
With display of set-value temperature.
With integrated switch actuator, e.g. for controlling thermoelectric actuating drives in heating/cooling systems or electric floor heating systems.
RTC function is available also without prior programming (preconfigured).
In connection with temperature sensor DP4-T-1 the integrated room temperature controller can be fitted with a remote sensor.
3 wire connection (neutral conductor required).
Only to be used in combination with ABB-free@home® room temperature controller cover plates CP-RTC-XXX. With fixing claws.
Control element: Floating rocker for the selection of set values and operating modes
Display elements: LCD showing operation modes
Rated voltage: 230 V~
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Supply voltage: 230 V~
Suitable for: ohmic
Rated current: 16 A
Output voltage: 230 V~
Rated power: 3680 W
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 71 mm x 71 mm x 48 mm
Mounting depth: 32 mm

WIRELESS	Bbn 4011395	Order details		Price 1 piece	Weight 1 piece	Pack unit

Switch 1/2gang, wireless
For sending switching, dimming and blind command to an ABB-free@home® actuator.
To be used with ABB-free@home® Zenit cover plates for 2 fold push buttons.
Control element: Switch contacts top/bottom
Display elements: LED for orientation or switch state display
Protection class of device: IP 20
Mounting depth: 14.1 mm
Dimensions (H × W × D): 44 mm x 44 mm x 23.5 mm

ABB-free@home®
Zenit/Millenium

Movement detector
With select lens for detection with animal access. For automatic switching of ABB-free@home® actuators dependent on movement and brightness.
To be used with ABB-free@home® Zenit cover plates for movement detector.
Detection range: frontal 6 m, lateral 3 m
Detection angle: 180°
Brightness limit value: 1 – 500 lux
Protection class of device: IP 20
Mounting depth: 14.1 mm
Dimensions (H × W × D): 44 mm x 44 mm x 29.6 mm

Movement detector + 1 actuator
With select lens for detection with animal access. Including an integrated actuator for switching 230 V~ devices. To be used with ABB-free@home® Zenit cover plates for movement detector.
Outputs: 1× normally open contact, potential free
Suitable for: resistive
Rated current: 10 A
Rated power: 2300 W
Suitable for: capacitive
Rated current: 10 AX
Detection range: frontal 6 m, lateral 3 m
Detection angle: 180°
Brightness limit value: 1 – 500 lux
Protection class of device: IP 20
Mounting depth: 31.5 mm
Dimensions (H × W × D): 44 mm x 44 mm x 47 mm

DINRail

Power Supply, 640 mA, MDRC
Power supply with integrated choke.
Fast diagnosis due to LED display for operational readiness and errors.
The bus can be connected via enclosed terminal block.
Display elements: Operational load/overload LED
Rated voltage: 127 - 230 V~, +10 % / -15 %
Secondary: 30 V, +2 V / --2 V
Rated frequency: 50 Hz/60 Hz
Outputs: 1
Rated current: 640 mA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit

ABB-free@home®

DINRail

Switch Actuator, 4-fold, 16 A, MDRC

For switching 4 independent 127 V~/230 V~ loads.
Each contact has a manual operation function independent of auxiliary voltage for additionally displaying the contact setting.
The bus can be connected via enclosed terminal block.
Control element: Relay control element
Display elements: Relay control element
Bus voltage: 24 V
Outputs: 4
Suitable for: AC1
Rated current: 16 A, cos ϕ 0.8
Output voltage: 230 V~
Suitable for: AC3
Rated current: 8 A, cos ϕ 0.45
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	942089	SA-M-0.4.1	2CDG510006R0011			1

Heating Actuator, 6-fold, 230 V, MDRC

For controlling thermoelectric actuating drives in heating/cooling systems.
The outputs are protected against short-circuit and overload.
The bus can be connected via enclosed terminal block.
Bus voltage: 24 V
Outputs: 6
Suitable for: ohmic
Rated current: 160 mA
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width: 4 MW

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit

Switch Actuator, 8-fold, 6 A, MDRC
Combination device with 8 binary inputs and 8 switch actuators.
Conventional push-buttons or auxiliary contacts can be connected to 8 channels.
The information of the contact enquiry can be used for activating ABB-free@home® actuators or for recording status information.
The contact polling voltage is made available by the device itself.
Maximum cable length at a cable cross-section of 1.5 mm² < 100 m
For switching 8 independent 230 V~ loads.
Bus voltage: 24 V
Inputs: 8
Polling voltage: 32 V-
Outputs: 8 Normally open contact, potential free (for 1 fan)
Suitable for: AC1
Rated current: 6 A, cos ϕ 0.8
Output voltage: 230 V~
Suitable for: AC3
Rated current: 6 A, cos ϕ0.45
Output voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64.5 mm
Module width: 8 MW

ABB-free@home®

DINRail

Fan Coil Actuator, PWM, MDRC
For controlling blower convectors.
Supports 2-pipe and 4-pipe system for heating and cooling.
The fan speed levels can be switched using a changeover or step switch function.
Three contacts for switching a three-stage fan.
Two contacts for activating the heating and cooling valves.
Supports 24V and 230V valves.
With two binary inputs for connecting dewpoint and condensation contacts.
The scanning voltage is provided by the device.
The bus connection is provided via the enclosed bus terminal.
Bus voltage: 24 V
Inputs: 2
Polling voltage: 10 V-
Outputs: 3 Normally open contact, potential free
Suitable for: AC3
Rated current: 6 A
Output voltage: 230 V~
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 108 mm x 64.5 mm
Module width: 6 MW

ABB-free@home®

DINRail

Dim actuator 4 x 210 W, MDRC

Multichannel universal dimming actuator optimised for dimming retrofit LED lamps (LEDi).
Also suitable for dimming incandescent lamps, low-voltage halogen lights with conventional or electronic transformers, 230 V halogen lamps and dimmable energy-saving halogen lamps.
Automatic load detection (can be deactivated).
Separate N-connection per channel.
Parallel connection of the outputs possible to increase the output power.
Outputs can be connected in parallel in any configuration.
Minimum load: 2 W.
Manual operation on device also possible without bus voltage or in an unprogrammed status.
Programming of the device also possible without applied 230 V supply voltage.
With integrated bus coupler.
Nominal power at 230 V~ mains voltage:
230 V~ incandescent and halogen lamps: 4 x 210 W/VA to 1 x 600 W/VA.
Dimmable 230 V~ LEDi: 4 x 210 W/VA to 1 x 600 W/VA in trailing edge control, 4 x 80 W/VA to 1 x 200 W/VA in leading edge control.
Inductive L-transformers with LED/low-voltage halogen lamp: 4 x 210 W/VA to 1 x 600 W/VA.
Electronic C-transformers with LED/low-voltage halogen lamp: 4 x 210 W/VA to 1 x 600 W/VA.
Electronic LC-transformers with LED/low-voltage halogen lamp: 4 x 80 W/VA to 1 x 200 W/VA.
Control element: One LED button per channel (including a colour status indication) for switching ON and OFF, as well as dimming up and down.
Bus voltage: 24 V
Rated voltage: 110 - 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 4x dimming channel
Protection class (device): IP 20
Temperature range (device): -5 °C - 45 °C
Storage temperature range: -20 °C - 70 °C
Dimensions: (L x W x D): 90 mm x 108 mm x 64 mm
Module width: 6
Mounting depth: 68 mm
Programming only with bus voltage applied via the web interface of the System Access Point.
Additional information about commissioning and operation is contained in the system manual and the online operating manual of the current Online-Catalogue.
Recommendation: Always use lamps of the same type and manufacturer.

ABB-free@home®

DINRail

Dim actuator 4x315W, MDRC

Multichannel universal dimming actuator optimised for dimming retrofit LED lamps (LEDi). Also suitable for dimming incandescent lamps, low-voltage halogen lights with conventional or electronic transformers, 230 V halogen lamps and dimmable energy-saving halogen lamps. Automatic load detection (can be deactivated). Separate N-connection per channel. Parallel connection of the outputs possible to increase the output power. Outputs can be connected in parallel in groups. Minimum load: 2 W. Manual operation on device also possible without bus voltage or in an unprogrammed status. Programming of the device also possible without applied 230V supply voltage. Extensive test and diagnosis functions for the i-Bus tool. Fast parameter setting in ETS using copyable channel templates. With integrated bus coupler.
Nominal power at 230 V~ mains voltage: 230 V~ incandescent and halogen lamps: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control. Dimmable 230 V~ LEDi: 4 x 315 W/VA to 2 x 500 W/VA in trailing edge control, 4 x 120 W/VA to 2 x 200 W/VA in leading edge control. Inductive L-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA. Electronic C-transformers with LED/low-voltage halogen lamp: 4 x 315 W/VA to 2 x 500 W/VA. Electronic LC-transformers with LED/low-voltage halogen lamp: 4 x 120 W/VA to 2 x 200 W/VA.
Control element: One LED button per channel (including a colour status indication) for switching ON and OFF, as well as dimming up and down.
Bus voltage: 24 V
Rated voltage: 230 V~ +10 % / -10 %
Rated frequency: 50 Hz / 60 Hz
Outputs: 4 dimming channel
Protection class (device): IP 20
Temperature range (device): -5 °C - 45 °C
Storage temperature range: -20 °C - 70 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm
Module width: X
Mounting depth: 68 mm
Programming only with bus voltage applied via the web interface of the System Access Point. For software and description please check the current Online-Catalogue. 1 MW ≙ 18 mm.
Recommendation: Always use lamps of the same type and manufacturer.

ABB-free@home®

DINRail

DALI Gateway, MDRC

The device is used to interface between DALI and free@home installations and incorporates the DALI power supply. One DALI output for up to 16 DALI Slaves.
Bus voltage: 24 V
Rated voltage: 100 – 240 V ~
Rated frequency: 50 Hz, 60 Hz
DALI outputs: 1
Protection class (device): IP 20
Dimensions: (L x W x D): 90mm x 72 mm x 64 mm

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit
	EAN	Type code	Order code		kg	pc.
	067409	DG-M-1.16.1	2CDG510012R0011			1

Split Unit Gateway, FM

The device is used to interface between the free@home system and many manufacturers' air conditioners, so-called split units. The device converts the free@home telegrams into infrared commands and transmits them to the split unit. The transmitter of the supplied cable is bonded directly onto the split unit's receiver. The split unit then no longer receives the commands from a remote control. Instead, it can be operated via any free@home sensors. The model of the split unit can be selected during commissioning. Auxiliary voltage is not required.
Bus voltage: 24 V
Outputs: 1
Protection class (device): IP 20
Dimensions: (L x W x D): 39mm x 40 mm x 12 mm

	Bbn 4016779	Order details		Price 1 piece	Weight 1 piece	Pack unit

Access control

The smarter way to control your door

Access control via digital locking cylinders has long been the system of choice in both private and commercial daily life. ABB-AccessControl ensures easy scalability, even for large-scale projects.

ABB-AccessControl comes along with maximum encryption transmission to ensure all cyber security demands. It can be planned as standalone solution or can be easily part of a bigger Building system due to smart connectivity via IP.

ABB-AccessControl as professional solution supports remote access and management possibilities that makes people's lives easier, thus for operators and end-users. The MyBuildingportal powered by ABB Ability provides the right and secure remote service.

a.206

Access control

The smarter way to control your door

Quick and easy retrofit to traditional mechanical cylinder
Whatever your access control needs, electronic wireless cylinders provide an ultra-modern solution that will compliment any type of door wherever they are used.

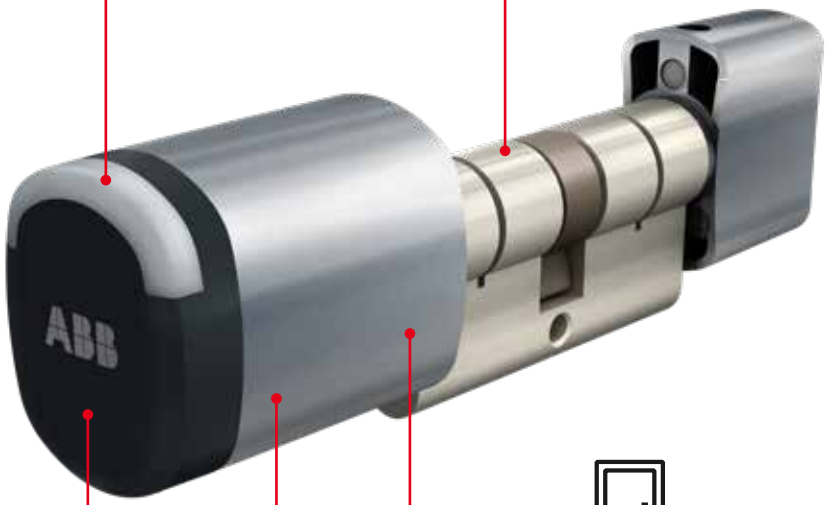
Maximum security by sophisticated encrypted communication
The DESfire EV1 key fob with sophisticated encryption technology makes duplication impossible. Plus the real-time cancellation to a lost or stolen key fob from management software, the door is secured all the time.

In addition, it is the encrypted radio frequency communication to transfer information from cylinder to Smart Access Point Pro. Both RF repeater and RF/IP gateway are also equipped with the same encryption mechanism.

Triple reminder guarantees on-time battery replacement
Despite the latest BLE low energy consumption technology, the battery can run with low power for quite a long period of time. When the reminder time has come with its self-counting algorithm, there will be visual indication from flash light every time swiping the card, in addition, the App will also receive the notification to change the battery. Finally, the email will be altered with the same information. With the help of local device App and email placement reminder, no need to worry about low battery power of your smart cylinder.

Scalable to big project
ABB-AccessControl is not restricted with wireless transmission, which is superb in short distance projects. The versatile system can flexibly scale up thanks to the RF/IP gateway. No limits of distance and capacity to decentralize each RF/IP gateway to manage up to 16 cylinders. This makes the new and big construction projects as easy as small projects to plan and to install.

User-friendly management system with intuitive web design
To intuitively visualize and manage the interlink between different user groups and door groups, is the key job of digital access control system. Administrator can quickly and easily execute all access plan updates on the system such as instant changes to user access privileges and can control the entire property. Meanwhile, administrator also can handle users' specific access rights to specific openings by setting the right mode from the choices of options.



Make a door smart

Example of European full profile cylinder

Different lengths and profiles
Different lengths for different door thicknesses and profiles for EU, US, SCAN, SWISS standards

Visual and acoustic indication
On-site feedback for permitted or non-permitted access and other notification

Interior and exterior doors
All the cylinders are suitable for interior and exterior doors, with IP66 protection level

MIFARE® DESFire® EV2
Transponders in three color variants are available as modern keys

In-built batteries
For up to 130,000 openings and reminder for soon necessary battery change

Control everything

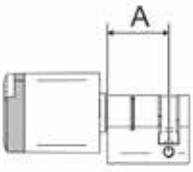
Smart Access Point Pro

Access all possibilities
Central management device for AccessControl and Welcome IP systems. Support up to 600 devices and 2000 Users

Who, where and when
Access rights management for controlling up to 2000 users with manageable access

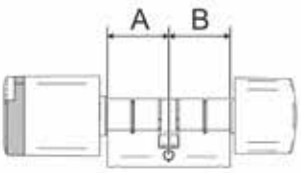
Easy commissioning and remote control
Web interface, no additional commissioning software is required

ABB-AccessControl



Cylinder - European profile

Cylinder - European half profile and European full profile
The cylinder is suitable for any interior or weather-proofed exterior door, making it a very versatile solution. As there is no wiring whatsoever, mounting and replacement is completed in next to no time, whether you are installing a cylinder for the first time or retrofitting. The cylinder can be operated offline, in a local networked configuration or online through internet.



- Supported RFID standards: MIFARE (DESFire EV1)
- Radio interface: IEEE 802.15.4 2.4GHz radio
- Battery: 4x LR1 Alkali
- Battery life at 20 °C: up to 130.000 or up to 3 years
- Temperature: -35 °C to 55 °C
- Protection type: up to IP66
- Humidity: 0 to 95%, non-condensing
- Certification symbol: CE, FCC, IC, IP66, EAC, WEEE

- Radio interface: IEEE 802.15.4 2.4GHz radio
- Power supply: 24 V DC
- Temperature: -10 °C to +45 °C
- Protection type: IP30
- Vandal proof: IK07
- Humidity: 0 to 95%, non-condensing

Smart Access Point Pro

A central management device of AccessControl and Welcome IP, it can couple as sub-system, and also manage interworking of multiple sub-system of same type. Commissioning and remote control is executed via web interface. No additional commissioning software is required.
Connection to the network via WLAN client mode or via CAT cable to manage all your access, configure all your devices, record your logs, etc.

- Easy to commissioning
- Access rights for full management
- Enhanced security with record event log and receive notification and alert
- Manage all connected devices
- Interaction between different systems
- Manage welcome App
- Event management and building-wide messaging
- Integrated chimey, easy for retrofit
- Dimension: 204 × 132 × 32 mm / 8 x 5.2 x 1.25 inch
- Operating mode: LAN / WiFi-Client / WiFi-AP
- Wireless transmission band: IEEE 802.11 a/b/g/n 2.4 GHz/5.8 GHz
- Safety standard: WPA-PSK, WPA2-PSK, WPA, WPA2, IEEE 802.1x
- Network connection standard: 10 / 100 Mbps, auto MDI/MDI-X
- PoE (Power over Ethernet)

Connecting to a smarter life

—
Security

To make you safer and enjoy your own time, ABB combines all the security functions that keep you all day long with peace of mind. Both ABB-Welcome and ABB-Welcome IP provide secure control of your accesses, whether we are talking about gates, front doors or entrance doors.

—
01
Video indoor station 4.3" Wi-Fi

—
02
IP Touch 7”

Thanks to door entry technology, and in particular IP HD technology, the residents of the house and building are always accessible to visitors with high-definition images transmitted from a multi-channel bandwidth. It is much more colourful, brighter, clearer and no interference in communication.

Cyber security

We believe that security and privacy are core values in our life.
We want to protect you, at the same time giving you control over your home.

At ABB we design the devices you use every day, whether it's for door entry, home automation or intrusion, to make this possible, integrating the most powerful technologies for your security.

MyBuildings portal
Enterprise-grade cloud infrastructure is designed for uninterrupted operation and securely protects your communication and data… all for your home!

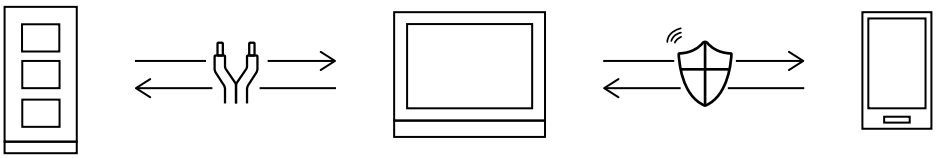

ABB Cyber Security Chip built into devices
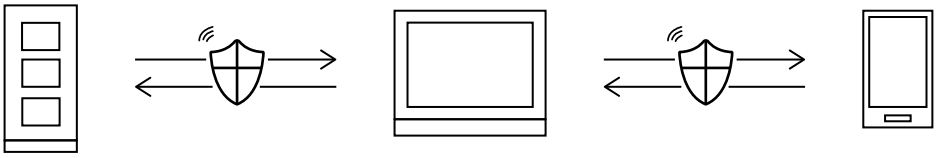
Dedicated unique certification into the chip encrypts all your passwords and data, enabling trusted communication to our portal and apps.

End-to-end encryption
With the combination of built-in hardware security and end-to-end encryption, we make it extremely harder for any ill-intentioned to access your home.

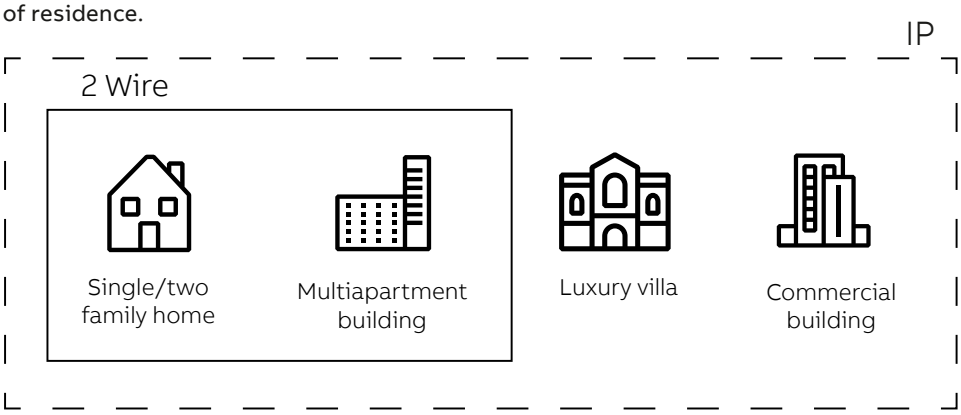


Welcome

In Welcome all the communication from the panels toward the cloud use these technologies.

Welcome IP

In Welcome IP, we protected all the communications among all the devices and the cloud.

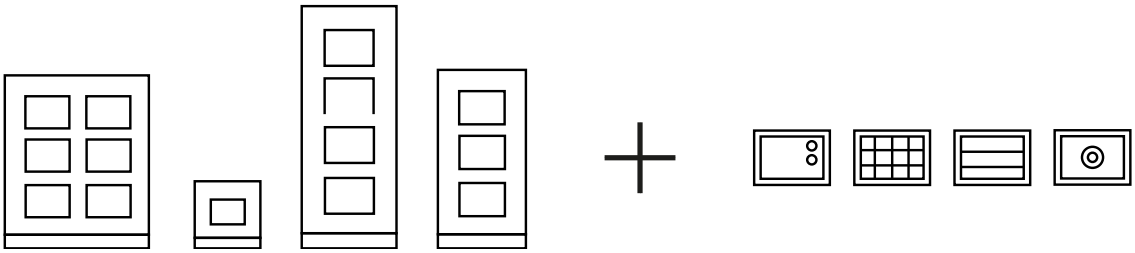


Customized solutions
According to your needs

ABB Door Entry System is more than just a door audio and video system, it's the future of smart home monitoring and security right at your fingertips.

Flexibility

Customized solutions for complete building automation, in commercial, public, and privately used buildings. The combination of the 2-wire and IP system makes ABB's proposal wide and varied enough to satisfy every type of residence.



Modular flexibility

Module design with infinite possibilities.
Our customers' requirements vary from the most basic to the complex. With functional modules, ABB-Welcome provides the answer for all these needs. For all types of new construction many combinations of outdoor stations are possible to create the desired solution according to the requirements of the builder, architect, installer and the aesthetic taste of the owner.

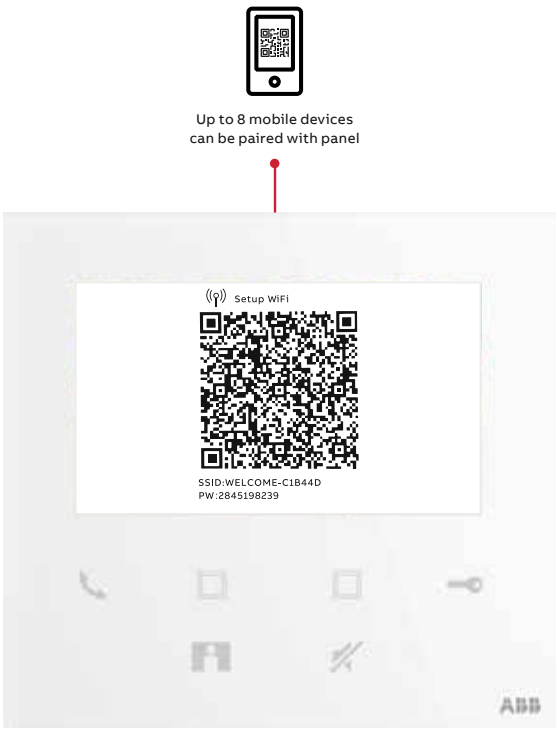
With this approch the modular outdoor station fits all type of buildings.

Examples of outdoor frames and modules that can be combined to create the right outdoor station for every need.

Customized solutions
According to your needs

Simplicity

Setting up your Welcome system is very simple: the 2-wire technology allows ease of installation also in case of renovation and even advanced functionalities like WiFi connectivity to the mobile app can be set through just the scan of a QR code.
Also the IP technology becomes easy: wireless and PoE connection make the system really easy to install. For the commissioning quickly create the building structure and scan the QR code of a device to place into the desired location, upload the information into devices. 1-2-3, Done!



Customized solutions

According to your needs

Simple understanding

ABB always takes pride in user experience and innovates common network technology to create a totally smarter solution that can perfectly meet your every need.

Main menu with easy settings for door communication, video surveillance and home automation.
The new interface ensures that comprehensive functions in a room or entire building are centrally visualized, easy and intuitively operated in a comfortable and efficient manner.

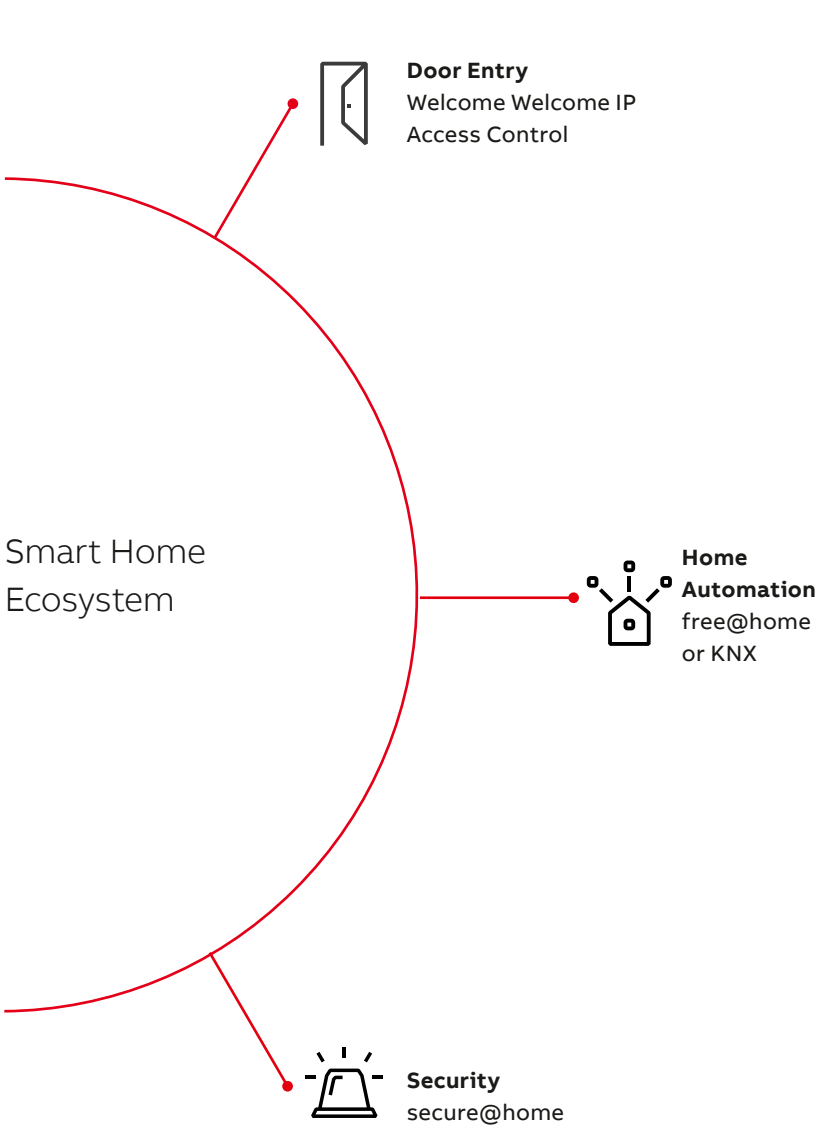
Customized solutions
According to your needs

Connectivity

You can answer and open the door remotly via the Welcome App.
The App is a cloud based integrated platform working with both iOS and Android. It allows you to use your smart phone or tablet managing the calls from IP Touch panel, 4.3” series WiFi, from all other 2wire panel with the IP gateway, digital cylinder and surveillance locally or remotely.
You can also set up your customized App with as many steps as you wish. Thanks to MyBuildings portal, the remote connection is totally automated and managed with the highest level of security and data privacy. No special settings need to be made on the internet router for this solution.

01
First screen of the App with selection of devices to pair.



02
Pairing process: scan the QR code, that appears on the indoor station, via the app.

03
Incoming door call from the outdoor station.

Smart Home Ecosystem

Imagine the very best in comfort, security, design and energy efficiency for tomorrow's smart home, today. ABB can bring this to any residential building more easily than ever. All the functions that can be controlled such as blinds, lighting, heating, air-conditioning, door communication, access control and security are designed to make life simpler and smarter.
Controlling the heart of the home or answering to your doorbell can be done at the touch of a panel, from the comfort of your armchair or remotely.

ABB-Welcome - Outdoor stations

Shared features:

- Type of installation: SM or FM
- IP54: dustproof & watreproof
- IK07: vandal proof

Keypad series

Video outdoor station with A/V module, display module & keypad module. One lock can be directly connected without independent power supply for the lock and additional terminal for second lock is available.

- Anti-fog design with built-in heater for clear images also in wet conditions
- Built-in infrared lighting for clear images at night and hidden surveillance from video indoor station and integrated optic sensor for day/night mode
- LED indicator for real-time status
- Opening of the door by DESFire or IC card. Support to establish the call by enter room number or by searching name through display and support to open the door by entering correct password through keypad module
- Easy to set default lock by one dip-switch
- Lock release time and speaker volume are adjustable
- Enable/disable outdoor station's acoustic feedback when pressing button
- Support local power supply (20-30 V DC)
- Support to release the default lock by pressing local exit button
- Wiegand output available, support 26 bits (default) and 34 bits
- Dimensions: 349 x 135 x 29 mm / 13.7 x 5.3 x 1.1 inch

Standalone

ABB-Welcome - Outdoor stations

Standalone outdor station:
Standalone access control outdoor station.
These can be use with Welcome 2-wire.

Common technical details:
- Dimensions: 139 x 135 x 29 mm / 5.5 x 5.3 x 1.1 inch
- Type of installation: SM or FM
- Rating current: 24 V DC, 25 mA
- Operating temperature: -40 °C...+55 °C
- Dustproof and watreproof: IP54
- Vandal proof: IK07
- Single-wire/fine-wire clamps: 2 x 0.28 mm²...2 x 0.75 mm²
- Connects to ABB-Welcome door communication by 2-wire cable

Standalone keypad module:
- Enables the opening of the door using a numerical code
- 1800 passwords can be taught in
- Enable control switch actuator with lights connected
- Standalone operation together with system controller (power supply) and switch actuator (security connection for the electrical door opener or light)
- Programming directly on the module
- Mounting tool is enclosed

Version	Stainless steel ■
Article no.	M2700KP-S
Order no.	2TMA200160X0005

Standalone transponder module:
- Enables the opening of the door using a key card
- 1800 users can be taught in
- Standalone operation together with system controller (power supply) and switch actuator (security connection for the electrical door opener)
- Programming directly on the module or using PC management software (requires 2-wire adaptor M2308)
- Mounting tool is enclosed

Version	Stainless steel ■
Article no.	M2700TP-S
Order no.	2TMA200010X0001

Standalone keypad module:
- Enables the opening of the door using a fingerprint scanner
- 64 users can be taught in
- Standalone operation together with system controller (power supply) and switch actuator (security connection for the electrical door opener)
- Programming directly on the module or using PC management software (requires 2-wire adaptor M2308)
- Mounting tool is enclosed

IP video outdoor station

ABB-Welcome IP - Video outdoor stations

Shared features:

- Type of installation: SM or FM
- IP54: dustproof & waterproof
- IK07: vandal proof
- Super anti-fog coating and built-in heater
- LED indicator for real-time status
- Integrated RFID Reader (MIFARE® DESFire® EV1 & EV2) for door opening

Touch 5” series

Video outdoor station with 5-inch touch screen, integrated with transponder and keypad. Serves as end device for the communication with IP touch panel, guard unit or property management.

- Intuitive operable touchscreen & virtual keypad integrated
- Advertising or Developer promotion display area
- Name list / logo / physical address / logical address calling type
- Wiegand output available
- HD video streaming (720p) with 130-degree angle
- Dimensions: 349 x 135 x 29 mm / 13.7 x 5.3 x 1.1 inch

Pushbutton series

Video outdoor station with transponder and pushbutton(s) serves as end device for the communication with IP touch panel, guard unit or property management.

- Bar and around pushbutton for optional
- Pushbutton could be programmed as you want (switch on lighting, call indoor station or guard unit)
- Bright back-lit ensures clear nameplate at nighttime
- HD video streaming (720P) with 130-degree angle

2-wire modules

ABB-Welcome - Outdoor station modules

2-wire modules:
These modules can be used with Welcome 2- wire.

Audio modules - 1st generation (primary module)
The primary module establishes communication with the system control center by a 2-wire connection. Each outdoor station always requires one primary module.

- 3 LED indicators for operation status indications: call established / system busy, communication possible and door unlocked
- One lock can be directly connected without independent power supply for the lock
- Addictional terminal for second lock is available
- Lock release time and speaker volume are adjustable
- On button versions: different mode setting is possible such as 1 call or 2 calls in one row, call guard or switching light for the first or second button.
- Integrated optica sensor for day / night mode
- Dimensions: 97 x 72 x 38 mm / 3.8 x 2.8 x 1.5 inch
- Type of installation: SM (only with new weather covers) or FM

Version	No button	1 button	2 buttons
Article no.	M251021A-A	M251022A-A	M251023A-A
Order no.	2TMA070150A0002	2TMA070150A0003	2TMA070150A0004

Camera modules - 1st generation

- Video color camera with large detection angle (H 86°, V 67°, D 104°) and manually mechanical adjustment (H ± 15° ,V ± 15°), built-in infrared lighting ensures clear picture and comfortable to eyes at night and hidden surveillance from video indoor station
- Optional to connect one additional analog camera for surveillance inside the video indoor station
- Dimensions: 97 x 72 x 41 mm / 3.8 x 2.8 x 1.6 inch
- Type of installation: SM (with weather covers 4102.WC-A) or FM

Article no.	M251021C
Order no.	2TMA070150N0038

Fingerprint module
Fingerprint module is one access control module of video/audio outdoor station

- Enables the opening of the door using a finger scanner
- 64 users can be taught in
- Programming directly on the module or using PC management software (requires 2-wire adaptor M2308)
- Rating current: 24 V DC, 40 mA
- Dimensions: 97 x 72 x 28 mm / 3.8 x 2.8 x 1.1 Inch
- Type of installation: SM or FM
- Operating temperature: -40 °C...+55 °C

Version	White	Stainless steel	Aluminum
Article no.	51381FP-W	51381FP-S	51381FP-A
Order no.	2TMA200160W0004	2TMA200160X0003	2TMA200160A0025

2-wire modules

ABB-Welcome - Outdoor station modules

2-wire primary modules

The primary module establishes communication with the system control center by a 2-wire connection. Each outdoor station always requires one primary module.

Common technical details:

- LED indicators for operation status indications: call established / system busy, communication possible and door unlocked
- Power supply for door opener (LOCK - GND): 18 V DC, 4 A impulse, max. 250 mA holding
- Support to release the lock by pressing local exit button
- Operating temperature: -40 °C...+55 °C
- Single-wire/fine-wire clamps: 2 x 0.28 mm^2...2 x 0.75 mm^2
- Connects to ABB-Welcome door communication by 2-wire cable

Audio module - 2nd generation

Audio module is compulsory for audio outdoor station composition

- One lock can be directly connected without independent power supply for the lock
- Lock release time is adjustable
- Enable/disable outdoor station's acoustic feedback when pressing button
- Manage the working mode and functionality of pushbutton outdoor station
- Operating current: 24 V DC, 120 mA
- Standby current: 24 V DC, 8 mA
- Dimensions: 97 x 72 x 28 mm / 3.8 x 2.8 x 1.1 Inch
- Type of installation: SM or FM

Article no.	M251381A-A
Order no.	2TMA200160A0001

Audio/video module - 2nd generation

Audio/video module is the heart of video outdoor station

- Built-in infrared lighting ensures clear picture and comfortable to eyes at night and hidden surveillance from video indoor station.
- Anti-fog design with built-in heater ensures clear image even in wet conditions.
- One lock can be directly connected without independent power supply for the lock.
- Additional terminal for second lock is available.
- Easy to set default lock by one dip-switch
- Lock release time and speaker volume are adjustable.
- Integrated optic sensor for day / night mode.
- Enable/disable outdoor station's acoustic feedback when pressing button
- Manage the working mode and functionality of pushbutton outdoor station
- Induction loop functionality is possible on Article M251382M when assembeing with stainless steel frame
- Dimensions: 143 x 72 x 28 mm / 5.6 x 2.8 x 1.1 inch
- Operating current: 24 V DC, 200-230 mA
- Standby current: 24 V DC, 60 mA
- Image sensor: CMOS sensor 1/3.2"
- Resolution: 550 TV lines, effective pixels 1297 (H) x 977 (V)
- Detection angle: H 100°, V 70°, D 130°
- Camera Standard :PAL/NTSC
- Floating output for door opener (COM -NC - NO): 30 V AC/DC, 1 A

Version	Standard	T-loop with speech synthesis
Article no.	M251381M	M251382M
Order no.	2TMA200160N0043	2TMA200160N0044

IP modules

ABB-Welcome - Outdoor station modules

IP modules:
These modules can be used only with Welcome-IP.

Common technical details:
- Dimensions: 143 x 96 x 23 mm/ 5.6 x 3.8 x 0.9 inch
- Type of installation: SM or FM

A/V module with 720P camera, Lan cable
Audio & video modules as the heart of outdoor station
- HD video streaming (720P) with 130 degree angle
- Super anti-fog coating and in-built heater
- LED indicater for real-time status
- Suitable for the disabled

Article no.	H851381M-S
Order no.	2TMA130160B0081

Big display module
Integrated with transponder and keypad serves as big touch screen fro daily operation for residential owners and visitors
- Intuitive operable touchscreen & Virtual keypad integrated
- Advertising or Developer promotion display area
- Name list / logo / physical address / logical address calling type
- Opeing of the door by DESFire or NFC or IC card

Version	**5 inch & IC/DESfire**
Article no.	H851381DP
Order no.	2TMA130160B0082

Standard modules

ABB-Welcome/ABB-Welcome IP - Outdoor station modules

Functional modules:
These modules can be used with both Welcome 2- wire and Welcome-IP.

Common technical details:
- Dimensions: 97 x 72 x 25 mm/ 3.8 x 2.8 x 1 inch
- Type of installation: SM or FM
- Operating temperature: -40 °C...+55 °C

Round pushbutton
1/2/3 pushbutton for visitor to press for calling
- Pushbutton could be programmed as you want (switch on lighting, call indoor station or guard unit)
- Bright back-lit ensures clear nameplate at night time
- Opening of the door by DESFire or NFC or IC card
- Rating current: 24 V DC, 10 mA/ for NFC version 24 V DC, 40 mA

Version	1 button	2 buttons	3 buttons
Article no.	51381RP1	51381RP2	51381RP3

Round pushbutton
3/6 or 4/8 pushbutton for visitor to press for calling
- Pushbutton could be programmed as one column or double columns
- Bright back-lit ensures clear nameplate at night time
- Rating current: 24 V DC, 8 mA

Version	3 bar buttons	4 bar buttons
Article no.	51381SP3	51381SP4
Order no.	2TMA130160N0001	2TMA130160N0002

Keypad with 1abc input
Digital inputing module for keyoad outdoor station
- Enable the opening of the door using a numerical code
- 3,000 customized passwords can be taught in
- Backlight automatically on for visibility at night
- Call guard unit is available
- Rating current: 24 V DC, 20 mA

Version	White	Stainless steel	Aluminum
Article no.	51381K-W	51381K-S	51381K-A
Order no.	2TMA130010W0014	2TMA130160X0001	2TMA210160A0009

Standard modules

ABB-Welcome/ABB-Welcome IP - Outdoor station modules

Display

The display module ensures that the personalised message, code and number can be read

- Physical address / logical address calling type
- Up to 5000 pcs cards can be registrered
- Opening of the door by DESFire or NFC or IC card
- Wiegand output available
- Rating current: 24 V DC, 160 mA

Version	ID Card	IC/DES fire card
Article no.	51381CR	51382CR
Order no.	2TMA130160N0010	2TMA130160N0009

Info module

Info module is used to hold the address of the building or the resident directory and assembled in outdoor station

- Stamped labelling foil is enclosed
- Backlight ensures clear visibility at night
- Rating current: 24 V DC, 8 mA

Article no.	51381DN
Order no.	2TMA200160N0039

Dummy module

Dummy module is one blank module, support to put 3rd-party module inside, also support to future function module replacement

- Maximum space inside 54.5 x 9.4 x 74 mm / 21.5 x 0.37 x 2.9 inch

Article no.	51381DM
Order no.	2TMA200160N0040

Letter box modules

ABB-Welcome - Alternative modules

Letter box modules:
For the integration into letter boxes and bell systems of different manufacturers.

Camera module

- The cutout must be created by the manufacturer
- Extended audio module assembly with video function
- Video camera with automatic day/night switchover and infrared LEDs to illuminate the night shots
- Installed heating to keep the lens free of condensation
- Vertical/horizontal detection angle: 86°/67°
- Setting angle horizontal/vertical: +/-15°, mechanically adjustable
- Dimensions: 126 x 68 x 31 mm / 5 x 2.7 x 1.2 inch

Article no.	83501-101-500-01
Order no.	2TMA070150N0043

Audio integration unit

- Makes audio communication possible with also adjustable volume
- Built-in relay for operating the door opener
- 8 inputs for connecting the doorbell push-switches
- With interface for the connection of built-in keypad extensions and of the camera module
- Dimensions: 68 x 126 x 31 mm / 2.7 x 5 x 1.2 inch

Version	EU	Non EU
Article no.	83110-500-01	83110-500-02
Order no.	2TMA070150N0042	2TMA210010N0037

Extension unit

- Extends the built/in audio module assembly by a further 12 binary inputs
- The built-in audio module can be extended to a maximum of 99 inputs for doorbell push-switches with the aid of the built-in keypad extension
- With interface for the connection of built-in keypad extensions
- Dimensions: 68 x 50 x 24 mm / 2.7 x 2 x 0.9 inch

Version	EU	Non EU
Article no.	83111-500-02	83111-500-01

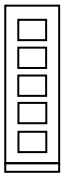
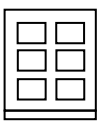
● It is possible to combine the frame of the same size for a multi-column installation to support more modules.

Mounting boxes

ABB-Welcome/ABB-Welcome IP - Installation material

3 types of boxes:





Surface-mounted box
for mounting of outdoor station on the wall.

Flush-mounted box
for mounting of outdoor station into the wall. This box is fitted with knock down holes for cabling from left, right, or back.

Pre-installation box
for flush-mounting of outdoor station into the wall for higher stability.

Surfece-mounted box for IP touch panel 7”

Mounting of IP Touch 7” on the wall

- For surface-mounted installation of indoor station
- The product is packed with accessories to ensure qualified installation
- Dimensions: 197 x 148 x 13 mm / 7.7 x 5.8 x 0.5 inch

Version	White □	Black ■
Article no. **Order no.**	42361S-W 2TMA130160W0017	42361S-B 2TMA130160B0080

Flush-mounted box & Pre-installation box for IP touch 7” & 10”

Flush-mounted box and Pre-installation box for IP 7&10 inch video indoor station

- The flush mounting box is fitted with knock down holes for cabling from left, right, bottom or back
- The product is packed with accessories to ensure qualified installation
- Dimensions: 194 x 145 x 55 mm / 7.6 x 5.7 x 2.2 inch, 2 boxes together

Article no. **Order no.**	42361F 2TMA130160B0132

Door entry system

ABB-Welcome - System devices

System controller

- Two version available: Standard system controller & mini system controller
- As the “brain” of the individual system, it manages the communication between the outdoor station and the indoor station
- Two working modes : “all on” and “one on”
- If in “all on” mode, and the apartment contains more than 1 video indoor station, all the screens in the apartment will be on while only one is on if in “one on” mode
- It can also serve as auxiliary BUS power supply when connected to gateway in certain mode
- 1 LED for normal working condition indication
- Overheat, short-circuit and lightening protection
- Dimensions (standard version): 90 x 72 x 65 mm / 3.5 x 2.8 x 2.5 inch
- Dimensions (mini version): 90 x 72 x 65 mm / 3.5 x 2.8 x 2.5 inch

Version	Standard 1.2A output, MDRC 8U, with lower consumption in “one on” mode
Article no.	M2300-101
Order no.	2TMA210161W0001
Pack Qty	1/10

Version	Mini 0.65A output, MDRC 4U, with lowerconsumption in “one on” mode
Article no.	M2301-101
Order no.	2TMA210161W0002
Pack Qty	1/10

Gateway

- It offers 5 different modes which can be set by dip switch: apartment gateway, floor gateway, building gateway, auxiliary BUS power supply interface and line amplifier
- Dimensinos: 90 x 72 x 65 mm / 3.5 x 2.8 x 2.6 inch

Article no.	M2302
Order no.	2TMA070060W0006
Pack Qty	1/10

IP Gateway & ABB-Welcome App

- The installation of the ABB-Welcome App enables to use smartphones and tablets (iOS and Android) as virtual video indoor station
- Both WIFI and remote access under 3G/4G through internet service provider.
- IP Gateway acts as a PC interface to program the telephone gateway more efficiently
- Enables the integration with ABB Comfort touch as indoor station
- Supports to monitor multi-cameras connected with camera interface
- Supports intercom calls, including home to home & room to room call by ABB-Welcome App
- Supports to communicate with guard unit by ABB-Welcome App
- Supports to control relay actuator, and one actuator can be activated during the call if necessary by ABB-Welcome App
- Supports to control two locks during the call by ABB-Welcome App
- Supports to make a SOS call if there is emergency by ABB-Welcome App
- Notification function of App is always available: while App is open in the foreground, background or even closed totally
- Dimensions: 90 x 180 x 65 mm / 3.5 x 7 x 2.5 inch

Article no.	83342-500-01
Order no.	2TMA020060H0008
Pack Qty	1/24

Door entry system

ABB-Welcome - System devices

Din rail adaptor

- One DIN rail adaptor fit for all the flush mounted devices: video distributor, switch actuator, and camera interface
- Adjustable and consistent looking cover can be taken out if needed
- Dimensions: 90 x 72 x 65 mm / 3.5 x 2.8 x 2.5 inch

Article no.	53001DR
Order no.	2TMA070150H0001
Pack Qty	1/10

Camera interface

- Supports up to 4 analog 3rd party cameras for one device
- Supports camera connection to the existing video/audio outdoor station
- Supports transfer of image from guard unit to the indoor station
- Supports the camera for viewing the area of the floor (for example with the connection from indoor station to this interface, where it connects to the analog camera
- Supports input and output of video signal of outdoor station to 3rd party VDR during the call, which can be viewed from the video indoor station)
- Supports installation in DIN, surface mounted
- Dimensinos: 77 x 61 x 25 mm / 3 x 2.4 x 1 inch

Article no.	83327-500-01
Order no.	2TMA070150B0007
Pack Qty	1/18

Video distributor

- This compact device supports 4-way outputs connected to different apartments or different high-rise buildings
- Flush-mounted into box or surface mounted through the hole in the middle, or DIN rail mounted via DIN adaptor (Article no. 53001DR)
- Dimensions: 45 x 45 x 26 mm / 1.7 x 1.7 x 1 inch

Article no.	M2304
Order no.	2TMA070070B0006
Pack Qty	1/18

Video outdoor distributor

- Used for buildings with more than 1 outdoor station
- 2-way inputs are connected to different outdoor stations
- Dimensions: 90 x 36 x 65 mm / 3.5 x 1.4 x 2.5 inch

Article no.	83325/2-500-01
Order no.	2TMA020070N0011
Pack Qty	1/20

BNC connector

- Used to connect the external camera to the camera interface or outdoor station's camera module
- The connector accepts a BNC plug connection directly
- Dimensions: 42 x 15 x 14 mm / 1.6 x 0.6 x 0.6 inch

Article no.	55001BC
Order no.	2TMA070180N0012
Pack Qty	1/10

Door entry system

ABB-Welcome - System devices

Switch actuator

- This compact device has 3 working modes: extend door bell, door opener and time relay
- Local pushbutton can be connected as control input
- The switching duration of unlock or switching on lightings is adjustable
- Flush-mounted or DIN rail mounted via DIN adaptor (Article no. 53001DR)
- Dimensions: 51 x 51 x 29 mm / 2 x 2 x 1.1 inch

Article no.	M2305
Order no.	2TMA070150B0006

Guard unit

- 4.3" touch screen and 6 touch film buttons can ensure the communication with calls from outdoor station, indoor station or other guard unit (if any)
- It can be manually or automatically set into intercept mode to increase security level for all users or only certain individuals
- Surveillance can be done through the camera of outdoor stations or integrated analog camera
- Missed calls and alarm messages stored in the memory can be reviewed
- It can be surface mounted on the wall or desktop mounted (desktop bracket 42311D is needed)
- Dimensinos: 144 x 198 x 45 mm / 5.6 x 7.8 x 1.7 inch

Article no.	M2303
Order no.	2TMA070030W0007
Pack Qty	1/15

Lift control module

- Enhance security to allow authorized visitor/resident to ONLY go to the designated floor while unauthorized visitor can not activate any floor button in the lift
- Efficient programming through PC by dedicated commissioning software
- Each module supports up to 16 floors, total up to 16 modules can be cascaded
- Dimensions of relay mode: 216 x 110 x 45 mm / 8.5 x 4.3 x 1.7 inch
- Dimensions of M adaptor: 90 x 72 x 65 mm / 3.5 x 2.8 x 2.5 inch

Version	Relay module	M adaptor (2 functions: PC adaptor and lift control module)
Article no.	M2307	M2306
Order no.	2TMA070150N0044	2TMA070100N0001
Pack Qty	1/30	1/10

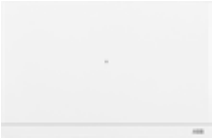
2-wire adaptor

- Supports to connect PC with management software into 2-wire DES system
- PC management software supports centralized management of user card no. /user names/logic addresses, registration/deletion/change
- Supports the building system without floor system
- PC management software records system logs, e,g unlock log, SOS log
- PC management software supports to configure lift control modules
- Dimensions: 90 x 180 x65 mm / 3.5 x 7 x 2.5 inch

Article no.	M2308
Order no.	2TMA210160N0003
Pack Qty	1/24

Door entry system

ABB-Welcome - System devices



External camera

- Analogue camera solutions for the camera interface from the ABB-Welcome range
- Three types are optional for different application, normal camera/dome camera/mini dome camera
- Image Sensor: 1/3” 1.3MP SONY Exmor CMOS
- Effective Pixels: 1305(H)×1049(V)
- Resolution: 700TVL
- Horizontal detection angle: 30°- 90° (manually adjustable for video camera & dome camera); 75°(fixed for mini dome camera)
- S/N Ratio: ≥50 dB
- Min. illumination (Day): 0.1 Lux @ F2.0
- Min. illumination (Night): 0 Lux @ F2.0
- Video signal: 1 x CVBS, 1Vpp, 75 Ohm (BNC)
- White Balance: AWB, 1 800 K – 10 800 K
- Lens: 2.8-12 mm (manually adjustable for video camera & dome camera); 3.6 mm (fixed for mini dome camera)
- IR Range: 50m (video camera), 40m (dome camera), 30m (mini dome camera)
- Input Voltage: DC 12 V +/- 10%
- Dustproof and waterproof as IP 66
- Dimensions Video camera: 286 x 86 x 77 mm / 11.3 x 3.4 x 3 inch
- Dimensions Dome camera: 130 x 119 x 104 mm / 5.1 x 4.7 x 4 inch
- Dimensions Mini dome camera: 105 x 94 x 83 mm / 4.1 x 3.7 x 3.3 inch

Version	Video camera	Dome camera	Mini dome camera

Door entry system

ABB-Welcome IP - System devices

Smart Access Point Pro

A central management device of AccessControl and Welcome IP, it can couple as sub-system, and also manage interworking of multiple sub-system of same type. Commissioning and remote control is executed via web interface. No additional commissioning software is required. Connection to the network via WLAN client mode or via CAT cable to manage all your access, configure all your devices, record your logs, etc.

- Easy to commissioning
- Access rights for full management
- Enhanced security with record event log and receive notification and alert
- Manage all connected devices
- Interaction between different systems
- Manage welcome App
- Event management and building-wide messaging
- Integrated chimey, easy for retrofit
- In-build BLE, the best choice for standalone AC system
- Dimensions: 204 x 132 x 32 mm / 8 x 5.2 x 1.25 inch
- Network parameter:
  - Operating mode:
    LAN/Wireless access point
  - Wireless transmission band:
    IEEE 802.11 a/b/g/n 2.4 GHz/5.8 GHz
  - Safety standard: WPA-PSK, WPA2-PSK, WPA, WPA2, IEEE 802.1x
  - Network connection standard:
    10 / 100 Mbps, auto MDI/MDI-X
- Radio interface: IEEE 802.15.4 2.4GHz radio
- Power supply:
  - 24VDC, together with ABB power adaptor
  - PoE(Power over Ethernet)
- Environment:
  - Temperature: -10 °C to +45 °C
  - Protection type: IP30
  - Vandal proof: IK07
  - Humidity: 0 to 95%, non-condensing

Article no.	D04011
Order no.	2TMA400260W0002

Door entry system

ABB-Welcome IP - System devices

Guard unit

The guard unit with desk-top design provides access to various services using the intuitive icon menu on the touch screen. Communication is possible with IP touch panel, outdoor station and other guard unit.

- Support to establish surveillance to outdoor station or IP camera
- Intercept to increase the security and service
- Support to release all doors or dedicated doors in case of emergency
- Receive the alarm and panic call (SOS) from IP touch panel
- Dimensions: 265 x 165 x 117 mm / 10.4 x 6.5 x 4.6 inch

Article no.	H8303
Order no.	2TMA130160W0018

Inerface module for LAN + RS485 + 11 alarm zones

Interface module use to extend LAN port, RS485 port, and alarm zones

- LAN port for private and public network
- Channels relay output
- 1 channel 485 output
- 12 V DC, 200 mA output
- Dimensions: 82 x 60 x 17 mm / 3.2 x 2.4 x 0.7 inch

Article no.	52361EX
Order no.	2TMA130160B0136

IP actuator (LAN port)

Connecting electrical door opener or hall light directly

- Easy to adjust the switching duration of unlock or the switching of light
- Dimensions: 90 x 70 x 65 mm / 3.5 x 2.7 x 2.5 inch

Version	**Grey** ■
Article no.	H8304
Order no.	2TMA130160H0051

24 VDC mini Power adaptor

Power adaptor supplies the power for IP touch panels and Welcome IP Access Point Pro

- Provide stable power supply input
- Dimensions: 44 x 72 x 60 mm / 1.7 x 2.8 x 2.4 inch

Version	**includes plug-adaptors for EU, UK, US, CN, AU**
Article no.	53012PS
Order no.	2TMA130160W0024

Power supply

Power adpator suppliers the power for system devices

- 27 V DC, 81 W
- Support over voltage, over current, over-heat and short-circuit protection
- Dimensions: 178 x 90 x 65 mm / 7 x 3.5 x 2.5 inch

Version	**includes plug-adaptors for EU, UK, US, CN, AU**
Article no.	YSM01-PS
Order no.	2TMA130160H0085

Intrusion alarm systems
Intrusion Systems – We make buildings safe and secure

ABB combines reliable alarm technology with easy-to-use home and building automation technologies. This allows the entire system to react directly in cases of emergency. The ABB offer includes a perfect solution: alarm panels, arming modules and alarm sensors (glass break sensors, motion detectors and more). The security system can be connected to building automation systems to become a smarter solution.
We offer reliable Intrusion Alarm Systems for intrusion-, hold-up- and technical alarms. The intrusion alarm systems are conform to the requirements of EN 50131.

Highest safety & security in case of an alarm
If an alarm is triggered, lights can be switched on and shutters can be opened as an additional deterrent. Even when you're at home, ABB solution can, for example, ensure the peripheral protection of your house and, in the event of an alarm, also switch on lights together with the siren and open the shutters.

Being safe at home, even when the alarm system is not activated
Imagine the following: you are at home, some intruders may try to gain access at night or using unwatched entrances. The alarm system is switched off. You can activate the panic function by a press of a button: lights switch on, blinds roll up.

Increased comfort and safety
By disarming the security system, the system switches the lights on in the entrance area and sets the heating to comfort mode. All the security sensors, such as those for water, gas, and smoke are active at all times. If there is an alarm, they control useful functions such as sockets, shutters and lights.

ABB-secure@home
Securing peace of mind

Whether at home or out and about, you and your loved ones can go about your daily activities knowing you don't have to worry about unwelcome intruders or dangerous incidents any time of day or night.

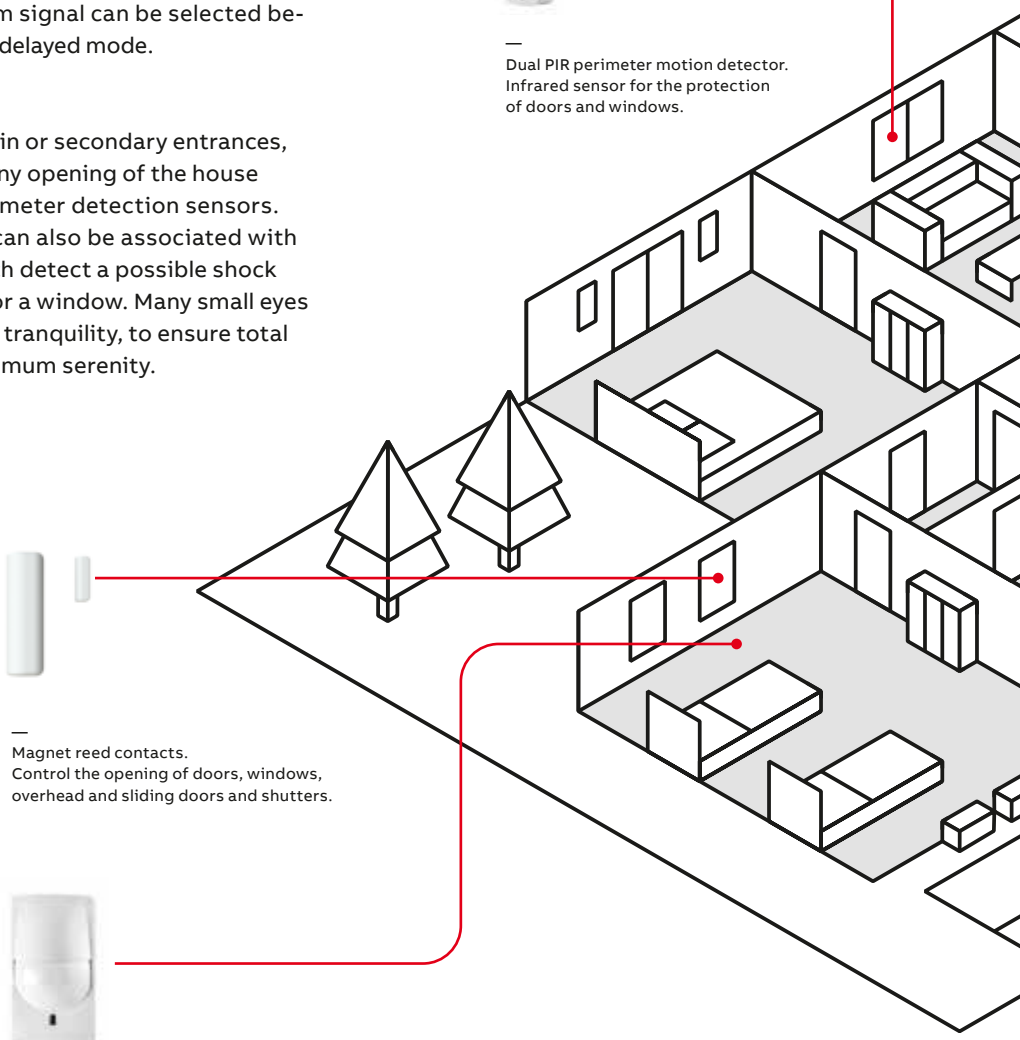
Unobtrusive simplicity
Installing and commissioning ABB-secure@home is straightforward and simple. Thanks to interference-proof and professional wireless devices it won't damage any existing brickwork or wall finishes. It has an intuitive architecture and is easy to manage via its smart central unit, dedicated remote control or remotely, from your smartphone or tablet.

360° freedom
ABB-secure@home offers comprehensive security, protecting your home, day and night, both inside and out. Not only from intruders but also unfortunate events such as floods and fires. Being a highly evolved system, it's completely customizable to suit your individual lifestyle.

—

With ABB-secure@home security and simplicity are within easy reach.

All-round protection
Both indoors and out



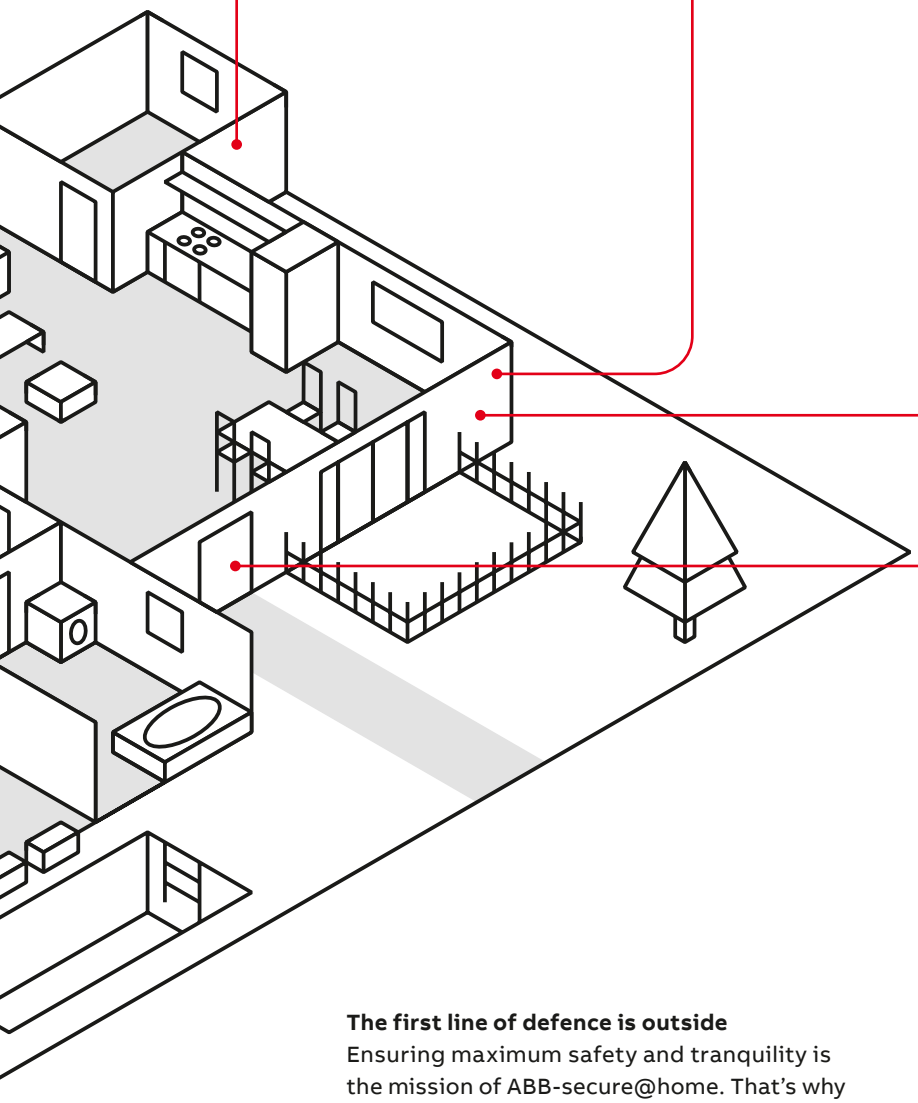
Security starts outside and continues inside your home. Your peace of mind is guaranteed by comprehensive protection and monitoring solutions.

Volumetric detection
Any movement, any presence inside the house is detected by volumetric sensors. They are located in strategic points and are equipped with different coverage lenses according to specific needs, and they will automatically adjust to changes of the environmental conditions and provide adjustable sensitivity. The alarm signal can be selected between the instant or delayed mode.

Opening detection
Windows, doors, main or secondary entrances, shutters or blinds, any opening of the house is controlled by perimeter detection sensors. The contact safety can also be associated with inertial devices which detect a possible shock occurred on a door or a window. Many small eyes stand guard on your tranquility, to ensure total protection and maximum serenity.

—
Dual PIR perimeter motion detector.
Infrared sensor for the protection of doors and windows.

—
Magnet reed contacts.
Control the opening of doors, windows, overhead and sliding doors and shutters.



—
Passive infrared detector with volumetric lens.
Automatically adjusts to changing environmental conditions.

—
Outdoor dual PIR motion detector.
Installation on wall or pole,
for controlling the building's
external areas.

—
Outdoor dual PIR motion
detector for height.
For controlling the building's
external areas, to be installed
at a height of 2.5 to 3 m.

—
Compact dual PIR perimeter
motion detector.
Compact size and attractive
look. For external control of
the building's perimeter.

—
Perimeter bidirectional dual
PIR motion detector.
For external control of the
building's perimeter, ideal for
the protection of doors
and windows.

The first line of defence is outside
Ensuring maximum safety and tranquility is the mission of ABB-secure@home. That's why the system is not limited to ensuring the safety inside your home, but also its external spaces with sophisticated sensors ready to watch over every corner of the property and to detect any unwelcome presence, even before it approaches the building.

Wrapped in safety
The infrared sensors are positioned in the outdoor spaces, in the garden and around the entire house perimeter: bidirectional detectors, door/window detectors, main or secondary entrances: a professional wireless technology can monitor the perimeter of any building in an accurate and punctual manner.

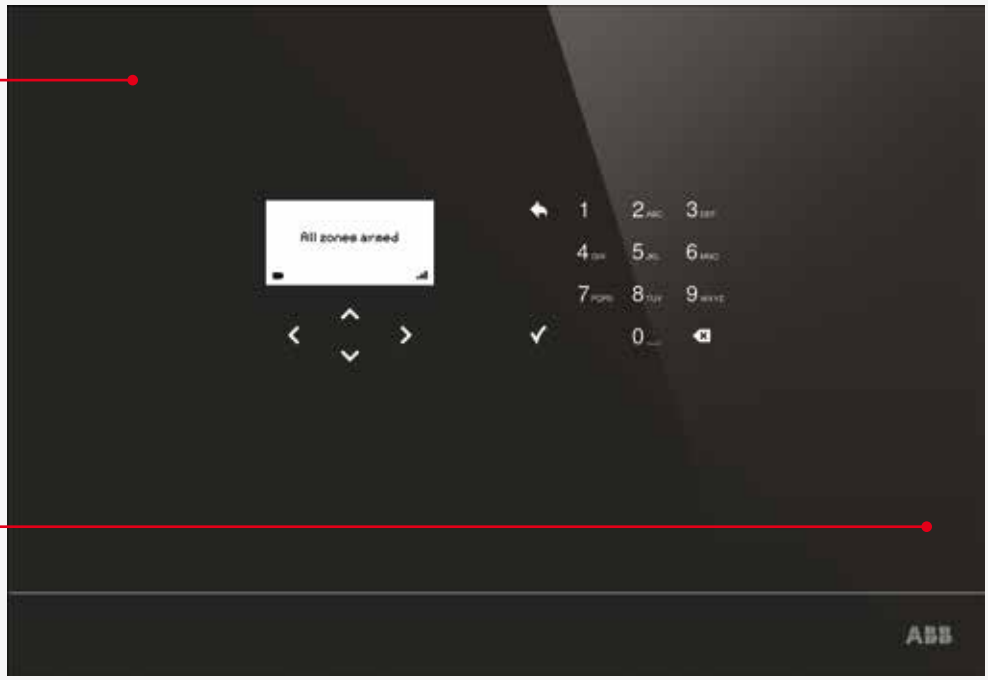
Hassle-free security
Simple integration that simply works

Imagine an intuitive, state-of-the-art security system that works with wireless technology and fits directly into your home design with minimum fuss. With ABB-secure@home, imagination becomes reality.

No wires, no problems
ABB-secure@home is a highly evolved system that's easy to install into inhabited, furnished homes and existing designs. Its use of wireless radio frequency technology minimizes invasiveness and disturbances during installation and when your system needs change in the future, it will adapt with them.

Safety and plug-and-play protection
With the connection to ABB-free@home® you have access to your system wherever you are. The ABB-secure@home configuration is immediate. Once installed and turned on, the sensors are automatically recognized by the central unit. The parameters are fully customizable according to your customers' needs. Then just press OK and you're done!

State-of-the-art technology
At the heart of everything we do



A processor and an integrated GSM (Global System for Mobile Communications) interface are at the heart of ABB-secure@home. This technology will protect your most valuable assets and itself from external tampering and interference.

Smart radio, maximum security
The wireless ABB-secure@home system transmits and receives at 868.3 MHz, making it able to distinguish and interpret signals with absolute precision. The bidirectional encrypted communication allows you to limit energy consumption and provide greater security during transmission, while everything is guaranteed by a proprietary protocol. Integrated CSMA (Carrier Sense Multiple Access) technology allows the optimisation of communication to avoid interference and disturbance. The alarm transmitter and receiver verify the absence of band occupancy, ensuring continuously successful communication.

A system that's always connected
The ABB-secure@home central unit is equipped with an integrated GSM interface through which each alarm is immediately sent via voice calls and/or SMS to all programmed telephone numbers.

868.3 MHz bidirectional encrypted proprietary protocol plus a unique rolling code for all arming/disarming controls

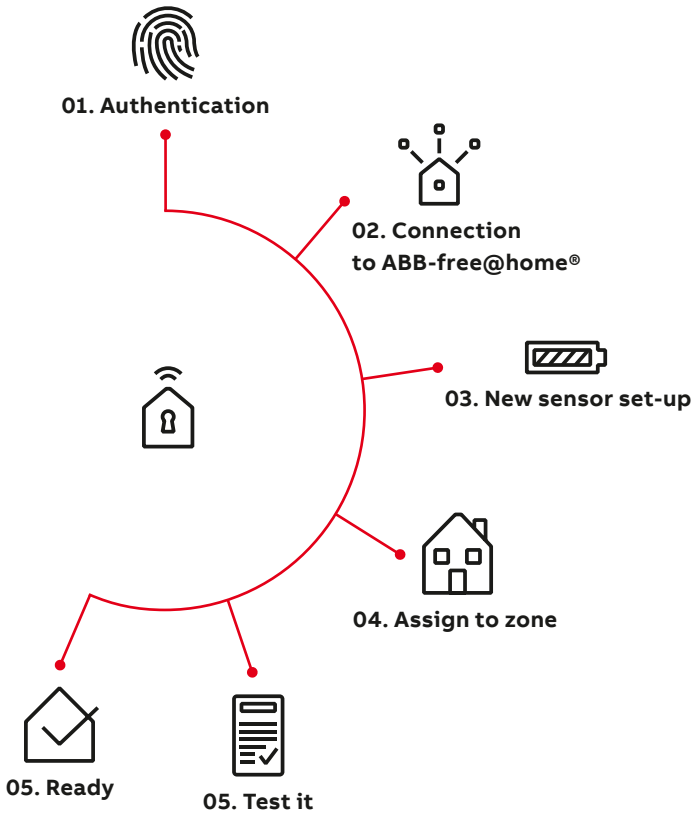
Integrated GSM module for sending alarms via voice call or SMS

Beautiful flexibility
Stylish remote controls

Technology and design are always in harmony with ABB-secure@home. Each control device is built with a clear intention to please at first glance.

Comfort in your hands
ABB-secure@home puts the power of your anti-intrusion system directly into your hands in the most simple way possible: with a stylish plug-and-play remote control. Four keys are already full configured and one is freely configurable, but in case of need also the four keys can be re-configured. The most common functions are assigned to the four preconfigured keys, to arm the intrusion zones in Home Stay or Home Away mode, to disarm all the anti-intrusion zones, and also to launch a panic alarm.

A remote control that manages everything
A lightweight object with heavyweight power. The ABB-secure@home remote control allows you to operate your anti-intrusion system in the most simple way possible: using five keys and five LEDs, fully configurable. Each of them can be configured to arm or disarm anti-intrusion zones and special functions such as robbery alarm, panic alarm and first aid alarm. All this contained in an elegant, attractive design.



Security is a breeze
Programmable in a few steps

—
01 Authentication.
Once you have booted the system from the central unit, authenticate yourself as an installer.
—
02. Connection to ABB-free@home®.
If the central unit is connected to the free@home bus, you can pair the two systems just copying the shown key into the free@home dedicated menu.
—
03 New sensor set-up.
To power the sensor, connect the battery. The central unit registers the sensor automatically.
—
04 Assign to zone.
Choose the home zone to place the sensor or create new ones to assign it to.
—
05 Test it.
As you finish the initial set-up, the central unit automatically performs a sensor test and shows you a report to check everything is working properly.
—
06 Ready.
The initial set-up lets you also easily add notification and installer contacts, create the user PIN and assign the allowed zones.

When a system is well thought out, everything becomes easier, and configuring ABB-secure@home is just as easy as installing it.The initial set-up takes only a few simple steps and you are done. It saves you valuable working hours and will help you gain more customers, too.

Comfort through security
Within a fully integrated system

The residential security system, ABB-secure@home, is part of the ABB Smarter Home system alongside the ABB-free@home® home automation system, and the Welcome door entry system.

Easy remote control
Always in the know about what is happening at home. Via app you can check at any time whether all the windows are closed or if someone has forgotten to switch off the lights. This makes it possible to maintain control – even while on holiday.

Central Unit

The central unit is at the heart of the ABB-secure@home® system; it complies with EN 50131-1 grade 2 class I standard.
It communicates with other system devices based on radio frequency with two-way protocol, by making the following features available to the user:

- management of anti-intrusion and home safety devices;
- management of anti-panic signaling;
- alarm notification via voice or SMS messages to the programmed telephone numbers;
- interfacing ABB-free@home® to integrate safety and home automation systems (only SAS.W1 and SAS.W2 models).

The central unit, equipped with a backup battery, indicates a power failure and its subsequent recovery inside the home.
Via the integrated GSM unit, available into some specific models, it can send alarms both in speech synthesis and SMS messages, to a maximum of 12 telephone numbers. In addition, the GSM unit enables the reception of commands through SMS messages.

ABB-secure@home – Motion Detectors

Motion Detectors – Indoor

SMD-W1.1A

Indoor Passive IR Motion Detector

The indoor passive IR motion detector reveal the presence of intruders inside the controlled area, providing pet immunity. The is equipped with a passive IR sensor with Fresnel lens and by default it operates with a wide-ranging coverage (90° angle and 11 m distance); it is possible, through a different configuration, to make it operate with a long-distance coverage (10° angle and 17 m distance). This device communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output).
It is possible to configure these parameters during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

SKP-W2.1A
SMD-W2.1D

Dual Passive IR Perimeter Motion Detector

The dual passive IR perimeter motion detector protects doors and/or windows using a tent-type cover on the opening and two infrared sensors. The device is also equipped with an extra input (it can be disabled, leaving only the active IR mode) where you can connect an external wired magnetic contact (with its anti-tampering).
The detector provides the anti-masking feature (that can be disabled).
It is supervised by the central unit at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output). It is possible to configure these parameters during the system commissioning.

Intrusion Alarm Systems

ABB-secure@home – Motion Detectors

Motion Detectors – Outdoor

SMD-W4.1A

Perimeter Bidirectional Dual Passive IR Motion Detector

The perimeter bidirectional dual passive IR motion detector allows the external control of the building's perimeter, ideal for the protection of doors and windows. It has to be installed on a wall.

Inside the machine there are four infrared detectors, two per side; both sensors on one side, coupled, can be adjusted horizontally at 0° or 3°. In the vertical direction, for each side, the upper sensor is fixed, while the lower one is adjustable to 4 positions (with detection distance of 2, 5, 8 and 12 m).

The alarm is triggered only if both sensors, even on just one side, detect a presence; this operation mode makes the device particularly suitable to avoid false signals due to the presence of pets. This device communicates bidirectionally with the central unit, that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output). It is possible to configure these parameters during the system commissioning.

white	–	SMD-W4.1A	2CSY254971R0202		0.57	1

SMD-W5.1A

Compact Dual Passive IR Perimeter Motion Detector

This compact-size device allows to control the building's external perimeter and it is particularly suitable for the protection of doors and windows. it has to be installed on the wall.

The curtain-type detection area (5° detection angle) has an adjustable length from 2 to 5 meters.

The device is internally fitted with two infrared detectors, one of which is adjustable.

The alarm is triggered only if both sensors detect a presence; this operation mode makes the device particularly suitable to avoid false signals due to the presence of pets.

The detector provides also an anti-masking function.

It communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds, that can be different for input and output).

It is possible to configure these parameters during the system commissioning.

Intrusion Alarm Systems

ABB-secure@home – Motion Detectors

SMD-W3.1A

Outdoor Dual Passive IR Motion Detector

The outdoor dual passive IR motion detector is suitable to control the building's external areas. It has to be installed on wall or pole.

The device integrates two infrared detectors: the upper one is fixed, the lower one is vertically adjustable in 5 positions (with 2, 3, 6, 8 and 12 m average coverage area). The alarm is triggered only if both sensors detect a presence; this operation mode makes the device particularly suitable to avoid false signals due to the presence of pets.

The horizontal detection area is 90°. It can be rotated according to six possible angle positions. The detector provides an anti-masking function (that can be disabled).

This device communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output). It is possible to configure these parameters during the system commissioning.

Spare lithium battery (Order code: 2CSY255331R0802).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SMD-W3.1A	2CSY255211R0201		0.55	1

SMD-W6.1A

Outdoor Dual Passive IR Motion Detector for Height

This device, specific to be installed on the wall at a height of 2.5 - 3 m, allows to control building's external areas. Through the two IR detectors, the device indicates the presence of intruders avoiding false alarm alerts.

The detector provides an anti-masking function (that can be disabled).

This device communicates bidirectionally with the central unit that supervises it at programmable intervals (every 15 minutes by default); it can be programmed in real time or delayed mode (with a programmable delay from 0 to 90 seconds that can be different for input and output).

It is possible to configure these parameters during the system commissioning.

Magnetic Contacts – Accessories

SMC-W3.1A

Magnet Reed Contact for Surface/Flush Mounting

The device signals the opening of windows or doors. As flush mounting device, it can be instaled in 8 millimetes round holes; to be installed as surface mounting, it needs the provided adapter.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Intrusion Alarm Systems

ABB-secure@home – Magnetic Contacts

SMC-W2.1

Rolling Door Magnet Reed Contact

The device signals the opening of overhead or rolling doors. It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.
It is made of aluminum with high resistance to the transit of heavy vehicles.
The minimum fixing distance is 20 millimeters from ferrous materials and 25 mm from non-ferrous materials.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SMC-W2.1	2CSY255341R0602		0.12	1

SLM-W1.1

Roller Shutter Sensor

The device detects the lifting of shutters through the movement of the retractable rope.
It is made of thermoplastic material; the rope is 3.5 m long.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Intrusion Alarm Systems

ABB-secure@home – Technical Detectors

STD-W1.1

Secure@home Wireless Interface Module for Busch-Smoke Alarm
The module is required for interfacing the smoke detectors (article no. 6800-0-2721) or heat detectors (article no. 6800-0-2723) to the central unit.
The module is equipped with an integrated lithium battery – minimum battery life: 10 years.
The device features a bidirectional communication with the central unit that supervises it with a programmable supervision interval (typically every 15 minutes). It is possible to configure this parameter during the system commissioning.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	STD-W1.1	2CSY254961R0701		0.02	1

STD-W5.1A

Water Detector
It detects the presence of water. The minimum detectable level of the liquid is 1 millimeter, but it can be adjusted to higher levels.
It is equipped with an anti-tamper (breakage or removal), self-diagnostics and control of battery charge device.
The detector ic composed by the interface module and the flood detection probe. It features a bidirectional communication with the central unit that supervises it with a programmable supervision interval (typically every 15 minutes).ilt is possible to configure this parameter during the system commissioning.
Spare lithium battery (Order code: 2CSY255331R0802).

Intrusion Alarm Systems

ABB-secure@home – Arming Devices

Arming Devices

SAD-W1.1F

SAD-W3.1F

Preconfigured Remote Control

The remote control is a mobile system device used to manage the anti-intrusion system in the simplest way. It has 5 with symbolic identification.

One key is freely configurable and the other 4 keys are pre-configured with the following functions: Away mode, Home mode, Disarm and Panic Alarm. The 4 pre-configured keys can be at any time re-configured if needed. One is a service LED that gives information about the battery level and the communication status with the central unit; the other four LEDs are used as a feedback regarding the arming (red LED on) or disarming (green LED on) status of the different system zones. All LEDs flash yellow for 2 seconds if there is something preventing the correct arming/disarming of the system (e.g. an open window). All the keys are equipped with LEDs.

Spare lithium button battery, 3V (CR2032) are normally available on the market.

Outdoor Siren

The outdoor siren is a two-way self-powered device capable of emitting acoustic and light alarms. It is installed outdoor on a wall and is equipped with anti-opening, anti-removal, anti-perforation, anti-shock protection, as well as an anti-foaming patented system.
Alarm sound type, duration, sound levels and LEDs, etc.can be configured and personalized while commissioning the system.
Spare battery pack (Order code: 2CSY254991R0803).

Batteries and Installation Material

SBA-W1.1

Rechargeable Battery Pack, Ni-Mh, 6 V, 1.6 Ah

This is the central units' dedicated battery pack. It is rechargeable, therefore it normally must not be replaced. Buy a spare battery only if its duration is significantly decreased, which could mean that the battery has reached its end-of-life.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SBA-W1.1	2CSY255111R0801		0.02	1

SBA-W2.1

Lithium Battery, 3 V, 1.4 Ah

This lithium batteries are the ones used by all the ABB-secure@home safety and security sensors.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SBA-W2.1	2CSY255331R0802		0.01	1

SBA-W3.1

Battery Pack, LR20, 7.5 V, 12 Ah

This is the outdoor sirens's dedicated battery pack.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Intrusion Alarm Systems

ABB-secure@home – Signalling Devices/Batteries and Installation Material

SIM-W1.1

Wireless Repeater

This device repeats the signal between sensors, sirens and central units, extending the range to the radio frequency transmissions.

The repeater features a bidirectional communication with the central unit that supervises it with a programmable supervision interval (typically every 15 minutes).It is possible to configure these parameters during the system commissioning.

Up to 4 repeaters can be configured for each central unit; each repeater has a list of devices to be managed: the update of the devices list for a repeater is done directly through specific functions of the central unit.

The device can be powered by a plug-in 220 V power supply; in this case the battery has a backup function in the event of a mains power failure.

It is equipped with an anti-tamper (breakage or removal), self-diagnostics and control of battery charge device.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SIM-W1.1	2CSY255201R0601		0.47	1

Intrusion Alarm Systems

ABB Alarm System – GM/A – Alarm Panels/System Components

Alarm Panels

GM/A 8.1

KNX Security Panel, SM

for the protection of small to medium residential or commercial properties against intrusion and technical faults. The Security Panel is suitable for up to five logical areas. It has 8 integrated zones for detectors, a Security Bus for Bus-detectors, Bus-Zone Modules and Setting devices, Ethernet connection (RJ45) for programming, operating and displaying system status via Web-Browser and an integrated KNX interface. The Security Panel GM/A 8.1 complies with the requirements to VdS classes A, B and C, to the European Standard EN 50131, Grade 1 to 3 and to ISO/IEC 62642 Grade 1 to 3.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Off the wall tamper contact for GM/A	–	WA/Z 1.1	2CDG110174R0011		0.2	1

System Components

BT/A 1.1

BT/A 2.1

Keypad for GM/A 8.1

Used to operate and display the information of the system states of the GM/A 8.1 KNX Security Panel. System messages are displayed on a four-line LCD display. The multifunction and special keys mean that all the system functions can be operated easily. Safety-relevant functions are protected by a user PIN. Fife Keypads can be connected to each Security Panel. There is no need for an external voltage supply, the keypads are supplied via the Keypad-Bus. The device can be used in systems with increased system requirements according to VdS Class A, B and C, DIN VDE 0833 Grade 1, 2 and 3 and EN 50131/IEC 62642 Grade 1, 2 and 3.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit

Intrusion Alarm Systems

ABB Alarm System – GM/A – Alarm Panels/System Components

MG/A 4.4.1

Zone Module, 4-fold

to connect to Security Panel GM/A 8.1 via the Security-Bus. For expansion of the Security-Panel by 4 detector zones. Used for connection to the exterior perimeter detectors such as magnetic reed contacts and passive glass break sensors. The module has 4 zones to which several detectors can be connected. The status of each zone is displayed with a status LED. The Zone Module delivers the control signals and the supply voltage for the external detectors. There is no need for an external voltage supply, the Zone Modules are supplied via the Security-Bus.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
to mount in the Security Panel housing	–	MG/E 4.4.1	2CDG110178R0011		0.1	1

Intrusion Alarm Systems

ABB Alarm System – GM/A – Motion Detectors

Motion Detectors

IR/XB

Passive IR Bus Motion Detector, 15 m

For direct connection to the security-bus of the Intrusion Alarm Panel GM/A 8.1. The motion detector with passive infrared technology is VdS class B / EN Grade 2 certified. It facilitates monitoring of an area with an infrared range of up to 15 m.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
VdS B/EN Grade 2	–	IR/XB	2CDG230023R0011		0.15	1

EIM/XB

Dualtech Bus Motion Detector, 15 m

For direct connection to the security-bus of the Intrusion Alarm Panel GM/A 8.1. The Dual-Motion Detector combines proven passive infrared technology with temperature-independent microwave technology. The combination of both functional principles results in a detector featuring high immunity to false alarms, even with unfavourable ambient conditions, and which still has high detection security. The detector is VdS class B / EN Grade 2 certified. It facilitates monitoring of an area with an infrared range of up to 15 m. For use in EU countries only.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
VdS B/EN Grade 2	–	EIM/XB	2CDG230025R0011		0.15	1

Intrusion Alarm Systems

ABB Alarm System – GM/A – Arming Systems

Arming Systems

L240/BS

SafeKey Evaluation Module

For connection of the SafeKey components as well as all components required for a setting door (magnetic contacts, lock bolt switching contact, bolt lock, internal siren). For direct connection to the security-bus of the Intrusion Alarm Panel GM/A 8.1. The management of the electronic keys from the SafeKey range is undertaken completely via the WebUI of the Security Panel GM/A 8.1.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	L240/BS	GHQ3050031R0001		0.13	1

WEL/A, ES

SafeKey Wall Reader, SM

For setting/unsetting with the Evaluation Module L240/BS. The unit is actuated by inserting the electronic SafeKey chipkey. The SafeKey Wall Reader WEL is equipped with the key reader and an acknowledgement buzzer. VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
stainless steel	–	WEL/A, ES	GHQ3050023R0001		0.38	1

WELT/A, ES

SafeKey Wall Reader with Keypad, SM

For setting/unsetting with the Evaluation Module L240/BS. The unit is actuated by inserting the electronic SafeKey chipkey and/or code. The SafeKey Wall Reader WELT is equipped with the key reader, keypad and an acknowledgement buzzer. VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
stainless steel	–	WELT/A, ES	GHQ3050024R0001		0.45	1

SCS

SafeKey Chipkey

It is an electronic carrier medium for setting / unsetting via a SafeKey Wall Reader. A SafeKey Chipkey can be authorized for any number of different SafeKey systems with different levels of authorization.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SCS	GHQ3050027R0001		0.02	1

Intrusion Alarm Systems

ABB Alarm System – GM/A – Signalling Devices/Installation Material

Signalling Devices

SSS

Indoor Siren, 12 V DC

Electronic solid-state siren with intermittent tone for alarm purposes in indoor installations.
External dimensions: ø x H = 90 x 37 mm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SSS	GHV9270001V0001		0.17	1

SSF/G

Siren in Enclosure

An aluminium protective housing with additional protective enamel coating. Protected against sabotage by a case tamper contact. The alarm inputs are wired onto a terminal strip. With fixing screw (M4) for potential equalization on the base.
Dimensions: H x W x D = 200 x 205 x 88 mm; Color: RAL 9002 Environmental class III to VdS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Surface mounting, white	–	SAD/GAP	2CDG220021R0011		0.131	1

Intrusion Alarm Systems

ABB Alarm System – GM/A – Batteries

SAK17

Sealed Lead Acid Battery, 12 V DC

Sealed lead acid battery for power backup up of alarm systems. Maintenance free.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
18 Ah	–	SAK17	GHV9240001V0013		7.15	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Motion Detectors

Motion detectors directly evaluate movements within closed rooms. The change to specific physical variables is evaluated and signaled as an attempted intrusion. The passive infrared detector is used for normal environmental influences.
For critical environmental influences a combination of passive infrared and microwave, so called dual technologie, is used.
Compatible systems: Alarm System – GM/A and KNX.

EIM/D

Dual Ceiling Detector, EN Grade 2, 10 m

Operates according to the proven detection principle of infra-red technology and microwave over 360°. The range of the infrared component can be adapted via the mounting height while the range of the microwave can be adjusted separately using a jumper. The detector is fitted with a walk test LED. Colour: RAL 9010 pure white. For use in EU countries only.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	EIM/D	2CDG230039R0011		0.14	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Magnetic Contacts

Magnetic contacts monitor windows, doors, hatches or other access points for their open or closed state. The state is evaluated by the alarm system to trigger an intrusion alarm. Compatible systems: Alarm System – GM/A, ABB-secure@home, KNX.

MRS/W

Magnet Reed Contact Set

For opening surveillance of windows and doors, complete for bolting or drilling. Contents: 1 magnet, 1 reed contact with 4.0 m connection cable LIYY 4 x 0.14 mm², 2 housings, 2 spacer plates, 2 flanges and 4 anti-magnetic fixing screws. VdS class B.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Saver Set (20 pcs.), brown	–	VMRS/B	GHQ3201972R0012		1.99	1

SMC-W3.1A

Magnet Reed Contact for Surface/Flush Mounting

The device signals the opening of windows or doors. As flush mounting device, it can be instaled in 8 millimetes round holes; to be installed as surface mounting, it needs the provided adapter.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SMC-W3.1A	2CSY295241R0606		0.12	1
brown	–	SMC-W3.1D	2CSY295201R0606		0.12	1

SMC-W2.1

Rolling Door Magnet Reed Contact

The device signals the opening of overhead or rolling doors. It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x) or to a dual passive IR perimeter motion detector (SMD-W2.1x); for this purpose it is equipped with a 1.2 meter connection cable.
It is made of aluminum with high resistance to the transit of heavy vehicles.
The minimum fixing distance is 20 millimeters from ferrous materials and 25 mm from non-ferrous materials.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SMC-W2.1	2CSY255341R0602		0.12	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Magnetic Contacts

MC-C 1.1

Rolling Door Reed Contact

The Rolling Door Reed Contact Set is mounted mainly on rolling, sliding, and tilting doors.
The contact housing is mounted on the ground (a flat support surface is required).
Only screws made of anti-magnetic material may be used for mounting.
Due to the weatherproof and mechanically stable design of the contact housing, the circuit is mostly protected against damage when rubber-tired vehicles drive over it.
The 4-wire cable is protected by a plastic-coated metal hose.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
VdS Class B, EN Grade 2	–	MC-C1.1	2CDG250006R0011		0.3	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Glass Break Detectors

Glass break detectors evaluate glass breakage of glass surfaces from windows or doors. Compatible systems: Alarm System – GM/A, ABB-secure@home, KNX.

SPGS/W

Passive Glass Break Detector

Passive Glass Break Detector evaluates typical glass-breakage noises. VdS class B.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SPGS/W	GHV9220004V0009		0.11	1

AGM

Acoustic Glass Break Detector, SM

Acoustic Glass Break Detector evaluates typical glass-breakage noises. Built in microphone.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	AGM	GHV9210030V0010		0.09	1

SGB-W1.1A

Shock Inertial Sensor

This device detects a possible shock occurred on a door, window or the surface on which it is installed. Equipped with a 2-meter connection cable, it must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x). Assembly: projecting on door/window/generic surfaces using screws or double-sided adhesive tape.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SGB-W1.1A	2CSY255871R0604		0.07	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Glass Break Detectors

LKS

Loctite Adhesive for Glass Break Detector

Loctite Adhesive for mounting Glass Break Detectors SPGS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	LKS	GHQ4001906R0001		0.06	1

GP2

Mechanical Tester for SPGS

Mechanical tester for SPGS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	GP2	GHV9220004V0004		0.1	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Lock Monitoring

The lock monitoring of windows, doors, hatches or other access points for their unlocked or locked state ensures that every access point is locked before the building is left. Also it helps to reduce false alarms in the building. Compatible systems: Alarm System – GM/A, ABB-secure@home, KNX.

WRK/W

Lock Bolt Switching Contact with Connection Cable

For installation in the strike plate, for lock monitoring on doors. Water-tight IP 67, with 2.5 m connection cable LIYY 3 x 0.14 mm². VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	WRK/W	2CDG250003R0011		0.03	1

VSUE

Window Lock Monitoring Contact

Lock monitoring is carried out with a special magnet and a reed contact. The magnet is mounted on the push rod of the window sash while the reed contact is mounted on the frame. The connection cable LIYY 4 x 0.14 mm² is 4 m in length. VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	VSUE	GHV9210018V0022		0.09	1

SLM-W1.1

Roller Shutter Sensor

The device detects the lifting of shutters through the movement of the retractable rope.
It is made of thermoplastic material; the rope is 3.5 m long.
It must be necessarily connected to a perimeter magnet reed contact detector (SMC-W1.1x).

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	SLM-W1.1	2CSY255001R0603		0.07	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Panic Buttons

Panic buttons are push buttons which can be pressed by a person in danger. The actuation of a panic button immediately leads to an alarm. In case of a hold-up alarm the panic button can be used to trigger a remote alarm only. Compatible systems: Alarm System – GM/A, KNX.

ND/W

Emergency Call Button, white

For manual alarm tripping. Complies with the police regulations since it features permanent trip recognition, momentary-contact function, with cover contact. Surface mount version. Colour: white. VdS class C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
Surface mounting	–	ND/W	GHQ7132443R0011		0.15	1
Flush mounting	–	NDU/W	GHQ7132443R0021		0.15	1

NDA/W

Cover Plate for Emergency Call Button

Used primarily in the banking sector or other institutions, where unintentional alarm triggering is possible due to public access.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
white	–	NDA/W	GHQ7132443R0004		0.03	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Technical Detectors

No matter whether they are smoke, gas or water leakage, the right detector will recognize it.

TD-C 1.1

Gas Detector with Relay Contact

The Gas Detector is used for monitoring gas leakage of domestic and commercial rooms. It detects gases like propane, methane and butane as well als acetylene, city gas and natural gas. The detector can be connected to ABB intrusion and fire alarm control panels, as well as ABB i-bus® binary inputs via a potential-free relay contact. Suitable as a stand-alone device. An external power supply with 12-24 V DC is required.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	TD-C 1.1	2CDG220023R0011		0.167	1

SWM 4

Water Detector for Detector Groups

A resin-encapsulated water detector with gold-plated Termipoint pins, detects water ingress, e.g., pipe fractures, ingress of groundwater and sewage, water damage caused by washing machines and dishwashers etc. before the damage becomes too expensive.
For operation directly on detector circuits of intrusion alarm panels or security terminals.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SWM 4	GHQ4030001R0004		0.16	1

SWM 4/RN

Water Detector with Relay, 12 V

Features a potential free changeover contact output, an LED parallel output and a LED display. The detector resets itself automatically when the affected area dries out. The device draws its power from an external 10 ... 23 V DC voltage source.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SWM4/RN	GHQ4030001R0012		0.23	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Technical Detectors

6833/01-84

Busch-Smoke Alarm® ProfessionalLine

For early detection of smouldering fires and open fires with smoke development indoors according to the photooptical measurement principle (Tyndall). With installed Lithium battery. Battery life min. 10 years. With test button and muting. Can be networked with up to 12 detectors using the radio module. Can be networked via 2-wire twisted pair cable with up to 12 detectors. Acoustic alarm: installed horn (85 dBA). Cyclic functional test. Including attachment material – VdS certified. Conform to EN 14604 studio white.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Technical Detectors

FC650/O

Optical Smoke Detector

Optical smoke detector in threshold alarm technology that detects smoke according to the scattered-light principle The detectors feature an alarm indicator on the detector head that is visible from all angles, and which can be be triggered with a permanent magnet for test purposes. A detector base is provided for mounting and cable connection purposes into which the detector is simply screwed in via the bayonet connection. Each detector is equipped with an alarm LED, which displays the stored alarm in the event of an a alarm Detector/base diameter: 110 mm. VdS approved.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	FC650/O	2CDG430079R0011		0.09	1

FC650/TDIFF

Differential Maxium Heat Detector

The FC650/TDIFF is a thermal maximum and rate heat detector with an alarm temperature of 58 °C.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	FC650/TDIFF	2CDG430080R0011		0.09	1

FC650/TMAX

Thermal Maximum Detector

Static Heat Detector in threshold alarm technology, – trigger temperature 78 °C. The detectors feature an alarm indicator on the detector head that is visible from all angles, and which can be be triggered with a permanent magnet for test purposes. A detector base is provided for mounting and cable connection purposes into which the detector is simply screwed-in via the bayonet connection. Each detector is equipped with an alarm LED, which displays the stored alarm in the event of an a alarm. Detector/base diameter: 110 mm. VdS approved.

FC600/BREL

Relay Base, 12/24 V

Enables system-independent connection of the FC650 series fire detector to systems or devices that are not specifically designed for this detector technology. Examples include Intrusion Alarm Panels, KNX Security Terminals, elevator controls or other signal processing equipment. The detector base must be supplied by either a 12 V or a 24 V DV voltage supply. A floating 30 V DC/1 A changeover contacting is provided for transferring an alarm.

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Arming Systems

Arming devices for alarm systems ensure a comfort and secure usage for activation or deactivation of the intrusion alarm functions. Compatible systems: Alarm System – GM/A, KNX.

ESPE/M

Electrical Mini Bolt Lock

The ESPE/M Mini Bolt Lock is used together with an intrusion alarm system to implement the inevitability condition. The motorized bolt lock additionally locks the door to the set area, preventing unintentional opening of the door when the intrusion alarm system is set. The ESPE/M Mini Bolt Lock is connected to the L240/BS Evaluation module for GM/A 8.1 KNX Security Panel.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	ESPE/M	2CDG270010R0011		0.13	1

Intrusion Alarm Systems

Conventional Intrusion Alarm Components – Signalling Devices

Signalling devices are used for local alarming. A distinction is made between internal and external alarming. Internal alarming is used, i.e. when people are present in the monitored building. It is used solely to make people aware of a danger. External alarming is carried out using acoustic signaling devices (sirens) and visual signaling devices (strobe light). External alarming is used to contact the neighborhood or the general public. Compatible systems: Alarm System – GM/A, KNX.

SSS

Indoor Siren, 12 V DC

Electronic solid-state siren with intermittent tone for alarm purposes in indoor installations. External dimensions: ø x H = 90 x 37 mm.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SSS	GHV9270001V0001		0.17	1

SSF/G

Siren in Enclosure

An aluminium protective housing with additional protective enamel coating. Protected against sabotage by a case tamper contact. The alarm inputs are wired onto a terminal strip. With fixing screw (M4) for potential equalization on the base.
Dimensions: H x W x D = 200 x 205 x 88 mm; Color: RAL 9002 Environmental class III to VdS.

Description	Mod. width	Order details		Price 1 piece	Weight 1 piece	Pack unit
		Type code	Order code		kg	pc.
	–	SSF/G	GHQ3050017R0001		1.64	1

SSF/GB

Siren with Strobe

An aluminium protective housing with additional protective enamel coating. Protected against sabotage by a case tamper contact. The alarm inputs are wired onto a terminal strip. With fixing screw (M4) for potential equalization on the base.
Dimensions: H x W x D = 258 x 205 x 88 mm; Color: RAL 9002 Environmental class III to VdS.

Subdistribution boards

ComfortLine Compact CA distribution boards

For wall-mounting with distribution panels and sheet steel door

Technical specifications	
Standards/regulations	DIN EN 61439-1/-3
Protection class	II, double insulated
	I, earthed in connection with earthing set (accessories)
Degree of protection	IP44
Mechanical impact strength	IK07
Rated current	I_{nA} up to 125 A

Product features	
Enclosures and doors	Made of sheet steel, colour white RAL 9016, powder-coated
	With depth level compensation
	One top mounted membrane flange per panel width
	Door opening angle 120°
	Double-wing doors on cabinets with three or more panel widths
	Doors with espagnolette closure
	Plastic covers with quick-action screw
	With cable strain relief
Internal configuration options	DIN rail spacing 125 mm/150 mm
	Panels for rail mounting devices with N/PE Quick-terminals
	Panels for terminal blocks: without N/PE Quick-terminals and DIN rails in double insulated assembly
Delivery forms	Enclosure with door
	Labelling system included in the scope of delivery
Accessories	Cable entry covers
	Lock replacement parts

Technical specifications	
Standards/regulations	DIN EN 61439-1/-3
Protection class	II, double insulated
	I, earthed in connection with earthing set (accessories)
Protection class	IP31
Rated current	I_{nA} up to 125 A

Product features	
Enclosures and doors	Made of sheet steel, colour white RAL 9016, powder-coated
	One top mounted membrane flange per panel width
	Door opening angle 120°
	Double-wing doors on cabinets with three or more panel widths
	Doors with espagnolette closure and plastic window
	Plastic covers with quick-action screw
	With cable strain relief
Internal configuration options	DIN rail spacing 125 mm/150 mm
	Panels for rail mounting devices with N/PE Quick-terminals
Delivery forms	Enclosure with trim frame and door
	Trim frame with adjustment to the plaster surface
	One nipple flange per panel width included in the scope of delivery
	Labelling system included in the scope of delivery
Accessories	Hollow-wall mounting set for flush-mounted consumer units
	Lock replacement parts

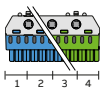
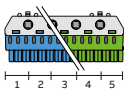
N/PE Quick-terminals

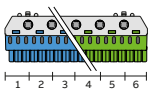
Standard-compliant, concise, flexible

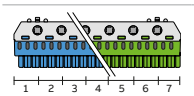
Configure as required

Due to the modularity and the extensive range of products, you can configure the products individually and practically. Depending on requirements, various Quick-terminals can be combined on a common terminal carrier. If a larger N or PE terminal block is required, two Quick-terminal blocks can be connected with the ZK10P10 connection bridge.









Product benefits

- Flexible terminal system for several N-potentials: Screw connection system: 2.5 to 25 mm² for rigid conductors; for flexible conductors up to 25 mm2 (ferrules required) Spring clamp system: 1.5 to 4 mm² for rigid conductors; for flexible conductors up to 2.5 mm2 (ferrules required)
- Optimal when using several residual current circuit breakers
- Simple expansion of the Quick-terminals with connecting bridges
- Unambiguous assignment of terminal blocks through clear colour coding: N = blue, PE = yellow-green
- Simple labelling of the terminal points with pre-printed, self-adhesive number strips
- Wide range of applications: In the consumer units of the UK600 and Mistral series, in all compact distribution boards and in all wall-mounting and floor-standing cabinets

Subdistribution boards

ComfortLine A wall-mounting cabinets IP44

For wall-mounting

A37

A57B

Technical specifications	
Standards/regulations	DIN EN 61439-1/-2/-3
Protection class	II, double insulated
Protection class	With door IP44
	Without door IP30[1]
Mechanical impact strength	IK07
Rated current	$I_{(nA)}$ up to 250 A

Product features	
Enclosures and doors	Made of sheet steel, colour white RAL 9016, powder-coated
	With depth level compensation
	One top mounted membrane flange per panel width
	Door opening angle 120°
	Double-wing doors on cabinets with three or more panel widths
	Doors with espagnolette closure
	Flange openings pre-embossed at the bottom and sides
	With cable strain relief
Internal configuration options	Prepared to be fitted with distribution and media panels[2]
	Prepared to be fitted with CombiLine-M modules on the EDF mounting frame[2]
Delivery forms	Empty cabinets with and without door
	Also delivered is a flange for cable entry CZF1 for the lower connection area
Accessories	Cable entry covers
	Closures
	Doors

> Distribution board panels/combination sets CombiLine, see main catalogue

[1] For an internal configuration as sub-distribution board with distribution panels or CombiLine modules

[2] Fastening elements CZ11 for fastening distribution panels and CombiLine modules on the front level have to be ordered separately

B-wall-mounting cabinets
IP44 ⏚, cabinet depth 215 mm

For an internal configuration with distribution panels/combination sets CombiLine N modules to EDF mounting frame, see main catalogue Internal Configuration Systems

Technical specifications	
Standards/regulations	DIN EN 61439-1/-2/-3
Protection class	I, earthed
Protection class	IP44
Mechanical impact strength	IK07
Rated current	$I_{(nA)}$ up to 250 A
Product features	
Enclosures and doors	Made of sheet steel, colour white RAL 9016, powder-coated
	With depth level compensation
	One top mounted membrane flange per panel width
	Door opening angle 120°
	Double-wing doors on cabinets with three or more panel widths
	Doors with espagnolette closure
	Flange openings pre-embossed at the bottom and sides
	Fastening elements CZ11 for the front fastening level are assembled
Internal configuration options	Prepared to be fitted with distribution panels/combination sets
	Prepared to be fitted with CombiLine-M modules on the EDF mounting frame
Delivery forms	Empty cabinets with door
	Also delivered is a flange for cable entry CZF1 for the lower connection area
Accessories	Cable entry covers
	Closures
	Transparent doors

> Distribution panels/combination sets CombiLine, see main catalogue

TwinLine N 44 floor-standing cabinets

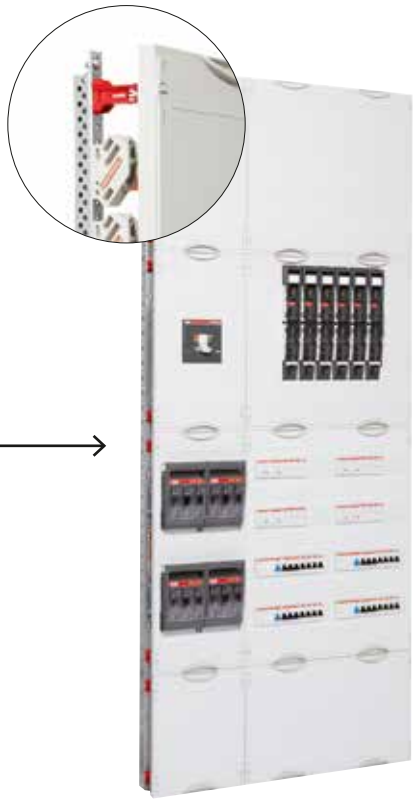
TwinLine N 44 floor-standing cabinets

Specifications and product features

Specifications for TwinLine H	
Standards/regulations	DIN EN 61439-1/-2/-3, DIN VDE 0660-600-1/-2/-3*
Protection class	I, earthed
	II, insulated
Degree of protection	with IP44 door
	Without IP30 door, when expanded as an installation distributor with meter and distributor fields, combination sets or CombiLine modules
Mechanical impact strength	IK08 for the cabinet housing with steel-sheet door
	IK07 in the area of flange knock-outs
Ambient conditions	Indoor installation
	Ambient temperature max. + 40 °C
	Ambient temperature min. - 5 °C
	Operating temperature max. + 55 °C
	Storage temperature max. + 55 °C
	Storage temperature min. - 5 °C

Product features for TwinLine H	
Housing and doors	Made of sheet steel, color RAL 7035, powder-coated
	A flange opening is cut out for each field width, knock-outs are on the bottom
	Door opening angle 180 degrees
	Double door cabinets with field width 4 and over
	Doors with rod lock
	Standard closure, double-bit 3 mm
Assembly options*	Prepared for expansion with meter and distributor fields, combination sets or CombiLine modules on EDF mounting frame
Forms of delivery	Housing with door
	External mounting lugs are included in the scope of delivery
	Support elements for each field width are included in the scope of delivery
	Touch protection included in the scope of delivery
	Middle support rail included in the scope of delivery
Accessories	Flanges must be ordered separately
	Base must be ordered separately

*The permissible heating for switchgear combinations (SK) up to 630 A rated current can be verified using the procedure according to 10.10.4.2; The required values of the power dissipation capacity for TwinLine N 44 standing cabinets refer to the tables on page ; above 630 A rated current, the procedure in accordance with 10.10.4.3 (DIN EN 61439-1 supplementary sheet 2, DIN VDE 0660-600-1 supplementary sheet 2) must be applied



TwinLine N 44 floor-standing cabinets

Delivery condition and expansion variants

TH312G

- Support components for each field width are pre-assembled
- Middle support rail and touch protection are included in the scope of delivery

EDFmounting frame installation
Expansion to an installation distributor with meter and distributor fields, combination sets or CombiLine modules on EDF mounting frame possible

TwinLine N 44 floor-standing cabinets

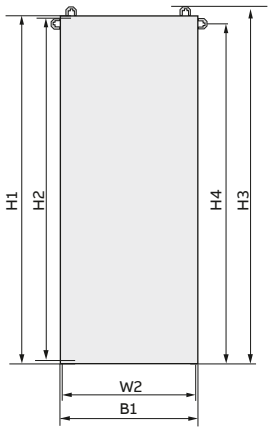
TwinLine-H, cabinet depth 225 mm, ⏚ ⧈

TH312G

Included in the scope of delivery

- External mounting brackets
- Supports for expansion with EDF mounting frame
- Middle support rail
- Touch protection

Order accessories separately



- Flanges
- Base

Crane transport

The lifting of the TwinLine housing is possible in accordance with the information given. Here it is imperative that transport eye bolts from ABB STRIEBEL & JOHN with order code TZ615P4 are used. Crane transport must be provided exclusively for individual cabinets! Furthermore, the maximum installation weights of the cabinets must be observed.

Notes

TwinLine N 55 wall cabinets and floor-standing cabinets

Wall cabinets

TwinLine N 55 wall cabinets and floor-standing cabinets

Wall cabinets/specifications and product features

Specifications for TwinLine-G, -L and -W	
Standards/regulations	DIN EN 61439-1/-2/-3, DIN VDE 0660-600-1/-2/-3*[1]
Protection class	I, earthed
	II, insulated
Degree of protection	with IP55 door
	Without IP30 door, when expanded as an installation distributor with meter and distributor fields, combination sets or CombiLine modules
Mechanical impact strength	IK08 for the cabinet housing with steel-sheet door
	IK07 in the area of flange knock-outs and for transparent doors
Ambient conditions	Indoor installation
	Ambient temperature max. + 40 °C
	Ambient temperature min. - 5 °C
	Operating temperature max. + 55 °C
	Storage temperature max. + 55 °C
	Storage temperature min. - 5 °C

Product features for TwinLine-G, -L and -W	
Housing and doors	Made of sheet steel, color RAL 7035, powder-coated
	A flange opening is cut out for each field width, knock-outs are on the side and bottom
	Door opening angle 180 degrees
	Double door cabinets with field width 4 and over
	Doors with rod lock
	Standard closure, double-bit 3 mm
Assembly options*	Prepared for expansion with meter and distributor fields, combination sets or CombiLine modules on EDF mounting frame
	Prepared for expansion with CombiLine modules on the WRmounting frame and mounting plates, by removing the EDF adapter
Forms of delivery	Housing with door
	Housing without door
	External mounting lugs are included in the scope of delivery
	Mounting strips with left and right mounting frame brackets, as well as an additional mounting strip for field width 4 and above cabinets, are included in the scope of delivery
	Touch protection for the insulated cabinet is included in the scope of delivery
	Touch protection for the earthed cabinet must be ordered separately as an accessory
Accessories	For housings without doors, the door can be ordered separately , as needed
	Flanges must be ordered separately
	Touch protection for the earthed cabinet must be ordered separately

*[1] The permissible heating for switchgear combinations (SK) up to 630 A rated current can be verified using the procedure according to 10.10.4.2; for the required values of the power dissipation capacity, please refer to the tables on page above 630 A rated current, the procedure according to 10.10.4.3 (DIN EN 61439-1 supplementary sheet 2, DIN VDE 0660-600-1 supplementary sheet 2) must be applied

* For detailed description of the assembly options of floor-standing cabinets se next pages in this chapter

TwinLine N 55 wall cabinets and floor-standing cabinets

Floor-standing cabinets

TwinLine N 55 wall cabinets and floor-standing cabinets

Floor-standing cabinets/technical specifications and product features

Specifications for TwinLine-G, -L and -W	
Standards/regulations	DIN EN 61439-1/-2/-3, DIN VDE 0660-600-1/-2/-3*[1]
Protection class	I, earthed
	II, insulated
Degree of protection	with IP55 door
	Without IP30 door, when expanded as an installation distributor with meter and distributor fields, combination sets or CombiLine modules
Mechnical impact strength	IK08 for the cabinet housing with steel-sheet door
	IK07 in the area of flange knock-outs and for transparent doors
Ambient conditions	Indoor installation
	Ambient temperature max. + 40 °C
	Ambient temperature min. - 5 °C
	Operating temperature max. + 55 °C
	Storage temperature max. + 55 °C
	Storage temperature min. - 40 °C

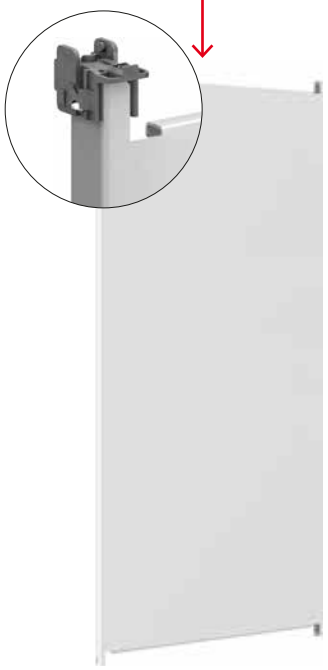
Product features for TwinLine-G, -L and -W	
Housing and doors	Made of sheet steel, color RAL 7035, powder-coated
	A flange opening is cut out for each field width, knock-outs are on the side and bottom
	Door opening angle 180 degrees
	Double door cabinets with field width 4 and over
	Doors with rod lock
	Standard closure, double-bit 3 mm
Assembly options*	Prepared for expansion with CombiLine modules on WRmounting frame and mounting plates
	Prepared for expansion with meter and distributor fields, combination sets or CombiLine modules on EDF mounting frame, EDF adapter and middle support rails must be ordered separately as accessories
Forms of delivery	Housing with door
	Housing without door
	External mounting lugs are included in the scope of delivery
	Mounting strips with left and right mounting frame brackets, as well as an additional mounting strip for field width 4 and above cabinets, are included in the scope of delivery
	Touch protection for the insulated cabinet is included in the scope of delivery
	Touch protection for the earthed cabinet must be ordered separately as an accessory
Accessories	For housings without doors, the door can be ordered separately , as needed
	Flanges must be ordered separately
	Base must be ordered separately
	Touch protection for the earthed cabinet must be ordered separately
	EDF adapter must be ordered separately if required*
	Middle support rails must be ordered separately if required*

*[1] The permissible heating for switchgear combinations (SK) up to 630 A rated current can be verified using the procedure according to 10.10.4.2; for the required values of the power dissipation capacity, please refer to the tables starting on page ; above 630 A rated current, the procedure according to 10.10.4.3 (DIN EN 61439-1 supplementary sheet 2, DIN VDE 0660-600-1 supplementary sheet 2) must be applied

* For detailed description of the assembly options of floor-standing cabinets se next pages in this chapter.

TwinLine N 55 wall cabinets and floor-standing cabinets

Floor-standing cabinets/assembly options ⏚



TW312G

Additionally order touch protection

Additionally order EDF adapter

Additionally order middle support rail

Additionally order touch protection

Mounting plate installation*
Expansion for control technology with mounting plate

EDF mounting frame installation
Expansion as an installation distributor with meter and distributor fields, combination sets or CombiLine modules on EDFmounting frame

Installation of WRmounting frame*
Expansion as an installation distributor with CombiLine modules on WR mounting frame

* The combination of mounting plate and WR mounting frame next to each other is possible.

TwinLine N 55 wall cabinets and floor-standing cabinets

Floor-standing cabinets/assembly options

TW312S

Touch protection included in the scope of delivery

Additionally order EDF adapter

Additionally order middle support rail

EDFmounting frame installation
Expansion as an installation distributor with meter and distributor fields, combination sets or CombiLine modules on EDF mounting frame

Touch protection included in the scope of delivery

Installation of WRmounting frame
Expansion as an installation distributor with CombiLine modules on WRmounting frame

TwinLine N 55 wall cabinets and floor-standing cabinets

Floor-standing cabinets/cabinet depth 225/275/350 mm ⏚

TG312G

Included in the scope of delivery

- External mounting brackets
- Mounting rails with left and right mounting frame brackets, as well as an additional mounting rail for cabinets with field width 4 and above
- Supports for expansion with CombiLine modules on WR mounting frame and mounting plates

Order accessories separately

- Flanges
- Base
- Touch protection for expansion with CombiLine modules
- EDF adapters, middle support rails and touch protection for expansion with meter and distributor fields, combination sets or CombiLine modules on EDF mounting frame

TwinLine N 55 wall cabinets and floor-standing cabinets

Floor standing cabinets/technical specifications and product features

TwinLine-X with door, IP55 , ⏚	
Standards/regulations	DIN EN 62208, DIN EN 61439-1/-2/-3, DIN VDE 0660-600-1/-2/-3*[1]
Mechanical impact strength	IK08 for the cabinet enclosure with sheet steel door
	IK07 in the area of flange knock-outs and for transparent doors
Environmental conditions	Indoor installations
	Ambient air temperature max. + 40 °C
	Ambient air temperature min. -5 °C
	Operating temperature max. + 55 °C
	Storage temperature max. + 55 °C
	Storage temperature min. - 5 °C
Enclosure and doors	Sheet steel, colour RAL 7035, powder-coated
	For each panel width, there is one flange opening at the top and one knockout at the bottom
	Door opening angle 180 degrees
	For cabinets with four panel widths double-wing doors
	Doors with espagnolette closure
	Standard closure double bit 3 mm
Internal configuration options*[2]	Prepared to be fitted with CombiLine modules to WR mounting frame and mounting plates
Delivery forms	Enclosure with door
	External mounting brackets included in the scope of delivery
	The mounting rails with mounting frame holders for right and left and also an additional mounting rail for cabinets with four panel widths are included in the scope of delivery
	A touch guard for the double insulated cabinet is included in the scope of delivery
	The touch guard for the earthed cabinet must be ordered separately as accessory
Accessories	Side panels must be ordered separately
	The connection set must be ordered separately
	Flanges must be ordered separately
	Plinths must be ordered separately
	The touch guard for the earthed cabinet must be ordered separately

*[1] The permissible heating for switchgear assemblies up to a rated current of 630 A can be verified with the procedure according to section 10.10.4.2; for the required values of the power loss capacity, please refer to the table on page 21; above a rated current of 630 A, the procedure in accordance with 10.10.4.3 (DIN EN 61439-1 supplement 2, DIN VDE 0660-600-1 supplement 2) must be applied

TwinLine N accessories

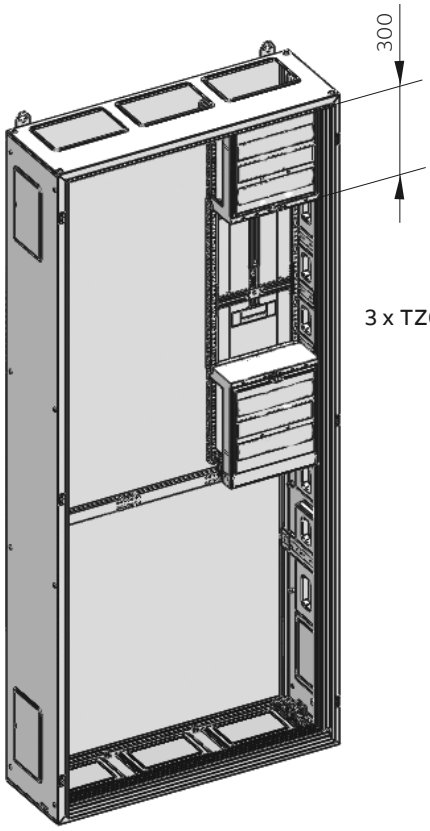
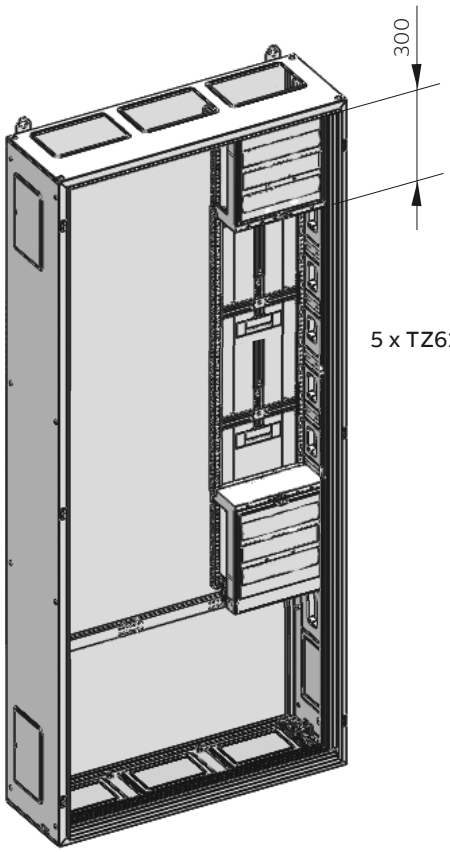
Meter applications



TZ610

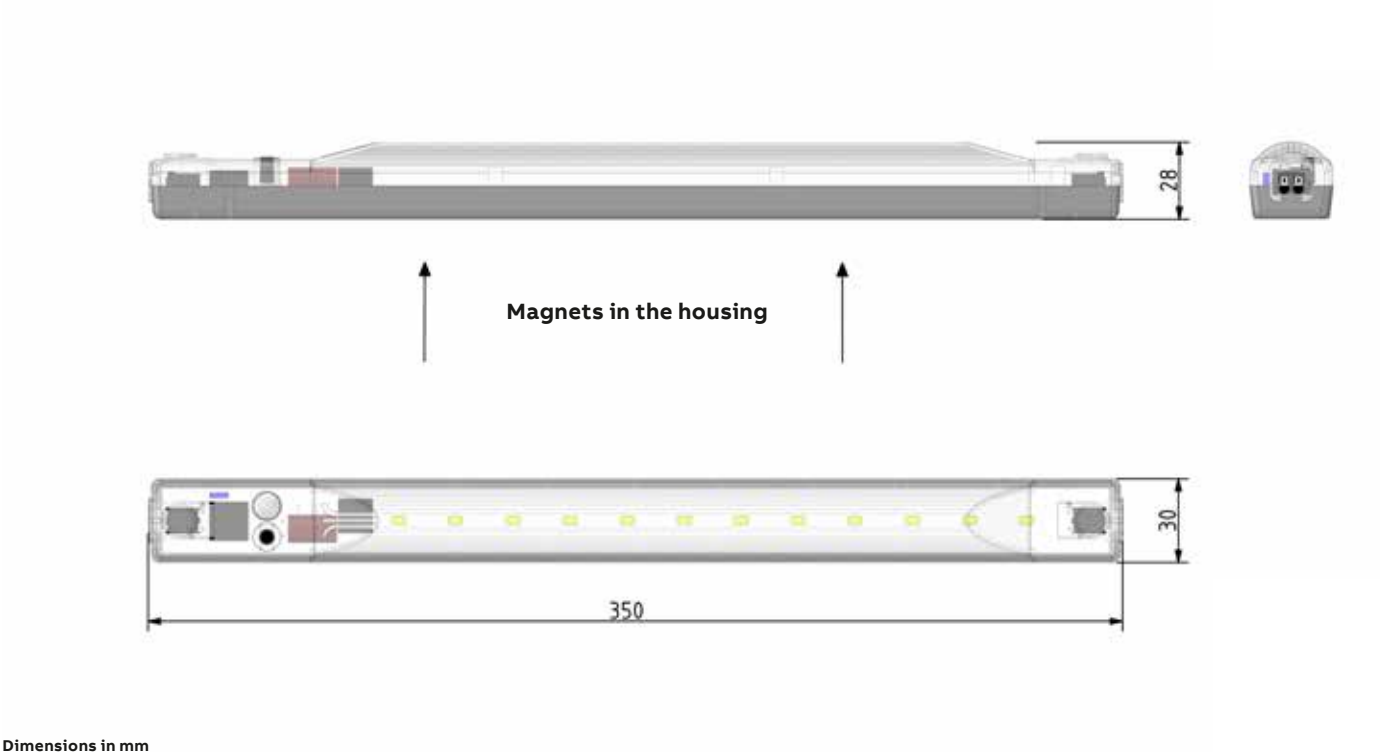
Inner cladding TZ610
For meter fields, depth = 225 - 350 mm
Additional profile for meter fields with 150 mm connection compartment in the insulated cabinet



TZ614

Cover strip TZ612-614
Required for installation of meter fields in insulated cabinets for compliance with protection class IPXXB in the area of unnecessary fastening points for the middle support rail

3 x TZ612-614



5 x TZ612-614

> Dimensions in mm

TwinLine N accessories

LED control cabinet lights TZ650

Technical specifications	
Operating voltage	24 V – 265 V AC / DC
Power consumption	6 W
Light output	700 lm
Lighting level	1200 lx, 0.5 m 450 lx, 1.0 m
Color temperature	5,000 K
Degree of protection	IP 20
Protection class	II
Lifetime (std. at 20 °C)	50,000 h
Terminal	Push-in connector
Housing material	Polycarbonate
Weight	140 g
Max. humidity [% rH]	90 %
Operating temperature [° C]	- 20 °C to + 60 °C
Ambient temperature (storage)	- 40 °C to + 85 °C
Approvals	CE

Notes

Interior expansion system CombiLine N

The right module for every type of application

Interior expansion system CombiLine N

Expansion with EDF or WR mounting frame

Empty cabinets for expansion with EDF mounting frame

Small distributor
UL and AL ⧈

Wall-mounted cabinets
U and A ⧈, B⏚
TwinLine-G, TwinLine-L and TwinLine-W ⏚⧈

Standalone cabinets
TwinLine-H ⧈ ⏚
TwinLine-G, TwinLine-L and TwinLine-W ⏚⧈

Series switching cabinets
TriLine®, System pro *E* power ⏚

Fire protection housing
UF, AF and SF ⏚

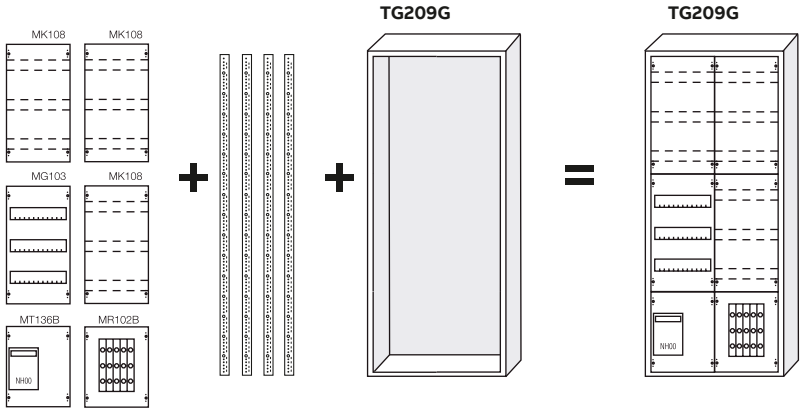
Empty cabinets for expansion with WR mounting frame

Wall-mounted cabinets
TwinLine-G, TwinLine-L and TwinLine-W ⏚⧈

Standalone cabinets
TwinLine-G, TwinLine-L and TwinLine-W ⏚⧈

Series switching cabinets
TriLine®, System pro *E* power ⏚

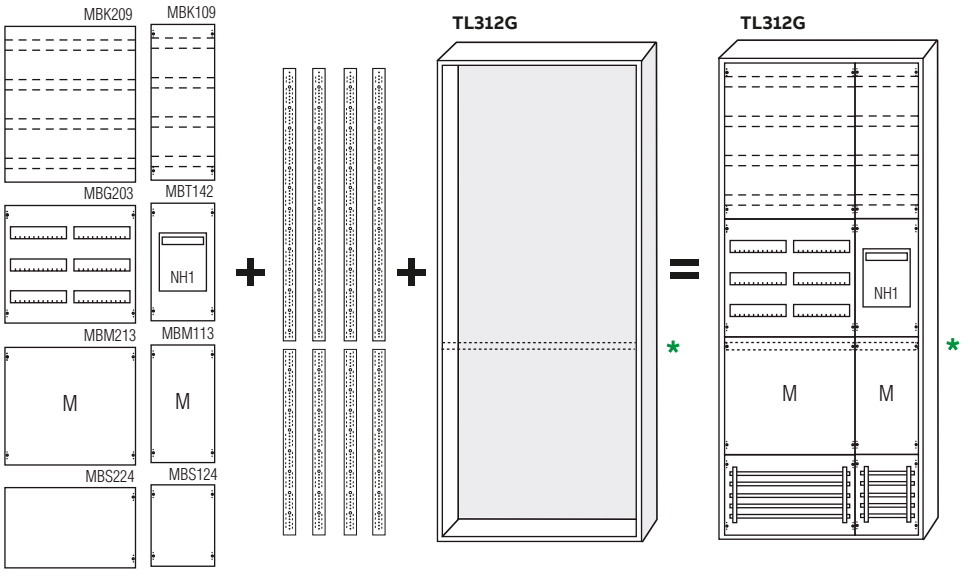
EDF mounting frame up to 400 A



WR mounting frame up to 850 A

Interior expansion system CombiLine N

Possible applications with EDF mounting frame



Small distributor of the UL series, AL/wall-mounted cabinets of the series U, A and TwinLine-G, -L and -W
Fire protection housing of the series UF, AF
Example: Expansion with modules (mounted) on EDF mounting frame in the TwinLine-G wall-mounted cabinet

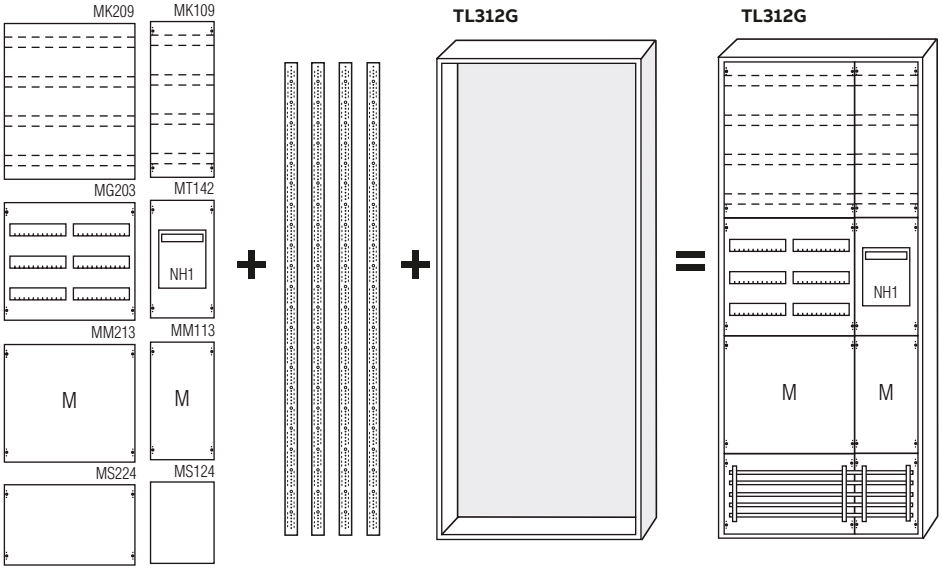
Modules (mounted) + EDF mounting frame + empty cabinet = wall-mounted distributor

Delivery form
Modules are delivered ex works assembled on the EDF mounting frame (installed in the cabinet).

Standalone cabinets of the series TwinLine-H as well as TwinLine-G, -L and -W
Series switching cabinets of the series TriLine®, pro *E* power system/fire protection housing of the series SF
Example: Expansion with modules (unassembled as a kit) and EDF mounting frame in the TwinLine-L standalone cabinet

+ 5 pcs. ZX1001 copper rail
+ 5 pcs. ZX1002 copper rail

Modules (kit) + EDF mounting frame + empty cabinet = standalone distributor



Delivery form
Kits, EDF profiles, copper rails and empty cabinet are each delivered packaged individually.

* The EDF mounting frame may not exceed a maximum height of 1350 mm (installation height 5) at once. For structural reasons in standalone cabinets (prepared for EDF mounting frame), that is why a central supporting rail is mounted ex works, which can be moved up and down in the grid 150 mm.

Interior expansion system CombiLine N

Possible applications with WR mounting frame

Standalone cabinets of the series TwinLine/series switching cabinets of the series TriLine®, System pro *E* power
Example: Expansion with modules (mounted) on WR mounting frame in the TwinLine- L standalone cabinet

+ 5 pcs. ZXM1003 copper rail

Modules (mounted) + WR mounting frame + empty cabinet = standalone distributor

Delivery form
Modules are delivered ex works assembled on the WR mounting frame and installed in the cabinet.

Interior expansion system CombiLine N

The three delivery forms

The interior expansion of modular cabinet series can be effortlessly mastered with the perfectly sophisticated quick-assembly system from ABB STRIEBEL & JOHN. Easy, quick and safe – these are the system's three product properties that speak for themselves. You choose which delivery form is right for you: Choose the complete delivery if you would like to have the modules installed in the empty cabinet ex works, the kit with instructions for assembly in order to set up the modules yourself on the mounting frame or the delivery with individual parts.

Complete delivery
The module system panel is completely assembled on the mounting frame with all modules and is delivered installed in the distributor cabinet. The mounting frame must be ordered separately.

Advantage: From the list of CombiLine N modules, you chose the modules that are tailored to your object, thereby getting the correct low-voltage distribution in the easiest way. The module control panel you have thus planned is delivered installed in the cabinet ex works. This way you do not have to spend time looking for system accessories, such as angle brackets, screws or retaining elements. All you need to do is choose the appropriate mounting frame. Our selection StriePlan can take care of this if desired.

Delivery as a kit
All of the individual parts required to assemble a module are delivered individually packaged as a kit with instructions for assembly. All you need to do is choose the appropriate mounting frame. The mounting frame must be ordered separately. Our software StriePlan will take care of choosing the mounting frame if desired.

Advantage: The kits allow you to be flexible when it comes to warehousing. You do not have to spend time looking for system accessories, such as angle brackets, screws or retaining elements. The enclosed instructions make assembly a breeze. Software support from StriePlan makes planning and calculation perfectly quick and clear.

Delivery in individual parts
The desired expansion parts are purchased individually in order to set up, expand or convert a module on your own.

Advantage: With a manageable number of individual parts, if necessary you can remain quick and flexible when it comes to setting up, expanding or converting distribution.

Complete delivery

Technical specifications

Standards/provisions	
DIN EN 61439-1/-2/-3 (VDE 0660-600-1/-2/-3)*1	X
DIN 43880 (rail-mounted devices)	X
Protection class	IP2XC

Electrical characteristics			
Rated impulse withstand voltage (U_{imp})	6 kV		
Overvoltage category	III		
Degree of contamination	3		
Protection class	I/II		
Rated current of the switchgear combination (I_{nA})	bis 850 A		
	Rail-mounted devices DIN 43880	NH-fuse switch disconnector	Busbar systems
Rated impulse withstand voltage (I_{pk})	25 kA	to 52 kA	to 74 kA
Rated short-time withstand current (I_{cw})	12.5 kA	to 25 kA	to 35 kA
	-	Values by request	see the chapter Busbar systems
Rated frequency (f)	50 Hz		
Rated insulation voltage (U_i)	690 V AC		
Rated operating voltage (U_e)	400 V AC		

*1 The permissible heating for switchgear combinations (SK) up to 630 A rated current can be verified using the procedure according to 10.10.4.2. The required power dissipation capacities can be found in the tables of the respective cabinet series. Above 630 A rated current, the procedure according to 10.10.4.3 (DIN EN 61439-1 supplementary sheet 2, DIN VDE 0660-600-1 supplementary sheet 2) must be applied

Interior expansion system CombiLine N

Busbar system 100 mm, NH00 switch disconnector, M(B)D...52(B)

MD352B

- Populated with InLine II NH00-100 fuse switch disconnection rails 160 A, Make: ABB
- Busbar center distance 100 mm
- For 3-pole, horizontally arranged busbars
- With busbar bracket type ZX520
- Rated current (I_n) max. 850 A
- **Important:**

1. The cabinet depth is to be noted in the lock area Spacing from the front edge of the equipment to the cover: 29 mm
2. The cable connection when using a middle rail or cross-profile rail in the direct connection is only possible to a limited extent with the use of a bridge clamp (plan for connection space, empty module)

- The mounting frame must be ordered separately
- The busbars must be ordered separately from the module
- Not suitable for fire protection housing
- Take additional connection room of at least 150 mm into consideration

Interior expansion system CombiLine N

Busbar system 185 mm for NH load break switch, M(B)L...5

ML35

- Unpopulated for load break switch NH00 to NH3 fuses 160 A to 630 A
- For make ABB SlimLine XR and Jean Müller Sasil
- Busbar center distance 185 mm
- For 3-pole horizontally arranged busbars, see below
- With busbar bracket type ZX523
- Cover without cutout
- Rated current (I_n) max. 850 A
- **Important:** Plan for connection space or empty module and note the cabinet depth in the lock area
- Spacing from the front edge of the equipment to the cover: 138 mm
- The mounting frame must be ordered separately
- Not suitable for fire protection housing

Height		Width		Useful width				From cabinet depth	Kit not installed		Mounted and installed in the cabinet

Busbar system 40 mm for S700 and S750, M(B)H

MH250

- Unpopulated for main circuit breakers
- For make ABB S700, 1 to 4-pole (width per pole 35 mm)
- Busbar center distance 40 mm
- For 4-pole horizontally arranged busbars, see below
- With busbar bracket type ZB5
- Additionally braced in the middle from 3-field width
- Covers with cutout
- Rated current (I_n) max. 250 A
- The remaining cutout is closed with cover strips
- The mounting frame must be ordered separately
- The modules MBH350 and MH350 are not suitable for fire protection housing

*1 Expansion on EDF mounting frame *2 Expansion on WR mounting frame

Planning information: Note the switch cabinet depth, distance between meter support plate and door at:
TwinLine-G, 225 mm depth = 126.5 - 139 mm, TwinLine-L, 275 mm depth = 141.5 - 154 mm, TwinLine-W, 350 mm depth = 168 - 180.5 mm
TriLine®, 325 mm depth = 148 mm, TriLine®, 425 mm depth = 198 mm
Important: Plan at least one module each with a width of 250 mm above and below the meter support plate

Interior expansion system CombiLine N

Module combinations for busbars TwinLine row mountings

The busbar systems for cabinet row mounting of the TwinLine cabinet system can be interconnected for various installation positions, the possible CombiLine N modules. There are modules that are interconnected in front of or behind the mounting frame due to the location of the busbar bracket.

If, for example, an N/PE busbar module is needed in the **top** of the cabinet and a busbar module is needed at the **bottom**, the possibility of combining the different modules must be taken into account. The different adjustment possibilities of the installation positions (1/0/-1) can be taken from the opposite side.

Distribution panel system CombiLine-X

The extension for the TwinLine-X cabinet system

The extension of the CombiLine N modules up to 1000 A in combination with the TwinLine-X floor-standing enclosures offers new possibilities, especially for panel builders. The new solution optimally meets the practical requirements for a flexible internal configuration with a high degree of protection, quick in assembly, and an ease of installation. The CombiLine-X system is tested according to DIN EN 61439-1/2 and offers a high safety standard.

- Degree of protection: IPXXC
- Busbars: 3-pole + N + PE
- Main incomer: XT5/XT6/XT7 up to 1250 A; 3/4 pole
- Switch disconnector: OT up to 1.000 A, TruOne up to 800 A
- Rated current (I_n): up to 1.000 A
- Single WR-frame / double WR-Frame for MBB
- Connection between breaker/switches and MBB: 800 A + 1.000A 3P, 3+N
- DIN EN 61439-1/-2

Technical specifications

Complete delivery
The module system panel is completely assembled on the mounting frame with all modules and is delivered installed in the distributor cabinet. The mounting frame must be ordered separately.

Advantage: From the list of CombiLine N modules, you chose the modules that are tailored to your object, thereby getting the correct low-voltage distribution in the easiest way.
The module control panel you have thus planned is delivered installed in the cabinet ex works. This way you do not have to spend time looking for system accessories, such as angle brackets, screws or retaining elements. All you need to do is choose the appropriate mounting frame. Our selection StriePlan can take care of this if desired.

Delivery as a kit
All of the individual parts required to assemble a module are delivered individually packaged as a kit with instructions for assembly. All you need to do is choose the appropriate mounting frame. The mounting frame must be ordered separately. Our software StriePlan will take care of choosing the mounting frame if desired.

Advantage: The kits allow you to be flexible when it comes to warehousing. You do not have to spend time looking for system accessories, such as angle brackets, screws or retaining elements. The enclosed instructions make assembly a breeze. Software support from StriePlan makes planning and calculation perfectly quick and clear.

Delivery in individual parts
The desired expansion parts are purchased individually in order to set up, expand or convert a module on your own.

Advantage: With a manageable number of individual parts, if necessary you can remain quick and flexible when it comes to setting up, expanding or converting distribution.

Distribution panel system CombiLine N CX, IP2XC			
DIN EN 61439-1/-2/-3 (VDE 0660-600-1/-2/-3)*	X		
DIN 43880 (rail mounting devices)	X		
Rated impulse withstand voltage (U_{imp})	6 kV		
Overvoltage category	III		
Degree of pollution	3		
Protection class	I/II		
Internal form of separation	Form 1		
Rated current of the switchgear assembly (I_{nA})	up to 1000 A		
	Rail mounting devices acc. to DIN 43880	NH fuses- Switch disconnectors	Busbars systems
Rated peak withstand current (I_{pk})	25 kA	up to 52 kA	up to 74 kA
Rated short-time withstand current (I_{cw})	12.5 kA	up to 25 kA	up to 35 kA
Rated frequency (f)	50 Hz		
Rated insulation voltage (U_i)	690 V AC		
Rated operational voltage (U_e)	400 V AC		

* The permissible heating for switchgear assemblies up to a rated current of 630 A can be verified with the procedure according to section 10.10.4.2; for the required power loss capacities, please refer to the tables of the respective cabinet series; above a rated current of 630 A, the procedure according to 10.10.4.3 (DIN EN 61439-1 Supplement 2, DIN VDE 0660-600-1 Supplement 2) shall be applied.

Tmax circuit breaker unequipped (MX…LX)

MX212LX

- Incoming / outgoing module
- Unequipped for ABB circuit breaker, fixed assembly with connections on front side **Tmax (XT5, XT6, XT7) 3-/4-poles**
- With all cross profiles required and busbar holder ZX522

- The mounting frames must be ordered separately.

Important:

- To be ordered seperately: For XT5 ES terminals / for XT6 800 A EF terminals
- Dim. 150 mm - plan empty modules on the connection side
- One current transformer can be installed per phase

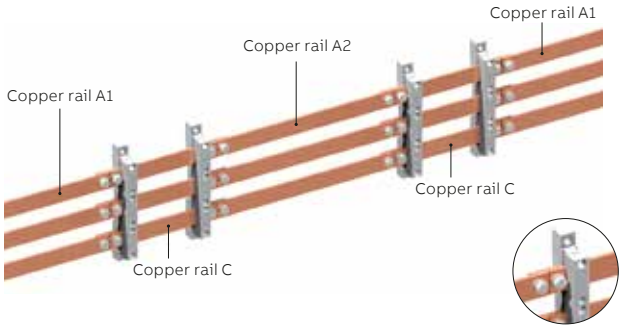
TwinLine busbars

Row mounting for modules M(B)S…24



- It is possible to combine different module widths within the cabinet with continuous busbars
- Busbars for cabinet row mounting (copper rail A1/A2) are delivered on the connection side with copper transport pieces and attachment material
- A connector (copper rail C) is required for each busbar connection
- **Important**: note the possibility to combine modules with the TwinLine cabinet row mountings
- A max. of 5 copper rails A1/A2 and C are required per module

TwinLine busbars

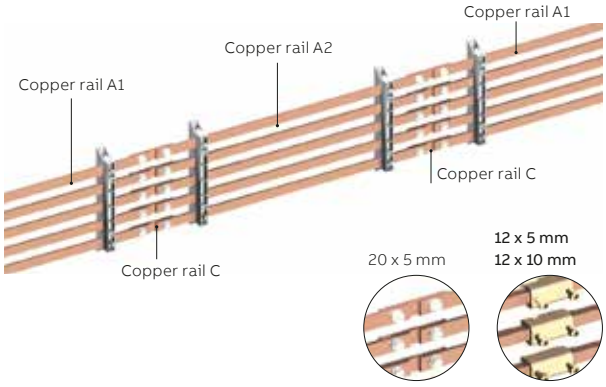
Row mounting for modules M(B)R...02(B)



- It is possible to combine different module widths within the cabinet with continuous busbars
- Busbars for cabinet row mounting (copper rail A1/A2) are delivered on the connection side with copper transport pieces and attachment material
- A connector (copper rail C) is required for each busbar connection
- **Important:** For populated modules MR...02B, the external bus-mounting fuse socket may be omitted, for:
  MR102B for connection left, 1 unit,
  MR202B for connection left, 1 unit,
  MR302B for connection left or right, 2 units each;
  these must be replaced by empty space covers ZA4P10 in the cover
- **Important**: note the possibility to combine modules with the TwinLine cabinet row mountings
- 3 copper rails A1/A2 and C are required per module

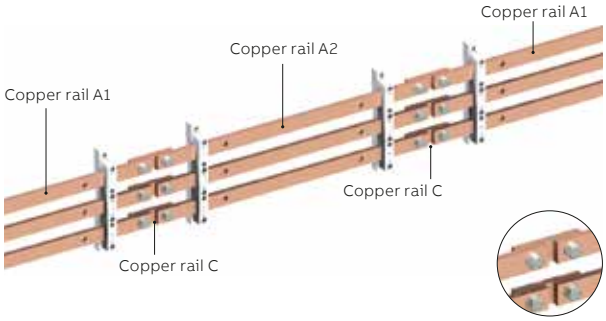
Notes

Busbars TriLine system and pro *E* power system

Row mounting for modules M(B)S…24



- It is possible to combine different module widths within the cabinet with continuous busbars
- A connector is required for cabinet row mounting for each busbar connection
- The busbar connection is realized outside the module
- Busbar connector for copper 12 x 5 mm and 12 x 10 mm, including connection terminals
- Busbar connector for copper 20 x 5 mm, including press-in nuts and fastening screws
- A max. of 5 copper rails A1/A2 and C are required per module

Row mounting of modules 100 mm, NH00 switch disconnectors, M(B)D...52(B)

ZXM1215

- Busbars for individual cabinet installation
- With the EDF and WR mounting frame, defined combinations (see info FB width) are possible within the cabinet. The different busbars can be connected via a connection set
- The NH00 fuse switch disconnection rails are mounted directly on the copper rails prepared with press-in nuts
- Set positions are specified for feeding in on copper rails
- 3 copper rails are required per module

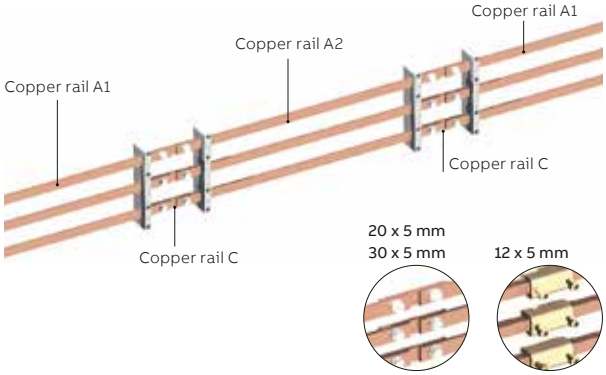
Busbars TriLine system and pro *E* power system

Row mounting of modules 185 mm, switch disconnectors, M(B)D..21-300(B)



- Combinations of different module widths are possible within a cabinet with continuous busbars.
- The busbars A1 and A2 are provided with press-in nuts to assemble the NH-in-line fused load break switches.
- The busbar connection is realized outside the module
- 3 copper rails A1 or A2 and 3 or 6 copper connectors C are required per module
- The busbars A1 are required for cabinet row mounting right or left (right extension)
- The busbars A2 are required for cabinet row mounting right and left (both sides extension)
- A busbar connector C is required for each busbar connection
- The busbar connector is delivered with the press-in nuts and attachment material

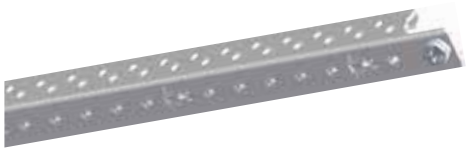
Notes



Interior expansion system CombiLine N

EDF mounting frame parts

Wall cabinet Standalone cabinet

Setup possibilities with EDF mounting frame parts in the variable setup with transverse profile rails
The vertical EDF profile rails are prepared for receiving modules. The use of a transverse profile rail is necessary to connect different field widths.
The TwinLine wall cabinets are prepared for the setup with the EDF mounting frame parts. In the TwinLine standalone cabinet, it is necessary to use a central mounting rail and EDF adapters (see TwinLine chapter).
For the installation of CombiLine modules in ComfortLine A wall cabinets, additional fastening parts CZ11 have to be ordered.

WR mounting frame parts

Setup possibilities with WR mounting frame parts in the variable setup with transverse profile rails.
The vertical WR profile rails are prepared for receiving modules. The use of a transverse profile rail is necessary to connect different field widths. The WR mounting frame is used in the TwinLine standalone cabinet. The EDF adapters of the mounting frame holder are removed for assembly in the TwinLine wall cabinet.

- WR mounting frame, complete
- WR profile rail, vertical with transverse profile rail
- To set up the modules up to 850 A

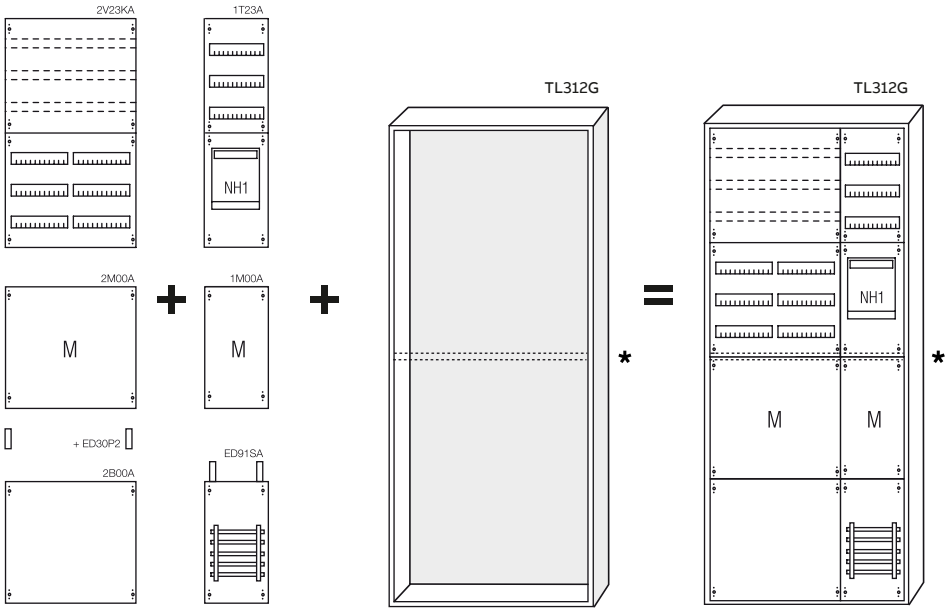
Interior expansion system with distribution panels/combination sets

Possible applications for wall-mounted and standalone cabinets

Wall-mounted cabinets of the series U, A, B and TwinLine-G, TwinLine-L and TwinLine-W

Example: Expansion with distribution panels/combination sets in the TwinLine-G wall-mounted cabinet



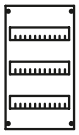
Distribution panel
+ distribution panel and combination kit
+ EDF installation kit
+ empty cabinet
= wall-mounted distributor

Delivery form
EDF installation kit, distribution panels, combination sets (mounted ex works on EDF profile) and empty cabinet are delivered individually packaged.

Standalone cabinets of the series TwinLine H and TwinLine-G, TwinLine-L and TwinLine-W
Series switching cabinets of the series TriLine®, Pro *E* Power system/fire protection housing of the series SF

Example: Expansion with distribution panels/combination sets in the TwinLine- L standalone cabinet

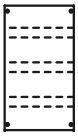
Distribution panels
+ combination sets
+ panel connector
+ empty cabinet
= standalone distributor



Delivery form
Distribution panels, combination sets (mounted ex works on EDF profile)
Panel connector and empty cabinet are each delivered individually packaged.

* The EDF mounting frame may not exceed a maximum height of 1350 mm (installation height 5) at once. For structural reasons in standalone cabinets (prepared for EDF mounting frame), that is why a central supporting rail is mounted ex works, which can be moved up and down in the grid 150 mm.

+ panel connector ED30P2



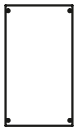
Internal expansion system with distribution panels

Population of the distribution panels

Distribution panels with DIN rails for rail-mounted devices
Equipment: DIN rail 35 x 15 mm for device installation and with hole pattern for the wiring system, row spacing 125 mm, with plastic covers, cutouts for rail-mounted devices DIN 43880 for 12 PLE (216 mm) per field width

> Wire holder and locking strips see page 260

Distribution panels with DIN rails for terminal blocks
Equipment: DIN rail 35 x 15 mm for terminal blocks with hole pattern for the wiring system, row spacing 125 mm, with plastic covers; for a protection-insulated design, use insulators ZK90; To mount the DIN rails to the rear, use ED33 deep angle piece and DIN rails for installation between the mounting frame

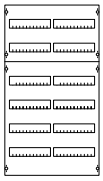


> Insulators page 260
> Deep angle piece page 260

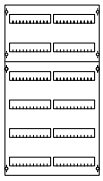
Distribution panels with mounting plates
Equipment: Steel sheet metal mounting plate, Sendzimir galvanized surface, material thickness 2 mm; the mounting plate is mounted on deep angle piece ED33 and can be variably adjusted in depth; maximum installation depth between mounting plate and cover 143 mm, with plastic covers (cover closed)

Distribution panels with mounting cross-beams for device installation without holes
Equipment: For every 150 mm, a mounting cross-beam ZX35 is mounted on ED33 deep angle piece and can be variably adjusted in depth; the maximum installation depth between the cross-beam and cover is 143 mm, with plastic covers (cover closed)

Distribution panels as touch protection (or to expand with assembly parts)
Equipment: Empty panel without installation parts, with plastic covers (covers closed)



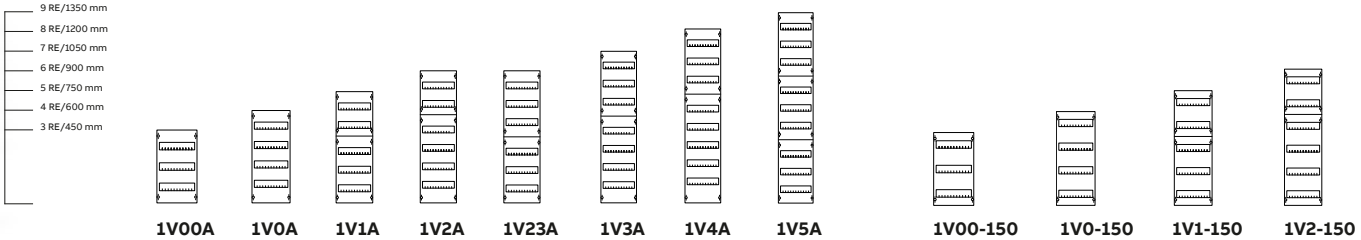
Distribution panels with busbars
Equipment: 5-Pole busbar system copper 12 x 5 mm, busbar spacing 40 mm, with plastic covers (covers closed)



> Busbar connection terminals page 260

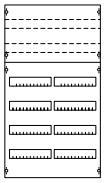
Internal expansion system - Distribution panels

Rail-mounted devices



2V2A

2V2-150



- Expansion with DIN rails 35 x 15 mm
- Distribution panels or field combinations must have the same grid units as the cabinets, in which they are installed
- For standalone and row switching cabinets, two fields or field combinations must be installed one above the other
- Without N/PE quick plug-in terminals
- The EDF profile rails are included in the scope of delivery

Notes

Distribution panel system CombiLine X
General information

Busbars for low voltage switchgear and controlgear assemblies

In this chapter you will find useful information on planning a low-voltage distribution. After you have collected the necessary data in the first step, the following information will help you to carry out the project planning in such a way that you can provide a design verification.

The following parameters are critical in order to define the dimensions of a busbar system:

- Necessary current carrying capacity I_{nA} / I_{nC}
- Rated peak withstand current (I_{pk})
- Rated short-time withstand current (I_{cw})
- Rated voltage (U_e)
- Rated impulse withstand voltage (U_{imp})

The specifications for these design values can be found on the next pages.

The short-circuit strength of the busbar system is determined by the

- arrangement of the conductors to each other
- Inherent stability of the conductors

The inherent stability of the conductor (the busbar) depends on the conductor geometry (flat rail/profile rail).

The inherent stability and the arrangement of the busbars to each other determine the spacing of the busbar supports. The busbar holder shall be capable of withstanding the forces that occur. Exceeding of the conductors' inherent withstand rating and incorrect support distances will lead to unacceptable conductor deformations. The busbar support must absorb the forces that occur. If the inherent strength of the conductors is exceeded and the support distances are incorrectly selected, this will result in impermissible deformations of the conductors.

The calculation of the occurring forces, the inherent stability and the maximum distances between the busbar supports can be carried out according to DIN VDE 0103 (IEC 60865-1).

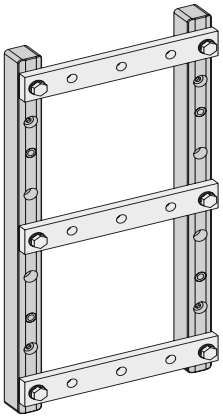
Distribution panel system CombiLine N
General information

Project planning of distribution board and design verification
When designing the system, it is necessary to clarify the level of the short-circuit current occurring at the installation location for the verification.

In the following cases a short circuit withstand rating verification is not required as per DIN EN 61439:
- If the rated short-time withstand current or rated conditional short-circuit current at the installation site is less than 10 kA
- If a cut off current of current-limiting devices is not exceeding 17 kA at the terminals of the incoming circuit of the assembly

If this is not the case, verification must be provided by means of an examination.

If higher short-circuit values than the above-mentioned values are to be expected at the installation site, you can alternatively use the tables derived from numerous tests for verification. You will find them on the next pages to prove the strength of the busbar system you have realized with our components.



Notes on the design of busbar connections
For the connection of busbars, DIN 43 673 (busbars - bores and screw connections) should be observed.

It contains information on how connections
- should be made in geometry
- with which fastening elements
- and with which torques.

Of course, on the selection pages of this chapter we offer you the appropriate materials to make secure connections.

Subdistribution boards

Fire protection housing – Housing for preventive fire protection

Preventive fire protection is not just the job of the construction managers. Electrical designers and installers or switchgear manufacturers are responsible during planning and execution for making sure that their systems will not the cause of a fire. In electrical switchgear, the following elements:

- Loose terminals
- Short circuits
- Fault arcs
- Overloads
- Insulation errors
- Lightning strikes

can cause a fire. Therefore, the system operator also needs to make the appropriate contribution by checking the electrical systems at fixed intervals, maintaining them and upgrading them as needed.

In the case of technical installations in industry or in building complexes with large concentrations of people, such as in airports, train stations, nursing homes, hospitals or hotels, it is vital that the functionality of safety-relevant electrical systems is maintained even during a fire.

ABB STRIEBEL & JOHN offers you an innovative housing system for preventive fire protection made of non-flammable material with optimal technical and economic expansion options.

A wide range of wall and standing housings are available in various cabinet sizes.

Subdistribution boards

Fire protection housing – General technical data

Technical parameters

Mounting type	UP wall mounting/AP wall mounting/AP standing mounting
Housing	Highly compressed, multi-layer fire protection panels (DIN 4102-1/DIN EN 13501-1) of building material class ‘A2’ non-flammable, smoke-tight
Surface	Coating light gray - similar to RAL 7035, edges in contrasting colors
Door	Door hinge right or left as standard, left also possible after conversion, opening angle approx. 180 degrees
Lock	Locking with sash lock through swivel handle with double bit half cylinder
Interior expansion	Prepared for installing distributor fields and CombiLine module system fields
Cable entries	Top and bottom
Standard ventilation	Ventilation in case of fire self-closing
Additional equipment	IP54, various decorative surfaces, reinforced back wall for free installation

Standards/regulations*

DIN EN 61439-2 (VDE 0660-600-2) (modules EDFmounting frame)	X
Protection class	IP41/IP44/IP54
Installation site/environment	Interior space
Ambient temperature, 24-hour average	+ 35°
Ambient temperature maximum value	+ 40 °
Ambient temperature minimum value	- 5°

Electrical characteristics

Rated impulse withstand voltage U_{imp}	III/6 kV
Pollution degree	3
Protection class	II
Rated surge current resistance I_{pk}	max. 17 kA
Rated short-time current I_{cw} 1.0 sec	max. 10 kA
Rated frequency	50-60 Hz
Rated insulating voltage U_i	690 V
Rated operating voltage AC U_e	400 V

Subdistribution boards

Fire protection housing – Standard features

Material/design
- Building material with surface – A2-s1, d0
- Fire resistance F30/F90
- Protection class depending on application, IP41, IP44 or IP54
- Smoke-tight
- Cold smoke-proof
- Wall thickness reduced to 72 mm

Locking using the swivel handle
The doors have swivel levers in stainless steel look, which are located centrally and can be locked with double bit half cylinders
