

Need to test the safety of appliances?

Get the right PAT tester for the job with the Martindale check list

The essential check list for fast and easy PAT testing

- Cover all bases with the capability to test not just appliances, but mains extension leads too
- Choose a small lightweight design for maximum portability with backlit display for all locations
- Look out for easy to read help guides on the tester or on-screen
- Go for one button operation for easy testing
- Choose clear PASS / FAIL indication with test results on-screen for record keeping
- Select rechargeable & mains operation for maximum productivity and low running costs
- Include a soft carry case which allows for testing without the need to unpack and repack
- Readily available accessories for all applications
