

Need to carry out electrical installation testing?

Get the right multifunction tester for the job with the Martindale checklist

Here are some key features to look out for to save time and money when 18th Edition testing

- Automatic polarity and wiring check on connection before you test
- Pass / Fail limit indicators for instant diagnostics of faulty wiring
- Fast reliable loop testing with built-in loop impedance tables
- RCD auto test and ramp test with all results on one screen
- Mains rechargeable for low running costs
- Remote test probe for one handed operation
- Soft carry case for testing without the need to unpack and repack
- Help screens to save time on-site
