

INCEPTOR[®] HI-BLOC

Engineered for performance and versatility, the Hi-Bloc delivers powerful illumination tailored for both expansive high-ceiling areas and narrow aisles, ensuring clarity and safety where it matters most.

Inceptor Sustainability Promise

To test our products we complete the TM66 form created by CIBSE.

Testing involves gathering thorough evidence which supports the specifications of our product ranges and we provide reports.

We deconstruct our products to show the disassembly and material used. This also demonstrates the ability to recycle or refurbish the different materials.

The ecosystem of our company is also thoroughly investigated to navigate what we offer to support a circular economy, for example technical support, warranty lengths, photometry data and so on.

Why we use the LIA to verify our TM66 test results...

Gaining the correct score is important to us, it allows us to understand where we stand in the process of achieving more sustainable product ranges. Therefore we use the LIA to verify our results, this ensures we have a consistent and accurate rating without any bias towards the products.

We are proud advocates in using TM66 and have been given the opportunity to be founding partners, demonstrating our commitment to a circular economy for our industry.

CIRCULARITY PERFORMANCE

We are working towards a circular economy & promise our Inceptor products will get to the standards set by the TM66 report.

Sustainable Inceptor

Sustainability drives all of our decisions and actions. We prioritize sustainability in all aspects of our business operations. Ovia® aims to become market leaders in sustainable lighting.

Look out for Inceptor Promise Icon!

Power Meets Control

Switch between power options and colour temperatures on demand, giving you the flexibility to adapt lighting to every task and environment.

Power Switchable

Seamlessly switch between 100W, 150W and 200W power outputs using a single switch, providing users with unprecedented control over their lighting environment.

CCT Switchable

Customise your highbay further with 3 colour temperature options. Select from either 4000K, 5000K and 6500K colour temperatures.

Elongated Shape

The slim, elongated body is specifically designed to provide uniform illumination along narrow aisles, ensuring consistent light coverage without creating dark spots while minimising wasted light above racking for maximum efficiency.

IP65 Rating

Dust-tight and water-resistant, this fixture delivers reliability even in tough industrial and commercial environments.

Integrated Mounting Support

Installation is made easier and more precise with built-in features such as an integrated spirit level for alignment and dual hooks provided as standard.

UGR <22

With a low UGR design, this fixture reduces glare and eye strain, creating a more comfortable environment that supports focus and long-term visual comfort in demanding settings.

Dimmable

Dimming is standard with 0–10V control, while the PIR sensor allows brightness to be further adjusted, saving energy and enhancing comfort.

Optional Accessories

Optional accessories provide added versatility and control, allowing installations to be tailored to the specific needs of each space. With features designed to improve efficiency, enhance safety, and simplify setup, they ensure the lighting solution remains flexible and adaptable for any environment.

Mounting Bracket

Providing a practical solution for installation directly on walls or ceilings. Its adjustable design allows the light to be angled precisely where it's needed making it ideal for spaces that require directional illumination or alternative mounting options beyond standard suspension.

PIR Sensor

Universal Zhaga socket for quick installation. Zhaga PIR controls lighting when movement is detected, with adjustable sensitivity to cut energy use

3 Hour Emergency Pack

The IP65-rated emergency pack provides up to three hours of maintained light, ensuring safety and compliance during power outages. Compatible with all Highbay fittings.

Remote Control

The programmable remote control allows full customisation of your lighting, with the ability to adjust PIR detection range and sensitivity, daylight thresholds, standby periods, and hold times. This makes it easy to fine-tune performance for maximum efficiency, comfort, and flexibility across different environments.

Memory Function

The remote control's built-in memory allows you to save preferred settings and quickly apply them across multiple fittings for faster, more consistent setup.

The Full Range

From core fittings to add-on accessories, the Inceptor Hi-Bloc family offers a complete solution for high-bay lighting across multiple environments.

SKU	Description
OXHB200	100W-200W INCEPTOR HI-BLOC LED HIGHBAY - IP65 - CCT SWITCHABLE
OXHBB	BRACKET FOR INCEPTOR HI-BLOC HIGHBAY FITTING
OCPIR-01	0-10V DIMMING PIR SENSOR, ZHAGA CONNECTION, 360°, IP65

Online Ordering

The site now incorporates a number of improved features that allow users to access new information directly and easily:

oviaonline.com

Product Finder

Our product finder tool makes it easier than ever for electricians, wholesalers and end users to search and locate products from across all categories, with just a few clicks.

Marketing Hub

Our Marketing Hub gives customers the opportunity to enhance their own marketing facilities with very little effort or cost. A selection of templates is available featuring many of our popular products. These templates can be customised with our stockists' details to provide maximum impact and optimise local sales opportunities.

Errors and Omissions excluded. Specification is subject to change without notice.
