

SOLUTIONS

The image displays a variety of industrial electrical solutions. In the foreground, there are two long, silver-colored metal tracks labeled '63A UN1112 STD TRACK' and '63A UN1212 CE TRACK'. These tracks are equipped with various components: a red emergency stop button, a red 'UN7223 ISOLATE BATTERY DISCONNECTING' switch, and a grey 'UN7113 ISOLATE BATTERY DISCONNECTING' switch. A black power strip with multiple outlets and a red emergency stop button is also visible. To the right, there is a black surge protector with multiple outlets and a red emergency stop button. In the background, there are several other components: a black terminal block, a black surge protector, a black power strip, and a black surge protector. A yellow cable is also visible in the background.

CABLE MANAGEMENT SPECIALISTS

UK OWNED
UK MANUFACTURER

Marshall-Tufflex is the UK's leading manufacturer and supplier of cable management solutions for commercial, industrial, healthcare, education and domestic markets.

Based in Hastings, East Sussex the company was established in 1942 and is recognised throughout the industry for quality, consistency, reliability, value for money and innovation.

We are extremely proud of our heritage as a family owned company and our priority for the future is to re-invest and continue producing new and effective solutions for the building industry.

UNDERFLOOR TO DESK SOLUTIONS

Marshall-Tufflex's underfloor to desk solutions incorporate a range of products for the distribution of power and data services from beneath raised floors and in-screed systems to desks.

TECHNICAL SUPPORT

Our Technical Team consists of qualified electricians, and technical experts with many years experience of cable management installations including an understanding of the regulations and compliancy to standards.

The team can advise on a wide range of solutions and technical issues, product standards, data cabling control and Part M compliancy.

We aim to complete all standard quotes within one working day, although more complex quotations such as 'take offs' can take longer.

BIM (Building Information Modelling)

BIM (Building Information Modelling) brings together all of the digital information for every component of a building in one place allowing anyone to access that data. BIM data can be used and shared to illustrate the entire building life-cycle, from feasibility, design, during construction and throughout its working life.

3D Autodesk Revit models are available to download for Marshall-Tufflex products, with the necessary technical product data for them to be easily specified and integrated into a construction project.

Visit www.marshall-tufflex.com/bim or www.thenbs.com

Standards

BSI Standards

Marshall-Tufflex is committed to excellence and is recognised by the BSI as a firm of Assessed Capability for Quality Management Systems to BS EN ISO 9001:2015 and Environmental Management Systems to BS EN ISO 14001:2015.

**PRODUCT DATA SHEETS ARE AVAILABLE
AS PDF'S ON OUR WEBSITE**
www.marshall-tufflex.com

RoHS

RoHS (Restriction of Hazardous Substances) restricts the use of specific hazardous materials found in electrical and electronic products. All Marshall-Tufflex products are RoHS compliant.

WEEE

WEEE is the directive on waste electrical and electronic equipment which sets collection, recycling and recovery targets for all types of electrical goods with the objective of reducing landfill. Marshall-Tufflex is fully compliant with the WEEE directive.

REACH

REACH is an EU regulation (dating from 18.12.06) that stands for Registration, Evaluation, Authorisation and Restriction of Chemicals. It addresses the production and use of chemical substances and assesses their potential impact on both human health and the environment. All Marshall-Tufflex products are REACH compliant and contain no 'Substance of Very High Concern'.

BEAMA is the independent expert knowledge base for the electrotechnical industry in the UK and across Europe. Representing over 300 manufacturing companies, the organisation has significant influence over UK and international political, standardisation and commercial policy. We are very proud to be an active member of BEAMA.

IN-SCREED FLOORING SYSTEMS

A range of floor outlet boxes, fittings and plates in galvanised steel, with choice of PVC-U or steel ducting designed to be positioned within screed flooring.

Product information

- 3 and 4 compartments (boxes come with extra divider to make 4 compartments)
- Suitable for 65-85mm screed depth
- Boxes for deeper floor screed available on request
- Lid recess to suit up to 6mm carpet tile
- For advice on box tray lids for non-standard floor finishes please contact our Technical Team
- Adjustable for box trim height
- Grey moulded carpet trim for floor outlet boxes
- Steel trims with various finishes available
- Universal junction box with integral, fully-reversible cable segregation

Standard floor box trim
GY
GY: Grey RAL7011 (floor box trim)

Other trim finishes: Floor boxes can be provided with a variety of trim finishes such as brass, stainless steel and painted colours. For further information please contact the Technical Team on +44 (0)1424 856688.

Floor materials

Marshall-Tufflex can supply floor outlet boxes and junction boxes that are suitable for different floor materials, such as marble, stone or wood, or where a higher IP rating is required. For more information on these, please contact our Technical Team on +44 (0)1424 856688.

POWERTRACK

A range of 63Amp powertrack complete with integral mounting brackets and pre-assembled end caps and couplers for ease of installation.

Product information

- Each length of track comes complete with pre-assembled coupler, end cap and floor mounting brackets.
- Maximum 63Amp rating
- Tap-offs are key and colour coded for Standard and CE (Clean Earth)
- Tap-offs are 32Amp rated or fused at 13Amp
- Adhesive dust covers protect outlets

Powertrack and fittings are independently tested by Intertek

Identification	
Standard	CE
Standard: Grey CE (Clean Earth): Red	

To calculate powertrack lengths required for different floor layouts refer to table on opposite page.

All tap-off units comply with the latest version of the Wiring Regulations Section 543 (High Integrity Earthing).

Powertrack – run length component chart

To determine the number and size of track required for a given area, select your total run length (in metres) from the left hand column, then find the correct track combinations along that row.

Total run in metres	Track lengths required			
3.6	3.6			
4.2	1.8	2.4		
4.8	2.4	2.4		
5.4	3.6	1.8		
6.0	3.6	2.4		
6.6	2.4	2.4	1.8	
7.2	3.6	3.6		
7.8	3.6	2.4	1.8	
8.4	3.6	3.6	1.2	
9.0	3.6	3.6	1.8	
9.6	3.6	3.6	2.4	
10.2	3.6	3.6	1.8	1.2
10.8	3.6	3.6	3.6	
11.4	3.6	3.6	2.4	1.8
12.0	3.6	3.6	3.6	1.2

Total run in metres	Track lengths required					
12.6	3.6	3.6	3.6	1.8		
13.2	3.6	3.6	3.6	2.4		
13.8	3.6	3.6	3.6	1.8	1.2	
14.4	3.6	3.6	3.6	3.6		
15.0	3.6	3.6	3.6	2.4	1.8	
15.6	3.6	3.6	3.6	3.6	1.2	
16.2	3.6	3.6	3.6	3.6	1.8	
16.8	3.6	3.6	3.6	3.6	2.4	
17.4	3.6	3.6	3.6	3.6	1.8	1.2
18.0	3.6	3.6	3.6	3.6	3.6	
18.6	3.6	3.6	3.6	3.6	2.4	1.8
19.2	3.6	3.6	3.6	3.6	3.6	1.2
19.8	3.6	3.6	3.6	3.6	3.6	1.8

We recommend that no single run of Powertrack exceeds 20 metres.

RAISED FLOOR BOXES AND GROMMETS

A high quality range of raised floor boxes to provide power and data to desks within the modern office environment. Available as standard or heavy duty versions, boxes are supplied with dividers for quick and easy configuration as either a 3 or 4 compartment box.

Product information

- Standard depth 83mm
- Supplied with dividers to create 3 or 4 compartment box
- Two earth fixing points for flexible positioning of sockets
- 3mm thick medium load plate
- Fixings are pre-punched for quick and easy installation
- Supplied with metal screws to attach trim to box for a secure fix
- Steel sub-frame option for heavy traffic and fine adjustment to allow for uneven flooring
- Supplied with two snap-in cable retainers/guides
- Lid recess to suit up to 6mm carpet tile
- Reversible and self closing lid for extra safety and security
- Barrel lock option available for extra security
- Knockouts in the base for better access
- Data connections to meet data cable specifications

Standard finish

Plate dimensions

3 compartment = 185 x 95mm
4 compartment = 185 x 71mm

Plate material

Plates are manufactured from plain galvanised steel to match floor boxes.

Important

Design of leads, plugs and sockets can vary so thought is required when configuring plates to avoid the clashing of cables which could prevent the floor box lid from closing.

Modules and leads

POWER AND DATA MODULES

A range of power and data modules ideal for under desk mounting.

Product information

- High strength, flame retardant moulded modules
- Polycarbonate RCBO units
- Power modules
- Can be fed from wall trunking, floor boxes, grommets or powerpoles
- For single use or modules can be interlinked
- In-feed supply either by GST 18/3 connection or plug socket
- Options of unswitched individually fused 3.15Amp or 5Amp sockets
- 2, 4 and 6 gang options plus the ability to link modules
- Polycarbonate power modules with twin USB points
- Desk units comply with BS 6396 for Electrical Systems in Office Furniture when powered from a plug socket outlet and with the current version of the BS 7671 Wiring Regulations when powered from a power distribution network.

Power module configurations

Our range of power modules and RCBOs can be integrated to deliver a complete system. Desktop Modules can also be used in conjunction with RCBO's to deliver power, data and USB charging at the desktop.

DESKTOP MODULES

A selection of stylish desktop modules for the modern office environment with individually fused UK sockets. Perfect for use in hot desking situations or conference rooms, the modules give easy access to power, data and USB charging at the desk surface.

For flexibility of installation, the units are supplied with two methods of attaching to the desktop. G-Clamps with protective desk guards and adhesive pads are both supplied.

- Ergonomic modern design
- 45° angled sockets that can accept large plugs and transformers
- Quick charge USB (1 x Type A + 1 x Type C)
- Sockets are individually fused to 5A
- Includes 500mm pre-wired power lead with male 3-pole connector
- Tough, high impact PVC-U construction
- Flat base for mounting and supplied with desk clamps and adhesive pads
- Master switch with neon power-on indicator
- 6C cut outs for populating with data or multimedia
- GST18/3 plug and play for connectivity to Marshall-Tufflex RCBO modules and feed units

Pre-wired underfloor power distribution

Underfloor Distribution System

Conduit assembly, tap off and adaptor

Cable Type	6491X (BASEC BS 6004 H07V-R)
Protective Earth (P.E)	4.0mm ² x 3 (Grey Plug)
Clean Earth (C.E)	4.0mm ² x 4 (Red Plug)
Protection: Conduit Assembly	25mm Steel flexible conduit (>1KN Tensile Load to BS EN 61386-23)
Protection: Tap Off	20mm Steel flexible conduit (>1KN Tensile Load to BS EN 61386-23)

General specification

Approvals: System	Designed to comply with the latest IET Wiring Regulations BS 7671
Approvals: Connector	Designed to comply with EN 61535:2009 (Fixed installation couplers for permanent connection)
Normal Voltage	250 volts
Frequency	50/60 Hertz
Volt Drop Line & Neutral Connector	1.0 mV/A/M
Volt Drop Line & Neutral	
(Flexible Cabling System) 2.5mm	19.0 mV/A/M
Volt Drop Line & Neutral (Underfloor) 4.0mm	12.0 mV/A/M
Connector Impedance	1.0m Ω/connector
Connector, Body Material	PA66 – GF25
Compatibility	Keyed against incorrect insertion
Operating Temperature (Ambient)	-5°C to + 40°C
Safety	PE contact engages first
Degree of Protection	Engaged IP2XC

Earthing requirements for the installation of equipment having High Protective Conductor currents. BS7671:2018 Reg. 543.7

The scope of Reg. 543.7.1.203 requires that every final circuit intended to supply one or more items of equipment, where the total protective conductor current is likely to exceed 10mA. in normal use, shall have a high integrity protective connection.

Singles Cabling System 4.0mm²

Final Circuit

This system conforms to the high integrity protective requirement by virtue of having a single copper protective conductor of 4mm², (Reg 543.7.1.203) with the protective conductor being enclosed throughout in trunking or flexible conduit to provide additional protection against mechanical damage.

Powertrack

Powertrack is an underfloor busbar system rated at 63Amp maximum. It is available in Standard or CE (Clean Earth) versions.

Lengths

- Powertrack lengths of 1.2m, 1.8m, 2.4m and 3.6m with tap-off outlets at 300mm

Safety

- Snap-fit feed units, couplers and tap-offs are key and colour-coded to avoid assembly errors.

Standard = grey

CE = red

- A shutter is operated on insertion to prevent accidental contact.
- Avoid exceeding the maximum power rating of the track. This is ascertained by the maximum power requirement for each floor outlet box.

Positioning

- For the most economic format, it is advised that Powertrack is arranged in parallel runs with Powertrack feed units orientated to the incoming supply.
- For optimum layout flexibility, spacing should be a maximum of 5.5m between each length of track and 2.5m from the perimeter when using a standard 3m tap-off to a floor box.

Electrical Characteristics			
Rated Current		63	Amps

Technical Specifications

Third party certified and tested to comply with:

BS EN 61534-1: 2011

BS EN 61534-22: 2009

BS 5733: 1995 where applicable.

Marshall-Tufflex is registered by BSI to BS EN ISO 9001: 2008

MT Powertrack is designed to comply with the current version of the BS 7671 Wiring Regulations.

ASTA Type Test Certification

Powertrack is independently tested by Intertek to BS EN 61534-22:2009 clauses 15.4, 18.4.3.2, & 18.4.3.3

Regulation 543.7 Installations to BS 7671:2018 Earthing requirements for the installation of equipment having High Protective Conductor currents.

The scope of Reg. 543.7.1.203 requires that every final circuit intended to supply one or more items of equipment, where the total protective conductor current is likely to exceed 10mA. in normal use, shall have a high protective connection.

All MT Powertrack tap-off units conform to the high integrity protective requirement by virtue of using a protective conductor of 4mm² enclosed within a flexible conduit, thus providing additional protection against mechanical damage.

Regulation 543.7.1.203.

32Amp 3 metre tap-off unit

The 32Amp tap-off unit comprises of an unfused tap-off* a flexible metal conduit with integral 4mm² conductors.

These units are designed to comply with regulation 434.2.1(i) of BS7671:2018 by virtue of the following:

- 1 Maximum length of cable is <3 metres.
- 2 Minimum risk of faults as the item is factory assembled and fully tested.
- 3 Fully protected by flexible steel conduit located within raised access floor that offers further protection.

*Fused 3 metre tap-offs are available if required.

5 metre tap-off unit

Tap-off units in excess of 3 metres should only be used if they contain a fuse or the powertrack is protected by a 32Amp rated protective device.

Raised floor boxes

Three and four compartment boxes and a range of grommets that can be configured to meet client requirements for accessing multiple services concealed below a raised floor system.

Technical specifications

Raised floor boxes are third party tested to comply with:

BS EN 61534-22:2009

BS EN 60670-1:2005

BS EN 60670-23:2008

BS EN 50085-1:2005

BS EN 50085-2-2:2008

Material

- Lid/trim: flame retardant polypropylene grey RAL 7011
- Box assembly: galvanised steel
- Load plate: 3mm zinc plated steel
- Accessory plate: galvanised steel

Dimensions

- For dimensions of non standard boxes and trims, contact our Technical Team on +44 (0)1424 856688.

Dimensions

No of compartments	Nominal trim size (L1 x W1)	Cut out dimensions (L2 x W2)	Accessory Plate Dimensions
3	357 x 257mm	322 x 222mm	185 x 95mm
4	357 x 257mm	322 x 222mm	185 x 71mm
		General tolerance +3mm	

Care should be taken to ensure that box edges are smoothed and free from burrs. Carpet tile cut size for lid is 303 x 166mm.

Load testing

Load testing of floor boxes to:

BS EN 61534-22:2009

BS EN 50085-2-2:2008

The floor boxes have been tested to and comply with the loading requirements of the aforementioned standards.

There are two loading criteria for the floor boxes:

1. A point loading; to simulate foot traffic or light furniture like a chair leg / caster sitting on the lid. The maximum permissible deflection is 6mm (BS EN 61534-22:2009 and BS EN 50085-2-2:2008)
2. A plate loading; to simulate heavy foot traffic or larger furniture loads. The maximum permissible deflection is 4mm (BS EN 61534-22:2009) or 6mm (BS EN 50085-2-2:2008)

The loading graphs show the deflection based on floor boxes without and with a sub-frame. The point loading value is approaching $\frac{1}{4}$ of a metric tonne without sub-frame and reaching $\frac{1}{4}$ of a metric tonne with sub-frame. In both cases the permanent deflection is less than 0.25mm.

For plate loading without sub-frame the value is approaching $\frac{1}{4}$ of a metric tonne with 4mm deflection and $\frac{1}{4}$ of a metric tonne with 6mm deflection. With the sub-frame fitted the loading reaches $\frac{1}{4}$ of a metric tonne with 4mm deflection and $\frac{1}{2}$ a metric tonne with 6mm deflection. In both cases the permanent deflection is reaching 0.5mm.

Note: floor boxes fitted with sub-frame can exceed more than 1 metric tonne plate load before lid failure. In all tests (with and without sub-frame) the required loading was reached without damage to the plastic trim or compromised the lid.

Note: The maximum permissible permanent deflection after the load has been removed is 3mm for both standards.

Grommets

Material

- ABS Flame retardant
- Flammability: UL94 V-0 at 2.0mm
- Colour: polypropylene grey RAL 7011
- Lid: captive screwdown
- Lid recess: 15mm for extra strength
- Through power/data options

Dimensions

Cut out dimensions

In-screed system

Three and four compartment boxes configured to meet client requirements for accessing multiple services concealed within an in-screed floor system.

Standard system is suitable for screed depths of 65mm to 85mm. For other screed depths please contact our Technical Team on +44 (0)1424 856688.

Material

- Lid/trim: polypropylene grey RAL 7011
- Frame assembly: galvanised steel
- Modular boxes: galvanised steel
- Load plate: galvanised steel

Wiring accessories and mounting plates

- 3 compartment box: 185 x 95mm
- 4 compartment box: 185 x 71mm
- For use with standard 60.3mm and 120.6mm accessories with blank or pre-punched plates for data/telecoms etc.

Junction box

Desk grommets

Standards and Directives

All products are manufactured to enable compliance with the following where relevant:

- BS 5733
- BS 6396
- BS 7671
- BS EN 55022
- BS EN 60950-1
- CE and UKCA marked
- The Electrical Equipment (Safety) Regulations 2016
- LVD Directive 2014/35/EU
- EMC Directive 2014/30/EU
- The Electromagnetic Compatibility Regulations 2016
- RoHS2 Compliant 2011/65/EU
- REACH Compliant

Further detailed information is available upon request.

Current Rating

Power modules 3 core wire 1.5 mm² rated at 16A

RCBO Power feed 2.5mm² rated at 20A

All leads are supplied with BS 1363 approved 13A three pin UK plugs and GST18 connectors

RCBO Rating

16A Type C 30mA 2 Pole

BS 6396:2008 requires RCD protection for electrical sockets

Earth Bonding

All units are supplied with a 150mm exterior earth lead to ring terminal.
Guidance from BS 6396:2008:

Fusing

The configurations of socket outlets connected to a single supply shall be either:

- a) No more than four sockets, where each socket is separately fused or has other overcurrent protection rated at not more than 5A; or
- b) No more than six sockets, where each socket outlet is separately fused or has other over current protection rated at not more than 3.15A

No single item of equipment having a rated voltage exceeding 250V or a rated current exceeding 5A shall be connected to the item of furniture.

Each unit is individually fused:

2 and 4 gang power sockets fused at 5A (20mm glass fuse)

6 gang power sockets fused at 3.15A (20mm glass fuse)

Power feed units are protected by either a 16A RCBO or 13A fuse

Fixing

Can be used in a cable tray or mounted directly to the desk.

Each unit is fitted with 2 fixing points at either end of the module for ease of mounting and securing the unit in a fixed position.

Materials

All components and plastic mouldings used throughout the products will conform to the relevant Flame Retardancy specifications.

Data and Multimedia

Units with data facilities are fitted with 2 or 4 blank LJ6 6C apertures and can be fitted with data or multimedia modules.

Units fitted with data facilities include a segregation plate that is fixed into the chassis to produce a separate enclosed area within the body of the unit.

Data cables can be fed into the units by way of a 20mm flexible plastic conduit, forming a protected umbilical, or as individual plain cables secured by a soft compression gland, at the opposite end to the power entry.

USB

Dual USB Fast Charge Type A sockets
5V DC 3.4A

Connection Options

Inputs:

RCBO Unit options:

- 16A GST 18: Unit can either plug directly into Power Module units or be connected via an Interconnecting lead
- Ø20mm knockout

RCBO Feed unit options:

- 16A GST 18: Unit can either plug directly into Power Module units or be connected via an Interconnecting lead
- Ø20mm knockout

RCBO Power feed unit options:

- 16A GST 18: Unit can either plug directly into Power Module units or be connected via an Interconnecting lead
- Ø20mm knockout
- Power modules are fitted with 16A GST 18 connectors

Outputs:

RCBO Units: Single GST 18

RCBO Feed units: 4 or 8 GST 18 connectors

RCBO Power Feed units: 4 or 6 13A UK socket outlets

Power modules: Single GST 18 for interconnects to additional units. *BS 6396 notes above.

Quality and Testing

All units are 100% electrically tested. Test consist of Earth Bond, Insulation, Load/Fuse Check, Continuity and Functional.

The following diagrams are suggested configuration options, please always ensure local Regulations are met.

Desktop Modules

Standards

- BS 1363
- BS 6396:2008
- BS 5733
- IEC60884-1:2006
- UL 94V-0

Material

Power and data desk top modules are constructed from high strength, high impact PVC-U

Fusing

To enable compliance to BS 6396 the UK sockets are fitted with Ø5 x 20mm anti-surge ceramic fuses at either 3.15Amp or 5Amp as marked

Quality & testing

100% testing – continuity, polarity, insulation & earth

Dimensions

DTM2BK	2x5A sockets	224x72x78mm
DTM4BK	4x5A sockets	336x72x78mm
DTM22BK	2x5A sockets & dual USB charger	260x72x78mm
DTM42BK	4x5A sockets & dual USB charger	392x72x78mm
DTM222BK	2x5A sockets, dual USB charger & 2x6c cut outs	362x72x78mm
DTM322BK	3x5A sockets, dual USB charger & 2x6c cut outs	409x72x78mm
DTM422BK	4x5A sockets, dual USB charger & 2x6c cut outs	458x72x78mm

Connection

All modules are pre-wired with a 500mm power lead with a GST18/3 3-pole male connector

1.5mm² H05VV-F 20A

For data modules and lead options please refer to page 13

Max voltage

250V

Switch

Single pole with neon indicator

Compliances

RoHS, WEEE, CE, UKCA

USB

Type C PD, DC 5V3A, 9V2A, 12V1.5A

Usage & maintenance

Not to be used with products and appliances exceeding 5A (3.15A for 6-way unit)

Fuses are 5x20mm and can be user-replaced.

To replace a fuse, disconnect from the mains supply first.

To clean the unit, disconnect from the mains supply and wipe with a clean damp cloth.

POWERTRACK AND POWER DATA MODULES INSTALLED AT CAMBRIDGE UNIVERSITY PRESS

The finance offices on the Cambridge University Press site underwent a refurbishment to enhance its IT and meeting facilities. There was a twelve-week schedule in place to install fuse boards, powertrack, power and data modules in order to supply power and data to a large number of desktop computers.

To assist with the cable management part of the works, Marshall-Tufflex supplied a number of its Clean Earth (CE) 63amp Powertrack lengths complete with pre-assembled coupler, end cap and floor mounting brackets. These were then connected to power modules, which were secured underneath desks by a wire basket, to keep floors clear of cable in the busy office.

“Marshall-Tufflex products are extremely high-quality, which means they are not prone to bending or breaking on-site like some products tend to be. Due to the robust, high-quality nature of the products provided, installation went incredibly well and was very straightforward, which has allowed us to complete our work to schedule.”

Michael Penfold,
M Penfold Electrical Contractors Ltd

INSCREED SOLUTION FOR UNIVERSITY OF CENTRAL LANCASHIRE

Founded in 1828, the University of Central Lancashire is one of the UK's largest, with the student and staff headcount approaching 38,000. As part of its continuing efforts to shape the future of its students, the university developed a new Engineering Innovation Centre (EIC).

Whilst developing the new Centre, contractor NG Bailey installed an Inscreed Underfloor to desk system, including floor boxes and junction boxes to accommodate large data cables. This was to ensure health and safety within the centre as no cables would be loose in the engineering rooms.

Supporting the future of engineering skills development within the North West, the EIC is a state-of-the-art facility located on the Preston campus. Exploiting the location of the university, the EIC is at the centre of one of the most active engineering and manufacturing areas in the UK and has established UCLan as a leader in engineering innovation.
