

# This is a wake-up call!

You can rest assured that quality pays off.

At Prysmian we prefer to see problems as possibilities. And looking at the last week's quality issues with dodgy Infinity Cables we see huge possibilities! We have always worked with quality as our top priority, listened to our customers' needs and tried to solve their everyday struggles through relevant service deals. 'Cause we have and will always continue to believe that quality pays off.

Australian made? Yes, of course!
