## MAGDUO, The New Range Of Two-Wire Fire Systems

Unlike standard conventional 4 wired systems where the sounders and detectors are wired on separate circuits, MAGDUO utilises intelligent 2-Wire technology enabling all devices on the same pairs of wires.

This advanced technology can reduce installation and material cost.

- The system is 'Two-Wire' meaning that all system devices can be installed on the same circuit
- Up to 32 devices per zone\* (Dependent on Device Loading Unit: DLU, please refer to product technical specification)
- MAGDUO will support 2-8 Zone applications
- The MAGDUO FlexiPoint detectors are changeable from smoke to heat detection mode using the dip switch settings with 7 different options
- FlexiPoint detectors are also available with inbuilt sounder & strobe options
- The 4 and 8 zone panels support up to 8 repeater panels
