ALRE CLIMATE CONTROLLERS. FOR **A PERFECT INDOOR CLIMATE.**

Enjoy a perfect indoor climate and the highest degree of comfort! Whether it is about protecting investments, equipment and valuables or feeling comfortable indoors, our climate controllers keep humidity and temperature in perfect balance. Adjustable daily programs with display controllers ensure sustainable and energy efficient heating - a topic, in light of global climate issues, that is more relevant than ever.

alre climate controller: comfortable indoor climate any time of the year.

APPLICATION **EXAMPLES:**

- + Cooling ceilings
- + Fan coils
- + Hot water underfloor heating
- + Air distribution systems
- + Partial air conditioners
- + Heat pumps
- + AC split units
- + Dew point monitoring
- + Relative humidity control
- + Accessories such as terminal strips and actuators

ELECTRONIC CLIMATE CONTROLLER WITH TRIAC OUTPUT (NOISELESS)

SURFACE-MOUNTED 'SUPER-SLIM' INSTALLATION – DESIGN BERLIN 1000

TECHNICAL DATA

Design:	Berlin 1000
Surface finish:	glossy
Housing colour:	pure white, like RAL 9010
Housing material:	ABS plastic
Ambient temperature:	0 ... 40 °C
Storage temperature:	-20 ... +70 °C
Permissible atmospheric humidity:	max. 95% rel. humidity, non-condensing
Electrical connection:	screw-type terminals 0.5 mm ² to 1.5 mm ²
Mounting / attachment:	surface / wall mounting (4-hole assembly on flush-mounted socket)
Protection rating:	IP 30
Safety and EMC:	according to DIN EN 60730
Max. power consumption:	< 0.8 W
Switching power:	15 W
Switching element:	triac
Switching contact:	NC contact
Sensor:	NTC, internal
Control function:	Heating or cooling
Control range:	5 ... 30 °C
Hysteresis:	0 K since control is practically continuous
Proportional range:	approx. 1 K
General features:	ECO function; 'heating / cooling' display; 'off with frost protection monitoring' operating mode; mechanical range restriction; scale: degrees Celsius; external setting

APPLICATION

This controller was specifically designed for heating / cooling regulation of 2-pipe systems used in hotels, homes and offices and can control up to 5 valve actuators (normally closed).

The KTRTB's internal sensor measures the room temperature and activates heating or cooling depending on the deviation from the configured setpoint temperature. As the switching element used is a triac rather than a relay or bimetal, the system operates without bothersome switching sounds.

ECO function: if this function is selected, the temperature is adjusted down by 3 K in heating mode and up by 3 K in cooling mode.

TYPE/IMAGE	ITEM NO.	FEATURES	CIRCUIT DIAGRAM	EURO/PG
	MA700300	Operating voltage: 230 VAC, 50 Hz Protection class: II, if properly mounted Max. switching current: 65 mA Max. switching voltage: 230 VAC, 50 Hz Min. switching voltage: 230 VAC, 50 Hz Output signal: switching PWM (230 VAC, 50 Hz) ECO contact: 230 VAC, 50 Hz, optionally configurable as ECO or OFF function		
	MA700400	Operating voltage: 24 VAC, 50 Hz Protection class: III, protective low voltage Max. switching current: 625 mA Max. switching voltage: 24 VAC, 50 Hz Min. switching voltage: 24 VAC, 50 Hz Output signal: switching PWM (24 VAC, 50 Hz) ECO contact: optionally configurable as ECO or OFF function

SURFACE-MOUNTED INSTALLATION – BERLIN 3000

TECHNICAL DATA

Design:	Berlin 3000
Surface finish:	mat
Housing colour:	pure white, like RAL 9010
Housing material:	ABS plastic
Operating voltage:	230 VAC, 50 Hz
Ambient temperature:	0 ... 30 °C
Storage temperature:	–20 ... +70 °C
Permissible atmospheric humidity:	max. 95% rel. humidity, non-condensing
Electrical connection:	screw-type terminals
Mounting/attachment:	surface/wall mounting or by means of an adapter plate on a flush-mounted socket
Protection rating:	IP 30
Protection class:	II, if properly mounted
Safety and EMC:	according to DIN EN 60730
Max. switching current:	6 (3) A
Max. switching voltage:	230 VAC, 50 Hz
Min. switching voltage:	230 VAC, 50 Hz
Switching power:	1380 W
Switching element:	bimetallic contact
Switching contact:	changeover
Output signal:	switching (230 VAC, 50 Hz)
Sensor:	bimetal
Control function:	Heating or cooling
Control range:	5 ... 30 °C
General features:	mechanical range restriction; thermal feedback; scale: degrees Celsius; on / off switch; external setting

APPLICATION

Control and monitoring of temperatures in closed, dry spaces. Remote control of air conditioners, climate chests, fan coil systems in living and office spaces and doctors' practices. Individual room optimisation in central air conditioning systems (hotels, hospitals etc.).

Suitable for all heating systems. (Please note the maximum switching current.)

TYPE/IMAGE	ITEM NO.	FEATURES	CIRCUIT DIAGRAM	EURO/PG
KTBSB-112.000 	MA200100	General features: 3-stage fan output; 3-stage fan switch; Switch 'On / Off' Hysteresis: approx. 0.5 K at a temperature change of max. 4 K/h

SURFACE-MOUNTED INSTALLATION – BERLIN 3000

TECHNICAL DATA

Design:	Berlin 3000
Surface finish:	matt
Housing colour:	pure white, like RAL 9010
Housing material:	ABS plastic
Operating voltage:	230 VAC, 50 Hz
Ambient temperature:	0 ... 40 °C
Storage temperature:	–20 ... +70 °C
Permissible atmospheric humidity:	max. 95% rel. humidity, non-condensing
Electrical connection:	screw-type terminals
Mounting/attachment:	surface/wall mounting or by means of an adapter plate on a flush-mounted socket
Protection rating:	IP 30
Protection class:	II, if properly mounted
Safety and EMC:	according to DIN EN 60730
Max. switching voltage:	230 VAC, 50 Hz
Min. switching voltage:	230 VAC, 50 Hz
Switching element:	relay
Switching contact:	NO contact
Output signal:	switching (230 VAC, 50 Hz)
Sensor:	internal NTC, optional external NTC 'Sensor 2'
ECO contact*:	reduction by 3 K; alternatively, this input can be configured as a frost protection contact
Control function:	heating and/or cooling
Control range:	5 ... 30 °C
Neutral zone:	approx. 2 K
General features:	operating mode 'off with frost protection monitoring'; mechanical range restriction; scale: degrees Celsius; external setting

APPLICATION

Single-room temperature controller with neutral zone for 2-pipe or 4-pipe air conditioners.

External flow sensor (H/C sensor):
For automatically switching the controller to heating or cooling mode in 2-pipe operation depending on the inflow temperature; alternatively, this input can be used as an H/C changeover contact.

Sensor rupture and short-circuit protection:
in case of a sensor rupture or sensor short-circuit, the heating is activated with a power-on time of 30% to prevent cooling or frost damage in the room.

TYPE/IMAGE	ITEM NO.	FEATURES	EURO/PG
KTRRB-117.128 	MA601300	General features: single-room climate controller, 3-stage fan output, fan operation in neutral zone ON/OFF selectable; on/off switch; 3-stage fan switch Max. switching current: heating 5 (1) A, cooling 5 (1) A, fan 3 (1) A Switching power: heating 1150 W, cooling 1150 W, fan 230 W Hysteresis: approx. 1 K	
KTRRB-117.163 	MA601400	like KTRRB-117.128 but without 3-stage fan output and 3-stage fan switch	
KTRRB-117.169 	MA601500	General features: single-room climate controller; 'off / manual fan / automatic fan' switch; 'ventilator 3-stage 0–10 V' switch; 'parametrisation 3-stage fan output' button; 'heating, cooling, frost protection, sensor rupture or short circuiting of the external sensor' display; 3-stage fan output 0–10 V with adjustment to individual fan stages or dynamic 0–10 V to activate EC fans; ON/OFF: ventilator operation in neutral zone selectable Max. switching current: heating 5 (1) A, cooling 5 (1) A Switching power: heating 1150 W, cooling 1150 W Output signal: Analogue 0–10 V (5 mA) for activating an rpm-controlled fan Hysteresis: approx. 0.5 K	

Accessories: Adaptor plate for mounting on flush-mounted socket JZ-17, terminal strips V00xx (see catalog), suitable valve actuators ZB00A-010.1xx (see catalog, suitable external sensors ('sensor 2'; see 'Sensor technology')

You can find other / similar controllers with outputs for heating / cooling in the 'Heating technology' section (RTBSB/RTBSU).

*With ECO operation, the neutral zone (2 K) is extended by the ECO zone (+/– 3 K). ECO operation is a savings mode that should be controlled, for example, via a window contact and/or a timer.

SURFACE-MOUNTED INSTALLATION – DESIGN BERLIN 2000 – WITH INTERNAL AND EXTERNAL (OPTIONAL) TEMPERATURE SENSOR

TECHNICAL DATA

Design:	Berlin 2000
Surface finish:	matt
Housing colour:	pure white, like RAL 9010
Housing material:	ABS plastic
Ambient temperature:	0 ... 40 °C
Operating voltage:	24 VAC / 50 Hz, 24 VDC
Storage temperature:	–20 ... +70 °C
Permissible atmospheric humidity:	max. 95% rel. humidity, non-condensing
Electrical connection:	screw-type terminals
Mounting / attachment:	surface / wall mounting
Protection rating:	IP 30
Protection class:	III
Safety and EMC:	according to DIN EN 60730
Max. switching current:	1 A
Max. switching voltage:	24 VAC / 50 Hz, 24 VDC
Min. switching voltage:	24 VAC / 50 Hz, 24 VDC
Switching power:	24 W
Switching element:	relay
Switching contact:	NO contact
Output signal:	Switching, 24 VAC / 50 Hz, 24 VDC
Sensor:	NTC internal, optional external, 'Sensor 2'
Hysteresis:	approx. 1 K
General features:	External dew point sensor connection; mechanical range limitation; external setting

APPLICATION

Temperature controller for cooling ceilings / walls and all kinds of hot water heaters in 2- and 4-pipe systems for hotel, home and office spaces. As the KTRRB features dew point monitoring, it is highly suited for controlling ceiling cooling systems.

The unit can control up to 5 valve actuators (24 V~ normally closed) per output. The types KTRRB-052.24x can be adapted to normally open actuators (24 V~, max. 5 pieces) with a jumper.

When using 0 – 10 V actuators: KTRVB-052.24x.

TYPE/IMAGE	ITEM NO.	FEATURES	CIRCUIT DIAGRAM	EURO/PG
KTRRB-052.245 	DA420700	General features: ECO function; 'heating/cooling/cooling interruption due to condensation/off' display; 'sensor break, sensor short-circuit, frost protection' display; operating mode 'off with frost protection monitoring'; relative scale; off/comfort/ECO switch External flow sensor (H/C sensor): for automatic switching of the controller to heating or cooling mode depending on the inflow temperature ('Sensor 2'); alternatively, this input can be used as an H/C changeover contact ECO Contact: upon closing the contact, the ECO function is actuated Forced switch-off contact: external switch-off function with frost protection function Control function: heating and/or cooling, cooling interruption upon condensation of the dew point sensor, frost protection function in the switched-off condition Control range: 13 ... 29 °C Setting range: -8 ... +8 °C Neutral zone: approx. 2 K Pipe system compatibility: 2-pipe and 4-pipe Replacement for KTRRB-040.213		

* An internal trimming potentiometer can be used to select whether control should be based on the internal (left stop) or external sensor (right stop). In the intermediate positions, if both sensors are used, a weighting is applied to the internal room sensor and the external radiation sensor. The weighting allows for compensation of different structural conditions such as large window areas or cardinal directions. For very slow controlled systems, it is recommended to assign a higher weighting to the radiation sensor than to the internal room sensor.

Accessories: suitable valve actuators ZBOOA-040.100, suitable external sensors ('Sensor 2'); see 'Sensor Technology'.

ACCESSORIES	ITEM NO.	FEATURES	EURO/PG
TPS 1 	G8000299	Mounting/attachment: using clips on cooling ceiling capillary pipe Use: drywall cooling ceiling (plasterboard) with hung up capillary pipe mat, metal ceiling cooling ceiling with integrated capillary pipe system Sensor line extendable up to: 50 m with 2x0.5 mm² Scope of delivery: sensor, 2 clips for cooling pad	
TPS 2 	G8000300	Mounting/attachment: using clips on cooling ceiling capillary pipe or cable ties on the pipe Use: pipe systems transporting cold water, plaster cooling ceiling with capillary tube system Sensor line extendable up to: 50 m with 2x0.5 mm² Scope of delivery: sensor, 2 clips for cooling pad, 2 cable ties

KTRRB-052.24x connection in a 4-pipe system

Important note:

The inflow channels of TPS-1 and TPS-2 are closed at the factory to avoid dirtying during assembly. After assembly, they must be shortened with a knife until they are flush with the wall or ceiling to ensure air circulation. The air ducts should be arranged such that soiling during operation is avoided. It is important that the air surrounding the sensor has the same temperature as the room air to be cooled. If the humidity and temperature of the air to be cooled (ceiling cooling system) is different from that of the air surrounding the sensor, condensation may be detected prematurely or too late. As regards TPS-3, contact with the PCB paths must be avoided to prevent long-term corrosion.

Attention in case of sensor extension:

laying parallel to conductors carrying a mains voltage can result in faults. The use of shielded conductors reduces sensitivity to electromagnetic fields.

Parallel wiring for heating/cooling changeover and/or ECO for several controllers (max. 20 controllers)

Average power consumption:	approx. 0.6 W (1 VA)
Max. switching current:	1 A
Max. switching voltage:	24 VAC / 50 Hz, 24 VDC
Min. switching voltage:	24 VAC / 50 Hz, 24 VDC
Switching power:	24 W
Switching element:	relay
Switching contact:	NO contact
Output signal:	switching, 24 VAC / 50 Hz, 24 VDC
Sensor:	NTC internal, optional external 'Sensor 2'
ECO contact:	when the contact is closed, the ECO function is actuated (+/- 3 K)
Control function:	heating and/or cooling, cooling interruption upon condensation of the dew point sensor, frost protection function in the switched-off condition
Control range:	13 ... 29 °C
Setting range:	–8 ... +8 °C
Hysteresis:	approx. 1 K
Neutral zone:	approx. 2 K
General features:	single-room climate controller; optional external dew point sensor; ECO function; 'heating / cooling / cooling interruption due to condensation / off' display; mechanical range restriction; relative scale; external setting
Pipe system compatibility:	2-pipe and 4-pipe

APPLICATION

For heating / cooling control of 2- and 4-pipe systems used in hotels, homes and offices.

The unit can control up to 5 valve actuators (24 V~ normally closed) per output. The controllers are configured for 2-pipe or 4-pipe operation by means of a jumper. In 2-pipe operation, the controller is operated with a common heating / cooling output, whose mode of operation action can be toggled by means of an external contact (changeover contact). Connection of TPS dew point sensors is possible (max. 5 of them in parallel). Condensate formation at the TPS can result in the cooling valve getting closed.

It is possible to actuate the energy saving (ECO) function via an external contact.

In the 'off' switch position, the room frost protection function is activated (when the temperature drops below 5 °C, all valves are forced open).

External flow sensor (H/C sensor): for automatic switching of the controller to heating or cooling mode depending on the inflow temperature ('Sensor 2'); alternatively, this input can be used as an H/C changeover contact.

TYPE/IMAGE	ITEM NO.	FEATURES	EURO/PG
KTRRU-052.245#00 	UA210401	General features: 'off with frost protection monitoring' operating mode; 'off / comfort / ECO' switch Surface finish: depending on the cover set selected Housing colour: depending on the cover set selected Mounting / attachment: in flush-mounted socket – adaptable with 50x50 mm or 55x55 mm cover set in almost all surface switch ranges (deep flush-mounted socket recommended) Accessories: cover sets are offered in several design variants (see 'Overview', and are not included in the scope of delivery. Suitable set no.: JZ-007.xxx, e.g.: cover set 50x50 mm, pure white, glossy: JZ-007.000 cover set 55x55 mm, pure white, glossy: JZ-007.100 Scope of delivery: controller, protective cap If the functions of the 'off / comfort / eco' switch are not required, JZ-008.xxx cover sets can be used instead (in switch position comfort).	

* An internal trimming potentiometer can be used to select whether control should be based on the internal (left stop) or external sensor (right stop). In the intermediate positions, if both sensors are used, a weighting is applied to the internal room sensor and the external radiation sensor. The weighting allows for compensation of different structural conditions such as large window areas or cardinal directions. For very slow controlled systems, it is recommended to assign a higher weighting to the radiation sensor than to the internal room sensor.

Accessories: suitable valve actuators ZB00A-040.100, dew point sensor TPS 1 / TPS 2 / TPS 3, suitable external sensors ('Sensor 2'); see 'Sensor Technology'.

*) During assembly, you need to remove 4 plastic tabs located at the rear of the frame

NOTE: Most switch ranges are designed in a colour similar to RAL 1013, 9016 or 1013, although different switch manufacturers use different designations for this colour. Coloured, glass and aluminium frames are also combined with white jacks or plugs so that controllers with white covers can also be integrated into these frames. Check the precise application in each individual case. The frames have different surface qualities (matt/glossy). For design reasons, the cover of the controller should have the same quality as the frame. We accept no liability for slight variations in colour and surface finish or for accuracy of fit. When installing devices into multi frames, always assemble the temperature controllers at the lowermost position.

'50x50 controller': The housing covers of the 50x50 controllers are 50x50 mm in size. Using a 50x50-mm insert frame, they can be integrated into nearly all light switch ranges in accordance with DIN 49075. The 50x50 mm insert frames must be ordered from the light switch manufacturer or from a wholesaler. The order number of the insert frame corresponding to the switch range in question can be found in the column 'Only for adaptation with '50x50' cover set'.

'55x55 controller': The housing covers of the 55x55 controllers are 55x55 mm in size. Many light switch ranges have inner dimensions of 55x55 mm. Therefore, the 55x55 controllers can be installed directly in the light switch frame without the use of an insert frame. See the column 'Adaptation with 55x55 cover set' to determine whether the 55x55 controller fits in the given light switch model (x).

All information regarding switch manufacturers' product lines and item numbers was last updated in 12 / 2022 | No liability is assumed for the information provided. | Technical specifications subject to change.

ELECTRONIC CLIMATE CONTROLLER WITH TIMER KTRRUU – 230 VAC

FLUSH-MOUNTED INSTALLATION – DESIGN BERLIN UP

TECHNICAL DATA

Design:	Berlin UP
Housing material:	PC, PMMA, ABS plastic
Ambient temperature:	0 ... 40 °C
Storage temperature:	–20 ... +70 °C
Permissible atmospheric humidity:	max. 95% rel. humidity, non-condensing
Protection rating:	IP 30
Safety and EMC:	according to DIN EN 60730
Max. power consumption:	approx. 1 W (2.2 VA)
Max. switching current:	3 (0.5) A each
Switching element:	2 relays
Switching contact:	2 NO contacts
Output signal:	Switching, analogue 0 ... 10 V max. 5 mA for activating an rpm-controlled fan
Sensor:	NTC internal, optional external 'Sensor 2'
External flow sensor (H/C sensor):	For automatic switching of the controller to heating or cooling mode depending on the inflow temperature ('Sensor 2'); alternatively, this input can be used as an H/C changeover contact
ECO contact:	upon closing the contact, the ECO function is actuated
Control range:	5 ... 40 °C
Setting range:	standard setting range for heating (5 ... 30 °C), second setting range for cooling (18 ... 40 °C)
Hysteresis:	approx. 1 K
Neutral zone:	adjustable
Display type:	illuminated graphical display
Pipe system compatibility:	2-pipe and 4-pipe

APPLICATION

Flush-mounted controller with timer function for heating/cooling regulation of 2- and 4-pipe systems used in hotels, homes and offices. The adaptation takes place in a menu.

The unit can control up to 5 valve actuators (normally open or normally closed) per output. In 2-pipe operation, the operating mode can be changed via an external contact (changeover) or a temperature sensor. The clock can serve as a master for other controllers for switching to ECO mode.

It is possible to activate the energy saving (ECO) or frost protection (OFF) functions via an external contact. Alternatively, the controller's inputs can be configured to connect with an external temperature sensor or dew point sensor (TPS).

A 0–10 V interface can be used to control the speed of a fan (**EC fan**).

General:
digital surface switch single-room climate controller with timer; optional external dew point sensor; ECO function, ECO value adjustable; 'ECO' display; 'on/off' display; 'heating' display; 'cooling' display; 'cooling interruption due to condensation'; digital actual value display; backlighting; operating mode 'off with frost protection monitoring'; child-safe features; facilities; power-reserve (3 days); actual value correction / measured value correction; learning function; emergency operating mode; holiday setting; party setting; automatic adjustment to summer / winter time; external setting; comfortable operation using touch-sensitive buttons with dynamic button assignment.

Depending on the project, special colors such as anthracite and aluminium are available on request.

TYPE/IMAGE	ITEM NO.	FEATURES	CIRCUIT DIAGRAM	EURO/PG
KTRRUu 217.456#21 (230 VAC) 	UA220000	Surface finish: glossy Housing colour: pure white, like RAL 9010 Operating voltage: 230 VAC, 50 Hz Electrical connection: pluggable screw-type terminals, voltage supply side 0.75–2.5 mm², low-voltage side 0.08–1.5 mm² Mounting / attachment: in flush-mounted socket – adaptable with 50x50 mm cover in almost all surface switch ranges (deep flush-mounted socket recommended) Protection class: II Max. switching voltage: 230 VAC, 50 Hz Min. switching voltage: 230 VAC, 50 Hz Switching power: 690 W Output signal: switching heating, cooling, heating / cooling, ECO, OFF, 230 VAC, 50 Hz; analogue 0 ... 10 V (5 mA) for activating an rpm-controlled fan Scope of delivery: controller, cover 50x50 mm, pure white (like RAL 9010), glossy, alre frame 'Berlin'		

* A menu setting can be used to select whether control should be based on the internal or external sensor. In the intermediate positions, if both sensors are used, a weighting is applied to the internal room sensor and the external radiation sensor. The weighting allows for compensation of different structural conditions such as large window areas or cardinal directions. For very slow controlled systems, it is recommended to assign a higher weighting to the radiation sensor than to the internal room sensor.

additional benefits:

- Pluggable screw-type terminals facilitate quick and easy assembly
- Illuminated, graphics-capable display
- Automatic adjustment to standard / daylight savings time
- Learn function
- Correction of measurement values
- Configurable display content
- Choice of various languages during installation: German, English, French, Dutch, Polish, Spanish, Czech, Russian
- Configurable inputs and outputs, for example:
 - OFF circuit with frost protection
 - ECO input
 - Dew point sensor input
 - Output: heating / cooling / timer master
- Fan control 0 – 10 V
- Key lock
- Valve protection function
- Configurable control method (PI-PWM or 2-point control)
- Holiday and party function
- Power reserve
- 'Heating operation' indication (LED orange)
- 'Cooling operation' indication (LED blue)

*) During assembly, you need to remove 4 plastic tabs located at the rear of the frame.

NOTE: Most light switches are designed in the colour 'like RAL 9010', although different switch manufacturers use different designations for this colour. Coloured, glass and aluminium frames are also combined with white jacks or plugs so that controllers with white covers can also be integrated into these frames. Check the precise application in each individual case. The frames have different surface qualities (matt/glossy). For design reasons, the cover of the controller should have the same quality as the frame. We accept no liability for slight variations in colour and surface finish or for accuracy of fit. When installing devices into multi frames, always assemble the temperature controllers at the lowermost position.

'50x50 controller': The housing covers of the 50x50 controllers are 50x50 mm in size. Using a 50x50 mm insert frame, they can be integrated into nearly all light switch ranges in accordance with DIN 49075. The 50x50 mm insert frames must be ordered from the light switch manufacturer or from a wholesaler. The order number of the insert frame corresponding to the switch range in question can be found in the column 'For adaptation of KTRRUu into size '50x50'.

'55x55 controller': The housing covers of the 55x55 controllers are 55x55 mm in size. Many light switch ranges have inner dimensions of 55x55 mm. Therefore, the 55x55 controllers can be installed directly in the light switch frame without the use of an insert frame. See the column 'Adaptation in switch range (55x55)' to determine whether the 55x55 controller fits in the given light switch range (KTRRUu 2x7.456#xx).

All information regarding switch manufacturers' product lines and item numbers was last updated in 12/2022 | No liability is assumed for the information provided. | Technical specifications subject to change.

CONTINUOUS ELECTRONIC CLIMATE CONTROLLER, KTRVB

SURFACE-MOUNTED INSTALLATION – DESIGN BERLIN 2000

TECHNICAL DATA

Design:	Berlin 2000
Surface finish:	matt
Housing colour:	pure white, like RAL 9010
Housing material:	ABS plastic
Storage temperature:	-20 ... +70 °C
Operating voltage:	24 VDC, 24 VAC, 50 Hz
Permissible atmospheric humidity:	max. 95% rel. humidity, non-condensing
Electrical connection:	screw-type terminals
Mounting / attachment:	surface / wall mounting
Protection rating:	IP 30
Protection class:	III
Safety and EMC:	according to DIN EN 60730
Switching element:	electronic with analogue output signal
General features:	climate controller for individual room control with proportionally controlled valve; mechanical range restriction; external setting

APPLICATION

Room temperature controller for continuous control of valve actuators. Controller for 2-pipe systems (1-duct), 4-pipe systems (2-duct) and mixing chambers.

TYPE/IMAGE	ITEM NO.	FEATURES	CIRCUIT DIAGRAM	EURO/PG
KTRVB-048.100 	DA450000	General features: scale: degrees Celsius Ambient temperature: 0 ... 50 °C Output signal: consistently 0 to 10 V or 10 to 0 V (can be switched using a jumper), max. 5 mA Sensor: NTC internal Control function: Heating or cooling with adjustable p-band, aligned to 5 V at setpoint temperature Control range: 5 ... 30 °C Hysteresis: 0 K, since control is always via the p-band in the range from +0.5 K ... 3 K (adjustable) Pipe system compatibility: 2-pipe		
KTRVB-048.200 	DA450100	General features: relative scale Ambient temperature: 0 ... 50 °C Output signal: consistently 0 ... 10 V or +10 ... 0 V (can be switched using a jumper), max. 5 mA Sensor: NTC internal Control function: Heating or cooling with adjustable p-band, aligned to 5 V at setpoint temperature Control range: 13 ... 29 °C Setting range: -3 ... +3 K (the pre-set 'zero point' of approx. 21 °C can be adjusted in the machine by +/- 5 K) Hysteresis: 0 K, since control is always via the p-band in the range from +0.5 K ... 3 K (adjustable) Pipe system compatibility: 2-pipe		

CONTINUOUS ELECTRONIC CLIMATE CONTROLLER, KTRVB

SURFACE-MOUNTED INSTALLATION – DESIGN BERLIN 2000

TYPE/IMAGE	ITEM NO.	FEATURES	CIRCUIT DIAGRAM	EURO/PG
	DA451500	General features: external dew point sensor; ECO function; 'heating /cooling /cooling interruption due to condensation /off' display; 'sensor rupture /sensor short-circuit /frost protection' display; operating mode 'off with frost protection monitoring'; relative scale Ambient temperature: 0 ... 40 °C Output signal: consistently 0 ... 10 V or 10 ... 0 V (can be switched using a jumper), max. 5 mA Sensor: NTC internal, optional external 'Sensor 2' (see 'Sensors')* External flow sensor (H / C sensor): for automatic switching of the controller to heating or cooling mode depending on the inflow temperature; alternatively, this input can be used as a 'Sensor 2' H / C changeover contact ECO contact: upon closing the contact, the ECO function is actuated (in heating mode, the temperature is adjusted down by 3 K and in cooling mode it is adjusted up by 3 K) Forced switch-off contact: external switch-off function with frost protection monitoring Control function: heating and /or cooling with p-band 1 K, cooling interruption upon condensation of the dew point sensor, frost protection function in 'off' state Control range: 13 ... 29 °C Setting range: 21 °C ± 8 K Hysteresis: 0 K, since control is always via the p-band in the range from 1 K Neutral zone: approx. 2 K Pipe system compatibility: 2-pipe and 4-pipe		

KTRVB-052.245 DA451600 Like KTRVB-052.244 but with 'off /comfort /ECO' switch

* An internal trimming potentiometer can be used to select whether control should be based on the internal (left stop) or external sensor (right stop). In the intermediate positions, if both sensors are used, a weighting is applied to the internal room sensor and the external radiation sensor. The weighting allows for compensation of different structural conditions such as large window areas or cardinal directions. For very slow controlled systems, it is recommended to assign a higher weighting to the radiation sensor than to the internal room sensor.

DEW POINT SENSOR, TPS

TECHNICAL DATA

Storage temperature:	−20 ... +70 °C
Sensor wire extendible up to:	50 m with 2x0.5 mm ²
Connecting cable:	10 m
Accessories:	For use with dew point sensors (e.g. WFRN) or climate controllers with dew point monitoring (KTRRB, KTRRU, KTRRUu, KTRVB, KTFRL, KTFRD)

APPLICATION

These dew point sensors were developed in conjunction with alre dew point monitors and cooling ceiling controllers for the specific purpose of detecting and signalling the dew point. In this way, they prevent dripping condensation water from reaching the cooling circuit parts, if installed correctly.

TYPE/IMAGE	ITEM NO.	FEATURES	EURO/PG
TPS 1 	G8000299	Mounting / attachment: using clips on cooling ceiling capillary pipe Use: Drywall cooling ceiling (plasterboard) with hung up capillary pipe mat, metal cooling ceiling with integrated capillary pipe system Sensor wire extendible up to: 50 m with 2x0.5 mm ² Scope of delivery: sensor, 2 clips for cooling pad	
TPS 2 	G8000300	Mounting / attachment: using clips on cooling ceiling capillary pipe or cable ties on the pipe Use: Pipe systems transporting cold water, plaster cooling ceiling with capillary tube system Sensor wire extendible up to: 50 m with 2x0.5 mm ² Scope of delivery: sensor, 2 clips for cooling pad, 2 cable ties

ILLUSTRATIONS

TPS 3

Important note:

The inflow channels of TPS-1 and TPS-2 are closed at the factory to avoid dirtying during assembly. After assembly, they must be shortened with a knife until they are flush with the wall or ceiling to ensure air circulation. The air ducts should be arranged such that soiling during operation is avoided. It is important that the air surrounding the sensor has the same temperature as the room air to be cooled. If the humidity and temperature of the air to be cooled (ceiling cooling system) is different from that of the air surrounding the sensor, condensation may be detected prematurely or too late. As regards TPS-3, contact with the PCB paths must be avoided to prevent long-term corrosion.

Attention in case of sensor extension: Parallel laying to conductors carrying a mains voltage can result in faults. The use of shielded conductors reduces sensitivity to electromagnetic fields.

Mode of operation – dew point sensor:

if the surface temperature of the dew point sensor is equivalent to the dew point, a microscopic film of moisture forms on its surface. This film changes the resistance value of the dew point sensor to such an extent that the connected controller or monitor detects this change and disables the cooling. In this manner, dripping condensate water at maximum cooling, and hence moisture damage to the building, are avoided. When the dew point sensor dries off again, the resistance value increases and cooling is re-enabled. To ensure that a pending undershooting of the dew point is detected in time, the dew point sensor should be assembled at the point where the dew point is most likely to be reached first along the cooling circuit. Generally, these locations are at the inlet coming into the room and/or near windows. If the place where the dew point is most likely to occur cannot be unambiguously determined, it is possible to connect up to 5 dew point sensors in parallel to one controller or monitor.

MECHANICAL ROOM HYGROSTATS / HYGRO-THERMOSTATS, RFSB, FHY, RKKDSB

SURFACE-MOUNTED INSTALLATION – DESIGN BERLIN 2000 / 3000 / UP

TECHNICAL DATA

Storage temperature:	–20 ... +60 °C (RFSB-060.xxx –20 ... +70 °C)
Permissible atmospheric humidity:	max. 95% rel. humidity, non-condensing
Electrical connection:	screw-type terminals
Protection rating:	IP 30
Protection class:	II, if properly mounted
Safety and EMC:	according to DIN EN 60730
Min. switching current:	100 mA
Max. switching voltage:	230 VAC, 50 Hz
Min. switching voltage:	24 VAC, 50 Hz
General features:	mechanical range restriction
Other / similar items:	For duct and control cabinet hygrostats, see 'Plant Engineering' chapter

APPLICATION

Hygrostat: The room hygrostat is used to monitor and control the relative humidity, e.g., in offices, homes, winter gardens, baths, swimming pools and data centres. The action of the relative humidity on a measuring tape is made to actuate a potential-free changeover contact. The desired value is set by means of the adjusting knob on the front panel. The setting range can be limited.

Hygro-thermostat: Monitoring and control of the relative humidity and the temperature in one device.

Note: Observe the wet room distance according to DIN VDE 0100-701!

TERMINAL STRIP FOR HEATING / COOLING MANIFOLD VOORL

FOR 5 OR 8 ROOM THERMOSTATS

TECHNICAL DATA

Surface finish:	matt
Housing colour:	light grey, like RAL 7035
Housing material:	ABS plastic
Operating voltage:	230 V~
Ambient temperature:	-10 ... +50 °C
Storage temperature:	-20 ... +70 °C
Permissible atmospheric humidity:	max. 95%, non-condensing
Electrical connection:	screw-type terminals 0.2 mm ² – 1.5 mm ²
Connectable pump power:	max. 180 VA
Device fuse:	T3,15/250 V, Ø 5x20 mm
Mounting / attachment:	surface mounting / wall mounting on a wall using screws or magnetic bases on a magnetic substrate
Protection rating:	IP 20
Protection class:	II, if properly mounted
Max. number of valve actuators:	Number of ducts x4 for each Duct 2, Duct 1 and 2 as well as 5 and 6 combinable Assignment of ducts to rooms as desired

APPLICATION

This device is specifically designed for fixed wiring of 230 VAC single-room temperature controllers and the associated valve actuators for fixed-location attachment. Switching between heating / cooling is performed via a central contact.

Heating controllers with changeover contact (e.g. RTBSB-201.010) can be connected as controllers. A master-slave time zone can be formed by using a clock controller. The time zone can also be switched to ECO function via an external switching contact at terminal U.

The VOORx-318.053 and VOORx-215.053 units have an integrated pump function.

TYPE/IMAGE	ITEM NO.	FEATURES	EURO/PG

Storage temperature:	-25 ... +60 °C
Permissible atmospheric humidity:	Max. 95% rel. humidity, non-condensing
Mounting/attachment:	M 30x1.5
Protection rating:	IP54
Protection class:	II
Safety and EMC:	according to DIN EN 60730
Average power consumption:	approx. 1.7 W
Opening/closing time:	approx. 3 min
Nominal stroke:	3.5 mm
Function type:	normally closed
Nominal closing force:	110 N
Connecting cable:	1 m / 2x0.34 mm ²

APPLICATION

'Stella' – the intelligent autonomous 230 VAC NC electrothermal actuator for automatic adaptive hydraulic comparison of heating manifolds' heating circuits in surface heating and surface cooling systems.

Sensors on the supply and return lines measure temperature differences and algorithm continuously calculates the necessary temperature spread and the appropriate valve position.

Normally closed and features a folding lever for easily unscrewing the thermostat valve or opening it manually when it is disconnected from the mains. With integrated inflow temperature limitation.

Combinable with every common temperature controller and terminal strip (except devices with switching element Triac).

ILLUSTRATIONS

BRIEF DESCRIPTION

- Combinable with the commercial two-point room temperature controller (electromechanical, electronic, PWM), except devices with switching element Triac
- For heating and cooling systems
- Features a folding lever for easily unscrewing the thermostat valve or opening it manually when it is disconnected from the mains
- Temperature sensors suited for surface heating pipes made of plastic, metal or combinations thereof with an external diameter of 12 to 20 mm
- Measures a heating circuit's outflow temperature
- The range of setpoint temperatures Stella calculates is variable and dependent on user behaviour and the system's environment
- The valve can be adjusted to any desired position between OPEN and CLOSED and set to remain in that position.
- An expansion element and a path measurement system are needed to position the valve lift.

ELECTRO-THERMAL VALVE ACTUATORS

FOR HEATING, VENTILATION AND AIR CONDITIONING TECHNOLOGY

		TECHNICAL DATA	APPLICATION
		Housing colour: pure white, like RAL 9010 Housing material: PC plastic, GF (20%) Ambient temperature: 0 ... 50 °C Storage temperature: -20 ... +70 °C Permissible atmospheric humidity: max. 95% rel. humidity, non-condensing Mounting / attachment: M 30x1.5 Protection rating: IP42 Protection class: II Safety and EMC: according to DIN EN 60730 Average power consumption: Approx. 3 W Opening / closing time: approx. 4 min Nominal stroke: 3 mm Function type: normally closed Nominal closing force: 90 N Connecting cable: 0.8 m / 2x0.5 mm ² Valve position indicator: 2x (at the top and the side)	Extremely compact design: Can be fitted quickly and comfortably thanks to the slim shape in the area around the fastening nut. Can be fitted in any position: Lateral drainage holes carry off any leakage water that from the valve plunger into the open, thus avoiding damage to the drive. Additional valve monitoring: Two additional viewing windows at the side allow users to visually check the respective valve position with ease; this does not work when mounted in a suspended manner.

TYPE/IMAGE	ITEM NO.	FEATURES	EURO/PG
ZB00A-010.100 	H9100010	Operating voltage: 230 V~, 50 Hz Max. power consumption: 70 W Max. starting current: approx. 0.3 A	
ZB00A-040.100 	H9100000	Operating voltage: 24 VDC or 24 VAC Max. power consumption: 12 W Max. starting current: approx. 0.5 A	

Thanks to their M 30x1.5 fastening and their characteristics (normally closed), the actuators are suitable for the following valve and distributor makes: Beulco, Empur, Heimeier, Kamo, Oventrop, Purmo, SBK, SKV, Strawa, Taconova, Watts

Brief description:

The drive features a compact, space-saving design.

The device can be mounted easily thanks to its narrowed shape, especially in the fastening area of the nut.

The connecting cable is not located near the fastening nut. This reduces the probability of contact with equipment carrying hot water.

Since the fastening nut allows continuous screwing onto the thread, by unscrewing the nut by two or three turns, it is possible to open the valve in an electrically de-energised state – something that cannot be done with bayonet couplings and impulse couplings.

Discharged water is dissipated via a draining system. Gaskets are not required thanks to the special design.

The double position display has the following advantages:

The upper display provides the option of a visual or, in conditions of bad visibility, tactile function test of the drive.

The lower viewing windows allow an additional check to determine whether the valve to be actuated follows the lifting movement of the drive.

At the beginning of the heating period, it can happen off and on that the valve plungers get 'stuck'. Therefore, with the additional display, it is possible to determine whether the cause lies with the actuator or with the valve in the event the valve does not open. However, that is not possible when mounted in a suspended manner.
