API INTEGRATION

To have all hotel services connected

Limitless integration
between hotel
applications.

API allows all third-party
services to share
information and work
together.

PROJECT DESIGN & REMOTE SUPPORT

Our design team works closely with your designers, architects and consultants to meet your specifications.

Our dedicated remote support team ensures your hotel is always working.

SUSTAINABILITY

Energy efficiency, CO2 footprint reduction and cutting running costs are the main focus of our solutions.

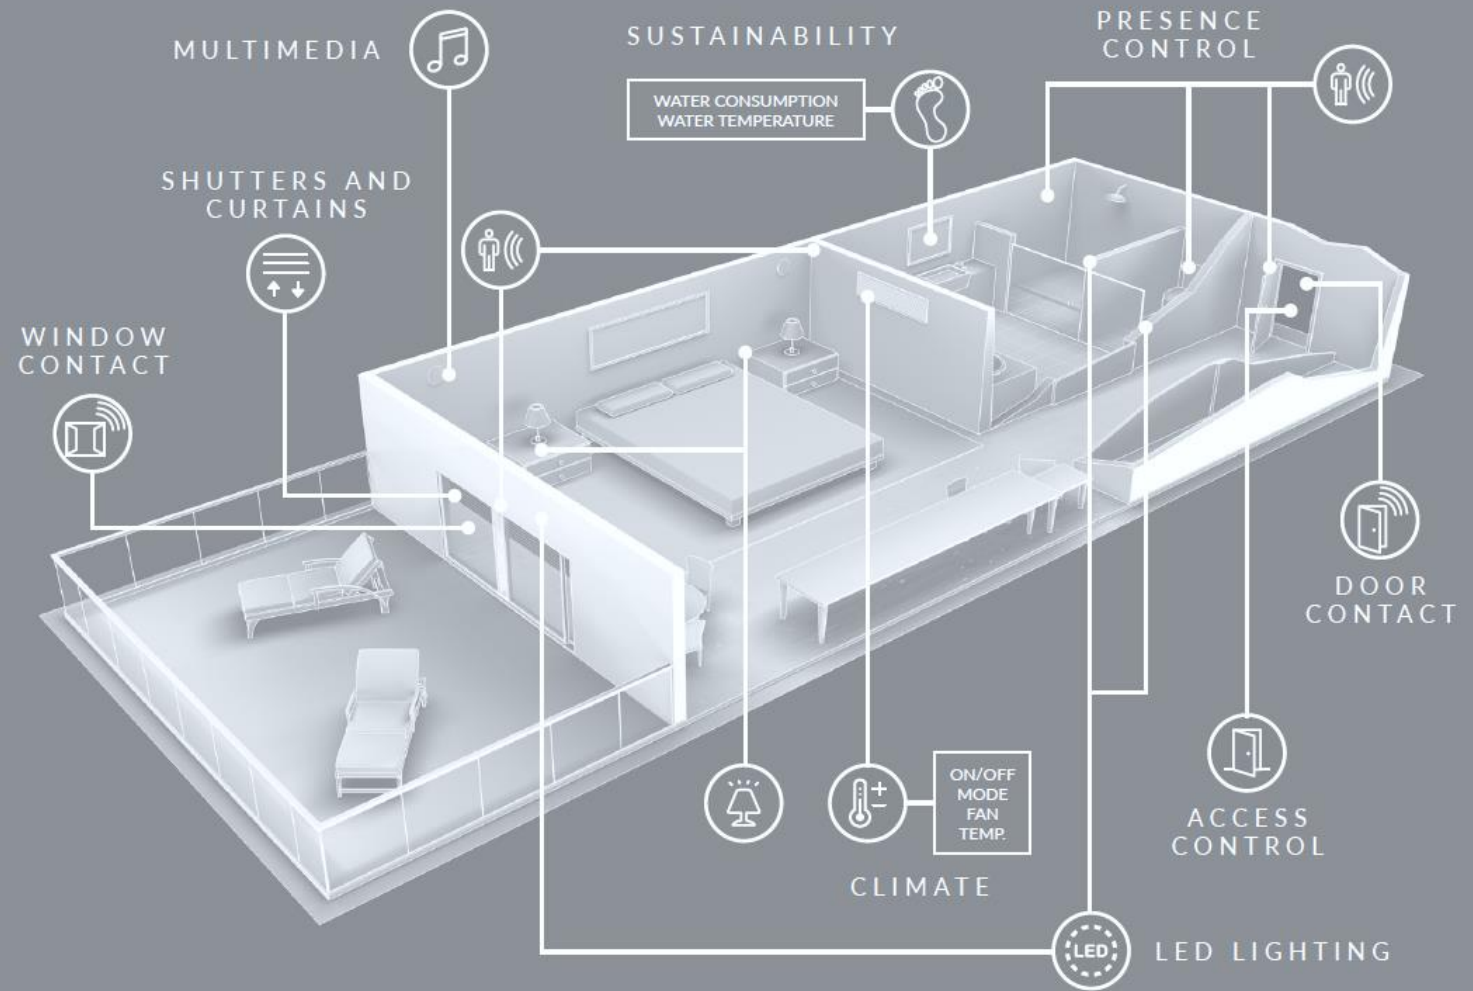

Preventive maintenance enables locating issues before it's too late therefore reducing material waste in the long term.

THE SOLUTION

Zennio's Hotel Solution merges the outstanding control properties of KNX with the scalability of IP networks and the opportunities of API integration.

All combined with the knowledge of a dedicated team that has been providing cutting edge solutions for over 15 years.

DESIGN

Fully customizable switches to meet every design

&

Flexibility to combine with your favourite finishes*

*Zennio solutions can be installed in combination with conventional switches

OUR COMMITMENT

We are committed to provide technological products and services to support the hospitality industry closely collaborating with our customers all over the world...

Lopesan Costa Bávaro (Punta Cana – DR), with over 1,100 rooms, includes a complete automation solution by Zennio
