

Electronics

Reliable and powerful

Weidmüller's Advanced Connectivity

Beside a full range of Electronic products Weidmüller also offers Network components for Industrial Ethernet applications or Sensor Actuator Interfaces.

Industrial Ethernet:

- Routers
- Switches
- Cables
- Accessories

Sensor Actuator Interface:

- SAI active
- SAI passive
- SAI universal
- SAI cables

You can rely on electronics from Weidmüller!

Top quality is crucial, especially in sensitive electronic technology. Weidmüller supplies high-quality electronic products which have been developed to state-of-the-art standards. That not only makes them very reliable, but also ensures they are future-proof and makes them suitable for international use.

With a comprehensive range spanning from power supplies to relay and optocouplers, we provide our customers with everything a complete electronics portfolio should offer. And there's more: with our power supply concepts, we examine individual problems and are guaranteed to find a practicable solution. Just ask us!

Power supplies

Extremely powerful

Power supplies from Weidmüller have been put to the test in supplying electrotechnical modules for years. They can be used safely in industry, in small businesses, or in the home. And they have even proved their efficiency at all times in tough industrial conditions. Weidmüller offers you the following power supply modules for industrial use:

compactPower

- Unregulated 1 and 3 phase transformer power supplies
- Input voltage according to IEC 38
- Power classes from 36 W to 1000 W
- Reliable short-circuit and overload protection
- International approvals

connectPower

- 1 phase and 3 phase switchmode power supplies
- Output currents from 3 A to 20 A
- Power classes from 36 W to 1000 W
- Robust design due to metal housing
- Power factor correction (PFC)
- International approvals

connectPower diode module

- Diode module for 2 x 10 A or 2 x 20 A
- 100 % decoupling for power supplies
- Application in redundancy operation
- To double the output power
- For supplying critical loads with power or to protect against reverse voltages

WAVEPOWER

- Switched-mode power supplies in integral housing
- Same design as other function units
- Cross-connection for 24 V supply
- Compact design
- International approvals

INSTAPOWER

- Switched-mode power supplies
- Ideal for separate supplies
- Output voltages from 5 V DC to 28 V DC
- Thermal trip with self-reset
- Small dimensions in installation housing
- International approvals

WAVEGUARD

- Electronic fuse
- Selective dynamic and static fuse for 24 V DC circuits
- Variable and set versions from 0.5 A to 8 A
- Ideal fuse protection for various load circuits of a switched-mode power supply

The advantages of Weidmüller products

- Complete product range
- Your one-stop shop
- Individualised customer applications
- Ideal for centralised and decentralised power supply concepts

Overvoltage protection

Specific customer solutions

However well earthed a building or system is, bolts of lightning cause dramatic voltage drops and correspondingly high potential peaks, despite low earth resistance. That's why one of the fields we specialise in is fuse-protecting buildings.

We offer a comprehensive range of products for installation in main distributors and sub-distributors, and for protecting appliances.

PU TSG and PU B series

- Class I conductors
- Combined overvoltage protection
- High discharge current conduction 10/350 μ s
- Low residual voltage
- Use in existing lightning protection systems

PU II series

- Class II conductors
- Comprehensive range for 4 and 5-conductor networks
- Voltage versions: 75 V, 130 V, 280 V, 385 V and 550 V
- High discharge current conduction 8/20 μ s
- With monitoring feature

PU D/PU D ZS series

- Class III conductors
- For use in sub-distributors or end applications
- With monitoring feature
- PU D: Voltage versions: 24 V, 48 V, 130 V and 230 V
- PU D ZS: for analogue telephone lines, So and Uko interfaces

Overvoltage protection

- For industrial data signals
- Protection from RS232, RS422, RS485 signals
- Little insertion attenuation
- LON™ protection and termination

MCZovp overvoltage protection

- For MSR circuits
- Slimline protection terminal
- Conduction via direct mounting rail contact
- Three-level protective circuit
- Low residual voltage due to suppressor diodes

Overvoltage protection

- For telecommunications interfaces
- Products for analogue and digital telephone lines
- Low residual voltage due to suppressor diodes
- NFN surface-mounted TAE socket
- With monitoring feature

The advantages of Weidmüller products

- Customer-specific solutions
- Years of experience in overvoltage protection
- Complementary protective components in the field of energy systems
- Complete overvoltage protection range for energy and process

Analogue signal processing

Perfect safety

Weidmüller's Analogue Electronics range offers three tiers of construction and configurability. MannSeries is a heavy duty range with metal housings and front adjustment, aimed at the Process segment. WAVEseries is modular, robust, with high quality polymer housings and DIP-switch configuration, for general industrial use. MICROANALOG has a very high density (6 mm width) format, but robust polymer housings and adjustability via DIP-switches, for lighter industrial applications.

MICROANALOG

- Isolate and convert DC currents, DC voltages and temperature signals
- Extremely small dimensions with a width of just 6 mm
- Adjustable versions without calibration
- Cross-connections for power supply
- Variable connection technology

WAVEANALOG

- Isolate and convert DC currents, DC voltages, frequencies, temperature signals and bridge voltages
- Fixed functions and variably adjustable versions
- Variable connection technology
- Cross-connections to power supply

WAVECONTROL

- Monitoring modules, 1/3 phase
- Measure and monitor currents up to 60 A AC/DC and voltages up to 450 V AC
- True RMS data acquisition
- Variably adjustable versions without calibration
- Hall sensor principle for indirect current measurement

MannSeries Isolators/Transmitters

- Repeat and convert different industrial standard signals across an insulation barrier
- Isolate and convert physical measurements to standard industrial signals

MannSeries Indicators/Totalisers

- Local and remote indication of the physical measurement or standard signal
- Calculate the total flow and the flow rate

MannSeries Monitors/Controls

- Actuate relays based upon the value of a physical measurement or industrial signal
- Auto manual stations
- Relay modules

The advantages of Weidmüller products

- Simple and universal product portfolio
- High level of functionality for reduced storage costs
- Synergy between connection technology, housing design and functionality
- International approvals

Plug interfaces and PLC interface elements

Varied functions

These product families establish a quick and easy I/O connection between the field and automated machinery. Weidmüller's wiring system reduces installation time and potential errors to an absolute minimum, and even makes maintenance work much easier. The plug interfaces and PLC interface elements combine various connection principles and clearly transmit the signals to the higher control system.

Interface units

- Fast conversion for DIN plug connectors to screw or tension clamp connectors
- Save space
- Socket for TS 32 and TS 35 rail
- Housing for printed circuit boards

PLC system interface

- All components are modular
- 1 x 4 byte and 4 x 1 byte system versions without a routing module
- Easily extendable
- Flexible – simply change the I/O interface

PLC front adaptor

- Fixed control cable
- Variable cable lengths with 4 standard lengths
- Wide-ranging system accessories
- Cost-effective coupling of plug interfaces

Plug interfaces

- Choice of screw or tension spring connection
- Compact design
- Clear connection labelling
- Active and passive versions

The advantages of Weidmüller products

- Space-saving cable channels
- Small module widths
- No more clamping levels
- Various cable lengths

Relays and optocouplers

Optimum options

Our relays and optos models are used in industrial automation applications for isolating and coupling digital input and output signals. The slimline design makes them a particularly interesting option for use in sub-distributors. But they also help users to maximise valuable switchboard space. Available in different versions, their compact design combines the functionality of the classic coupling level with the clamping level.

MCZ Series

- Relays and optos in 6.1 mm design
- Tension spring connections
- Cross-connection for potentials via plug-in jumpers
- Relays from 5 V DC to 230 V AC
- Optos with output currents of 100 mA to 2 A

MICROSERIES

- Relays and optos in 6.1 mm design
- Screw and tension spring connections
- Cross-connection for potentials via plug-in jumpers
- Relays from 5 V DC to 230 V AC
- Optos with output currents of 100 mA to 2 A

RIDERSERIES

- Relays
- Robust industrial model
- High-performance switching
- Versions with 1, 2, 3 and 4 changeover contacts
- Input voltages from 6 V DC to 230 V AC

PLUGSERIES

- Relays and optos
- Screw and tension spring connections
- Cross-connection for potentials
- Switching power up to 4 k VA

The advantages of Weidmüller products

- Extensive product portfolio of high-quality relays and optocouplers
- Variable connection technology
- Safe isolation according to DIN VDE 0106

Innovative housing concept for IP68 environments

In industrial automation technology, sensors monitor complex processes that enable conclusions to be drawn concerning the 'status' of the process or installation. As a result of this information, actuators then perform the necessary actions. Generally speaking, a process of signal conditioning takes place for the purpose of communication with the controls. This means the signals are processed, protected, amplified or standardised in accordance with IEC 60381.

The JACKPAC® concept integrates basic functionalities required for signal conditioning such as amplification, isolation and conversion of signals; and thanks to the field-wiring suitable housing sealed to IP68 it also takes on the task of protection. This permits, on the one hand, to realize decentral wiring concepts without compromise and, on the other hand, to make optimum use of digital input/output modules in IP6X environments.

JACKPAC® relay

- 1 change over contact
- With and without galvanic isolation
- 24 V/2 A switchable on the output
- Timer with 50 and 100 ms

JACKPAC® analogue

- 2 way passive isolator
- 3 way active isolator
- Standard range for 0/4 to 20 mA or 0 to 10 V input/output

JACKPAC® ovp

- 1 and 3 steps surge protection
- Protect analogue and digital signal, Ethernet networks
- Separate PE connection leaves the housing

Software and tools

Technical support

At Weidmüller, we strive to the best support to our customers. For instance we developed WAVEtool for our analogue signal conditioners. This software service tool enables fast and uncomplicated configuration of the versatile WAVEANALOG PRO products.

Furthermore, you will find standard, up-to-date texts for tender documents at our Internet site www.weidmueller.com. The PLC-Guide simplifies your choice of the correct interface module among the numerous I/O product manufacturers.

In our online catalogue we present you with complete data for our electronic products. You may download data sheets, use the "tell a friend"-function, or choose the correct relay for your application in our product selector. This tool enables you to see all relay families and see a comparison to another Weidmüller relay.

Weidmüller is the leading manufacturer of components for electrical connection technology. The Weidmüller product portfolio ranges from terminal blocks, PCB connectors and terminals, protected components, Industrial Ethernet components and relay sockets to power supply and overvoltage protection modules suitable for all applications. Electrical installation and marking material, basic I/O components and a variety of tools round off the range. As an OEM supplier, the company sets global standards in the field of electrical connection technology.

We cannot guarantee that there are no mistakes in the publications or software provided by us to the customer for the purpose of making orders. We try our best to quickly correct errors in our printed media. For this purpose we list corrections, which have been identified after publishing printed media, on our web site at www.weidmueller.com. For convenience we list these corrections against product catalogue number and/or page number. This Internet-database is part of our catalogue.

All orders are based on our general terms of delivery, which can be reviewed on the websites of our group companies where you place your order. On demand we can also send the general terms of delivery to you.
