

BACKBOXES WITHOUT KNOCKOUTS

Our knockout-free back boxes are ideal for schools, secure facilities, and other demanding environments where strength and reliability are essential.

Back boxes without knockouts provide a solid, unbroken structure that blocks dust, debris, and insects, protecting wiring and ensuring long-term reliability.

Solid back boxes let you drill openings exactly where needed, making cable routing and conduit attachment more precise and adaptable to any installation.

- ✦ **Built for safety**
