

FP FIREFIX™

The fastest way to install FP Cable

...using  gas nailing technology

What is FP FIREFIX™?

FP FIREFIX™ is a fixing clip for Pirelli FP200 Gold and FP Plus fire resistant cable. It is an alternative to the traditional 'AP' clip used to secure fire resistant cable.

FP FIREFIX™ Kits

FP FIREFIX™ is offered in kit form. Each kit includes all the necessary parts to install 500 FP FIREFIX™ clips - apart from the Spit Pulsa Tool (sold separately). This tool uses gas nailing technology to secure the clip to a variety of substrates including: concrete, steel, composite steel decking, masonry and block work.

What is Spit Pulsa gas nailing Technology?

Pirelli developed FP FIREFIX™ in an exclusive partnership with the construction industry's leading tool and fixing manufacturer - Spit (part of the ITW Construction Company). Pirelli has designed special cable clips and adaptors to fit the Spit Pulsa 700E gas nailing tool. This tool can be used for most installations, is ideally suited to large volume installations and fixes each clip in approximately 10 seconds. ITW recommend that a 20 minute training programme is undertaken by Spit Pulsa tool users. This training is FREE and available nationwide.

Part Numbers:

Size suitable for FP200 Gold,
2 core x 1.5mm².

- Red Clip Kit - **UFPNF215R**
- White Clip Kit - **UFPNF215W**

Other colours are available subject to minimum order quantities.

Clips suitable for other cable sizes available shortly.

**Pirelli's new FP FIREFIX™ kit
(using Pulsa nailing technology)
consists of:**

- 500 FP FIREFIX™ Clips
- 500 Nails
- 1 Gas Cartridge
- 5 Spit Pulsa Tool Adaptors

Trade Price for FP FIREFIX™ Kit = £250

FP FIREFIX™

The fastest way to install FP Cable

...using  gas nailing technology

Features of FP FIREFIX™ Systems

- Clip tested to BS5839-1:2002
- Can hold one or two cables
- Simply clips shut, holding the cable securely
- Manufactured from non-rust stainless steel
- Available in red or white LSOH powder coating (Other colours available subject to minimum order quantities)
- Clip suitable for FP200 Gold, 2 core x 1.5mm² (other sizes following shortly)

Recommended Maximum Spacing of FP FIREFIX™ clips

Cable Diameter (mm)	Horizontal (mm)	Vertical (mm)
Not exceeding 15mm	300	400

Benefits to Contractors

- +
- Can be quickly fixed to a variety of substrates:
 - Pulsa tool can install on to steel, composite steel decking and most concrete, masonry and blockwork
- +
- Reduces installation times and costs - FP FIREFIX™ is up to 10 times quicker to install than conventional methods
- +
- FP FIREFIX™ can be installed prior to the cable installation - reducing the need to use an electrician at this stage
- +
- 10 year warranty offered on FP 200 Gold system, when installed with FP FIREFIX™ clips, on to recommended substrates
- +
- Does not require installer to hold the clip during installation - improving safety when working in difficult locations
- +
- Less noise during installation - enabling use during normal working hours, for refurbishment installations, in many cases
