

Vijeo Design' Air Plus

Get a fully operable view of your application from wherever you are

Vijeo Design'Air Plus is Schneider Electric's new feature in Vijeo Designer and application for Android and iOS tablets and smartphones. Vijeo Design'Air Plus enables you to create a tablet/smartphone project specifically for the tablet/smartphone display size. At runtime, an operator can access the user application to display data and control automation processes on the tablet/smartphone.

You can use Vijeo Designer's drawing tools to create and edit a visual representation of the automation process. You can draw shapes and parts (such as rectangles, arcs, and pies), Toolchest parts (such as numeric displays, switches, and bar graphs), use the gradient feature to enhance the color of the drawn objects, and set up an Alarm Panel for remote alarm monitoring.

Vijeo Design'Air Plus provides operators with the capability to select a user application, and on successful login, download and launch the tablet/smartphone application. The operator can view and monitor an automation process, and for example, change values in numeric displays and string displays. In the Alarm Panel, the operator can monitor and acknowledge alarms.

HMI PROJECT DESIGN

Vijeo Design'Air Plus enables an HMI designer to create a tablet/smartphone project of the automation process using enhanced drawing tools.

REMOTE ACCESS AND CONTROL

Vijeo Design'Air Plus enables an operator to control automation processes, providing the ability to view and monitor data, change variable values, and monitor and acknowledge alarms.

ENHANCED DATA DISPLAY

Vijeo Design'Air Plus takes advantage of the advanced graphic and multi-touch capabilities of tablets and smartphones and applies it to the automation industry.

Download Vijeo Design'Air Plus from **Google Play** or **App Store** in iTunes.
