

INCEPTOR® MILLI DOWNLIGHTS.

Explore the Inceptor Milli family, an innovative range of fire rated domestic downlights that seamlessly blend style and functionality. Take control of your downlights with the option to switch the wattage and colour temperature to suit the atmosphere of any room. Ensure an easy installation with our pre-fitted Flow™ connectors.

Ovia Lighting distinguishes itself by combining innovation, quality, and customer-centric design in the creation of industry-leading lighting products.

Our dedication to excellence ensures that we not only meet but exceed the expectations of our customers, setting new standards for lighting solutions in the industry.

Inceptor Sustainability Promise

To test our products we complete the TM66 form created by CIBSE.

Testing involves gathering thorough evidence which supports the specifications of our product ranges and we provide reports.

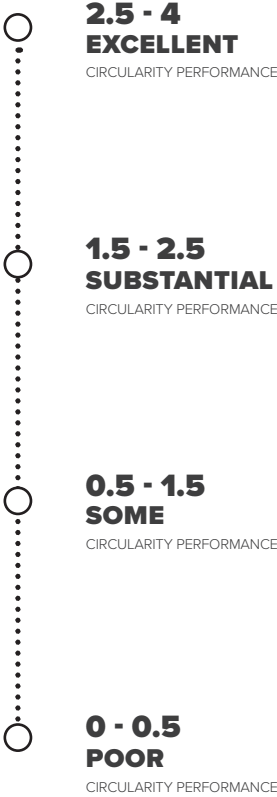

We deconstruct our products to show the disassembly and material used. This also demonstrates the ability to recycle or refurbish the different materials.

The ecosystem of our company is also thoroughly investigated to navigate what we offer to support a circular economy, for example technical support, warranty lengths, photometry data and so on.

Why we use the LIA to verify our TM66 test results...

Gaining the correct score is important to us, it allows us to understand where we stand in the process of achieving more sustainable product ranges. Therefore we use the LIA to verify our results, this ensures we have a consistent and accurate rating without any bias towards the products.

We are proud advocates in using TM66 and have been given the opportunity to be founding partners, demonstrating our commitment to a circular economy for our industry.

We are working towards a circular economy & promise our Inceptor products will get to the standards set by the TM66 report.

Sustainable Inceptor

Sustainability drives all of our decisions and actions. We prioritize sustainability in all aspects of our business operations. Ovia® aims to become market leaders in sustainable lighting.

Look out for Inceptor Promise Icon!

Introducing the Inceptor Milli Adjustable, the latest addition to the Milli family. Designed with the same innovation, fire-rated safety, and installation ease as the standard Inceptor Milli, the adjustable version offers even greater flexibility for tailored lighting.

360° Adjustability & 20° Tilt Angle

Offering full 360° rotation and a 20° tilt, the light output can be positioned exactly where it's needed. It can even be installed tight to ceiling joists without affecting movement, making it easy to adapt to any room layout.

Seamless Colour Match

The Inceptor Milli Adjustable is designed so the inner housing always matches the outer bezel finish. Even when rotated or tilted, the visible section remains consistent with the bezel colour.

Flexible Cut-Out Sizing

The Inceptor Milli Adjustable has been designed with a cut-out range of 68mm to 75mm. This ensures compatibility with a variety of ceiling apertures, ideal for new installations and retrofit projects. The broader range allows easier replacement of existing downlights without additional adjustments.

Quick & Easy Control

Each Inceptor Milli downlight allows both the colour temperature and wattage to be changed while the fitting is partially lowered out of the ceiling. With no need to fully remove the luminaire, on-site adjustments become quicker, easier, and far more convenient.

Endless Features & Benefits

Standard / Fixed Version

A sleek, fire-rated downlight with a 60° beam angle, offering IP65 protection and switchable wattage and colour temperatures.

Baffle Version

With a 25° beam angle, the Baffle version delivers focused, low-glare lighting with a UGR < 19 rating and comes with changeable bezels in multiple finishes.

Adjustable Version

The Adjustable version adds 360° rotation, 20° tilt, and a 68–75mm cut-out range, alongside all the core Inceptor Milli features.

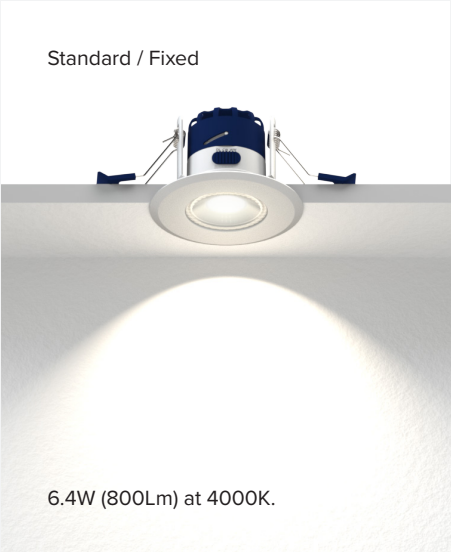

Multiple Finishes

For Standard/Fixed and Adjustable Inceptor Milli downlights, choose from White, Black, Chrome, Satin Chrome and Antique Brass finishes.

For baffle downlights you can purchase individual bezels. Simply twist the existing bezel to remove.

Individual bezels are only available for the Baffle downlights.

Power Switchable

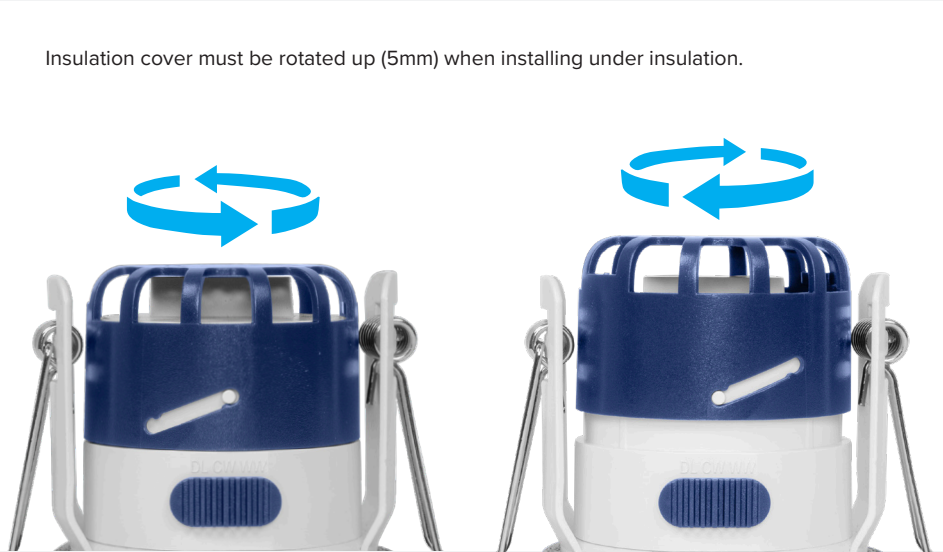

Seamlessly switch between 6.4W and 4W power outputs using a single switch, providing users with unprecedented control over their lighting environment.

This allows for effortless adaptation to varying lighting needs, whether you seek a vibrant, well-lit atmosphere or a more subdued, energy-conscious ambiance, the Inceptor Milli ensures optimal flexibility.

Twist Insulation Cover

The Inceptor Milli's rotatable insulation cover introduces a practical solution for installation challenges, offering an extra 5mm clearance when placed under insulation. By accommodating insulation materials more effectively, the Inceptor Milli ensures optimal performance. Unrestricted airflow around the fixture helps manage heat dissipation, contributing to the longevity and efficiency of the downlight.

CCT Switchable

Customise your downlight further with 3 colour temperature options. Select from either 2700K (Warm White), 4000K (Cool White) and 6500K (Daylight) colour temperatures.

Quick and Easy Installation

Fast-Fit 3 Pole & Loop Connector

All of our Inceptor Milli downlights are supplied with a pre-wired male Flow connector, making installation faster, easier, and far more reliable straight out of the box, saving both time and effort on site.

3 Pole Female Push Fit Connector

Every Inceptor Milli downlight is supplied with a loose 3 Pole Female Push Fit Connector. This allows for simple looping in and out, giving installers a quick, secure, and tool-free connection that helps save valuable time on site.

Large Multi Pack Available (10 Qty)

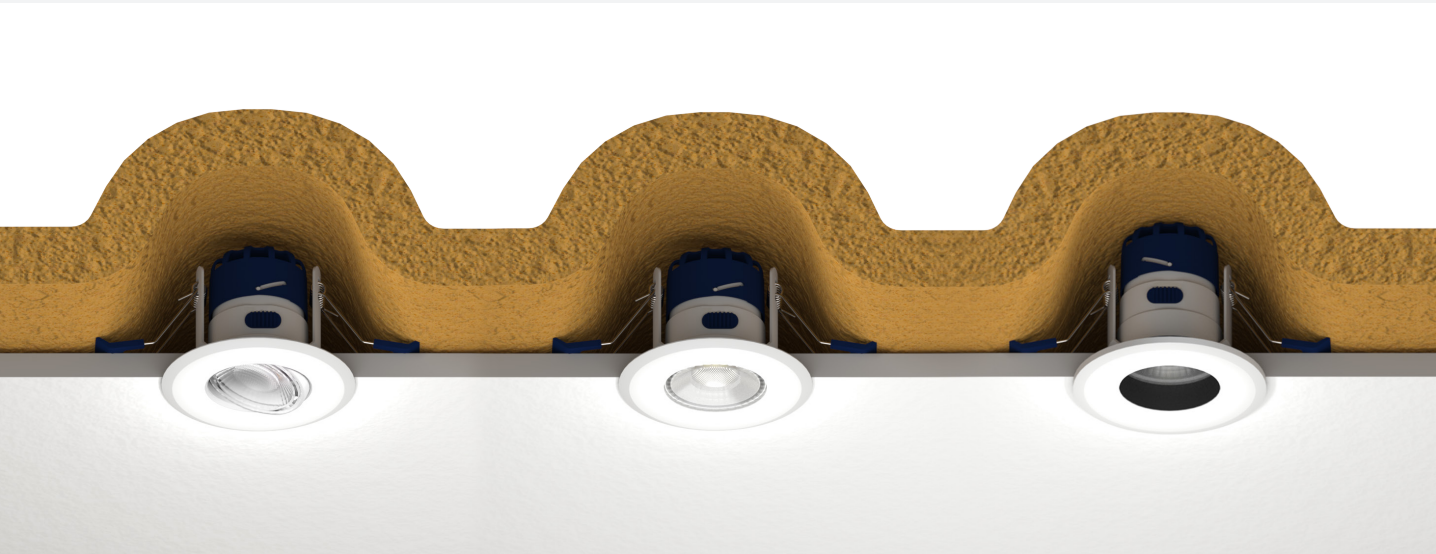

Maximize your lighting solutions with the Inceptor Milli, now available in a convenient 10-pack. We aim to provide a practical and cost-effective solution for all your comprehensive lighting projects.

Sustainability Verified

The Inceptor Milli family is assessed using the CIBSE TM66 framework, with results independently verified by the LIA. This ensures a transparent rating and reflects our commitment to sustainable, circular lighting solutions.

Insulation Coverable & Fire Rated

Featuring a rotatable insulation cover which allows you to install the downlights safely under insulation but also adjust the cover allowing for 5mm extra clearance. Our downlights are Fire Rated to 30, 60 and 90 minutes and also feature an Intumescent Strip, which, when exposed to fire, expands to seal the gap between the luminaire fitting and plasterboard.

Insulation cover must be rotated up (5mm) when installing under insulation.
Fire rated downlights. Compliant in all ceiling types: Solid Timber, I-Joist and Metal-Web.

Broad Cut-Out Range

Our Inceptor Milli Fixed & Baffle downlights have a cut-out range of 64mm to 75mm. This also allows the downlights to be installed in wide range of existing ceiling cut-outs.

Inceptor Milli Adjustable downlights have a cut-out aperture range of 68mm to 75mm.

Convertor Plates

The Inceptor Milli Convertor Plate allows the standard Milli fitting to be retrofitted into ceilings that have cut-outs bigger than Ø75mm, up to a maximum cut-out of Ø120mm.
