

Megger®

MET1000 Megger's Other Multifunction Tester

Gordon Billings

Introduction

Most electricians have heard of Megger and probably immediately think of Megger's MFT range.

MFT of course stands for Multi Function Tester.

But there is another Megger Multi Function Tester in the range that electricians may not be so aware of

And that is.....

Introduction

The Megger MET1000

Key Features

The MET1000 is a general purpose Electrical Tester.

It comes with CAT IV 600 V Safety Rating

It benefits from an IP65 Environmental Class

Key Features

The MET1000 has auto power on

Single pole voltage indication

Voltage indication with dead or no batteries

Complies to IEC/EN 61243-3

All of which means.....

Key Features

It can be used as a 2-Pole Tester
as part of safe isolation

Key Features

The MET1000 has True RMS AC measurements on voltage and current

Key Features

The MET1000 features an open jaw AC clamp giving current measurement up to 200A

Key Features

There is also resistance measurement up to 50 k Ω

Key Features

On top of those features it also has:

A Phase Sequence Indicator

An Extra Low Voltage (ELV) indicator.

Key Features

Other features on the MET1000 include

A Hold function

LCD Screen Backlight

LED Torch

Screw-on interchangeable
GS38 and Euro 4mm tips

Key Features
