TIME SWITCHES & HEATING CONTROLS

About Sangamo

Sangamo have been manufacturing time switches from our Port Glasgow, Renfrewshire factory for over 65 years. Our reputation for quality and reliability is unrivalled.

Today we offer a wide range of time switches and heating controls for domestic, commercial and industrial use, via our close relationships with the UK & Ireland's major electrical wholesalers. We are able to supply our products to companies and organisations the length and breadth of the British Isles.

Project Work

We provide products for projects large and small, single drop or call off orders for long term projects.

We will work with your preferred electrical wholesaler to find the right package for you.

At Sangamo we prefer the personal touch, from on site visits to establish your requirements to our customer service and technical support, our entire team is knowledgeable, experienced and only a call away.

OEM & Customised Products

Our products can be altered or customised to suit your needs. From pre-set time switches – so they can simply be installed and turned on – to bespoke badged products and packaging. We work with many companies and organisations to provide tailored solutions for their projects.

A Scolmore® Group Company

Sangamo has been part of the Scolmore® Group of companies since 2018, and whilst the company operates independently, Sangamo benefits from the expertise, knowledge and support of the Scolmore® Group and continues to create strong growth within its product categories.

Scolmore® has been a leading UK manufacturer of electrical accessories and lighting products since 1989 and has earned a reputation worldwide for high quality products, innovative solutions and exemplary customer service. Key to the continued success of the group is the commitment to developing new products which incorporate the very latest in technological advancements, and provide contractors and installers with cost-efficient, easy to install solutions that help them remain highly competitive.

UK Manufacturing

Our Round Pattern Time Switch and Powersaver product ranges are both fully manufactured in the UK by our experienced production team.

Five Year Guarantee

Sangamo has a proud reputation for quality and reliability. To ensure our products can be installed and used with complete confidence we guarantee our full range of time switches and heating controls for five years from the date of manufacture.

CHOICE PROGRAMMERS

Programmers are a key component of heating control systems. Since many homes are unoccupied for parts of the day, there is little point in heating them if no one is there to benefit. A programmer allows the occupant to specify when the heating comes on to match their lifestyle and their heating requirements.

For many people in the UK, this simply means firing up the heating in the winter months for a couple of hours in the morning, so the house is warm when they wake up, and then firing the heating up again in the evening so the house is warm when they get home until they go to bed.

CHOICE THERMOSTATS

A room thermostat is used to regulate and maintain a desirable temperature throughout the home. It works by switching the heating system on and off as the temperature varies throughout the day.

For example, if the temperature drops below a certain level, a sensor in the room thermostat can be made to trigger the switch for the boiler and pump which will heat the radiators and in turn, the rooms in the home. If the room rises above a certain temperature, the thermostat will then turn off the central heating system so that your house will cool down to its desired temperature once more.

NETATMO SMART THERMOSTAT

The Netatmo Smart Thermostat's intelligent system predicts the start of the heating period, ensuring comfort at the right time. Forget waking up to chilly mornings or returning to a cold house after a long day at work.

Thanks to its Auto-Care function, the Netatmo Smart Thermostat can tell you when its batteries are low, or notify you of a problem with your heating system's operation.

With an energy efficient, e-ink display in a stylish and attractive plexiglass cube designed by Philippe Starck and 5 interchangeable colour stickers supplied in the box that allows you to change your thermostat to suit your style.

Widely compatible, it replaces most wired and wireless thermostats on the market and can be used with fuel, gas and wood systems.

As well as Netatmo's own app the Netatmo Smart Thermostat is also compatible with a number of smart home solutions like Apple HomeKit, Amazon Echo & IFTTT.

POWERSAVER CONTROLLERS

The primary application for the Powersaver range is to control immersion heaters. In a typical UK household nearly 20% of a home's energy cost is spent on heating hot water. Leaving an immersion heater on all the time can be a significant waste of energy that can drive this figure up to 25% or higher.

Immersion heaters are often rated at 3kw which, if left on permanently, can cost around 13p per hour/ £1.56 per day/ £9 per week/ £450 per year, so it is best to have control of your heating patterns.

Fitting a Sangamo immersion heater controller can reduce these costs by up to 50%, even more if the property can take advantage of a dual tariff electricity and controlled by the Powersaver Dual Flexi.

The Powersaver Boost and Select models are also suitable for heavier duty lighting and electric panel heater applications in both domestic and commercial properties.

ROUND PATTERN TIME SWITCHES

Sangamo have manufactured the renowned RPTS from our Port Glasgow factory since 1951, having sold over 11 million switches and counting. These 20A switches are famous for their high capacity, quality and reliability.

We often hear from customers who have had switches installed for over 5 decades and often on their second use, having outlived the equipment they were being utilised for.

S250 STANDARD RANGE

The original RPTS model for those that need simple on & off switching of up to 20A. The dial is 24 hour but contains a Day Omit device which skips the ON operation on selected days of the week. These switches come with either 2 or 3 sets of ON & OFF arms. To set the switch you simply loosen the centre screw, move the arms around the dial to match up with the switching times and re-tighten.

3-PIN OR 4-PIN

3-pin switches have common clock & switch connections. 4-pin switches have independent clock & switch connections enabling the use of a different switching circuit voltage, a Volt Free Contact, in effect.

S250 STANDARD RANGE

- S254.2 Standard 3 Pin Time Switch, 2 On/Offs
- S255.2 Standard 4 Pin Time Switch, 2 On/Offs

- S254.3 Standard 3 Pin Time Switch, 3 On/Offs
- S255.3 Standard 4 Pin Time Switch, 3 On/Offs

Q550 ASTRO/SUNTRACKER

Astro/Suntracker switches automatically adjust themselves to follow Sunrise/Sunset times throughout the year. This makes them ideal for controlling external and internal lighting loads up to 20A or 3,600W of LED lighting with no need for a sensor.

As these switches track the motion of the sun & not the time it should be set to GMT & left all year, so there's no need to worry about summer & winter clock changes, the switch does it all itself. The month dial controls the brass sunset/sunrise arms automatically to keep the lights switching at the right time each day.

Sunset & Sunrise times vary through the length of the British Isles by as much as 40 minutes at certain times of year. Our RPTS Astro models come in 4 zone variations to make the switching times more accurate. Additionally, users can alter the longitude setting away from the 0° longitude line to focus the accuracy in further, if required.

2 on/off models have a second set of fixed time operating arms, allowing you to set your lighting to go off for a set period overnight while still benefiting from the sunset and sunrise programming.

All models also contain a 100 hour battery reserve.

3-PIN OR 4-PIN

3-pin switches have common clock & switch connections. 4-pin switches have independent clock & switch connections enabling the use of a different switching circuit voltage, a Volt Free Contact, in effect.

NFC DIN RAIL TIME SWITCHES

NFC (Near Field Communication) is a wireless communication protocol that allows you to program the switch using the free Sangamo Connect app on an Android NFC Smart phone.

This works the same way as contactless bank cards, oyster travel cards and mobile payment systems.

You set the program up on the app and hold the phone next to the switch to read, write or transfer programming times.

DIN RAIL TIME SWITCHES

All Sangamo's DIN Rail mountable time switches are designed for 35mm "Top Hat" rail. Switches come in 1, 2 or 4 modules, each module is 17.5mm wide, which fits the required width in the DIN enclosure.

Using the 25195 USB Hub and Easy Vue software or 25196 USB Hub with bluetooth and connect app programs can be transferred to a 25193 data key and then to one or multiple switches. 1 module switches do not require a Data Key as the fascia can be removed and slotted into the Hub directly.

Pulse Programming

Short term switching at fixed times. Ideal for school bells, sirens, churches, etc. A burst from 1 second up to 59m 59s can be programmed into the unit. This feature appears on all standard switches.

PANEL TIME SWITCHES

The panel time switch range can also be surface or din rail mounted.

The analogue 16000 range are simple to use and are a cost effective timer. They are extremely easy to set, change and to view programmes. They are often used where multiple people are involved in setting and changing programs. For instance in church halls and similar applications. They are also fitted where the potential user is not comfortable using the latest digital technology, preferring the traditional pin type setting.

The 28000 range provides additional functionality in the same format to suit additional programming requirements.
