Why use SuperClip™ for EV installs?

- ✓ Fast installation — designed to help reduce fixing time
- ✓ No plugs or screws required
- ✓ UV stable and corrosion resistant
- ✓ High load capacity
- ✓ Removable and reusable
- ✓ Designed and manufactured in the UK
- ✓ Suitable for a range of common installation substrates

Secure your cables. Speed up the install.

EV installations often mean working outdoors, on different substrates and around existing infrastructure.

SuperClip™ provides a fast, secure fixing solution for cable management — helping installers get the job done without the need for plugs, screws or traditional cleats.

SUPERCLIP™ for Solar PV and Battery Systems. **Secure your cables. Keep installations Moving.**

Solar PV and battery storage installations require secure, reliable cable management across a range of environments. SuperClip™ provides a fast and versatile fixing solution for associated cable runs, helping installers achieve neat, secure and professional installations without the need for plugs or screws.

Why use SuperClip™?

- ✓ Fast and simple cable fixing
- ✓ No plugs or screws
- ✓ Strong and secure fixing
- ✓ UV stable and corrosion resistant
- ✓ Removable and reusable
- ✓ Designed & manufactured in the UK

From rooftop solar to battery storage — one smart fixing solution.

SUPERCLIP™ for Heat Pump & AC Installations. *A smarter way to secure your cable runs.*

From heat pumps to air conditioning systems, SuperClip™ provides a fast and secure way to manage associated cable runs. Less time spent fixing, fewer components to worry about, and a cleaner, more professional finish.

Why use SuperClip™?

- ✓ Faster cable fixing
- ✓ No plugs or screws
- ✓ Secure, reliable fixing
- ✓ Suitable for internal and external applications
- ✓ UV stable
- ✓ Corrosion resistant
- ✓ Removable and reusable
- ✓ Made in Britain

Secure your cables. Simplify the install.

Heat pump and air conditioning installations can involve multiple cable runs, challenging environments and different substrates. SuperClip™ provides a fast, secure fixing solution for associated cables — helping installers achieve neat, professional installations.

SUPERCLIP™ for Conduit and SWA installations. **Secure conduit and SWA without the hassle.**

From conduit runs to heavy-duty SWA cable, SuperClip™ provides a fast, secure and versatile fixing solution for a wide range of electrical installations.

Why use SuperClip™ for Conduit?

**"Secure your conduit.
Simplify the install"**

- ✓ Fast and easy to install
- ✓ No plugs or screws
- ✓ Secure, tidy cable runs
- ✓ Removable and reusable
- ✓ UV stable and corrosion resistant

Why use SuperClip™ for SWA?

**"...best clip on the
market..."**

- ✓ Strong and secure fixing
- ✓ Up to 44kg load capacity
- ✓ No plugs or screws
- ✓ UV stable and corrosion resistant
- ✓ Removable and reusable

Why SUPERCLIP™ ?

One clip. So many applications.

SuperClip™ is designed to make cable fixing faster, simpler and more efficient — helping installers spend less time on fixing and more time getting the job done.

What it means for installers

- Reduce time spent fixing cables*
- No plugs or screws*
- Up to 44kg load capacity*
- 90 & 120 minute resistant*
- UV stable and corrosion resistant*
- Can be removed and reused*
- UK designed and manufactured*
- A cleaner, more professional finish.*

**EV • Solar • Battery Systems • Heat Pumps • SWA •
Conduit • AC — one smart fixing solution.**

Ready for the Latest Fire & Safety Requirements Supporting safer electrical installations

The latest changes to **BS 7671 Amendment 4** place increased emphasis on fire safety and the integrity of electrical installations.

SuperClip™ provides a secure cable management solution designed to help installers achieve neat, robust and reliable installations.

Built with safety in mind

SuperClip™ has been independently fire tested and is designed to provide secure cable support in applications where maintaining cable support during fire conditions is important.

Fire Tested

- ✓ Up to 120 Minute - BS EN 50200 — PH120
- ✓ Up to 90 Minute - DIN 4102-12

Load Capacity

- ✓ Up to 44KG
